xyl	xylophone
YMCA	Young Men's Christian Association
Yorks.	Yorkshire
YT	Yukon Territory
YWCA	Young Women's Christian Association
YYS	(Zhongguo yishu yanjiuyuan) Yinyue yanjiusuo and variants (Music Research Institute (of the Chinese Academy of Arts))
Z	Zimmermann catalogue [Purcell]
zar(s)	zarzuela(s)
zargc	*zarzuela género chico*

Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

Xan.	Xanadu

Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

Abbreviations in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

Alphabetization of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

Bibliographies are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

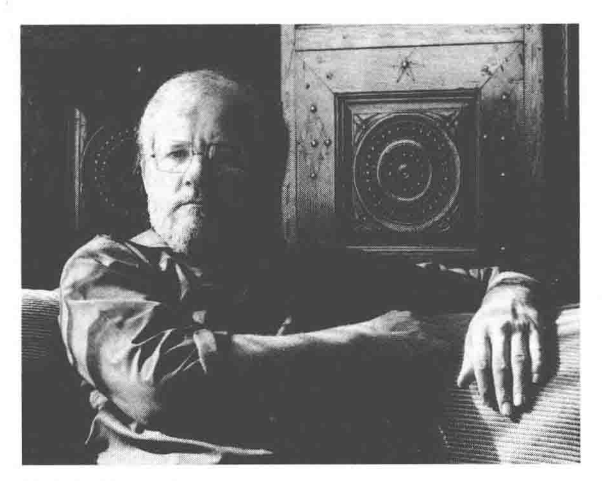
Cross-references are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

Signatures where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

Work-lists are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

S. Pugliatti: 'Le "Musicae traditiones" di Francesco Maurolico', *Atti della Accademia Peloritana dei Pericolanti: Classe di lettere, filosofia e belle arti*, xlviii (1951–67), 313–98
R. Moscheo: *Francesco Maurolico tra rinascimento e scienza galileana: materiali e ricerche* (Messina, 1988)
R. Moscheo: *Mecenatismo e scienza in Sicilia nel '500: Ventimiglia di Geraci ed il matematico Francesco Maurolico* (Messina, 1990)

MARIO RUFFINI



Mauro Matti, Fra. *See* MATTI, MAURO.

Maurus Panhormita. *See* CIAULA, MAURO.

Maw, (John) Nicholas (*b* Grantham, 5 Nov 1935). English composer. He studied composition with Berkeley and theory with Steinitz at the RAM (1955–8), and then in Paris (1958–9) with Boulanger (composition) and Deutsch (analysis). He was Fellow Commoner in creative arts at Trinity College, Cambridge (1966–70); tutor in composition at the University of Exeter (1972–4); visiting professor of composition at Yale School of Music (1984–5, 1989); visiting professor of composition at Boston University School of the Arts (1986); and, from 1990, professor of music at Milton Avery Graduate School of the Arts, Bard College, New York.

Maw's student compositions demonstrate his stylistic struggles while finding his voice. The Flute Sonatina (1957) and *Six Chinese Songs* (1959), for example, embrace post-Webern serialism, though, significantly, the segments of the row in the latter suggest keys. The *Nocturne* (1957–8) is quasi-tonal, yet its motivic development uses serial procedures. A compositional block followed, broken by the *Essay* for organ (1961, rev. 1963), in which a personal style began to emerge. Its primary force is melody combined with a harmony that exploits serial and tonal tensions in a distinctive manner. Maw later commented that his roots belong to the period 1860 to 1914, and his music may be heard as an attempt to reconnect with the Romantic tradition that was broken with the onset of Modernism.

He now felt confident to follow the instinct of his inner ear in the major work that followed, *Scenes and Arias* (1962, rev. 1966), a post-Expressionist canvas in which Berg, Britten and Strauss jostle in a heady creative mix. Its broad span is expertly organized with the chromatically saturated harmony entirely derived from two germinal chords whose properties lead to the harmonic ambivalence at the heart of the work. Maw's natural melodic gifts give

Nicholas Maw, 1981

rise to arching lines for the three female soloists featuring favourite intervals of the 7th and the 9th. The work's vocal and orchestral writing is lush and dramatic, and its predominantly contrapuntal texture culminates in a compositional tour-de-force: a passacaglia which is itself a three-part canon on a ten-note melody journeying through its 11 possible transpositions.

Maw described *Scenes and Arias* as a study for opera, and two followed in its wake. *One Man Show* (1964, rev. 1966, 1970), a two-act comedy, is mainly through-composed in accompanied arioso, out of which arias, duets and ensembles emerge allowing Maw's lyrical gifts sway. The musical material is closely developed around a number of leitmotifs, and the comedy wittily evoked in musical terms. The three-act romantic comedy *The Rising of the Moon* (1967–70) marked a significant advance in its more finely rounded central characters and the varieties of music to suit the dramatic moment. Again the action is taken forward in a fluid arioso influenced by Strauss and Britten, but more opportunities are made for set pieces to be interpolated. The British militia and Irish patriots are effectively contrasted, the former full of bluff and bluster, the latter in scherzo-like music synonymous with their furtive stratagems. As in *Scenes and Arias*, the opera's harmony is bound together by a particular complex chord. Alongside the operas Maw composed two chamber orchestra works: Sinfonia (1966) and Sonata for two horns and strings (1967). Their neo-classical titles mask formal structures that show his characteristic allegiance to Romantic experimentation: the Sonata is cast in one movement, within which material is stated, developed and restated, while the first section of the Sinfonia combines first movement with scherzo. These works form a precursor to the orchestral music of the 1970s; after that the orchestra became Maw's principal vehicle of expression, beginning with a piece of intense lyricism, *Life Studies* (1973–6). Its eight 'studies' exemplify one of the the composer's preferred formal models wherein a composition comprises a series of separate character pieces, which may be likened to the albums of studies in the Romantic tradition. Movements may exist by themselves, and in a complete performance the player is given choice over order; such controlled freedom appeared first in *Chamber Music* (1962) and also occurs in the six *Personae* for piano (1973, 1985–6). *Life Studies* is a fine example of Maw's mature language in which the melodic ideas, through their linear and harmonic components, are equally the driving force on the surface and the underlying means of structural organization. Harmonically fixed pitch formations within complex chords are used to signal the key of a phrase or section, or to pinpoint, both vertically and horizontally, formally significant groups of notes or intervals.

If *Scenes and Arias* had marked the first watershed in Maw's career, then *Odyssey* (1972–87) was the second. The choice of title is significant, synonymous both with Maw's own journey as a creative artist, and the vast scale of the work itself. Cast in a single massive Brucknerian span lasting over 90 minutes, the work again demonstrates Maw's predilection for extended melodies, and his method of self-generating melodic ideas, which are then structured into long-limbed paragraphs, at its most sophisticated. Its five sections constitute a gigantic upbeat, an exposition and development of a 44-bar *Ur* melody, a contrasting intermezzo, an adagio, a further development of earlier

M

[continued]

Monnet [Monet], **Jean** (*b* Condrieu, 7 Sept 1703; *d* Paris, 1785). French impresario and writer. Son of a baker, he was orphaned at an early age but benefited from the patronage of the Duchess of Berry until her death in 1719. According to his memoirs (*Supplément au roman comique*, 1772) he led a colourful but dissolute life for some years, was imprisoned briefly in 1741 for publishing scurrilous literature (*Les annales amusantes*), and thereafter embarked on a series of theatrical enterprises. In 1743 he paid 12,000 livres for the *privilège* of the Opéra-Comique and assembled a talented troupe which included the comedian Pierre-Louis Dubos, *dit* Préville, Charles-Simon Favart as *régisseur*, François Boucher as stage designer, and Dupré as *maître de ballet*, with his pupil, Noverre. (Rameau may also have directed the orchestra: see Sadler.) The troupe enjoyed such success that, in 1745, it was forced by the Opéra (from whom the *privilège* had been acquired) to close.

Later that year Monnet left Paris for Lyons, where he served briefly as director of the Opéra. Productions mounted in Dijon (1746) and London (1749) proved unsuccessful. In December 1751, however, he again secured the *privilège* of the Opéra-Comique and remained its director until 1758. This was an outstanding period in the development of the *opéra comique* and must be attributed in part to Monnet's extraordinary talent for surrounding himself with influential artists. Favart and Noverre continued to work for him, as did Boucher, who designed a new, impressive theatre for the Foire St Laurent in 1752; his friend Vadé wrote the libretto to the historically important work, *Les troqueurs*, set to music by Dauvergne and staged at the fair in July 1753; Michel-Jean Sedaine was encouraged to write his first opera libretto, *Le diable à quatre*, for the fair of 1756; and Egidio Duni composed *Le peintre amoureux de son modèle*, another highly influential work, for the fair of 1757.

Monnet's influence extended even to England, through his 30-year friendship and correspondence with David Garrick (whom he had first met on a visit to London in 1748). He offered much practical advice to Garrick on stage decoration and design, engaged French personnel for his friend's London troupe, and entertained Garrick and his wife on their visits to France. About 1766 he published his *Projet pour l'établissement d'un opéra italien dans la ville de Londres*.

Monnet has been credited with a number of librettos but only *L'inconséquente, ou Le fat dupé* (1787) can be attributed to him with certainty. His edition of the *Anthologie françoise* (1765) is of historical value to the study of French folklore. His life formed the subject of a vaudeville by Pierre-Yon Barré, Jean-Baptiste Radet and François-Georges Fougues, *dit* Desfontaines (1799).

ELISABETH COOK

Monnet, Marc (*b* Paris, 11 March 1957). French composer. Monnet studied at the Paris Conservatoire, then with Kagel at the Cologne Musikhochschule. He attended courses by Ligeti, Stockhausen and Xenakis at Darmstadt, winning the Kranichstein prize in 1974, and held a residency at the Villa Medici in Rome (1976–8). Among his collaborators have been Jean-Louis Barrault, Stanislas Nordey, Dominique Bagouet and Karine Sporta.

Many of Monnet's works are composed for unusual chamber-size ensembles. His music has a solemn ruggedness, sometimes described as expressionist, which conveys a predilection for gloomy and austere regions, where the uncanny sometimes rubs shoulders with reminiscences of Bartók's nocturnal pieces (*Les ténèbres de Marc Monnet*, 1984). Violent, if not frenetic, disintegration of form, and the rejection of any notion of development, leads to a sense of arbitrariness produced by abrupt stops and silences (*Fragments*, realized at IRCAM, 1990–93). Since 1986, the year in which he founded the theatre company Caput mortuum, the interpreters of his music are as likely to be 'vocalisateurs-acteurs-gesticulateurs' as musicians.

LAURENT FENEYROU

Monnikendam, Marius (*b* Haarlem, 28 May 1896; *d* Heerlen, 22 May 1997). Dutch composer, organist, critic and teacher. He studied organ with Verheyen in Amsterdam and Louis Robert in Haarlem. He continued his studies with de Pauw (piano and organ) and Dresden (composition) at the Amsterdam Conservatory. He received a state grant for study in Paris with d'Indy. He then taught composition and analysis at the Rotterdam Conservatory and the Amsterdam Conservatory (1927–32). Prolifically active as a critic, he was appointed music editor (in 1933) for the *De tijd-Maasbode* group and was a regular contributor to the journal *Mens en melodie*.

Characteristic of Monnikendam's working method is his constancy towards a basic idea. This could be a melodic principle such as the Gregorian chant melody in the *Sinfonia sacra* (1947), a folksong, as in the Symphonic Variations on the Dutch folksong *Merck toch hoe sterck* (1954), or an ostinato pattern such as the rhythmic cell in *Heart-Rhythm* (1975). A piece which is typical of his rhythmic and dynamic style is the symphonic movement *Arbeid* (1931), which was dedicated to the conductor of the Concertgebouw Orchestra Willem Mengelberg. His numerous church works include the *Te Deum* (1946), *Klaagzangen van Jeremias* (1956) and *Via sacra* (1969). He composed oratorios, secular choral pieces and concertos; his many organ works include concertos, the Toccata no.2 (1970) and *Postludium super FeikE (A) Asma* (1974). He wrote books on Stravinsky (Haarlem, 1951), Franck (Haarlem, 1966) and composers of the Netherlands (Amsterdam, 1968).

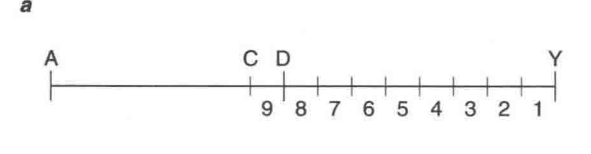
ROGIER STARREVELD/KATJA BROOIJMANS

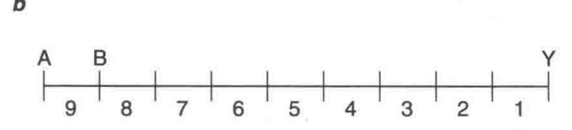
Monochord. An ancient single-string instrument first mentioned in Greece in the 5th century BCE, and said to have been an invention of Pythagoras. The monochord remained a viable musical device, used mainly for teaching, tuning and experimentation, until the advent of more accurate instruments in the late 19th century.

In its earliest form the monochord's single string was stretched across two fixed bridges which were erected on a plank or table. A movable bridge was then placed underneath the string, dividing it into two sections. The marks indicating the position of the fixed bridge were inscribed on the table beneath the string. The resonating box, seen in drawings after the 12th century, was a late medieval addition which increased the portability in addition to enhancing the tone of the monochord. After 1500 one of the end bridges was replaced with a nut, the attendant lowering of the string enabling the user to press it directly on the belly of the instrument. Although simple to use, this modified monochord was considerably less accurate. The name monochord was usually retained for multi-string instruments when the strings were tuned in unison or when the instrument was used for the same purposes as a monochord. The medieval instrument varied from about 90 to 122 cm in length. During the Middle Ages the selection of a monochord's basic pitch was influenced by its size and by the voice range of the user rather than by any existing standards.

1. Acoustical systems. The divisions of the monochord are usually presented in terms of proportions, string lengths or cents. A fourth method, that of expressing string lengths by means of logarithms, was often used in the 18th century, but this system, like the cents system



derived from it, is not proportional and cannot be used on the instrument without further calculation. The first two can be directly applied and are the only kinds of division to have attained any practical significance before the 20th century; this kind of division is designated a manual division.



Aristotle and Euclid followed Pythagoras's lead when discussing intervals; Aristoxenus, however, used a six-interval scale and a non-proportional arithmetic, or fractional, division of the string. Pythagorean techniques of dividing the monochord were introduced to the Middle Ages by the late antique writers Theon of Smyrna, Aristides Quintilianus, Nicomachus of Gerasa, Cleonides, Gaudentius, Ptolemy, Porphyry, Bacchius and the author of the treatise known as Bellermann's Anonymous.

The Pythagorean concept of division by proportions is based on the relationship of the harmonic and arithmetic means as they are represented by the numbers 6, 8, 9 and 12. The ratio 12:6 produces the octave; 9:6 and 12:8, the 5th; 8:6 and 12:9, the 4th; and 9:8, the major 2nd. Reduced to their lowest terms these ratios are dupla (2:1), sesquialtera (3:2), sesquitertia (4:3) and sesquioctava (9:8). They can be applied to a string in two ways. For example, in fig.1*a*, one whole tone (D down to C) can be produced by dividing half the string length (AY) into eight parts (DY) and then adding an equal ninth portion (sesquioctava) to form the second pitch (CY). Conversely (fig. 1*b*) a subsesquioctava proportion (8:9) can be used if the string length AY is divided into nine parts and the second is sounded with only eight of them (BY).

In fig.1*a* the monochord is divided in a descending manner, from the higher pitches to the lower. The second division (1*b*), moving from the lower to the higher pitches, is an ascending division. It is of course possible to use both techniques alternately in one division. The more complex ratio, like that of the Pythagorean semitone (256:243), can be determined by calculation with simple intervals, for example, the sum of two whole tones (9/8 x 9/8 = 81/64) is subtracted from the fourth (4/3 – 81/64 = 256/243) – an extremely simple manoeuvre when done on the instrument.

The completion of either of the above divisions in the manner of the Middle Ages would give a two-octave scale in the Pythagorean tuning whose lowest note would be given by the entire length of the string. In general it may be said that the Greek writers up to 500 CE used the descending division. Medieval scholars began with the descending division and subsequently adopted the ascending division. The technique of the latter, originally attempted by Boethius, was first successfully described by Odo of St Maur (Cluny) in about 1000. Writers of the

1. Diagrams showing divisions of the monochord

2. Monochord from 'De musica' by Boethius, Canterbury, 1150 (GB-Cu Ii.3.12, f.61v) (for a further illustration of the monochord see GUIDO OF AREZZO, *fig.1)*

Renaissance and the post-Renaissance eras preferred the ascending division.

The selection of the technique to be used in working out a specific division was often dependent on its intended usage. Although all medieval divisions achieve the same end and utilize the same four proportions, the method of division selected depended on whether it was for a speculative (descending division) or a practical (ascending) treatise. The popularity of the ascending division parallels the rise of the practical treatise in the late Middle Ages.

2. SYSTEM OF STRING LENGTHS. The cumbersome nature of the proportional system together with the difficulty of using a compass to divide the string caused some investigators to adopt the system of string lengths, an accurate and simple method of proportional pitch representation. The only problem with the string lengths lies in the number of units encountered. For example Johann Neidhardt in 1706 specified a string length of 1781·82 units for the second step of his scale which he based on a division into 2000 units. Other advocates, like Marpurg, suggested the use of only three digits to represent the total length of the string; however, this was a compromise rarely admitted by the users of the technique.

3. DIVISION OF THE CHROMATIC SCALE. Semitones can be determined on the monochord by three methods: by extending the superparticular divisions, arithmetically dividing the tone, or by mean-proportional division. In superparticular divisions two complete and different (different even for notes which are enharmonically equivalent) sets of chromatic notes are available. These

may be obtained by the successive application of the sesquialtera proportion (beginning with the note F) or of the subsesquialtera proportion (beginning with B). The former will produce a series of perfect 5ths in descending order (called 'flat semitones'), and the latter a set of ascending perfect 5ths ('sharp semitones'). Arithmetical semitones are determined by an equal division of the difference between the string lengths of two pitches a step apart. This method was frequently used in post-medieval times even though the semitones are of unequal size. The mean proportional string lengths necessary for single equal semitones are usually determined by means of the Euclidean construction (a perpendicular erected at the juncture of two string lengths which are used as the diameter of a semicircle will equal the proportional length). To determine two or more mean-proportionals, a mechanical device like the mesolabium (a series of overlapping square frames) can be used to substitute for the mathematical function of the cube root; multiple mean-proportionals can also be formed by means of the sort of geometrical figures used by Lemme Rossi in the 17th century.

4. USES. In addition to its value as an experimental device, the monochord served throughout the Middle Ages as a teaching instrument. Monochord-based diagrams and sets of directions for determining the consonances abound in both speculative and practical treatises of this era. Until the adoption of sight-singing methods based upon the hexachord system, the monochord was used to produce pitches for rote singing; from then until the 13th century it was used mainly to check correct reproduction of intervals. The decline of its pedagogical use after this time is probably due to the introduction of keyboard instruments. The use of the monochord by teachers in the Renaissance was restricted to those few who rigidly maintained the Pythagorean scale as the basis of their musical instruction.

Because so much of the early use of the monochord was didactic, its users attempted to make the division as efficient and accurate as possible. The efficiency of a monochord division depends on the relation between the number of separate measurements and the number of notes produced. The results of these efforts are particularly noticeable after 1450 because after this date each new division often produced a new variation of a given tuning. Often the musician wished to change the tuning but not infrequently he was only seeking a simpler method of division. It would seem that the appearance of an altered tuning bothered the Renaissance musician little, for because of the monochord's inaccuracy, a variation of a few cents (in some cases as much as 22 cents) was a small sacrifice to make for a more efficient division. A case in point is the division of Ramos de Pareia whose monochord tuning varied widely from the accepted Pythagorean standard. Ramos, however, was apparently not bothered by the pitch deviation as long as he was able to simplify the division. To this end he stated: 'So therefore we have made all of our division very easy, because the fractions are common and not difficult'. In many cases this desire is not stated expressly, as it was by Ramos, but it may be suspected that it served as an underlying cause of many tuning variations in the Renaissance and later eras.

The other areas in which the influence of the monochord is evident are in its instrumental applications and its use as a symbolic device. In the former instance the use of the monochord in ensembles is cited in both Greek and medieval writings. In later times, however, the descendants of the monochord, the clavichord (sometimes called *monochordia* by 15th- and 16th-century writers), hurdy-gurdy and trumpet marine, were more frequently used. Throughout the late Middle Ages and the Renaissance the monochord is often mentioned as a basic tool in the design or measurement of bells and organ pipes. Finally, until about 1700 the monochord was commonly used to show the unity existing between man and the universe. It is represented as a divided string whose pitches may represent the solar system (*musica mundana*), the muses, the zodiac, or even bodily functions; often this is being tuned by the hand of God.

For Jacques de Liège's division of the monochord, *see* THEORY, THEORISTS, fig.4.

CECIL ADKINS

Monocordo (It.; Fr. *monocorde*). An instruction to a string player to execute a passage or piece on one string. The effect was first used by Paganini in his *Sonata Napoleone* (1807).

Monod, Jacques-Louis (*b* Asnières-sur-Seine, 25 Feb 1927). French conductor, composer and pianist. He entered the Paris Conservatoire below the official age of nine, taking courses in various disciplines. In 1944 he attended Messiaen's seminars, then went on to study theory, composition and analysis with René Leibowitz (1944–50). He went to the USA with Leibowitz in 1951, and studied at the Juilliard School of Music (composition with Wagenaar) and Columbia University (conducting with Rudolf Thomas). At Juilliard he was also a teaching assistant to Richard Franko Goldman, in whose class he prepared and directed the first all-Webern concert ever given, on 8 May 1951. Later he studied with Boris Blacher and Josef Rufer in Berlin. Monod made his piano début in a concert conducted by Leibowitz in Paris in 1949 to celebrate Schoenberg's 75th birthday. He was subsequently active as a pianist, in many song recitals with the American soprano Bethany Beardslee (then his wife), and as a conductor. He played or conducted the premières of Schoenberg's Songs op.48, Webern's Songs opp.17 and 25, the two versions of Berg's *Schliesse mir die Augen beide*, and Babbitt's *Widow's Lament* and *Du* (written for him and Beardslee). Between 1960 and 1966 he gave the first European performances of several American works, and he also made the first recordings of much 20th-century music.

music for television (notably the series 'Naked City'), advertisements, films (such as *Nightmare*, 1956, in which he also acted), and recordings (including several albums for Frank Sinatra and Ella Fitzgerald). Manuscript scores of his works are in the holdings of the BMI Archives in New York.

May is probably best known for his arrangements for Charlie Barnet, which were characterized by wailing, 'scooping' saxophones voiced in thirds. His version of Ray Noble's *Cherokee* became a standard of the swing era and also Barnet's signature tune. While with Miller, however, he was more prominent as a trumpeter; good examples of his playing may be heard on *I dreamt I dwelt in Harlem* (1941, Bb) and *American Patrol* (1942, Vic).

WAYNE J. SCHNEIDER

May, Derrick (*b* Detroit, 1963). American DJ. He has been influential in establishing techno and house music; he also records as Rythim Is Rythim and Mayday. He gained international prominence with X-Ray's *Let's Go* (1986) and Rythim Is Rythim's *Nude Photo* (1987), both released on his own Transmat label. Along with work by school friends Juan Atkins and Inner City's Kevin Saunderson, these became early defining singles of the Detroit techno sound, whose roots included soul, funk and 'emotion'. At this time, May and Saunderson earned an influential spot on local radio (WJLB) and the Transmat label released recordings by Carl Craig, Joey Beltram and Bang the Party. Rythim Is Rythim's *Strings Of Life* (1987) became May's most well know track, an influential and uplifting anthem written in memory of Martin Luther King. It was followed by *The Beginning* (1990), after which he took a break of several years to reassess techno and the scene he had helped create. *Relics* (1993) pieced together unreleased early material. Staunchly independent from major label excesses and an inspiration to such figures as Carl Craig and Todd Terry, May has remained an authority on the roots of techno but has apparently been unnerved by the directions it has taken since.

IAN PEEL

May, Edward Collett (*b* Greenwich, 29 Oct 1806; *d* London, 2 Jan 1887). English music teacher. He was organist of the Royal Naval Hospital, Greenwich (1837–69); visiting teacher of sight-singing at the Central School, Westminster, and at six London teacher-training colleges between 1841 and 1883; and professor of vocal music at Queen's College, London from 1879 to 1883. May was chiefly celebrated in his day as John Hullah's principal assistant in the government-sanctioned Singing Schools established in 1841. Upon Hullah's appointment as government inspector of music in 1872, May took over his main appointments.

BERNARR RAINBOW

May, Florence (*b* London, 6 Feb 1845; *d* London, 29 June 1923). English pianist and biographer. First trained by her father, Edward Collett May, in 1871 she went to Lichtental, near Baden-Baden, to study with Clara Schumann, who introduced her to Brahms. Becoming his pupil, she was thereafter noted for her authoritative performances of his music. Her *Life of Johannes Brahms* (2 vols., London, 1905, 2/1948) is a well-researched and fully documented study, agreeably written, that remains useful.

BERNARR RAINBOW

May, Frederick (*b* Dublin, 9 June 1911; *d* Dublin, 8 Sept 1985). Irish composer. One of the most imaginative of the first generation of composers to emerge in the newly independent Ireland. He studied at the Royal Irish Academy of Music and Trinity College, Dublin, taking the undergraduate degree in 1931. He pursued further studies at the RCM with Gordon Jacob and Vaughan Williams, among others. *Scherzo for Orchestra*, May's first major work, was given its première performance at the college and earned him a travelling scholarship to study with Wellesz in Vienna. The String Quartet in C minor, an impressive, introspective essay, followed after three years. The quartet, his only composition in this genre, ranks as one of the most individual statements from an Irish composer in the first half of the 20th century. Together these early compositions established May as the least insular and most original Irish composer of his time. Two subsequent orchestral compositions, *Symphonic Ballad* (1937) and the impressionistic *Spring Nocturne* (1938), employ modernist techniques. *Songs from Prison* (1941), based on a text by Ernst Toller, speaks eloquently of the composer's political convictions and his regard for human dignity.

May embraced the European aesthetic, strongly resisting the nationalistic approach advocated by some of his Irish contemporaries. He defended his compositional breadth and expounded on other practical musical matters in a series of cogent articles appearing, most notably, in the influential periodical *The Bell*. These writings betray May's increasing frustration with the course of music in Ireland. Dissatisfaction combined with ill health led him to compose little other than arrangements in the last three decades of his life. Although he served as music director at the Abbey Theatre for about 15 years and held other occasional posts, he was troubled by persistent financial difficulties.

WORKS
(*selective list*)

Scherzo, orch, 1933; Str Qt, c, 1936; Sym. Ballad, orch, 1937; Spring Nocturne, orch, 1938; Songs from Prison (E. Toller, E. Stadlen, after N. Heseltine), Bar, orch, 1941; Lyric Movt, str orch, 1943; Sunlight and Shadow, orch, 1955; songs; choral works

JOSEPH J. RYAN

Mayall, John (*b* Macclesfield, 29 Nov 1933). English guitarist, keyboard and harmonica player, singer and composer. He formed his own bands in Manchester in the late 1950s and early 60s and, influenced by ALEXIS KORNER, formed Blues Syndicate and moved to London. In 1963 he formed the Bluesbreakers with John McVie and others. The personnel of this band was fluid, and many aspiring blues musicians served their apprenticeship in it. Certain important line-ups were briefly established, the first including McVie (bass), Hughie Flint (drums) and ERIC CLAPTON (guitar; formerly of the Yardbirds). They recorded the important and commercially successful *Bluesbreakers – John Mayall with Eric Clapton* (Decca, 1966), a mixture of original material by Mayall and covers of blues standards, and which is the first blues/rock album to be so completely dominated by the guitar.

Clapton left the group shortly afterwards and Peter Green replaced him; Aynsley Dunbar replaced Hughie Flint. The new line-up recorded the album *A Hard Road* (Decca, 1966; released 1967), on which Green demonstrated that he was a worthy successor to Clapton on tracks such as 'The Supernatural'. Mick Taylor (later of the Rolling Stones) joined the group, recording *Crusade* (Decca, 1967), *Bare Wires* (Decca, 1968) and *Blues from Laurel Canyon* (Decca, 1968). His extended guitar solo on 'Fly tomorrow', from the last of these demonstrated the style he would later develop with the Rolling Stones. Mick Fleetwood and Jack Bruce (later of Cream) also played with Mayall for short periods of time, but Fleetwood, Green and McVie left to form Fleetwood Mac (1967).

In 1969 Mayall changed to more acoustically-based music with a version of the Bluesbreakers that was indebted to jazz. Without drums, the ensemble centered around the fingerstyle acoustic guitar playing of Jon Mark, the virtuosic tenor saxophone and flute playing of Johnnny Almond and Mayall's keyboards, as on the live album *The Turning Point* (Pol., 1969; released 1970), which also included the harmonica tour de force 'Room to Move'. Mayall changed direction to explore a more intense fusion of styles on the album *Jazz-Blues Fusion* (Pol., 1971), but eventually returned to his earlier electric blues style. Throughout the 1960s and early 70s his albums included increasingly more of his original pieces, many modelled on traditional blues, and fewer covers.

SUSAN FAST

Maya music. The term 'Maya' applies in a broad sense to a large group (about two million in the 1960s) of Amerindians speaking Maya languages; in this context it refers principally to the music of the pre-Columbian civilization.

1. To 1600. 2. Modern developments.

1. To 1600. The pre-Columbian Mayas inhabited the Yucatán peninsula of Mexico, as well as the Guatemalan highlands, present-day Belize and the eastern parts of the Mexican states of Chiapas and Tabasco. Maya culture reached its peak in such ceremonial centres as Copán, Tikal and Uxmal as early as 300–900 CE, during which centuries the Mayas developed systems for astronomy, mathematics and writing matched by no other pre-Columbian peoples. By 1517–18, however, when Spanish explorers first began skirting the coasts of the lowland Yucatán peninsula, they had long since fallen victim to conquering invaders from central Mexico.

Jaina island has yielded decorated clay flutes that reveal a flourishing music culture from about 500 CE: vertical flutes with six unequally spaced finger-holes (fig.1*a*); flutes producing an oboe-like sound by means of a goitre chamber deflecting the air near the animal-effigy neck (fig.1*b* and *c*); and multiple-tube flutes capable of sounding three-note chords. A clay trumpet in two joined sections with the proximal of almost cylindrical bore, the distal of conical bore, was found in Tabasco. (For descriptions of these instruments see Martí, p.123ff.)

Important archaeological evidence of pre-Columbian Maya aerophones has been found in: Jaina; Jonuta, Tabasco; Tuxtepec, Oaxaca; Campeche; San Andrés; Tuxtla, Veracruz; Cozamaloapa, Veracruz and Catemaco, Veracruz, including whistles made of clay from burials of the same period in Jaina. These whistles have mouthpieces in quadrangular, rectangular, ellipsoidal and conical shapes. Several whistles are in the form of human faces and also in the shape of animal figures representing Mayan deities.

Mayan wooden trumpets in two joined sections exceeding a man's arm in length were favoured about 775 CE when the walls of the Bonampak temple in dense jungles of Chiapas were painted (fig.2). Twin trumpeters standing side by side in a 12-man orchestra appear on one Bonampak mural; elsewhere trumpeters mix singly with the fighters. The lips of the players tightly pursed over the black-ring mouthpiece of each trumpet held aloft suggest the blowing of numerous higher partials. Unlike six-hole goitre and multiple flutes that died out long before 1500, 'long thin trumpets of hollow wood with long twisted gourds at the ends' were still a principal Mayan instrument when Diego de Landa wrote his *Relación* in 1566 and when Bartolomé Resinos Cabrera described the *loj-tum* dance in 1624 (Chinchilla Águilar, p.19):

> The [*loj-tum*] dance enacts the sacrifice of a prisoner taken in battle. Tied to a stake, he is attacked by four dancers disguised as a jaguar, a puma, an eagle, and another animal – these four representing his spirits. They try to kill him to a terrible din caused by yells and the calls of long twisted trumpets that look like sackbuts and whose frighteningly dismal sounds are enough to scare the wits out of anyone.

Not only the Bonampak murals but also two of the three surviving pre-Columbian Mayan manuscripts in European libraries testify to the popularity of the *kayum*, an upright single-headed cylindrical or kettle-shaped drum, played barehanded. The top and bottom panels in side 63 [34] of the Dresden Manuscript (*c*1200) show deities playing drums whose clay frames resemble two arms of a candelabrum. The top of the arm nearer each seated deity is covered with tied hide, the top of the other arm is open. The base joining the two arms is filled with water, enabling the player to adjust the pitch. The top panel shows in addition a deity shaking a large perforated rattle and another playing an end-blown flute. Glyphs for musical sound emanate from both the drum and flute. The drummers in sides 21–2 of the Tro-Cortesianus Manuscript in Madrid sit before kettledrums on tripods (fig.3*a*); the central panel of side 87 shows two seated players of flaring-bell trumpets, evidently made of wood (fig.3*b*).

Except for pellet-bell rattles (Sp. *cascabeles*; Maya *tzitzmoc*) metal instruments had no place in Maya organology. The hundred golden pellet-bell rattles found in 1926 at the Sacred Well at Chichén-Itzá, an archaeological site occupied from about 889 CE, were brought from afar. In Mayan manuscripts pellet-bell rattles are associated with Ah-Puch, the death god. Both the Dresden and Madrid manuscripts show gods decked with jingles, the Madrid at side 34 showing 24 jingles shooting out like sting rays, the seated Ah-Puch at 12b3 in Dresden surrounded by three different types of jingle.

The conquest of the Maya area, first by eagle and jaguar warriors from Tula, the Toltec capital, about 1000,

piano K485, which is in fact a sonata-form movement deriving nearly all its themes from the main subject; the resulting frequent occurrence of this idea, together with its tuneful character, doubtless accounts for Mozart's choice of title.

With the more extended structures of the period of Beethoven and Schubert, monothematic sonata-form movements are comparatively rare (though the influence of Haydn in this respect is evident in Clementi's work, e.g. Waltz op.39 no.2). 19th- and 20th-century composers seeking to achieve thematic unity in extended works have often resorted to THEMATIC TRANSFORMATION similar to the kind used in the 17th-century variation canzona. Music adhering rigorously to the principles of 12-note composition is monothematic if theme and note row can be equated, but in many instances rhythm and other factors create thematic contrasts which are more apparent to the ear than the basis provided by the note row.

MICHAEL TILMOUTH

Monotonality. The theory that any tonal piece or movement has only one key – that in which it begins and ends – and hence that MODULATION (i) in the sense of a true change of tonic is illusory.

Monotone (from Gk. *monos*: 'single', and *tonos*: 'note'). A single unvaried tone, or a succession of sounds at the same pitch. Prayers, psalms, lessons and other portions of the Divine Office, when declaimed on a single note, are said to be monotoned or recited in monotone. The device is often used as a special effect in opera (for example the Notary's utterances in the Act 2 finale of Mozart's *Così fan tutte* or the taking of the oath in the opening scene of Britten's *Peter Grimes*).

Monpou, (François Louis) Hippolyte (*b* Paris, 12 Jan 1804; *d* Orléans, 10 Aug 1841). French composer. At the age of five he became a choirboy at St Germain-l'Auxerrois; when he was nine he went to Notre Dame, where his precociously able music reading and organ playing attracted attention. At 13 he was one of the first students in Choron's Institution Royale de Musique Classique et Religieuse. Choron sent the boy to study the organ at Tours Cathedral, where in 1819 for a brief time he became organist. In 1822 he began to take harmony lessons from Fétis. In 1825 he taught singing and was *maître de chapelle* at the Collège St-Louis. He also accompanied Choron's public concerts.

In the late 1820s Monpou began to make a name for himself as a composer of songs and was among the first to set the new works of poets such as Victor Hugo and Alfred de Musset. In September 1830 he set Musset's *L'Andalouse* to music; it was an instant success, as was his *Le lever*. Then followed such settings as *Sara la baigneuse*, *Madrid*, *Les deux archers* and *Lénore*. Fétis now described the music of Monpou as both 'bizarre' and 'extravagant'.

In the hope of gaining entry to the Opéra, in 1834 Monpou began writing comic operas. The *Gazette musicale* praised the Opéra-Comique for staging his *Les deux reines* (6 August 1835), but his four succeeding comic operas were not the resounding success he had expected. To establish his reputation he decided he now needed a libretto from Scribe, and he succeeded in acquiring his three-act play *Lambert Simnel* (already rejected by Halévy and Donizetti). However, the Opéra-Comique imposed a penalty of 20,000 francs if Monpou could not produce the score by 31 August 1841. He became ill; his doctors ordered rest and a change of climate. Exhausted and suffering from gastralgia, he left for Orléans, where he died.

Monpou, in the judgment both of his contemporaries and of subsequent critics, was an innovator, not an imitator; his songs show true originality and sympathy for the Romantic poets – he was associated with the Petit Cénacle, which included Gautier, Hugo and Nerval. His use of cross-rhythms was new for its time, and unorthodox practices, including the use of bizarre harmonies in such works as *Lénore*, laid him open to charges of eccentricity. Monpou's earnest temperament was little suited to comic opera; nevertheless his most substantial achievement is the historical opera *La chaste Suzanne* (1839).

WORKS

printed works published in Paris

STAGE

opéras comiques, first performed in Paris, Opéra-Comique, unless otherwise stated

Les deux reines (1, F. Soulié and Arnould [J. Mussot]), 6 Aug 1835, vs (?1840)

Le luthier de Vienne (1, J.H. Vernoy de Saint-Georges and A. de Leuven), 30 June 1836 (1836)

Piquillo (3, A. Dumas *père* and G. de Nerval), 31 Oct 1837

Un conte d'autrefois (1, Brunswick [L. Lhérie] and de Leuven), 20 March 1838

La Perugina (incid. music, 1, Mélesville [A.-H.J. Duveyrier]), Renaissance, 20 Dec 1838

Le planteur (2, Saint-Georges), 1 March 1839 (*c*1839)

La chaste Suzanne (opéra, 4, P.F.H. Carmouche and F. de Courcy), Renaissance, 29 Dec 1839 (*c*1840)

La reine Jeanne (Brunswick and Leuven), 12 Oct 1840, collab. L. Bordèse [also perf. as Jeanne de Naples]

Lambert Simnel (3, E. Scribe and Mélesville), 14 Sept 1843; completed by A. Adam, vs (1843)

L'orfèvre, 1836, unperf.

SONGS

Si j'étais petit oiseau (P.J. de Béranger), 3vv (1828); several other pubd duets and trios

76 singly pubd songs, 1v, pf acc:

(1822): Si j'étais ange (A. de Kermainguy)

(1830): Chauvin et Jeanneton; Fauvette; Il était trois chasseurs; Joli coeur; La milice; L'Andalouse (A. de Musset); Marie (Naudet); Le soleil et la liberté (G. Drouineau); Vous vous trompez, grand-mère

(1831): Venise (Musset)

(1832): Le lever (Musset)

(1833): Lénore (G.A. Bürger, trans. G. de Nerval)

(1834): Enfant, dis-moi ta romance (Schoeppers); Il ne faut pas rire des sorciers; La juive (V. Hugo); Le beau moine (B. Lopez); Le noir (R. de Beauvoir); Les colombes de Saint-Marc (Beauvoir); Les deux archers (Hugo); Le soulier dans la cheminée (E. Thierry); Les résurrectionnistes (F. Soulié); Le voeu sur mer (Beauvoir); Mignon (J.W. von Goethe); Sara la baigneuse (Hugo); Un clair de lune; Vite, aimez-moi (M. Aumassip)

(1835–8): Addio Teresa (Dumas); A genoux (Hugo); Hélène (Danglemont); La chanson de la nourrice; La chanson du fou (Hugo); La gitana (Soulié); Lamento (T. Gautier); L'espagnole; Les trois marteaux; L'étoile disparue (E. Plouvier); Madrid (Musset); Paroles d'un croyant (H.F.R. de Lamennais); Si je mourais! (A. Vanauld); Simple amour (Mme H. Lesguillon); Une sérénade (M. de Forges); Vieux sergent, jeune soldat (E. Barateau)

(1840–44): Dans ma gondole de Venise (Barateau); Exil et retour (Plouvier); Gastibelza, le fou de Tolède (Hugo); La captive (Hugo); La chanson de triboulet (Plouvier); L'âme du bandit (A. Richomme); La Psyché (Plouvier); Le mal d'amour (Plouvier); L'enfant perdu (Plouvier); Les deux étoiles (Plouvier); Les larmes du départ (Plouvier); Le voile blanc (Abbé de Lécluse); Mon fils charmant (Plouvier); Pauvre Hélène (A. Gourdin); Pour un sourire (Plouvier)

(undated): C'est tout mon bien (H.L. Guerin); Je ne réponds de rien (Robillard); La femme changée en pierre (M. Waldor); La fille de Gentilly; La glaneuse; La madonna col bambino (A. Vannault); La tour de Nesle; Le capitaine négrier (R. de Fobriant); Les clocheteurs des trépassés; Les jolis tambours; Le soulier de la liberté; Les yeux noirs (C. Dovalle); L'oiseau de Cèdre; L'onde et les beaux jours (Romagnési); Pastourelle (M. de Manchange); Prière pendant l'orage; Rosa (Waldor); Une marine; Une nuit sur l'eau

Cantiques à la vierge, 3vv, org
2 motets: O Domine, miseremini; Pie Jesu

Monsardus, Hieronymus. *See* MONTESARDO, GIROLAMO.

Monserrate [Montserrat], **Andrés de** (*b* Codalet, Catalonia; *fl* 1614). Spanish theorist. He served as precentor (*capiscol*) of the church of S Martín, Valencia. His brief plainchant treatise, *Arte breve, y compendiosa de las dificultades que se ofrecen en la música practica del canto llano* (Valencia, 1614), is among the very few works on music theory published in Spain in the first half of the 17th century. Although intended as a practical guide, its approach is learned, and it is solidly based on past authorities, ancient and modern, who are listed at the beginning and cited throughout. In his second prologue Monserrate described the place of music among the arts and echoed Bermudo in his scorn of the practical musician ignorant of the foundations of the art. His work is divided into two parts, the first concisely summarizing the fundamentals, the second expanding them with quotations and musical examples. He included the customary topics: notation, solmization, mutation, accidentals, cadences and the modes. He dwelt on certain controversial topics at some length – for example the use of sharps and flats in plainsong and the reasons in favour of the use of B♭ in the 5th and 6th modes. His work was often cited by later Spanish theorists. A tiento and several villancicos by one 'Montserrat' are known; the tiento may be attributable to José Montserrat, an organist in Valencia and Murcia, or to Roque Montserrat, *maestro de capilla* at Cartagena.

ALMONTE HOWELL/LOUIS JAMBOU

Monsigny [Moncigny, Moncini, Monsigni], **Pierre-Alexandre** (*b* Fauquembergues, near Saint-Omer, 17 Oct 1729; *d* Paris, 14 Jan 1817). French composer. He was born into a noble but penniless family; his aristocratic origins were useful to him in his Parisian career, however, and are evident in the fact that all his scores were published anonymously, for it would have been improper for a nobleman to admit to being a musician. He settled in Paris in 1749, intending not to become a composer of operas but, according to Quatremère de Quincy, to 'throw himself into finance'; he did indeed enter the service of the receiver general of the Clergé de France about 1750, and then became *maître d'hôtel* to the Duke of Orléans about 1768. In Paris Monsigny continued the musical studies he had begun in his native province, first with a violin master, then with Pietro Gianotti, an instrumentalist at the Opéra and the author of a didactic work *Le guide du compositeur* (Paris, 1759). His first impressions of *grand opéra* were unfavourable ('I would rather try a different genre', he told his friends), and he therefore naturally found himself drawn to the nascent genre of *opéra comique mêlé d'ariettes*.

His first opera, *Les aveux indiscrets*, was performed in 1759 (the same year as Philidor's first, *Blaise le savetier*), but the preface to the libretto dates its composition four years earlier. *Les aveux indiscrets* is a mixture of elements borrowed from various different genres: the dominant influence is that of the Italian intermezzo, but it also contains characteristics peculiar to the French tradition, such as *petits airs*, a final *divertissement* and dialogue arias. Monsigny's personal touch already shows in the quality of the melodic invention, particularly noticeable in the duet 'L'amour veut du mistère' in the middle of the final *divertissement*. *Le maître en droit* (1760) and *Le cadi dupé* (1761) belong to the hybrid category of the *opéra comique mêlé d'ariettes et de vaudevilles*. Their strong points are the arias expressing an *amoroso* sentiment (this marking appears frequently in Monsigny's work and is generally associated with A or E major); the prototype is Lindor's aria 'Ah, quel tourment' (*Le maître en droit*, 2.i). However, Monsigny also shows an increasing mastery of action ensembles, such as the duet 'Prêtons un peu l'oreille' in *Le maître en droit* (2.vi) and the trio 'Entrez donc' in *Le cadi dupé* (scene vii). It was on hearing the duet 'Je veux former de nouveaux noeuds' (*Le cadi dupé*, scene viii) that the dramatist Sedaine, seeking a musician much as the Cadi was seeking a wife, cried, 'There's my man!' The first result of the collaboration between Sedaine and Monsigny, which proved one of the most fruitful in French opera, was *On ne s'avise jamais de tout* (1761); it was such a success that it was revived at court in December of the same year, an unusual distinction for an opera first performed at the Théâtres de la Foire, and was chosen, with *Blaise le savetier*, for the first performance given by the Comédie-Italienne after its merger with the Opéra-Comique, on 3 February 1762.

The comic vein still predominant in *On ne s'avise jamais de tout* gives way, in *Le roi et le fermier* (1762), to a far more complex dramatic conception, not only in the unexpected alternation between comic and serious scenes but also in the use of musical procedures still new to French opera (fig.1). If Monsigny displays a richer and

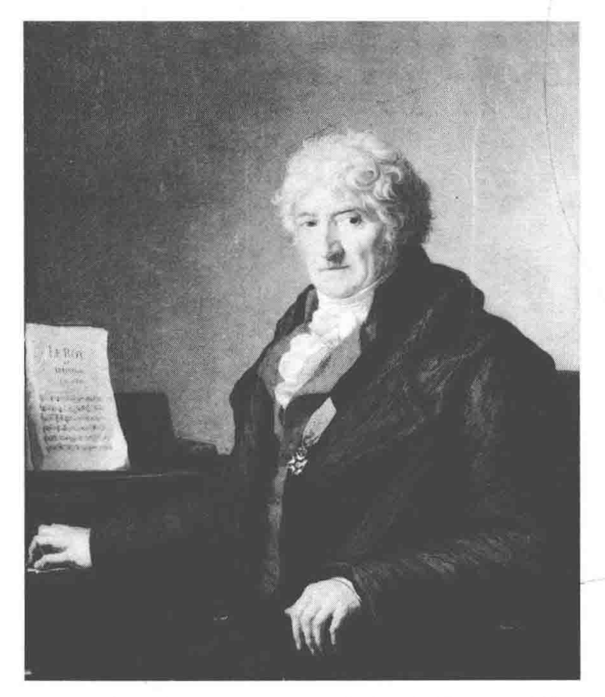
1. Title-page of the first edition of the full score of Monsigny's 'Le roi et le fermier' (Paris: Herissant, 1762)

more ambitious idiom here than in his previous operas, he had the advantage of a libretto well designed to point up the role of the music. It includes, for instance, no fewer than three narrative arias, the most complex of which, Jenny's tale in Act 1 scene viii, contains recitative passages of great dramatic power. Sedaine himself, in his preface to *Rose et Colas*, drew attention to the possibility in music drama of prolonging a moment of intense emotion by allowing different characters to express contradictory feelings. The scene Sedaine had in mind occurs in the septet in Act 3 scene xiv, in which the King is recognized by the peasants who have welcomed him to their home, while Lurewel and the Courtier try in vain to flatter their sovereign. Another case in point is the first scene of Act 3, in which Betsy, Jenny and their Mother sing different songs in turn before combining their melodies into a continuous sequence in which each character preserves her own individuality. Later, Sedaine and Monsigny reverted to a similar method, making it even more radical, at the end of Act 2 of *Le déserteur* (1769).

With *Rose et Colas* (1764) Sedaine and Monsigny returned to one of the standard themes of *opéra comique*: two young peasants crossed in love. Rather than representing a backward step after the powerful and tormented language of *Le roi et le fermier*, *Rose et Colas* was an attempt to convey the quintessence of traditional *opéra comique* – and perhaps to outdo Favart on his own ground. Sedaine's and Monsigny's liking for experiment is evident again in their one contribution to *grand opéra*, *Aline, reine de Golconde* (1766), considered too close to *opéra comique* by the *Mercure de France* (it includes nine pieces marked *amoroso*), yet condemned by Grimm for conforming too obviously to the conventions of the Académie Royale de Musique. In any case, this ambiguity did *Aline* no harm: the work was performed until 1782, surviving the revolution introduced into the repertory of the Opéra by Gluck and Piccinni.

The bucolic atmosphere of *Aline* and the dark passion of *Le déserteur* clearly show the dangers of drawing too facile a distinction between the Académie Royale and serious opera on the one hand, and the Comédie-Italienne and light opera on the other. *Le déserteur* displays an amazing compendium of procedures all combining to express the purest pathos: the frequent use of minor keys, often intensified by chromaticism; instrumental effects (three pieces call for the use of mutes); dramatic breaks in the discourse; fugal writing; and silence from characters confronted with a fate too cruel to bear. Such concentrated methods had no equivalent in French music of the galant period, but nonetheless Monsigny struck a deep chord of sympathy in his public, for *Le déserteur* was among the *opéras comiques* most often performed during the last two decades of the *ancien régime* (fig.2), and had a long history of performance in foreign theatres.

Leaving aside his part in the pasticcio *La rosière de Salency* (1769), Monsigny composed nothing during the two and a half years between *Le déserteur* and *Le faucon* (1771). *La belle Arsène* (1773) occupies a special place in his output, both because the libretto is by Favart and not Sedaine and because the genre of *comédie-féerie* calls for a type of dramaturgy halfway between *opéra comique* and *opéra-ballet*. As usual, Monsigny shows his talent most clearly in the cantabile pieces, such as Alcindor's opening monologue, 'Ah! quel tourment' (in four contrasting sections), in Arsène's *andantino amoroso*, 'Eh quoi, l'amour est-il un bien suprême' (3.vi) and in the moving



2. Monsigny's 'Le déserteur', Act 3: aquatint by A.-B. Duhamel after François-Marie Isidore Queverdo, c1787

C minor lament of Alcindor to a still-doubting Arsène (3.ix). The last opera on which Sedaine and Monsigny collaborated, *Félix* (1777), rests on the two dramatic principles characteristic of almost all their work together: social criticism and the exploitation of the sentimental vein. Here Monsigny's music returns to complexity similar to that of *Le déserteur*, although contrasting effects are less systematically employed, yielding to subtler vocal and orchestral writing. The culmination of the opera, which did much for its reputation, is the trio sung by Félix, Morin and Thérèse (3.ix); Monsigny claimed to have thought of the melodic idea for this while looking at Greuze's painting *La bénédiction du père de famille*.

Monsigny wrote no more music after *Félix*. The main reason for this strange silence is the cataract from which he suffered. However another, and not incompatible, reason was suggested by Quatremère de Quincy, to the effect that Monsigny had exhausted his inspiration by identifying too strongly with the passions he set to music. This theory, drawn from Diderot's *Paradoxe sur le comédien*, is corroborated by several contemporary witnesses, who emphasize both Monsigny's remarkable susceptibility to emotion and the slowness, even difficulty, with which he composed – because of this Sedaine decided not to entrust the libretto of *Le magnifique* to him (it was eventually set by Grétry).

At the Revolution Monsigny was deprived of his means and his financial situation became increasingly difficult. It was somewhat alleviated by a pension from the Opéra-Comique in 1798 and greatly improved in 1800 when he succeeded Piccinni as Inspector of Musical Education. In 1804 he became a Chevalier of the Légion-d'Honneur (fig.3) and in 1813 took Grétry's place as a member of the Institute. He had, however, been infirm since 1809 and was unable to take an active role. Despite his personal difficulties and his retirement from musical life at the age of 48, his operas continued their brilliant career at the end of the *ancien régime*, during the Revolutionary period and into the first quarter of the 19th century.

Monsardus, Hieronymus. *See* MONTESARDO, GIROLAMO.

Monserrate [Montserrat], **Andrés de** (*b* Codalet, Catalonia; *fl* 1614). Spanish theorist. He served as precentor (*capiscol*) of the church of S Martín, Valencia. His brief plainchant treatise, *Arte breve, y compendiosa de las dificultades que se ofrecen en la música practica del canto llano* (Valencia, 1614), is among the very few works on music theory published in Spain in the first half of the 17th century. Although intended as a practical guide, its approach is learned, and it is solidly based on past authorities, ancient and modern, who are listed at the beginning and cited throughout. In his second prologue Monserrate described the place of music among the arts and echoed Bermudo in his scorn of the practical musician ignorant of the foundations of the art. His work is divided into two parts, the first concisely summarizing the fundamentals, the second expanding them with quotations and musical examples. He included the customary topics: notation, solmization, mutation, accidentals, cadences and the modes. He dwelt on certain controversial topics at some length – for example the use of sharps and flats in plainsong and the reasons in favour of the use of B♭ in the 5th and 6th modes. His work was often cited by later Spanish theorists. A tiento and several villancicos by one 'Montserrat' are known; the tiento may be attributable to José Montserrat, an organist in Valencia and Murcia, or to Roque Montserrat, *maestro de capilla* at Cartagena.

ALMONTE HOWELL/LOUIS JAMBOU

Monsigny [Moncigny, Moncini, Monsigni], **Pierre-Alexandre** (*b* Fauquembergues, near Saint-Omer, 17 Oct 1729; *d* Paris, 14 Jan 1817). French composer. He was born into a noble but penniless family; his aristocratic origins were useful to him in his Parisian career, however, and are evident in the fact that all his scores were published anonymously, for it would have been improper for a nobleman to admit to being a musician. He settled in Paris in 1749, intending not to become a composer of operas but, according to Quatremère de Quincy, to 'throw himself into finance'; he did indeed enter the service of the receiver general of the Clergé de France about 1750, and then became *maître d'hôtel* to the Duke of Orléans about 1768. In Paris Monsigny continued the musical studies he had begun in his native province, first with a violin master, then with Pietro Gianotti, an instrumentalist at the Opéra and the author of a didactic work *Le guide du compositeur* (Paris, 1759). His first impressions of *grand opéra* were unfavourable ('I would rather try a different genre', he told his friends), and he therefore naturally found himself drawn to the nascent genre of *opéra comique mêlé d'ariettes*.

His first opera, *Les aveux indiscrets*, was performed in 1759 (the same year as Philidor's first, *Blaise le savetier*), but the preface to the libretto dates its composition four years earlier. *Les aveux indiscrets* is a mixture of elements borrowed from various different genres: the dominant influence is that of the Italian intermezzo, but it also contains characteristics peculiar to the French tradition, such as *petits airs*, a final *divertissement* and dialogue arias. Monsigny's personal touch already shows in the quality of the melodic invention, particularly noticeable in the duet 'L'amour veut du mistère' in the middle of the final *divertissement*. *Le maître en droit* (1760) and *Le cadi dupé* (1761) belong to the hybrid category of the *opéra comique mêlé d'ariettes et de vaudevilles*. Their strong points are the arias expressing an *amoroso* sentiment (this marking appears frequently in Monsigny's work and is generally associated with A or E major); the prototype is Lindor's aria 'Ah, quel tourment' (*Le maître en droit*, 2.i). However, Monsigny also shows an increasing mastery of action ensembles, such as the duet 'Prêtons un peu l'oreille' in *Le maître en droit* (2.vi) and the trio 'Entrez donc' in *Le cadi dupé* (scene vii). It was on hearing the duet 'Je veux former de nouveaux noeuds' (*Le cadi dupé*, scene viii) that the dramatist Sedaine, seeking a musician much as the Cadi was seeking a wife, cried, 'There's my man!' The first result of the collaboration between Sedaine and Monsigny, which proved one of the most fruitful in French opera, was *On ne s'avise jamais de tout* (1761); it was such a success that it was revived at court in December of the same year, an unusual distinction for an opera first performed at the Théâtres de la Foire, and was chosen, with *Blaise le savetier*, for the first performance given by the Comédie-Italienne after its merger with the Opéra-Comique, on 3 February 1762.

The comic vein still predominant in *On ne s'avise jamais de tout* gives way, in *Le roi et le fermier* (1762), to a far more complex dramatic conception, not only in the unexpected alternation between comic and serious scenes but also in the use of musical procedures still new to French opera (fig.1). If Monsigny displays a richer and

Ballet Folklórico de Mexico (directed by Amalia Hernández), *Xtoles* was first collected by José Jacinto Cuevas (1821–78), who included a triple-metre version of it in his *Mosaico yucateco*. Equally well ascribable to Africans, who by 1604 outnumbered Spaniards at Mérida, the melody cannot be authenticated as truly Mayan for lack of any music of a popular or folkloristic nature written down in Yucatán before the middle of the 19th century. On the other hand, the cathedral organist at Mérida in 1596 was Gaspar Antonio Chi (Xiu) (1531–*c*1610), a Maya priest's son who according to Sánchez de Águilar 'sang plainsong and figural music excellently, and after being *holpop* [choirmaster] at Tizimín became organist of Mérida Cathedral and the governor's official interpreter'.

2. MODERN DEVELOPMENTS. Indigenous music with a strong Maya legacy can be found in the Yucatán and Chiapas. Max Jardow-Pedersen (1996) mentions the use of *tunkul* (slit-drum) in Dzitnup, Yucatán, and the *bulalek* (water-drum) in Chanchichimilá, Yucatán; both instruments are still in use for Christian religious festivities. In Chiapas there are a few European instruments made locally. Tzotzil and Tzèltal are indigenous people from the highlands of Chiapas who retain a great variety of traditional dances with strong Mayan roots but accompanied by groups of indigenous and European instruments. Mercedes Olivera (1974) offers good examples of various dances, including the *danza del agua* (water dance) of San Juan Chamula, performed to the music of a double-headed cylindrical drum and a rudimentary 12-string guitar at a number of Catholic festivities. Other dances of the same region of highland Chiapas include the *yojualelvinajil*, a religious dance performed with harp and the same rudimentary 12-string guitar; the *quintajimoltic*, a carnival dance performed with a single-headed drum and cane flute, the drum is made of a *cántaro* (clay pot) with a single skin head covering the mouth of the pot.

In Yucatán modern European instruments are found playing a regional music known as *jarana* with strong European roots. Jardow-Pedersen (1996) mentions the presence of brass bands playing *jaranas* characterized by hemiola rhythms. The *jarana* is danced as an offering to the patron saint at Christian festivities, and is still performed at certain Maya rituals in honour of ancient Mayan deities, including Chaak and the gods of the four winds. Pedersen mentions that among Mayan people from Yucatán, Christian practices have been integrated into Mayan rituals and other events. This is the case at the Christian festivity in Xalua, Yucatán, where *jaranas* are performed for the exorcism ritual, *tangas-ik* (evil winds); before a bull fight and also in honour of *wanthul* (god of cattle). Another modern reference to contemporary Mayan music by Thomas Stanford (1997) refers to the presence of a particular style of music called *son de maya pax* in Quintana Roo, with accompaniment by violins, cornets, snare drum and bass drum, also characterized by hemiola rhythms.

Mayer, Charles (*b* Königsberg [now Kaliningrad], 21 March 1799; *d* Dresden, 2 July 1862). German pianist and composer. The son of a clarinettist and a pianist, he was taken as a baby to St Petersburg; four years later his family moved to Moscow. He studied with his mother and John Field. On the burning of Moscow in 1812 the family fled back to St Petersburg; there he resumed his studies with Field, whose style he is said to have closely imitated. In 1814 he made a successful tour of Poland, Germany, France and Holland (playing his variations on *God Save the King* in Amsterdam). From 1819 he was securely established as a teacher in St Petersburg. Field's last appearance seems to have been at a soirée arranged by Mayer in 1836; he himself played a polonaise with his young son, and was praised in the *Moscow Gazette*. A later tour (1845) encompassed Scandinavia, Hamburg, Leipzig and Vienna; Berlioz described him as 'an artist of great talent' in the *Journal des débats* (16 April 1845). With the rise of Henselt's star in Russia, Mayer left St Petersburg and settled in Dresden.

A busy and popular teacher, Mayer is said to have had as many as 800 pupils. These included Glinka, who acknowledged his liberating influence and his stimulus of talent and taste. He revised the variations on *Benedetto sia la madre* for Glinka, who accepted his suggestion for an accompaniment figure in the Mazurka in *A Life for the Tsar*. Schumann praised his playing and some of his pieces, including the Six Etudes; his opus numbers ran to 351. His F♯ Mazurka was mistakenly included in Klindworth's edition of Chopin.

FRANZ GEHRING/JOHN WARRACK

Mayer, Emilie (*b* Friedland, Mecklenburg, 14 May 1821; *d* Berlin, 10 April 1883). German composer and sculptor. The daughter of an apothecary, she received piano lessons and soon began to compose short piano pieces. In Stettin (now Szczecin) she took lessons with Carl Loewe. During this period she composed songs, chamber music, overtures and symphonies. In 1847 she moved to Berlin, where she studied fugue and counterpoint with Adolf Bernhard Marx and orchestration with Wilhelm Wieprecht. She organized private performances of her music at home and in other houses, as well as in the Königliches Schauspielhaus. Her Sinfonia in B minor (1852), one of her most successful compositions, was given several public performances by Karl Liebig. She went with her brothers to Vienna, and travelled between Berlin, Stettin and Pasewalk, spending considerable money and energy on having her music printed and performed. Later, her financial affairs seem to have deteriorated. Her music was performed in Brussels, Lyons, Budapest, Dessau, Halle, Leipzig and Munich, and was much acclaimed during her lifetime. She was the most prolific German woman composer of the Romantic period, yet most of her music (which is in the Berlin Staatsbibliothek) has remained unperformed since her death.

Her output includes a Singspiel *Die Fischerin*, several sinfonias and overtures, choral settings and lieder. Among her instrumental works are 9 sonatas for violin and 13 for cello, 11 piano trios and 7 string quartets. She also wrote three sonatas for piano, as well as shorter pieces. Her work adheres to the classical tradition and is modelled on the style of Mendelssohn. Besides composing, she worked as a sculptor, and some of her works were retained in royal collections.

EVA RIEGER

Mayer, Giovanni [Johann] **Simone** [Simon]. *See* MAYR, SIMON.

Mayer, (Jakab) Gyula [Julius]. *See* MAJOR, GYULA.

Mayer [Meyer, Meier, Mejer], **Johann David** (*b* Schwäbisch Hall, 15 June 1636; *d* Schwäbisch Hall, 23 Dec 1696). German composer and music editor. He was the son of a town councillor at Schwäbisch Hall and after attending the local Gymnasium studied administration at the University of Tübingen from 1657 to 1663. He himself became a councillor in his native town. He was a man of some importance in the community and in addition to his other civic responsibilities was *Director musices* from 1687; he also had an interest in the salt industry. In 1682 he published *27* [*recte* 36] *schönen, geist- und trostreichen neuen vortreflichen Arien in 5 Instrumental und eben so viel Vocalstimmen*. This collection, which is lost, was very successful, and when the edition of 800 copies was sold out Mayer brought out a much enlarged new edition: *Geistliche Seelen-Freud, oder Davidische Hauss-Capell: bestehend in Theils gantz neu- und andern mehr, schönen, auch Lehr- und trostreichen Arien und Gesängen zu göttlichen Lobs Aussbreit* (Ulm, 1692; the preface is dated 21 August 1691). In this new edition the contents of the first edition are arranged for the simpler texture of two voices (treble and bass) and continuo. Mayer also added nearly 100 new pieces, giving a total of 129 songs and 112 melodies; he himself wrote 14 of the poems and 54 of the melodies, six of which Daniel Speer took into his *Choral Gesang-buch* in the same year (there are 51 melodies, without bass, in Zahn, 30 of which – not 37 as Zahn said – are by Mayer, and there is one in Winterfeld). Some of the melodies are in an arioso style, others are more folklike. He also published a volume of *Geistliche Haus- und Kirchenmusik* for five voices and instruments (Schwäbisch Hall, n.d.; only bass and continuo parts survive, title-page missing) and he may have been the composer of a *Lob- und Danck-Lied* (*Lasset uns den Höchsten loben*) for two voices (Schwäbisch Hall, 1683).

PERCY M. YOUNG

Mayer, John (Henry) (*b* Calcutta, 28 Oct 1930). British composer of Indian origin. He studied Indian classical music with Sanathan Mukerjee and Western music with Melhi Mehta in Bombay. He also studied the violin from the age of nine with Phillipe Sandre in Calcutta. After winning a scholarship in Bombay, he went to London to attend the RAM (1952–4), also studying composition with Seiber. He played in the LPO (1953–8) and the RPO (1958–65).

His work as a composer is characterized by its use of Indian instruments and techniques in conjunction with Western forms and orchestration. Sitars, tampuras and

tablas make a significant appearance in his Violin Concerto. Rāgas, tālas and microtonal inflections are central features of the Flute Concerto, composed for James Galway, and the Concerto for Orchestra commissioned by the LPO. The latter suggests the additional influence of jazz, Mayer's enthusiasm for which, again combined with non-Western instruments and idioms, was given a more significant platform in the music he wrote as director of the group Indo-Jazz Fusions. In 1989 Mayer became composer-in-residence at the Birmingham Conservatoire, where he subsequently instigated the BMus Indian Music course in 1997. He was made an honorary ARAM in 1990.

Mayer, Josepha. German soprano. *See* WEBER family, (3).

Mayer, Peter. *See* MEYER, PETER.

Mayer, Sir **Robert** (*b* Mannheim, 5 June 1879; *d* London, 9 Jan 1985). English music patron of German birth. Son of a wealthy and musical German-Jewish brewer, he entered the Mannheim Conservatory when he was six. He was a gifted pianist, and at the age of 11 was encouraged by Brahms. He became a businessman, however, settling in England in 1896 and becoming a naturalized British subject in 1902. In 1919 he married the singer Dorothy Moulton. Having made his fortune in the metal business in the USA and the City by 1923, he sought to make a lasting contribution to music. His wife's recollection of a concert for children they had heard in New York decided the form their patronage would take. The first Robert Mayer Children's Concert (29 March 1923) coincided with a transport strike in London, but the audience (300 for the first concert) grew to 1360 by the third concert. Sargent succeeded Boult as conductor in the second season. Mayer retired from business in 1929 to devote himself to extending the scope of the children's concerts; he was knighted in 1939.

After World War II he further extended his activities by founding Youth and Music after the example of the continental Jeunesses Musicales (founded in wartime Brussels by Marcel Cuvelier). Youth and Music was to cater for an older age group than the audience of the Robert Mayer Children's Concerts, and in 1954 Mayer at last succeeded in rallying various musical interests to start it. In his 90s he was still seeking to expand the scope of Youth and Music. He was honoured by governments, and by universities and other institutions. His memoirs, *My First Hundred Years*, were published in 1979. His first wife, Dorothy (1886–1974), a soprano and a noted interpreter of contemporary music, played a prominent part in his activities as a patron, and wrote *The Forgotten Master: the Life and Times of Louis Spohr* (London, 1959).

Mayer, Werner. *See* EGK, WERNER.

Mayer, Wilhelm [Rémy, W.A.] (*b* Prague, 10 June 1831; *d* Graz, 23 Jan 1898). Austrian composer. He studied from 1846 at the Prague Organ School with C.F. Pitsch and belonged to the group of Davidsbündler which included Hanslick, Ambros and Savenau. He first appeared in public as the composer of an overture *Die Fanatiker der Cevennen* for Eugène Sue's drama *Jean Cavalier*. At the wish of his father, a Prague lawyer, Mayer studied law, taking his degree in 1856, and did not turn to music professionally until he became artistic director of the Steiermärkischer Musikverein in Graz (1862). There he wrote many orchestral works, including the overture *Sardanapal* (1868), the programmatic symphony *Helena* (1869) and a Symphony in F (1867). In 1870 he gave up his position in order to dedicate himself solely to composition and private teaching. He also wrote three more symphonies, an orchestral fantasia, *Slawisches Liederspiel* and *Östliche Rosen* for solo voices and chorus with two pianos, a concert opera *Das Waldfräulein* (Graz, 1876) and many songs. His music, which he published under the pseudonym W.A. Rémy, shows the influence of Schumann and has some similarities to Dvořák. His pupils included Busoni, Kienzl, Heuberger, Rezniček and Weingartner. He was a learned and strict but inspiring teacher: his theories of counterpoint were based on Cherubini, his orchestration principles on Berlioz, though he was anti-Wagnerian. Busoni's obituary speaks gratefully of his teaching, and observes, 'His universal erudition enabled him to elucidate, embellish and bring to life points in music and the history of music by drawing upon the entire history of civilization, giving character sketches of the masters where it was relevant, and adding his own highly personal observations, some factual, some joking, some poetic'.

influences on Mayr's church music seem to be Italian rather than French. His offertories and psalms, though published in 1702 and 1706 respectively, seem to belong more to the mid 17th century than to the early 18th. This is particularly noticeable in the shape of the short melodic phrases from which he often built up his choral textures and in his very fluid handling of triple time. His treatment of solo and tutti voices, alternating in the same section, shows the influence of Kerll, though Mayr made them alternate over longer periods, and his solo passages, especially in the psalms, tend to be longer and more developed than Kerll's. He was particularly fond of writing bass solos in which the voice forms the bass of a trio texture whose upper parts are violins.

The chief characteristic of Mayr's offertories is their close thematic integration, in which voices and instruments share equally. *Dominus regnavit* consists of several short sections, each based on one or two short themes, which are treated exhaustively by various combinations of solo and tutti voices and violins. As a result Mayr's choral textures tend to be imitative and broken up, rather than contrapuntal: his chordal tutti writing relies for its effect on rhythmic drive rather than varied textures. His solo writing is largely syllabic – the few melismas are used for expressive effect – and his word-setting is very careful; he introduced effective word-painting wherever the opportunity arose.

The solo writing in Mayr's school operas shows the influence of Carissimi and his followers. It is in his later instrumental music that the effects of his visit to Paris can be most clearly seen.

ELIZABETH ROCHE

Mayr [Mayer], **(Johann) Simon** [Giovanni Simone] (*b* Mendorf, nr Ingolstadt, Bavaria, 14 June 1763; *d* Bergamo, 2 Dec 1845). German composer, teacher and writer on music. He was a leading figure in the development of *opera seria* in the last decade of the 18th century and the first two decades of the 19th.

1. LIFE. Johann Simon, the second child of Josef Mayr, a schoolteacher and organist, and Maria Anna Prantmayer, a brewer's daughter from Augsburg, received his early musical education from his father. By the age of seven and a half he was an able sight-singer and by nine an accomplished pianist and budding composer of songs. Around this time his father refused the offer of a now unknown patron to provide him with further training in Vienna and instead sent him to the Jesuit seminary nearby at Ingolstadt, where he received a traditional education funded by a scholarship for his singing. In 1781 he began to study law and theology at the University of Ingolstadt, where he taught himself various orchestral instruments and supported himself by playing the organ. His first published work, *Lieder bei dem Clavier zu singen*, appeared in Regensburg in 1786.

In 1787, through a connection at the university, Mayr's talent was recognized by the lawyer Thomas von Bassus, who took him first to Poschiavo, a Swiss town close to the Italian border where he owned a printing business, and to Tirano nearby, then to Bergamo in 1789 to study with Carlo Lenzi, *maestro di cappella* of the basilica of S Maria Maggiore. This arrangement proved unsatisfactory for Mayr, and he would have returned to Bavaria except that the canon of the basilica, Count Pesenti, arranged for him to continue his studies in Venice with Ferdinando Bertoni, *maestro di cappella* of S Marco, a composer of opera and sacred music. Mayr's stay in Venice provided an ideal opportunity to hear a broad range of Italian sacred, theatrical and instrumental music and enabled him to have his first oratorio and several cantatas performed between 1791 and 1794.

During this period Mayr was encouraged by Niccolò Piccinni and Peter Winter to begin composing theatrical works. His first opera, *Saffo* (1794), was written for La Fenice, where he had probably been a viola player for several years. His next opera, *La Lodoiska*, also performed at La Fenice (1796), was sufficiently successful to earn him a reputation immediately as one of the best Italian composers, a position reinforced by the subsequent popularity of his first *opera buffa*, *Un pazzo ne fa cento* (1796, Venice, S Samuele), performed 17 times in Vienna during the next year. Mayr's fame enabled him to marry one of his pupils, Angiola Venturali, daughter of a wealthy Venetian merchant, whose death in childbirth in 1797 was followed a month later by the death of their baby. In 1804 Mayr married Angiola's sister Lucrezia, who bore him one child, Nina, in 1805.

in recitatives) and manipulation of orchestral and vocal texture to produce sharp dynamic changes often combine to create musico-dramatic effects of remarkable intensity for their time. Mayr avoided exaggeration, however. In fact, in his *Zibaldone* (1837; see Gazzaniga, 1977) he disparaged much of the opera written in the 1820s and 30s as degenerate for relying on excessive dramatic effects and lamented the expansion of the orchestra to include such trivial instruments as the triangle.

Mayr also bridged the 18th and 19th centuries through his treatment of form in his serious operas. Although they still consist of discrete numbers, they break with tradition in abandoning the exit convention in many scenes as early as *La Lodoiska* (1796); in including a high proportion of active, multipartite duets and ensembles; and in incorporating many expansive choral numbers, a reflection of Gluck's influence. Mayr's arias display a broad range of forms and may include as many as four movements (see the aria for Elfrido/Alfredo cited above), although one- or two-movement designs are the norm. His single-movement arias are the most traditional, generally adhering to the types of shortened da capo structures that were common at the end of the 18th century. His multi-movement arias, on the other hand, move towards Rossinian designs. In many cases their texts are longer than the conventional Metastasian pairing of quatrains, and they often include sections in which the principal soloist interacts with other soloists or a chorus. Moreover, they minimize recapitulations and instead allow the music to unfold in conjunction with the emotional progress of the character's thoughts as an asymmetrical series of new ideas. Some, though by no means all, of Mayr's closing fast movements even include repetitions of their principal themes, like those found in Rossini's cabalettas.

Mayr's duets also provide models for the later Rossinian form in four sections (for example, Telemachus and the Mentor's duet in Act 3 of *Telemaco*, 1797), although many contain fewer independent movements and resemble instead earlier duets by Mozart or Cimarosa. Mayr has been credited with adapting the comic central finale to serious opera, and, while his role in this development has yet to be established definitively, the complex designs of his finales do in many cases show their comic origins by beginning with an extended series of active and reflective sections or even independent movements. Yet these finales also anticipate Rossinian conventions by normally including a slow concertato movement (though it rarely attains the length of Rossini's), an active transition and a stretta-like final tutti.

Mayr's sinfonias, like those of his predecessors and Rossini, have no specific thematic relationship to the body of the opera which they precede, but several (e.g. the Venetian *Lodoiska*, *Ginevra di Scozia*, 1801, and *Tamerlano*, 1812) include melodies which evoke their locales. In most cases they consist of a slow introduction followed by a fast movement in some version of sonata form, normally with the development section or the reprise of the first theme group truncated or eliminated. However, Mayr also experimented with non-traditional designs, for example the theme and variations movement of the sinfonia for *Zamori* (1804), the two dance movements of the sinfonia for the Venetian *Lodoiska* and the rondo-like allegro of the sinfonia for *I misteri eleusini* (1802).

Although Mayr's contribution as a melodist was less distinguished, at their best his melting cantilenas can be moving and his cabalettas exciting. He anticipated an important aspect of Rossini's melodic style by moving towards the later composer's broad spectrum of lyric types, which ranges from his 'open' melodies – freely constructed, additive series of short phrases having an almost improvisatory character – to 'closed' tuneful themes, although in Mayr's style these extremes are somewhat less pronounced than in Rossini's operas. However, in their less vigorous profiles his melodies still adhere closely to the more refined language of such late 18th-century composers as Piccinni, Cimarosa and (to a lesser extent) Mozart.

Mayr's prodigious output of sacred music – beginning with several student works and the early Latin oratorio *Iacob a Labano fugiens* (1791) – is little known, partly because he refused permission for it to be published during his lifetime. His 12 oratorios conform to customary Italian practices: they consist of two parts, the first incorporating a brief sinfonia, an introductory chorus having sections for soloists, a sequence of recitatives, ariosos, arias and duets, and a concluding chorus, the second being similar except for a brief introduction. Other sacred works comprise 18 masses, seven requiem masses, and a plethora of single movements for the Mass and Offices. Mayr wrote more than 60 secular cantatas for one or more soloists, chorus and orchestra, many of them occasional works. He also produced instrumental music throughout his career, including more than 50 independent sinfonias for orchestra (and others for keyboard), two piano concertos, a string quintet, and two dozen works for wind sextet, septet and octet. His numerous writings on music and translations of foreign essays, mainly for his pupils at the Lezioni Caritatevoli, have begun to receive scholarly attention.

Mayr was well regarded by such later Italian composers as Bellini and Giovanni Pacini. Rossini credited him with being 'among the first to cause the *dramma musicale* to progress with dignity' and praised him for 'using the instruments with abandon rather than with diffidence dictated by the rules'. Donizetti, whose high regard for his teacher is evident in many of his letters, composed a cantata for the public celebration of Mayr's 78th birthday. Verdi attended his funeral. Although Mayr has not shared in the continued fame of his best-known successors, his musico-dramatic creativity and his importance for the development of Italian opera at the turn of the century are evident throughout his works. Far beyond his role in the musical education of Donizetti, Mayr played a crucial part in the transition from 18th-century to 19th-century opera. Moreover, his interest in and cultivation of the music of northern composers paralleled the aim of progressive aestheticians to invigorate Italian theatre through the study and assimilation of foreign culture. Thus he was one of the first musicians to adapt the ideals of nascent Italian Romanticism to operatic practice.

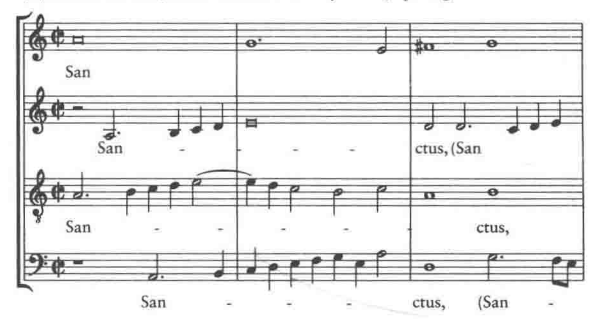
manuscript during his lifetime, the majority of his surviving motets, numbering about 250 pieces, appeared in prints dating from 1572 to 1600. The preponderance of his masses are parody compositions; the seven masses in his first book (1587), for example, are all based on motets. For models he turned not only to his own compositions, but also to those of Jacquet of Mantua, Josquin, Lassus, Palestrina, Rore, Alessandro Striggio (i), Verdelot and Wert. Although motets predominate as models, there are also masses based on chansons and madrigals, his own and those of others. In spite of the variety of sources, Monte's models have in common a certain stylistic gravity, perhaps most evident in his choice of Josquin's *Benedicta es*. In this his approach to parody technique differed slightly from that of Lassus, who occasionally turned pointedly to frivolous models (see, for example, his '*Missa Je ne mange poinct de porcq*'). Typical of Monte's approach to his models is a thorough appropriation and exploration of their materials (both melodic and harmonic), and a tendency to spin out the greater part of his music from the models. Freely composed passages are made to resonate stylistically with the chosen models (ex.1). Contrapuntal writing prevails; his music unfolds in unhurried, sometimes quite melismatic lines, and there is little evidence of post-Tridentine concerns about textual clarity.

Monte's motets embody a classic late Renaissance style, in which the idiosyncrasies of his madrigalian style are largely set aside for a more impassive and restrained approach. Compositions for five voices predominate (of the single book for four voices of 1596 only one partbook survives). His motets are technically flawless, particularly in matters of dissonance treatment and text underlay; broadly responsive to their texts, though seldom to the point of extreme madrigalisms; expressive yet restrained. Chromaticism is rare, notwithstanding Cerone's statement in *El melopeo y maestro* (1613) that 'Filippo de Monte and Luca Marenzio like to use very pleasant and very sweet chromatic progressions, or to put it more appropriately, soft, sensuous and effeminate ones'. Continuity of motive, texture, and harmony predominates; obvious cadences are continually avoided, or deftly undercut. In his choice of mode and vocal scorings, Monte revealed a characteristic sensitivity to a text's predominant affect. For the most part, his motets rely on an unobtrusive technique more than on high artifice; puzzle canons and cantus firmi are exceptional reminders of the composer's Netherlandish background (see, for example, *Gaudent in caelis* and *Ad te, Domine, levavi anima meam*, both from the third book of motets for five voices, 1574). A unique example of his interest in polychoral writing appears in the 1585 collection of six- and 12-voice motets; its concluding piece, *Benedictio et claritas*, is scored for three four-voice choirs. For an example of his motet writing at its most effective and expressive, see *O suavitas et dulcedo* (from the *Libro quarto de motetti*, 1575).

Monte's sacred madrigals, a genre to which he devoted considerable energy – beginning in 1581 with his first book (five voices), and continuing until his *Eccellenze di Maria vergine* of 1593 – are closely allied in style to their contemporary secular counterparts, and evolved along similar lines. Monte produced more work in this genre than any of his contemporaries.



(ii) Secular music. Monte's secular works represent the larger part of his output; madrigals predominate. Indeed,

(a) Rore: *Anchor che col partire* (RISM 1547 [14]), opening

(b) Monte: Sanctus, *Missa 'Anchor che col partire'*, opening

Monte was the most prolific madrigalist in the history of the genre: he published 34 books, spanning his entire career, from 1554 to 1603. He showed much less interest in the French chanson, though his *Sonetz de P. de Ronsard mis en musique* (1575) is an attractive volume. Only his first four books of madrigals were published during his years of residence in Italy; the remaining books, all published during his lengthy period of residence at the imperial court in Vienna and Prague, take on the character

of a continuing homage to his Italian years and to a genre to which he was deeply committed.

He began late as a published madrigalist. His first book for five voices, published in Rome (1554) when he was 33, is remarkably conservative in style, more so than previous writers have remarked. Relentlessly imitative, harmonically unadventurous, it seems hardly touched by the more rhetorically focussed styles then being explored by Willaert and Rore. In the books that followed (the first book for four voices of 1562, the second book for five voices, 1567, and the first book for six voices, published before 1569), he revealed a broader stylistic range, and a deepening awareness of the accomplishments of his finest contemporaries – Willaert and Rore among them. He explored the possibilities of more colourful harmony and linear chromaticism, and achieved a subtler balance between homophonic and contrapuntal writing. His five-madrigal cycle *La dolce vista* (first published in 1568[13]) is unique in his oeuvre for its exploration of the *madrigale arioso*, a fashionable genre in these years. With his publications of the late 1560s and 1570s he achieved his greatest prestige and popularity, and his works from these years were often reprinted (as was not the case with most of his madrigal books published after 1580).

In the years following his imperial appointment (1568) his madrigals became more and more individual in style, a development stemming not so much from his presumed isolation in Vienna and Prague (see Einstein), as from the continuing evolution of his personal style. The books published prior to 1580 show an overwhelming predilection for the poetry of Petrarch (Monte set more poems from the *Canzoniere* than any other composer), though in these same years Monte gradually abandoned Petrarch in favour of his sixteenth-century imitators (Bembo, Ariosto and Sannazaro among them).

In the dedications of his madrigal books of 1580 and 1581, Monte diligently cultivated his new patron Rudolf II and other important figures at court. From his comments in these letters, it appears that Monte was vexed by rapidly changing musical tastes at court, and dismayed by the apparent failure of his most recent music there: 'I have tried, and I am still trying, by a change of style, to give some pleasure to those who have been little pleased with my other compositions' (dedication to Rudolf, tenth book for five voices, 1581). Despite his stated intentions, however, his music in these books continues to explore the serious style he had cultivated since the 1560s. Elaborate counterpoint prevails; two-tenor scorings predominate; and the madrigals abound with nervous rhythmic energy (most of his madrigals before 1580 are notated in *tempus imperfectum diminutum*, and regularly partake of the rhythmic volatility of the *note nere* madrigal). In particular, the tenth book represents a high point in Monte's entire madrigalian output, in such pieces as *Scipio, l'acerbo caso* (ex.2) and the brilliant eight-part cycle *Già havea l'eterna man*, a setting of a cento based on Ariosto's *Orlando furioso*.

After 1581, Monte gradually turned towards the canzonetta-madrigal (a hybrid genre then much in favour), his version of which crystallized in the eleventh book for five voices (1586). Perhaps significantly, he dedicated the book to an Italian connoisseur, Mario Bevilacqua of the Accademia Filarmonica di Bologna, rather than to anyone in his immediate imperial environment. His new style is marked by a much greater reliance on transparent

Ex.2 *Scipio, l'acerbo caso*, opening

homophony, two-soprano textures and lively rhythms. (In these same years he switched definitively from *tempus imperfectum diminutum* to *tempus imperfectum*.) This decisive change in style accompanied an equally decisive rejection of the neo-Petrarchan sonnet in favour of the epigrammatic madrigals of Guarini and Tasso, both of whose poetry is featured in the eleventh book. In the remaining years of his life, Monte continued to cultivate and deepen this style, by gradually turning away from its radically simplified means. Already by 1590, in his fourteenth book for five voices, he had returned to more complex polyphony and harmony. In the remaining years of his life he explored the textural and contrapuntal potential of six- and seven-voice composition (as exemplified in his last three publications, *La fiammetta* (1599), *Musica sopra Il pastor fido* (1600) and his swan-song, the ninth book for six voices (1603). These last works show

S.L. BALTHAZAR

Mayr, Wolfgang (*fl* 1616–41). German composer. He was a singer at the Michaelskirche, Munich, the archives of which refer to his (?second) marriage in 1641. Only two compositions by him survive, both printed in anthologies of church music: one in *Siren coelestis*, 2–4vv (Munich, 1616[2]), the other in Johann Donfrid's *Promptuarii musici* (Strasbourg, 1622[2]). The latter compilation contains mainly Italian music, and Mayr's presence among the few Germans represented may have resulted from his ability to write in an italianate style. Certainly his Purification Day motet *Hodie beata virgo*, for two sopranos and continuo, shows a complete assimilation of the post-Viadana Italian duet style: though not melodious it is pleasantly canonic, and Mayr was occasionally aware of the possibilities of dissonance.

JEROME ROCHE

Mayseder, Joseph (*b* Vienna, 26 Oct 1789; *d* Vienna, 21 Nov 1863). Austrian violinist and composer. The son of an impoverished painter, he showed talent as a violinist at an early age and was given lessons by Joseph Suche in 1797 and by Anton Wranitzky from 1798. Encouraged by Schuppanzigh, in whose string quartet he later played second violin as a 15-year-old, he made his first public appearance with brilliant success at a morning concert in the Augarten in 1800. Two more appearances followed within a month, and in 1802 he played before the Empress Consort Maria Theresa. In the same year he began piano and composition lessons with Förstner. From about this time he was active as a quartet player in such private circles as those of Beethoven's patrons Zmeskall von Domanovecz and Prince Lobkowitz; he was regarded as an unsurpassable exponent of the Mozart, Haydn and earlier Beethoven quartets. He was appointed leader of the Hoftheater orchestra in Vienna (1810), soloist at the

Hofkapelle (1816) and later soloist to the emperor (1835) and musical director of the Hofkapelle (1836). He also played in the orchestra at the Stephansdom and gave a series of concerts in association with Giuliani and Hummel, later with Moscheles and then the cellist Merk, until his retirement from concert life in 1837. His only musical journey was to Paris (1820) where he met, among others, Cherubini, Habeneck, Herz and Kreutzer, but he did not perform there publicly. He was awarded the Salvator medal (1811), the freedom of Vienna (1817) and the Order of Franz Joseph (1862), and was an honorary member of several musical bodies.

63 of Mayseder's compositions were published; most of these are conservative in style and were intended primarily for his own performance, including 20 sets of variations, seven of his eight string quartets and three violin concertos. A mass in E♭, written for the Hofkapelle in 1848, won wide approval. The majority of his autograph manuscripts and sketches are in the music collection of the Vienna Stadtbibliothek.

Mayshuet (de Joan). *See* MATHEUS DE SANCTO JOHANNE.

Maystre, Matthaeus le. *See* LE MAISTRE, MATTHAEUS.

Mayuzumi, Toshirō (*b* Yokohama, 20 Feb 1929; *d* Kawasaki, 10 April 1997). Japanese composer. He studied with Ikenouchi and Ifukube at the Tokyo National University of Fine Arts and Music, from which he graduated in 1951. As a student he distinguished himself as an adventurous composer, sometimes writing in the traditional idiom of late Romanticism (the Violin Sonata of 1946), sometimes experimenting with jazz rhythms (*Hors d'oeuvre* for piano and the Divertimento for ten instruments), sometimes drawing on Indian or Balinese music (the *Symphonic Mood* and *Sphenogrammes*). The last of these works brought him his first public success and marked the beginning of his international reputation when it was performed at the 1951 ISCM Festival. Mayuzumi went to Paris in 1951–2 to study at the Conservatoire with Aubin; while there he was also able to familiarise himself with the new developments of Messiaen and Boulez and with *musique concrète*. Returning to Tokyo in 1953 he founded (with Akutagawa and Dan) the Sannin no Kai (Group of Three).

Mayuzumi has consistently experimented with new ideas and techniques in his compositions. His *X, Y, Z* (1955) was the first Japanese example of *musique concrète*, and his *Shūsaku I* (1955) the first of synthetic electronic music. He also utilised prepared piano, 12-note, serial and aleatory methods; however, it is possible to identify in his work a predominant interest in the unique sonorities of instruments and voices. This has led him to employ such unexpected combinations as 'claviolin', electric guitar and vibraphone (in the orchestral *Ektoplasm*) or five saxophones, piano and musical saw (in *Tone Pleromas 55*).

In 1958 a new direction in Mayuzumi's music was opened by *Nehan kōkyōkyoku* ('Nirvana Symphony'). Obsessed by the sounds of Buddhist temple bells, he analysed the sonorities acoustically and tried to reproduce their profound sensation by means of tone qualities, volumes and the use of space in the composition; the result was an Otaka Prize in the following year. Many of his works are based on Buddhist philosophy and music, among them *Sange* for male chorus, the *Mandala Symphony*, the symphonic poem *Samsara* and the cantata *Geka* (*Pratidesana*). At the same time he developed interests in traditional Japanese music, such as *gagaku* and *shōmyō* (Buddhist chants), the nō drama and the *gidayū* singing which accompanies *bunraku*. In *Bugaku* for orchestra (1962), which won an Otaka Prize in 1967, he attempted to imitate the sounds and rhythms of the music for the court dance after which the piece is named, while *Shōwa Tenpyō-raku* (1970) was written for an actual *gagaku* ensemble. *A hun* for three nō instruments (1958) explores the rhythmic structure of the traditional play, and *Bunraku* (1960) is an evocation for solo cello of puppet drama. In his later years he composed only occasionally, presenting for many years the popular TV programme 'Dai mei no nai ongakukai' ('The Concert without Title').

Mayuzumi has often collaborated with and provided incidental music for such theatrical groups as the Bungaku-za or the Haiyū-za. In some dramatic ventures he worked with Mishima, whose nationalist ideology was similar to his own; their joint projects included *Bara to kaizoku* ('Roses and Pirates', 1958) and a version of Wilde's *Salome* (1960). He has also composed much music for films, including *Akasen-chitai* ('Red District'), the first Japanese film with electronic music, *Tokyo Olympic*, which won the Mainichi Music Prize for a film score in 1964, and *The Bible* (1965). His two operas, *Kinkakuji* and *Kojiki*, both commissioned by European opera theatres, also reveal his nationalist learnings.

JAMES R. ANTHONY

Montella [Montelli], **Giovanni Domenico** [Mico] (*b* Naples, *c*1570; *d* Naples, Jan 1607). Italian composer, lutenist and organist. Along with Giovanni di Macque, Dentice and Gesualdo he was one of the most important figures in Neapolitan music in the last quarter of the 16th century. He was a lutenist in the academy of Don Fabrizio Gesualdo in the late 1580s and at this period worked in close association with his teacher, Macque. In 1591 Montella became a lutenist in the chapel of the Spanish viceroy in Naples, where from 1599 he again served under Macque, not only as a lutenist but also as an organist. He worked alongside G.M. Trabaci and Ascanio Mayone as well as Macque, an association that seems to have stimulated him to exceptional productivity: all but two of his 19 publications appeared between 1600 and 1607.

Montella published a considerable amount of secular music, of which, unfortunately, only about one half survives complete. None is widely available in modern edition, and his style – apparently central to the Neapolitan school – is thus little studied. The texts of his madrigals have a popular, villanella-like flavour. The madrigals fall into three groups: the first and second books for five

voices (1594–6); the third to the sixth books for five voices (1602–4); and the seventh and eighth books for five voices and the two books for four voices. The first two books, both dedicated to the future King Philip III of Spain, set texts by the well-known poets Tasso and Parabosco, and by local poets, including the earliest setting of the poems of G.B. Marino before their publication in 1602. The second group are characterized by an increased use of chromaticism and bolder dissonance treatment, more closely resembling that of Gesualdo than that of Macque. The newer verse form of the *quinario* appears for the first time in the sixth book. In the final group, Montella moves away from the more chromatic and dissonant style of the second group. These pieces are set in a more popular homophonic style with frequent changes in metre sometimes with short imitative motives to add interest to the texture. The first book of four-voice madrigals published in 1604 gives prominence to the poems of G.B. Marino (set in the first 12 works, followed by a setting in *ottonario* verse by Ansaldo Ceba). The second book for four voices was published posthumously and given over predominantly to the poems of G.B. Guarini. Settings of Marino and Guarini also occur in the last two books of five-voice madrigals. The poems of the Florentine poets Chiabrera and Rinuccini in the eighth book, published posthumously, show an awareness of developments in Northern Italy at the time.

The six three-part laude by 'Mico Montelli' that are found in Giovenale Ancina's *Tempio armonico* (RISM 1599[6]) resemble villanellas in style: occasional imitative passages with the upper voices in 3rds against the bass enliven a basically homophonic texture. Montella's four-part lauda *Se mai vergine pia*, which appeared in 1600 in *Nuove laudi ariose*, sounds a more personal note, expressed through chromaticism and experimental harmonies. The latter tendency is also present in the eight-part polychoral motets and masses of 1600, whose more lyrical aspects set Montella apart from Trabaci and Mayone. The five-part motets of 1603, while more conservative in style, show him to be a master of contrapuntal techniques: in *Terribilis est locus* the outer voices sing a double canon against the cantus firmus in the tenor, and *Ad Dominum cum tribular clamavi* is a strict triple canon. The *Lamentationes* (1602) combine contrapuntal ingenuity with expressive, roving harmonies and appropriate chromaticism.

W. RICHARD SHINDLE/CHIH-HSIN CHOU

Montemezzi, Italo (*b* Vigasio, nr Verona, 31 May 1875; *d* Vigasio, 15 May 1952). Italian composer. He abandoned engineering for music and entered the Milan Conservatory (at the advanced level) in 1896. His diploma work in 1900 was the lyric scena *Cantico dei cantici*, which was conducted in the same year by Toscanini; he also won a prize for his one-act opera *Bianca*. After teaching harmony at the conservatory he competed (unsuccessfully) for the Sonzogno prize with a one-act version of *Giovanni Gallurese*. The three-act version, conducted by his friend Tullio Serafin, was performed in Turin with financial support from well-wishers in Verona, and won considerable acclaim and the support of the publisher Ricordi. Ricordi introduced him to Luigi Illica and commissioned a new opera, *Héllera*, based on Benjamin Constant's *Adolphe*; when performed in 1909, however, it had little success, owing to disagreements between composer and librettist. Montemezzi won lasting fame with *L'amore dei tre re*, performed at La Scala in 1913 (the singers included De Angelis and Galeffi) and at the Metropolitan in the following year. During the war years he wrote *La nave*, adapted by Tito Ricordi from D'Annunzio's play; its first performance coincided with the end of the war, and perhaps the bellicose ideas expressed in the text – verbose and rhetorical, and permeated with sensuousness, sadism and imperialism – made it less acceptable in the postwar years.

Montemezzi continued to compose while engaged mainly in conducting his own works in the most important opera houses, especially in the USA. In 1931 he wrote *La notte di Zoraima*, to a trite libretto with an Inca setting. In 1943 *L'incantesimo*, to a libretto by Sem Benelli with a medieval symbolic subject, was broadcast by NBC; it was not staged until 1952 (in Verona) a few months after the composer's death. From 1939 to 1949 Montemezzi was in the USA, but he returned in his last years to his native Vigasio. An opera based on Edmond Rostand's *La princesse lointaine* was not completed.

From *Giovanni Gallurese* on (despite the opera's Mediterranean setting, typical of *verismo*), Montemezzi's style is directed towards the integration of a typically italianate vocal line into a skilfully and densely written orchestral texture, and can thus be considered as continuing the trend, represented above all by Catalani and Franchetti, towards the absorption into the Italian tradition of certain Wagnerian elements. *L'amore dei tre re* shows clear echoes of *Tristan* in the lovers' rapturous desire for annihilation, but also of *Pelléas* in the presence

of symbolist elements, the impersonality of characters – whose unwitting actions seem to be governed by a fatal destiny – and the trance-like suspended sonorities. The subtle orchestration is indebted to both Wagner and Debussy, while simple thematic references, consisting mainly of rhythmic ostinato figures, carry a leitmotivic function; the plot is advanced through dialogue, the 'hidden arias' typical of early 20th-century Italian opera occurring only rarely. In *La nave* there are also traces of the influence of Richard Strauss. In D'Annunzio's frenzied text, and especially in the hysterical and lascivious central character of Basiliola, who seeks vengeance through seduction, Montemezzi has a chance to create a character reminiscent of Salome and Electra: there are echoes of expressionism in the frequent parlando passages for the chorus and in the animated vocal writing. The later operas add nothing new to Montemezzi's style, and embody a traditional type of drama with a retrospective musical idiom. Among the few non-operatic works of Montemezzi, a certain renown was won by two symphonic poems, *Paolo e Virginia* (from J.H. Bernardin de Saint-Pierre's novel) and *Italia mia! nulla fermerà il tuo canto*, a patriotic elegy for his distant homeland destroyed by fascism.

Montero. Venezuelan family of musicians.

(1) José María Montero (*b* 1782; *d* 1869). Composer and violinist. He studied with J. Luís Landaeta and from 1816 worked with the Venezuelan musicians José de Jesús Alas and Manuel Peña. From 1822 to 1851 his name appeared in account books indicating his service to churches and confraternities in Caracas, such as the church of Altagracia (1822), S Mauricio (1824, 1826, 1842) and Divina Pastora (1842). At Altagracia he worked with the musicians Josef Marquez and Ramón Lozano. In 1824 he was employed by the Confraternity of the Holy Rosary for the important feast of Naval. He also worked for the confraternities of the Blessed Sacrament (1822) and S Juan Bautista (1824, 1826, 1842).

WORKS

Trisagio, 3vv, 1814; 2nd Lesson of the Dead, in honour of Bolívar, 1842; Tono, 3vv, for the Society of S José; Vexilla regis; O sacrum convivium; Pange lingua (Sp.), 3vv; Tono para le fiesta de Nuestra Señora de Candelaria; Libera me; Quae est ista, grad; Salve; Canto a María; Versos a Jesús crucificado; Versos a la virgen del carmen; Aria a la virgen (?spurious); Versos a la virgen para la pesta (?spurious)

(2) José Lorenzo Montero (*b* ?Caracas, *fl* 1842–5). Composer, teacher and music director, son of (1) José María Montero. He formed and directed a music group that was first announced in *El venezolano* on 17 December 1844 and 7 January 1845. The group was qualified to play for churches, theatres, and dances and other occasions. He also collected newly composed Venezuelan music and foreign works. His own compositions are both lyrical and dramatic. He had a penchant for melodic variation, chromatic word-painting and madrigalisms. His works are formally well structured, and there are many points of imitation within the sections. Soloistic writing and pairing of voices contrast with homophonic blocks, and he favoured elided resolutions and mediant shifts.

WORKS

Sacred: Tantum ergo; 3rd Lesson of the Dead, in memory of Bolívar, 1842; Funeral March; Mass of the Dead; Pange lingua; Trisagio; Tollite portes, grad; Ave Maria, off; Credo; Grad for the Holy Cross; Jerusalem; O María, soberana reina del cielo; Salve; Gozos a San Francisco de Paula; Benedicta, grad; Ave maris stella
Other works: March, F; Himno for 5 July; Andante; Patriotic Song for 19 April

(3) Ramón Montero (*b* ?Caracas, ? early 19th century; *d* after 1878). Composer, son of (1) José María Montero. He is mentioned in a document of 17 February 1851. Among the musicians who knew him were Manuel Peña and José de Jesús Alas. His most active years musically were 1863–79, when he was in the employ of Caracas Cathedral as a church musician, receiving payments in

of symbolist elements, the impersonality of characters – whose unwitting actions seem to be governed by a fatal destiny – and the trance-like suspended sonorities. The subtle orchestration is indebted to both Wagner and Debussy, while simple thematic references, consisting mainly of rhythmic ostinato figures, carry a leitmotivic function; the plot is advanced through dialogue, the 'hidden arias' typical of early 20th-century Italian opera occurring only rarely. In *La nave* there are also traces of the influence of Richard Strauss. In D'Annunzio's frenzied text, and especially in the hysterical and lascivious central character of Basiliola, who seeks vengeance through seduction, Montemezzi has a chance to create a character reminiscent of Salome and Electra: there are echoes of expressionism in the frequent parlando passages for the chorus and in the animated vocal writing. The later operas add nothing new to Montemezzi's style, and embody a traditional type of drama with a retrospective musical idiom. Among the few non-operatic works of Montemezzi, a certain renown was won by two symphonic poems, *Paolo e Virginia* (from J.H. Bernardin de Saint-Pierre's novel) and *Italia mia! nulla fermerà il tuo canto*, a patriotic elegy for his distant homeland destroyed by fascism.

Montero. Venezuelan family of musicians.

(1) José María Montero (*b* 1782; *d* 1869). Composer and violinist. He studied with J. Luís Landaeta and from 1816 worked with the Venezuelan musicians José de Jesús Alas and Manuel Peña. From 1822 to 1851 his name appeared in account books indicating his service to churches and confraternities in Caracas, such as the church of Altagracia (1822), S Mauricio (1824, 1826, 1842) and Divina Pastora (1842). At Altagracia he worked with the musicians Josef Marquez and Ramón Lozano. In 1824 he was employed by the Confraternity of the Holy Rosary for the important feast of Naval. He also worked for the confraternities of the Blessed Sacrament (1822) and S Juan Bautista (1824, 1826, 1842).

WORKS

Trisagio, 3vv, 1814; 2nd Lesson of the Dead, in honour of Bolívar, 1842; Tono, 3vv, for the Society of S José; Vexilla regis; O sacrum convivium; Pange lingua (Sp.), 3vv; Tono para le fiesta de Nuestra Señora de Candelaria; Libera me; Quae est ista, grad; Salve; Canto a María; Versos a Jesús crucificado; Versos a la virgen del carmen; Aria a la virgen (?spurious); Versos a la virgen para la pesta (?spurious)

(2) José Lorenzo Montero (*b* ?Caracas, *fl* 1842–5). Composer, teacher and music director, son of (1) José María Montero. He formed and directed a music group that was first announced in *El venezolano* on 17 December 1844 and 7 January 1845. The group was qualified to play for churches, theatres, and dances and other occasions. He also collected newly composed Venezuelan music and foreign works. His own compositions are both lyrical and dramatic. He had a penchant for melodic variation, chromatic word-painting and madrigalisms. His works are formally well structured, and there are many points of imitation within the sections. Soloistic writing and pairing of voices contrast with homophonic blocks, and he favoured elided resolutions and mediant shifts.

WORKS

Sacred: Tantum ergo; 3rd Lesson of the Dead, in memory of Bolívar, 1842; Funeral March; Mass of the Dead; Pange lingua; Trisagio; Tollite portes, grad; Ave Maria, off; Credo; Grad for the Holy Cross; Jerusalem; O María, soberana reina del cielo; Salve; Gozos a San Francisco de Paula; Benedicta, grad; Ave maris stella
Other works: March, F; Himno for 5 July; Andante; Patriotic Song for 19 April

(3) Ramón Montero (*b* ?Caracas, ? early 19th century; *d* after 1878). Composer, son of (1) José María Montero. He is mentioned in a document of 17 February 1851. Among the musicians who knew him were Manuel Peña and José de Jesús Alas. His most active years musically were 1863–79, when he was in the employ of Caracas Cathedral as a church musician, receiving payments in

CAROLYN GIANTURCO/TERESA M. GIALDRONI

Montesano, Alfonso (*b* ?Maida, ?1595–1605; *d* ?Naples, ? after 1624). Italian composer. He dedicated his only extant music, *Madrigali a cinque voci ... libro primo* (Naples, 1622[13]), to Marc'Antonio Loffredo, Prince of Maida, and one madrigal in the book to Loffredo's son Francesco. The 18 pieces, which include settings of poems by Guarini, Marino, G.B. Strozzi and Petrarch, have the usual features of the Neapolitan *seconda pratica* madrigal – chordal declamatory phrases, points of close imitation and slow *durezze e ligature* – but Montesano combined them in a less disjunct, contrasting and expert manner than did, for example, Lacorcia or Agresta. The three madrigals by Francesco Genuino also in the book only heighten the impression of Montesano's compositional inexperience suggested by occasional awkward, inexpressive clashes of seconds, maladroit harmonic progressions (both the result of inexpert part-writing) and trite imitative motifs. There are a few effective examples of chromaticism in the manner of Gesualdo. A list appended to a letter of Schütz's mentions a second and third book of five-part madrigals by Montesano (see E.H. Müller, ed.: *Heinrich Schütz: Gesammelte Briefe und Schriften* (Regensburg, 1931/*R*), 117–18), but they cannot now be traced.

KEITH A. LARSON

Montesardo [Melcarne, ?Muscarini], **Girolamo** [Monsardus, Montesarduus, Hieronymus] (*b* Montesardo, nr Alessano; *fl* 1606–*c*1620). Italian composer and singer. He was a member of the clergy. The name Montesardo refers to his place of origin; his real surname was Melcarne. In 1606 his first surviving (though clearly far from his first) work was published in Florence, and on 11 April 1607 he was engaged as a singer at S Petronio, Bologna, where he remained until September at a monthly salary of six lire. From 16 January to 16 November 1608 he served as *maestro di cappella* at Fano, and in 1609 he held the same post at Ancona Cathedral. By 1611 he was living in Naples, and it is likely, though not certain, that he was *maestro* at Lecce in 1619. He is remembered chiefly for having devised (according to his claim) a simple alphabet notation of chords for use in RASGUEADO playing of the five-course guitar, probably based on a similar system already in use in Spain (*see* GUITAR, §4; TABLATURE, §4. This notation was widely popular in Italy through much of the 17th century and was used for song accompaniments as well as for solo playing. The *Nuova inventione*, in which Montesardo's system is presented, contains such popular dances and harmonic patterns as the Ruggiero, *bergamasca*, folia and *Ballo del gran duca*. It is the first Italian publication to include *ciaccone* and passacaglias; the latter are equated in meaning with ritornellos. Although Montesardo seems to have composed mostly polyphonic church music and madrigals, he occupies a curious position in the early history of monody. His *L'allegre notti di Fiorenza*, dedicated to Pier Francesco Bardi, is organized into musical 'evenings' which are supposed to have taken place in the various *piazze* of Florence. It includes, in addition to Montesardo's own experiments in the new style (plus pieces for two to four voices and continuo), solo songs by Jacopo Peri and Giulio Caccini and four-voice madrigals by other composers active in the city. *I lieti giorni di Napoli*, too, shows strong Florentine connections in its prologue, which is similar in poetry and music to those of the earliest operas, and in its settings of poems by Chiabrera; indeed, it may be seen as the earliest attempt to introduce the new monodic style to Naples. The publication also contains, among a variety of pieces, an echo song and three puzzle canons. A Gervasio Melcarne, two of whose madrigals appear in Nenna's eighth book of madrigals for five voices (1618), may be the same person.

WORKS

El pr. libr. de la canciones villanellas (Venice, 1606), lost, mentioned in *GöhlerV*
Nuova inventione d'intavolatura per sonare li balletti sopra la chitarra spagnuola senza numeri e note (Florence, 1606)
Ecclesiastici concentus, 1–8vv, bc, op.8 (Venice, 1608)
L'allegre notti di Fiorenza ... dove intervengono i più eccellenti musici di detta città, 1–5vv (Venice, 1608)
Madrigali in due stili (Venice, 1609), lost, mentioned in *PitoniN*
I lieti giorni di Napoli: concertini italiani in aria spagnuola con le lettere dell'alfabeto per la chitarra, 1–3vv, op.11 (Naples, 1612/*R*)
Amphiteatrum angelicum divinarum cantionum, 1–8vv, op.12 (Venice, 1612)
Paradiso terrestre con motetti diversi e capriciosi, 1–5vv (Venice, 1619), lost, mentioned in *GerberL*
Motetti, 2–4vv, lost, listed in *MischiatiI*
Vespri, 4vv, con messa, lost, listed in *MischiatiI*, probably the work mentioned in *WaltherML* as pubd before 1653
2 motets, 8vv, 1613[2]; Puer qui natus est nobis, mentioned in *EitnerQ* as MS at Breslau, is probably the first of these
2 motets, 3vv, 1616[2]; 1 each repr. in 1623[2] and 1627[1]

THOMAS WALKER/TIM CARTER

Montesarduus, Hieronymus. *See* MONTESARDO, GIROLAMO.

Montes Capón, Juan (*b* Lugo, 13 April 1840; *d* Lugo, 24 June 1899). Spanish composer, organist and conductor. He completed his ecclesiastical studies at the Seminario Conciliar de S Lorenzo in Lugo (1850–63), but chose music as his profession. He served as pianist for two music societies in Lugo and in 1876 founded the city's municipal band. Three years later he founded the Orfeón Lucense choral society, which achieved immediate acclaim; in 1887 the society became the Orfeón Gallego, for which Montes earned numerous prizes, including first and second prizes at the Gran Concurso Internacional de Orfeones in Bilbao (1892). He was also choirmaster and second organist at Lugo Cathedral for many years, and founder and director of the Schola Cantorum of the Seminario Conciliar.

As a composer Montes was the only Spaniard to win three first prizes at the same competition (in La Coruña in August 1890). He collaborated on two folksong collections, the *Cancionero musical de Galicia* (with C. Sampedro Folgar) and the *Cancionero musical popular español* (with F. Pedrell), and had an intimate knowledge not only of Galician folk music but also of the music of other regions of Spain. His most outstanding compositions are his *6 baladas* for voice and piano, of which *Negra sombra*, a setting of a poem by the Galician poet Rosalía de Castro, was performed throughout Europe and Latin America at the beginning of the 20th century. Among the best of his other secular works are the orchestral *Fantasía*, *Maruxiña* (a *muiñeira* for voice and piano), *Alborada gallega*, written for the Lugo municipal band, and the *Sonata descriptiva gallega* for string quartet. He also wrote almost 200 sacred works, of which the *Oficio de Difuntos y Misa de Requiem* and *Misa en Honor del Apóstol Santiago* are especially notable. His collected works, edited by J. López-Calo, have appeared as *Obras musicales de Juan Montes* (Santiago de Compostela, 1991–9).

JUAN BAUTISTA VARELA DE VEGA

Montesdoca, Martín de (*b* Utrera, nr Seville, 1525/6; *d* ?Yçalco [now Izalco, El Salvador], after 1583). Spanish music printer. He studied at the Colegio de María de Jesús at Seville, but after his father's death in 1547 he returned home; within two months he married a wealthy distant cousin, resident at Seville, and had two children, Pedro (*b* 1548) and Leonor (*b* 1552). He signed a contract on 27 April 1551 with the type founder and printer Antonio de Espinosa, who was leaving for Mexico City. On 8 May 1551 he rented a shop in Seville from the book dealer Francisco Gutiérrez, who on 1 November 1559 bought Montesdoca's press and began printing music in 1560.

On 29 March 1554 MIGUEL DE FUENLLANA's father-in-law, the Sevillian physician Juan de Salazar, signed a contract with Montesdoca for the printing of 1000 copies of the important vihuela tablature, the *Orphenica lyra* (colophon date, 2 October 1554). When an unscrupulous employee ran off additional copies, Fuenllana had to send a scout throughout Spain in search of the pirated copies.

Montesdoca also published the five partbooks of Francisco Guerrero's *Sacrae cantiones*. Again, the contract signed on 23 August 1555 illustrates the conditions of printing Guerrero's first collection (sole complete partbooks are in *US-NYhsa*). In 1556 Montesdoca published the first polyphonic choirbook issued in Spain, Juan Vasquez's *Agenda defunctorum* (copies in *E-Bbc* and *E-V*).

After his wife's death in 1557, Montesdoca was ordained priest, and in January 1561 contracted the removal of himself with at least one of his children (Pedro) to Honduras. Assigned first to minister at Tuxtla (Chiapas), he was installed as *chantre* in Guatemala City Cathedral by 17 October 1572. His years at the cathedral overlapped with those of Hernando Franco (*maestro de capilla* by about 1570). In 1584 Montesdoca resigned as *chantre* and settled as a curate at Yçalco.

ROBERT STEVENSON

Monteux, Pierre (*b* Paris, 4 April 1875; *d* Hancock, ME, 1 July 1964). American conductor of French birth. He was the father of Claude Monteux. He began learning the violin when he was six and at the age of nine entered the Paris Conservatoire, where he studied the violin with Maurin and Berthelier, harmony with Lavignac and counterpoint with Lenepveu; in 1896 he shared with Thibaud a *premier prix* for violin. When he was 12 he conducted an orchestra in Paris and elsewhere with Cortot as soloist, and in 1890, while still a student, he was engaged as violist at the Opéra-Comique (where he led his section at the première of *Pelléas et Mélisande*), and for the Concerts Colonne, of which he became assistant conductor and choirmaster in 1894. That year he also joined the Quatuor Geloso as violist, remaining with it until 1911; he took part in a performance of a Brahms quartet in the composer's presence. He was conductor of the Orchestre du Casino at Dieppe, 1908–14, and conducted at the Paris Opéra in the 1913–14 season. In 1911, as well as founding the Concerts Berlioz, Monteux was appointed conductor of Diaghilev's Ballets Russes, and thereby became responsible, between 1911 and 1914, for the premières of *Petrushka*, *The Rite of Spring* and *The Nightingale*, *Daphnis et Chloé* and *Jeux*. Each was an outstanding contribution to 20th-century music and dance, and brought Monteux into close contact with Debussy, Ravel, Stravinsky and other composers, giving him the basis of his lifelong support and understanding of their music in particular, as well as of French music in general.

Recalled from wartime military service, Monteux went in 1916 to the USA and took up a post at the Metropolitan Opera (1917–19) in charge of the French repertory. Among other works he conducted the American première of *The Golden Cockerel*. He moved to the Boston SO in 1920, where he introduced a number of recent works to

Pierre Monteux

the repertory – mostly French (Debussy, Chausson, Milhaud and others), but also including Bliss, Bridge, Falla, Malipiero, Schreker and Szymanowski. In 1924 he returned to Europe as second conductor (under Mengelberg) of the Amsterdam Concertgebouw Orchestra, and remained with the orchestra for ten years. In addition, he formed the Orchestre Symphonique de Paris in 1929 and conducted it until 1938, giving a large number of first performances, including Prokofiev's Symphony no.3 (1929). Always concerned with young talent, he founded the Ecole Monteux at Paris in 1932 for the coaching of conductors, and continued this work later at the Monteux (originally Domaine) School at Hancock, Maine (his pupils included Erich Kunzel, Neville Marriner, Lorin Maazel and André Previn). He had returned to the USA in 1936 as conductor of the San Francisco SO, a post he held until 1952; during this period he raised the standard of the orchestra to an international level. He took American nationality in 1942. He was a regular guest conductor with the Boston SO from 1951 and the Metropolitan Opera from 1953 to 1956. In spite of his numerous highly praised recordings, he once said that he hated all the records he made because of the lack of spontaneity in the technique of recording. He preferred live concerts and remained active to an advanced age, accepting his final appointment in London in 1961 as chief conductor of the LSO at the age of 86, on a contract for 25 years with an option for renewal. In this capacity he conducted *The Rite of Spring* in London in 1963 on the 50th anniversary of its Paris première, and gave noble performances of the German repertory, especially Brahms, and a varied selection of English works. His many memorable recordings with the LSO include Berlioz's *Roméo et Juliette*, Brahms's Symphony no.2, Dvořák's Symphony no.7, Elgar's 'Enigma' Variations and works by Debussy and Ravel.

Monteux was never an ostentatious conductor, preparing his orchestra in often arduous rehearsals and then using small but decisive gestures to obtain playing of fine texture, careful detail and powerful rhythmic energy, retaining to the last his extraordinary grasp of musical structure and a faultless ear for sound quality. He was a Commandeur of the Légion d'Honneur and a Knight of the Order of Oranje Nassau.

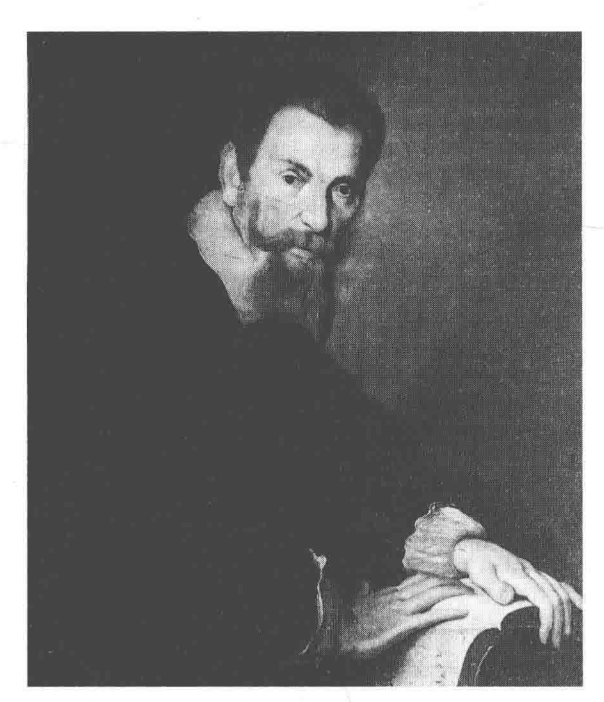
MARTIN COOPER, JOSÉ BOWEN, CHARLES BARBER

Monteverdi [Monteverde], **Claudio** (**Giovanni** [Zuan] **Antonio**) (*b* Cremona, 15 May 1567; *d* Venice, 29 Nov 1643). Italian composer. The most important musician in late 16th- and early 17th-century Italy, he excelled in nearly all the major genres of the period. His nine books of madrigals consolidated the achievement of the late Renaissance masters and cultivated new aesthetic and stylistic paradigms for the musical Baroque. In his operas for Mantua and Venice he took the experiments of the Florentines and developed powerful ways of expressing and structuring musical drama. His three major collections of liturgical and devotional music transcend the merely functional, exploiting a rich panoply of text-expressive and contrapuntal-structural techniques. Although he composed little or no independent instrumental music, his writing for instruments was genuinely innovative. Schrade's famous assessment (1950) of Monteverdi as 'creator of modern music' may be exaggerated, but his significant place in music history is assured.

1. CREMONA. Monteverdi was baptized (on 15 May 1567) in SS Nazaro e Celso, eldest son of an apothecary, surgeon and doctor, Baldassare (*b c*1542), and Maddalena Zignani (they married in early 1566). Baldassare had four sons and two daughters by Zignani and his second wife, Giovanna Gadio (married 1576/7); a third marriage, to Francesca Como in 1583, was childless. Claudio's younger brother Giulio Cesare (bap. 31 Jan 1573) also became a musician.

The young Monteverdi was precocious, publishing his first collection, the three-voice *Sacrae cantiunculae* (dedication dated 1 August 1582) at the age of 15. In it he styled himself 'discepolo' of Marc'Antonio Ingegneri, the *maestro di cappella* of Cremona Cathedral, whose teaching he honoured in four further publications. These lessons may have been private: there is no record of Monteverdi singing in the cathedral choir. But Ingegneri, a fluent composer, gave his pupil careful training in counterpoint and text-setting by way of three-voice motets, four-voice spiritual madrigals, three-voice canzonettas and two books of five-voice madrigals. Presumably Monteverdi had vocal lessons – he later taught singing – and certainly tuition on string instruments (the viol and *viola da braccio*). He was ambitious, publishing his music

in Venice with the presses of Angelo Gardane (the motets and five-voice madrigals) and Giacomo Vincenti and Ricciardo Amadino (the canzonettas): only the spiritual madrigals were issued locally, in Brescia. When old enough to seek employment, he looked first to Verona (his first book of five-voice madrigals was dedicated on 27 January 1587 to Count Marco Verità, a prominent patron there) and then to Milan, where he played the *viola da braccio* for Giacomo Ricardi, to whom he dedicated his second book (the last to mention Ingegneri) on 1 January 1590. Finally, he was appointed 'suonatore di vivuola' to Vincenzo I Gonzaga, Duke of Mantua.



2. MANTUA. Monteverdi moved to nearby Mantua in 1590 or 1591. The Gonzagas employed a select band of musicians for court service headed by the renowned Giaches de Wert, whose influence is immediately apparent in Monteverdi's third book of madrigals, dedicated to Duke Vincenzo on 27 June 1592. Poets and artists associated with Mantua and nearby Ferrara (the Gonzagas were closely allied with the Este dukes) also offered a fertile environment: verse by Tasso and in particular Guarini (whose famous *Il pastor fido* was mooted for performance in Mantua in the early 1590s) had a powerful influence, as did the musical environment of Ferrara and its virtuoso singers. The third book also consolidated an association with the Venetian printer Ricciardo Amadino which lasted over 20 years.

In Mantua Monteverdi began low down in the ranks as he learnt the trade of the court musician, a position emphasized by his marriage (on 20 May 1599) arranged with the court singer Claudia Cattaneo, daughter of his colleague in the string band, Giacomo. But Monteverdi's reputation was on the increase: four of his canzonettas were published by Antonio Morsolino (RISM 1594[15]), and three years later six madrigals were printed in *Fiori del giardino* (Nuremberg, 1597[13]). His music was now being sent to Ferrara (four canzonettas in late 1594) and he would have dedicated his next book of madrigals to Alfonso II d'Este had the duke not died in late 1597. Monteverdi was well enough respected to head the three other musicians accompanying Duke Vincenzo on his expedition to Hungary (June–November 1595) against the Turks – where he may have met the Florentine patron and theorist Giovanni de' Bardi – and to form part of his retinue on a tour to the Flemish town of Spa in June–October 1599, where Monteverdi reportedly discovered the 'canto alla francese' (the meaning remains unclear). He was probably among the musicians accompanying Duke Vincenzo to Florence for the festivities celebrating the wedding of Maria de' Medici and Henri IV in October 1600, including Jacopo Peri's opera *Euridice*. His failure to succeed Wert in 1596 – the post went to the older Benedetto Pallavicino – was probably more a matter of precedence than of talent.

Guarini's *Il pastor fido* finally received three performances in Mantua in 1598, the last on 22 November before the visiting Margherita of Austria, bride of Philip III of Spain; the wedding had been celebrated in Ferrara the week before (Philip III was represented by proxy), with Duke Vincenzo (Margherita's cousin) acting as host. Her visit to Ferrara coincided with the performances of madrigals by Monteverdi and other moderns sponsored by the dilettante Antonio Goretti which prompted the so-called Artusi–Monteverdi controversy. Giovanni Maria Artusi, a Bolognese canon and conservative music theorist, launched his attack in his *L'Artusi, overo Delle imperfettioni della moderna musica* (1600), followed by the *Seconda parte dell'Artusi* (1603). His sights were set not just on Monteverdi – the theorist Ercole Bottrigari is treated more harshly – but the young composer was an easy target. *L'Artusi* cites passages from anonymous madrigals later published by Monteverdi (in his fourth and fifth books), criticizing their irregular dissonances and modal improprieties. Monteverdi was initially defended (according to the *Seconda parte dell'Artusi*) by an unknown academic styled 'L'Ottuso'. He himself entered the fray with a postface to his fifth book (1605), glossed in the *Dichiaratione*appended by Giulio Cesare Monteverdi to his *Scherzi musicali* (1607), as a manifesto of the 'second practice'. Here he promised a treatise entitled *Seconda pratica, overo Perfettione della moderna musica*.

Monteverdi was no theorist, and his references to humanist musical thought appear both casual and opportunistic. But the notion of two practices, the first with music as mistress of the oration and the second with oration as mistress of the music, justified contrapuntal licence in the service of text expression and permitted different styles to co-exist for different ends, offering a remarkable solution to the aesthetic dilemmas of the late Renaissance. Artusi responded (as Antonio Braccino da Todi) in two further treatises (only one of 1608 survives) but softened his tone. The controversy scarcely damaged Monteverdi's career, even if it may have contributed to the 11-year gap between the publication of the third and the fourth books of madrigals (although the third book was meanwhile reprinted three times). Indeed, after the death of Pallavicino on 26 November 1601, Monteverdi was finally appointed Duke Vincenzo Gonzaga's *maestro della musica*. He was granted Mantuan citizenship on 10 April 1602 and moved to a house nearer the ducal palace (in the parish of S Pietro); he also celebrated his promotion in the title-pages of his fourth book of madrigals (dedicated to the Accademia degli Intrepidi, Ferrara, 1 March 1603) and his fifth (to Duke Vincenzo Gonzaga, 30 July 1605).

Monteverdi was now known as far away as Copenhagen (six madrigals were included in two anthologies by Melchior Borchgrevinck, RISM 1605[7] and 1606[5]); and the Italian poet Tommaso Stigliani included a madrigal in his praise (*O sirene de' fiumi, adorni cigni*) in his *Rime* (Venice, 1605). His court duties included teaching (the virtuoso tenor Francesco Campagnolo and, from mid-1603, the young soprano Caterina Martinelli), the direction of a female vocal ensemble, and theatrical composition, with a ballo, *Gli amori di Diana ed Endimione*, for Carnival 1604–5, and the opera *Orfeo* commissioned by Prince Francesco Gonzaga, heir to the throne, for Carnival 1606–7. *Orfeo* was performed before the Accademia degli Invaghiti on 24 February 1607 and repeated at least once at court (on 1 March; a third performance was also planned). Monteverdi's friend Cherubino Ferrari, author of two encomia in the fifth book of madrigals, praised it highly when the composer visited Milan in August, and the score was published in Venice in 1609 (dedicated to Francesco Gonzaga on 22 August). There were also several performances in Salzburg between 1614 and 1619, probably due to the presence there of the virtuoso tenor Francesco Rasi, who had sung the title-role in Mantua.

1. Claudio Monteverdi: portrait by Bernado Strozzi, 1630–43 (Tiroler Landsmuseum Ferdinandeum, Innsbruck)

After sending off his *Scherzi musicali* (dedicated to Francesco Gonzaga on 21 July 1607), Monteverdi returned to Cremona; his wife was ill and receiving care from his father. He was still composing, sending a sonnet setting to Duke Vincenzo in Genoa on 28 July and promising another; both were perhaps included in the sixth book of madrigals. His increasing fame is clear: the first four madrigal books were reprinted in Venice (the fifth was already in its better second edition); he was admitted to Cremona's Accademia degli Animosi on 10 August 1607; and spiritual contrafacta of his madrigals by Aquilino Coppini were published in Milan in early September (two more volumes followed in 1608 and 1609). But Claudia's death on 10 September (she was buried in SS Nazaro e Celso) was a grievous blow, leaving him sole guardian of three children (another daughter died shortly after birth): Francesco Baldassare (bap. 27 Aug 1601), Leonora Camilla (bap. 20 Feb 1603) and Massimiliano Giacomo (bap. 10 May 1604). He was deeply reluctant to return to Mantua but received a formal summons from the court official Federico Follino (24 September) 'to acquire the greatest fame which a man may have on earth' in the forthcoming festivities celebrating the wedding of Prince Francesco Gonzaga and Margherita of Savoy.

Monteverdi was to compose some of the *intermedi* accompanying Gabriello Chiabrera's play *L'idropica*, a sung and danced *Ballo delle ingrate*, and a new opera, *Arianna*. He probably started working on *Arianna* in late October 1607, when its librettist Ottavio Rinuccini visited Mantua (he arrived on the 23rd). Monteverdi now faced competition from the Florentine Marco da Gagliano, brought to Mantua by the melomane Prince (from December 1607 Cardinal) Ferdinando Gonzaga: Gagliano's *Dafne* was performed in Carnival 1607–8, and Monteverdi wrote bitterly (on 2 December 1608) of the rewards gained by his rival. Both *Arianna* and the *Ballo delle ingrate* were revised by order of Duchess Eleonora Medici-Gonzaga: she had a competitive eye on the wedding celebrations currently being prepared in Florence. A crisis was also caused in early March by the death from smallpox of the young soprano Caterina Martinelli, who was to have played Arianna: she was replaced by the renowned actress Virginia Ramponi-Andreini ('La Florinda'), a member of the Comici Fedeli contracted to perform in the Mantuan celebrations. The opera, staged on 28 May, was a great success, with Andreini moving the audience to tears in Arianna's lament, the only section of the opera that survives. It is possible that the lament had been added to the opera specifically to cater for Andreini's talents.

Monteverdi returned exhausted to Cremona, and although he sent a new madrigal back to Mantua (perhaps to Cardinal Ferdinando) on 26 November, he was in a state of nervous collapse. In November–December 1608 first his father and then he himself tendered his resignation: responding to a direct command to return in order to provide music for a 'balletto' for Carnival 1608–9, Monteverdi wrote a rancorous letter to the duke (2 December) deploring his mistreatment. Duke Vincenzo responded, confirming an annual pension of 100 scudi on 19 January 1609 and increasing his salary to 300 scudi (plus 35 scudi for housing) one week later; securing regular payment of the pension was to trouble Monteverdi until his death. Thus he was back in harness: in summer 1609 he composed music for the duke and auditioned potential court musicians; in early 1610 he sent a score of *Orfeo* to Prince Francesco Gonzaga in Turin; and in early summer 1610 the arrival in Mantua of the virtuoso soprano Adriana Basile prompted a flurry of compositions, including the *Sestina* SV111 and the polyphonic *Lamento d'Arianna* SV107 later included in the sixth book of madrigals. However, he remained restless. The publication of his *Missa ... ac vespere* (SV205–6, dedicated 1 September 1610) was followed by a trip to Rome, via Florence, to present the volume to its dedicatee, Pope Paul V. He said that the trip was to secure a place at the Seminario Romano for his son Francesco, but his secretive behaviour raised suspicions that he was seeking another post and sowed seeds of considerable doubt concerning his loyalty to the Gonzagas.

Nothing came from Rome. Monteverdi's subsequent enthusiasm for the Friday evening concerts in the Gonzaga palace, described in letters to Cardinal Ferdinando of December 1610 and January 1611, and his sending an eight-voice *Dixit Dominus* and other music to Prince Francesco on 26 March 1611 may have sought to placate his employers. His third, fourth and fifth madrigal books were again reprinted in 1610–11 (and the 1610 *Missa 'In illo tempore'* in Antwerp in 1612). But the performance of psalms by Monteverdi in Modena at Christmas in 1611 reportedly went down badly, and things soon became still worse. When Francesco Gonzaga became duke on Vincenzo's death (18 February 1612) he reduced his lavish court. That, as well as intrigue from Cardinal Ferdinando's favourite musician Santi Orlandi and further signs of dissent from Monteverdi, led to the abrupt dismissal of him and his brother on 29 July. Monteverdi returned to Cremona (with only 25 scudi to his name, he claimed) and then visited Milan (rumours of a disastrous performance in the cathedral there were countered by Alessandro Striggio). The sudden death of Duke Francesco

on 22 December 1612 and the accession of Cardinal Ferdinando as regent further favoured Orlandi, now *maestro di cappella*. Only by luck did things turn for the better in mid-1613. Giulio Cesare Martinengo, *maestro* of S Marco, Venice, died on 10 July, and Monteverdi auditioned for his post on 1 August, providing music for a Mass. He was appointed on 19 August 1613 at a salary of 300 ducats, and arrived in Venice in early October after an eventful journey from Mantua including highway robbery.

3. VENICE. Monteverdi proclaimed his new position in his sixth book of madrigals, published in mid-1614 (significantly with no dedicatee). S Marco was certainly prestigious given its central role in Venetian ritual, although the famous musical establishment had been run down by ineffective *maestri*: Monteverdi reorganized the *cappella*, restocked its library (in 1614 he purchased partbooks by Palestrina, Soriano and Lassus among others) and recruited new musicians. The fact that his letters to Mantua so emphasize his good working conditions in Venice may have been a challenge to his former employers. But his composing and performing duties were well defined, and many could be delegated to assistants; he was respected and well treated; his good salary was regularly supplemented *ex gratia*; and there were rich pickings from freelance work in the city.

Monteverdi's duties for S Marco can be gauged from his letters and other sources; where we have precise details they are clearly the tip of the iceberg. As far as special feasts are concerned, he was required to direct, and often to compose, music for Holy Week and Easter (1615, 1619), the Feast of St Mark (25 April 1627), the Feast of the Holy Cross (3 May 1618), Ascension Day (Mass and Vespers, plus a cantata for the ceremony of the wedding of Venice to the sea; 1618), the Feasts of the Redeemer (1620) and St Justina (the anniversary of the victory at Lepanto; 7 October 1627), All Saints' Day (1620), and Mass and Vespers on Christmas Eve (1616, 1627, 1633). He provided music for four state banquets each year (as on St Vitus's Day, 15 June, in 1623 and 1626) and for other Venetian churches: Vespers in S Giovanni Elemosinario on 24 June 1620; for the Feast of St Charles Borromeo celebrated by the Milanese community in S Maria Gloriosa dei Frari on 4 November 1620 (similarly in 1635); a Requiem Mass for Grand Duke Cosimo II de' Medici sponsored by the Florentine community in SS Giovanni e Paolo on 25 May 1621 (the description by Giulio Strozzi is the earliest evidence of a close relationship with this Venetian poet); and for the patronal feast of the Scuola Grande di S Rocco at least in August 1623 and 1628. The procurators of S Marco were pleased with their appointment: Monteverdi's salary was increased to 400 ducats on 24 August 1616.

Ferdinando Gonzaga may have felt some remorse when, in December 1613, Prince Francesco de' Medici asked him for a copy of *Arianna*; certainly the cardinal (from 1616 duke) appears to have regretted the loss of so distinguished a composer, making several efforts to encourage him to return to Mantua. He also regularly commissioned music from Monteverdi, who was happy to use his Venetian duties as an excuse but could not always refuse: he was still a Mantuan citizen and subject. The ballo *Tirsi e Clori* (later included in the seventh book of madrigals) was performed in Mantua in January 1616; and although the proposed *intermedi*, *Le nozze di Tetide*, for the wedding of Duke Ferdinando and Caterina de' Medici (February 1617) remained unfinished, Monteverdi set the prologue to Giovanni Battista Andreini's *La Maddalena*, a *sacra rappresentazione* performed as part of the celebrations. A libretto received from Mantua in spring 1618, Ercole Marigliani's (Marliani) *Andromeda*, was eventually staged in Carnival 1619–20 (with another ballo, *Apollo*) and on 13 December 1619 Monteverdi dedicated to Duchess Caterina his seventh book of madrigals, for which he hoped to gain an endowment for his pension; he received a necklace instead. Plans to celebrate Caterina's birthday on 2 May 1620 with a performance of *Arianna* came to naught, but he wrote music for Carnival 1620–21 and set at least two of the *intermedi*for Marigliani's *Le tre costanti*, performed in early 1622 to celebrate the marriage of Eleonora Gonzaga and Emperor Ferdinand II.

Monteverdi maintained contacts elsewhere in Italy. In 1614 he sent a copy of his sixth book and other music to the poet Angelo Grillo (Livio Celiano), a correspondent from Mantuan times; he was invited by Rinuccini to visit Florence in 1617; in 1619–20 he acted as agent for Paolo Giordano Orsini, Duke of Bracciano, to print Francesco Petratti's *Il primo libro d'arie*; on 13 June 1620 he attended a meeting of Adriano Banchieri's Accademia dei Floridi in Bologna (he became an honorary member of its successor, the Filomusi, in 1625 or 1626); and in 1623–4 he sent music to Cesare d'Este, Duke of Modena. He also cultivated several Venetian patrons: the lament from *Apollo* was performed in the palace of Giovanni Matteo Bembo in January 1620; in March 1620 he noted his regular service in the private oratory of Marc'Antonio Cornaro; in October 1622 Lorenzo Giustiniani had him recruit Andreini's *commedia* troupe; and the *Combattimento di Tancredi e Clorinda*SV153 was performed in 1624 during a carnival entertainment sponsored by Girolamo Mocenigo (i.e. Carnival ?1624–5).

The *Combattimento* was published only in Monteverdi's eighth book of madrigals of 1638. With the sixth book of 1614, the seventh of 1619, the *Lamento d'Arianna* of 1623 and the 1632 *Scherzi musicali*, Monteverdi's rate of publication was now much slower: he no longer needed to make his name through print. However, the earlier madrigal books were regularly reprinted both in Venice (Bartolomeo Magni, printer of the seventh book, reissued books 1–7 in 1620–22) and in Antwerp (Pierre Phalèse reprinted books 3–5 in 1615). Single works were also included in collections emanating from Lombardy (Ala, 1618; Giulio Cesare Bianchi, Monteverdi's former pupil, RISM 1620[3], 1620[4]; Calvi, 1620–21 (= 1621[4]), 1624[2], 1626[3], 1629[5]), from Rome (Sammaruco, 1625[1]) and Naples (Sabino, 1627[4]), from the Veneto (Lappi, 1623; Anselmi, 1624[11]) and from north of the Alps (Gruber, 1615[2]; Bonometti, 1615[13]; Donfrid, 1622[2], 1627[1]), as well as in some produced by Venetian colleagues and associates (Giovanni Battista Camarella, ?1623; Carlo Milanuzzi, repr. 1624; Leonardo Simonetti, 1625[2]). Curiously, Monteverdi did not publish any large-scale sacred collection until the retrospective *Selva morale e spirituale* of 1640–41; much sacred music must also be lost.

Monteverdi's father died on 10 November 1617, and his father-in-law on 24 April 1624; legal disputes ensued over Cattaneo's estate, including a house and 19 instruments. His own sons Francesco and Massimiliano caused

some anxiety. In 1619 he moved Francesco, who was studying law at the University of Padua, to Bologna for spending too much time in musical circles. Massimiliano was also enrolled in the seminary in Bologna in 1619 and from 1621–2 as a medical student; he graduated in 1626 and moved to Mantua, only to be arrested by the Inquisition in September 1627 for reading prohibited material (Monteverdi sold for bail the necklace received for the seventh book of madrigals): the case dragged on for over a year.

Although he sought to give the impression of being happy in Venice – moving swiftly to dispel rumours in 1620 of a return to Mantua on the death of Santi Orlandi – Monteverdi was tempted by offers elsewhere. Indeed, he may still have hankered after a court appointment, for all his difficulties in Mantua. In July 1623 Antonio Taroni, a former Mantuan musician now in the service of King Sigismund III of Poland, noted that Monteverdi had differences of opinion with his employers (and, it seems, his colleagues) and offered him a salary of 1000 scudi plus other emoluments to move to Poland; Monteverdi went as far as to have Taroni write to Duke Ferdinando Gonzaga for permission for him to leave Italy. The Polish offer may have been repeated on the visit to Venice of Crown Prince Władisław Sigismund in March 1625: Monteverdi wrote a mass for his visit to S Marco and was involved in private music-making for the prince. In August 1627 he was involved in intrigue to gain the commission for the wedding festivities of Odoardo Farnese, Duke of Parma, and Margherita de' Medici; he then spent long periods in Parma working with his assistant Antonio Goretti on six *intermedi* and a tournament (he also produced a mascherata for Carnival 1627–8). The festivities eventually took place in December 1628, and with some success despite the cold weather. His developing association with the Habsburgs in Vienna, fostered perhaps by the presence of Mantuan musicians there encouraged by Eleonora Gonzaga, may also reflect a desire to return to court. Not surprisingly, the procurators were anxious, ordering his return from Parma in November 1627 and December 1628. He was also denounced anonymously for expressing pro-Habsburg sympathies some time after 1623.

Otherwise, Monteverdi settled in to a quiet middle age, dabbling in alchemy in 1625–6, editing Arcadelt's four-voice madrigals (Rome, 1627), and welcoming foreign musicians, including Heinrich Schütz on his second visit to Venice (1628–9): Schütz honoured Monteverdi in *Es steht Gott auf* – reworking *Armato il cor d'adamantina fede* and *Zefiro torna, e di soavi accenti* – published in his *Symphoniarum sacrarum secunda pars* (1647). Monteverdi continued to compose: the dramatic cantata *Armida abbandonata* (1626–7); chamber music for the English ambassador and music for the Feast of Our Lady of Mount Carmel, both on 17 July 1627; music for a banquet in Chioggia on 22 September 1627; five sonnets by Giulio Strozzi (*I cinque fratelli*) in honour of Grand Duke Ferdinando II and Prince Giovanni Carlo de' Medici for a banquet in the Arsenale on 8 April 1628; music for nuns at S Lorenzo in early 1630; a canzonetta probably for Enzo Bentivoglio sent on 9 March 1630; and the short opera *Proserpina rapita* for the wedding of Lorenzo Giustiniani and Giustiniana Mocenigo in April 1630. Commissions from Mantua slowed down with the death of Duke Ferdinando Gonzaga on 29 October 1626: an opera, *La finta pazza Licori*, was commissioned shortly after the accession of Duke Vincenzo II but little progress was made on its music. Thoughts also turned to the need for financial security: he repeatedly petitioned for the Mantuan pension, and in September 1627 he made the first of several attempts to gain a canonry in Cremona to secure an annual income.

The War of the Mantuan Succession and the sack of Mantua by plague-bearing Imperial troops on 18–21 July 1630 sent shock waves throughout Italy. A Mantuan delegation headed by Monteverdi's old associate Alessandro Striggio arrived in Venice, unwittingly infecting the city: almost 50,000 inhabitants had died by autumn 1631. The Venetians planned a new church in intercession: the ceremonial foundation of S Maria della Salute on 1 April 1631 involved music by Monteverdi, and his mass to celebrate the cessation of plague (21 November) included the Gloria (with added 'trombe squarciate') later published in the *Selva morale*. These were hard times: Monteverdi vowed to visit Loreto, took orders on 9 March 1631 and entered the priesthood on 16 April 1632 – hence the styling 'Reverendo' in his second book of *Scherzi musicali* (the printer's dedication is dated 20 June 1632). Whether this was a matter of devoutness – Monteverdi never went to Loreto – or convenience remains unclear. Certainly the Cremonese benefice gained by the intervention of Emperor Ferdinand II, encouraged by his wife Eleonora Gonzaga in December 1633, brought him income from its associated property.

In 1633 Monteverdi was approached by the theorist Giovanni Battista Doni for his views on modern music; two letters to Doni (22 October 1633, 2 February 1634) reveal his intention still to complete the long-promised treatise on the 'second practice' (now titled *Melodia, overo Seconda pratica musicale*), and according to his eulogist Matteo Caberloti he was still working on it at his death. Two arias were included in an anthology by Alessandro Vincenti (RISM 1634[7]), and he provided music for Giulio Strozzi's Accademia degli Unisoni in Venice in 1637–8. Associations with the Habsburgs in Vienna became still stronger: he wrote a ballo, *Volgendo il ciel per l'immortal sentiero*, perhaps for the election of Emperor Ferdinand III in the late 1636; the revised *Ballo delle ingrate* for Vienna may date from this period (not 1628); and much of the eighth book, the *Madrigali guerrieri, et amorosi*, is associated with the new emperor (the dedication to him is dated 1 September 1638). Eleonora Gonzaga was in turn the dedicatee of the *Selva morale e spirituale* (1 May 1641). We do not know whether the manuscript of the opera *Il ritorno d'Ulisse in patria* now in Vienna also reflects connections pursued at the time.

Monteverdi's contributions to the new 'public' opera in Venice (established in 1637) were remarkable by any standard, let alone for someone in his 70s. He revived *Arianna* to inaugurate opera at the Teatro S Moisè in Carnival 1639–40, and later that season produced *Il ritorno d'Ulisse* at the Teatro S Cassiano: it was then performed in Bologna and revived in Venice in Carnival 1640–41. His second Venetian opera, *Le nozze d'Enea in Lavinia* (Teatro SS Giovanni e Paolo, Carnival 1640–41) is lost; the preface to the scenario by the anonymous librettist (not Giacomo Badoaro, as was once believed) praises Monteverdi's dramatic abilities. His third, *L'incoronazione di Poppea* (SS Giovanni e Paolo, Carnival

1642–3), with the famous Anna Renzi as Octavia, was an astonishing achievement. Not all the music in the surviving sources (from the 1650s) is likely by Monteverdi, and the final scene was probably set by Francesco Sacrati, but it marks a glittering end to his career.

After *Poppea* Monteverdi made a six-month trip to Lombardy and Mantua in spring and summer, seeking once more to guarantee his Mantuan pension, which is also the subject of his last surviving letter, to Doge Francesco Erizzo in August 1643. He died in Venice on 29 November after nine days' illness and was buried with full ceremony in the Frari, the music directed by his assistant and eventual replacement at S Marco, Giovanni Rovetta. Shortly after, a memorial service was held with the music organized by Giovan Battista Marinoni (ii). Work left incomplete at his death included a ballo for Piacenza for Carnival 1643–4 (one had already been performed there on 7 February 1641), his treatise, and perhaps another Homeric opera, *Ulisse errante*, eventually set by Francesco Sacrati. A commemorative volume of poetry, *Fiori poetici*, was edited by Marinoni in 1634, including Caberloti's eulogy.

Monteverdi may have become crotchety in old age, as is suggested by an unpleasant dispute with the singer Domenico Aldegati in June 1637. His many letters (at least 127 survive), most of them to the Mantuan court secretaries Alessandro Striggio (the librettist of *Orfeo*) and Ercole Marigliani (or Marliani), suggest that he could be both difficult and proud; they also contain many revealing remarks on music and musicians. However, a gentler side is apparent in his portrait by Bernardo Strozzi (now in the Gesellschaft der Musikfreunde, Vienna, with

2. *Title-page, with portrait of Monteverdi, from Giovan Battista Marinoni's edition 'Fiori poetici' (Venice, 1644)*

a second version in the Tiroler Landesmuseum Ferdinandeum, Innsbruck), which was the model for the engraving heading the *Fiori poetici*. (Domenico Fetti's *Ritratto di comico*, once thought to be of Monteverdi, probably represents the actor Tristano Martinelli.) There is other evidence of his wit and humour, not least in his music. Certainly the poems and music dedicated to him, and the honourable mentions in treatises from Banchieri onwards, reveal his professional standing. So does the unusual number of posthumous publications, including the *Messa et salmi* (dedication dated 11 December 1649) and the ninth book of madrigals (27 June 1651). *Poppea* was also revived by the Febiarmonici in Naples in 1651. His music was copied extensively into north European and English manuscripts, and his madrigals circulated widely in contrafacta in Germany. His influence on later Baroque composers, both in Venice and further afield, awaits full documentation but was clearly considerable.

Monteverdi's elder son Francesco joined the singers of S Marco in July 1623 and appears in lists up to 1677, for all Monteverdi's attempts to have him become a lawyer. There is evidence of his performing in S Marco in Holy Week 1615 and on Christmas Eve 1618; in S Petronio, Bologna, in October 1619; in the Requiem for Grand Duke Cosimo II in 1621; and in Giovanni Felice Sances's tournament *Ermiona* (1636, Padua). Two short arias by him survive in Milanuzzi's *Quarto scherzo delle ariose vaghezze* (repr. 1624). Monteverdi's second son Massimiliano, a doctor, died in Cremona on 14 October 1661.

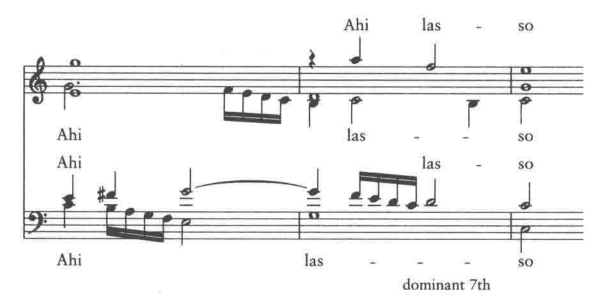
4. Theoretical and aesthetic basis of works. Monteverdi's work has usually been discussed in terms of stylistic opposition between a *prima pratica* ('first practice') and a *seconda pratica* ('second practice'). This opposition originates in concepts of the period, as outlined below, and at first sight supplies a useful means of distinguishing between retrospective and modern elements in Monteverdi's music in technical, aesthetic and historiographical terms. Indeed there is a substantial 20th-century literature in which it is used in this sense, the *prima pratica* being used to mean the stricter style of Palestrina and his Roman contemporaries, and the *seconda pratica* the freer, more rhetorically expressive concertato style of the north Italian composers.

Such a two-style framework admittedly provides a convincing interpretative key for some important aspects of Monteverdi's output, especially in the first decade of the 17th century. It has served to highlight the contrast between new, extrovert, expressive, theatrical 'Baroque' elements, and established, relatively restrained, participant-orientated 'Renaissance' elements. But it should be used with caution: the powerful narrative unity (or duality) it confers on Monteverdi's development as a composer is largely fictitious. The demands placed upon him as a professional musician working in various contexts (Cremona, Mantua, Venice and for the Habsburgs), besides his own eclectic opportunism as a composer, meant that he drew promiscuously on several different, and almost incompatible, styles and aesthetic ideals. Even as early as the 17th century, Berardi went beyond the notion of two practices, referring to a mysterious *terza pratica*. But to call on this as a means of broadening the debate seems a half-measure, and also seems likely to cause yet further confusion: Gary Tomlinson has identified as a third practice Monteverdi's evolution of 'new modes of musical expression and

structure to accommodate the new poetics of Marinism' (D1987, p.215), and Tim Carter has used the term 'terza prattica' in a related but slightly different sense to describe Monteverdi's extensive use of Venetian triple-time canzonetta structures in the late works, especially in laments such as the *Lamento della ninfa* (Arnold, D1963, 3/1990, p.161), and the aesthetic that they imply. The reality seems too complex to be accommodated even by a threefold scheme: modern as well as conservative elements occur side by side already in the *a cappella* style of the late 16th century, and several different novel vocal and instrumental styles beyond this were variously current in north Italy during Monteverdi's lifetime. Moreover, the usefulness of the term 'seconda pratica' has been compromised by its use at one time or another to define almost any musical innovation of the early 17th century – one or other new aspect of aesthetics: the monodic style; the rhythmic regularity in one or more of the new aria styles; the new harmonic, 'vertical' organization of textures; the new *basso continuo* textures; and several more.

It is the famous controversy with G.M. Artusi (see §2 above) that provides the primary evidence for a careful definition of the term, though even this is unsatisfactory in some respects. In *L'Artusi* (1600) the theorist attacked Monteverdi as a breaker of the rules of counterpoint authoritatively established by Zarlino, especially in his use of irregular, unprepared dissonances and his neglect of modal unity; and in defending himself Monteverdi invoked this *seconda pratica*, which, he claimed, permitted licences in these areas, as opposed to a *prima pratica* that he said was Zarlino's concern. However, allusions to the *seconda pratica* stretch over a long period, during which far more than two distinct styles are evident in Monteverdi's work alone, and refer to an even longer and even less homogeneous period: indeed the composer's brother, Giulio Cesare Monteverdi, in 1607 claimed that the *seconda pratica* had begun with Rore. Accordingly, it is difficult to know precisely what the scope of Monteverdi's projected treatise on the *seconda pratica* would have been, had he ever completed it.

The Artusi controversy focussed attention also on the relationship between music and text, and specifically on attitudes to Platonic ideas concerning music. Here there was no ostensible disagreement between Artusi and Monteverdi, both of whom were content to defer to Plato's authority and to his commonplace requirement that the music should be subservient to the text. Indeed, Monteverdi in the preface to his eighth book of madrigals claimed to be uniquely faithful to Plato, and to be restoring an ancient threefold taxonomy of 'agitated', 'moderate' and 'relaxed' genres, often in the modern literature interpreted without further ado as styles (*see* STILE CONCITATO). But these references are again problematic: the eighth book is not typical of all of Monteverdi's output, the composer was by no means a musical antiquarian, and his appeal to Plato may have been no more than a conventional rhetorical adornment for his argument, intended as a compliment to his patron.



Another key concept that has been invoked for understanding the aesthetic underlying Monteverdi's music is that of mannerism, implying the deformation of Renaissance ideals (not necessarily according to antique models). The term is sometimes used by modern critics, even though there is nothing in Monteverdi's own writings to illuminate its use; others use the term Marinist (see above). Such terms usually imply the relevance of a rhetorical model, or models, to the music, and in Monteverdi's case these are mostly derived from the literary poetics of Chiabrera, Tasso, Guarini or Giambattista Marino, or the musical poetics of Wert. For example, Monteverdi's adoption of a consciously mimetic style in his madrigals from the fifth book onwards, and especially in the sixth, seventh and eighth books, and their consequent fragmentation of form, is felt to owe something to an extreme rhetorical model such as has been discerned in Marino, and this is sometimes felt to work to the detriment of the late music. The secondary literature probably owes an unconscious debt to the 18th-century Arcadians, particularly Crescimbeni, who regarded Guarini and, especially, Marino as deformers of the ideal of Tuscan poetry as the latter had been cultivated from Petrarch to the 16th century. So again, aesthetic categories built on rhetorical interpretations of Monteverdi's music provide a useful interpretative key, but have their limitations.

5. TONAL LANGUAGE. There is also scope for varieties of interpretation of Monteverdi's tonal language, quite apart from the fact that his output encompasses a number of distinct styles. Since the late 18th century (possibly first in *BurneyH*, 1789) his music has generally been associated with the replacement of modal by tonal practice, and 19th-century French theorists were responsible for popularizing a view of him as the inventor of the unprepared dominant 7th chord and, with it, major-minor tonality. Indeed F.-J. Fétis notoriously located this in bar 13 of *Cruda Amarilli che col nome ancora* from the fifth book (third crotchet of the second bar of ex.1).

It is true that much of Monteverdi's music, particularly in his later Venetian style, can readily be analysed in terms of major-minor tonality (even though this music never uses the resources of tonal modulation in any developed way). On the other hand, the anachronism implicit in such analysis, not least in the light of Artusi's interest in Monteverdi's modal practice, has led to 20th-century attempts to interpret the music in terms of modes. Bernhard Meier (see L. Finscher, D1986) is an extreme example of a writer interpreting the music in terms of a supposedly thorough-going, unified modal system, with all divergences from supposed norms interpreted in terms of rhetorical intention.

Others offer compromise readings; Dahlhaus (J1968) has analysed some of the modally ambiguous pieces (notably *O Mirtillo, Mirtillo anima mia*, a *Pastor fido* setting from the fifth book that was criticized by Artusi), seeking to distance Monteverdi from both modal and fully tonal practice, and suggesting that these works are based on a system of so-called *Teiltonarten* ('partial' keys)

Ex.1 *Cruda Amarilli che col nome ancora* SV 94, bars 12–14

that permits cadencing on any note of the prevailing hexachord. His impressive understanding of the more complicated aspects of Monteverdi's tonal practice has been developed at greater length by Chafe (J1992), who provides a speculative system of tonal allegory again based on relationships between hexachords. In another notable contribution to scholarship, Susan McClary (J1976) has reinterpreted Monteverdi's modal practice in quasi-Schenkerian terms, including an account of the development through the composer's career of increasingly extensive prolongational techniques.

But changes in the understanding of the late Renaissance modes during the last three decades have brought into question many of the assumptions on which much of this work was based, including the assumptions that 16th-century music was uniformly modal; that Monteverdi's tonal language represents a transitional stage between 'modality' and 'tonality'; that the establishment of modern tonality involves an increase in structural complexity; or indeed that tonality depends primarily upon chordal, vertical relationships at all. It is sufficient here to note that many of Monteverdi's works exploit novel techniques of tonal integration, not necessarily invented by the composer, and that these later became part of the basic equipment of all composers writing in major-minor tonality (see §7 below). Their use contributes to some of the most profoundly satisfying artistic effects in Monteverdi's music, although they are in part specific to certain sections of his output.

One of the most interesting is represented by Monteverdi's characteristic long overlapping diatonic scale descents, migrating from voice to voice – sometimes in the bass, sometimes in the upper voices and sometimes sequential – that are often used to prepare principal cadences, though seldom to structure entire works. They are neither specifically modal nor tonal in the modern sense, and are cast basically as trio textures for two sopranos and bass, though usually elaborated in five voices. A characteristic example is found in the last 13 bars of *Io mi son giovinetta* from the fourth book, based, as ex.2 illustrates, on interlocking diatonic scales harmonized essentially as a lightly disguised chain of parallel root position triads. Such structures, probably developed in the first instance from the Marenzian villanella repertory of the late 16th century, appear in some of Monteverdi's works from 1590 onwards (see §7 below). They underlie some of the schematically constructed instrumental ritornellos in the first two acts of *Orfeo*, and they are still evident in the fine six-voice psalm setting *Cantate Domino canticum novum* SV293, published by G.C. Bianchi in 1620. Whether or not they should be considered 'tonal' in any modern sense, these Monteverdian diatonic descents arguably constitute one of the most important of the structural innovations of the late 16th century. They provide contrast with sections in which they are not used, giving strong, temporary tonal unity to sections of works and providing a powerful sense of tonal release as they conclude; they are also of historical importance in that they foreshadow similar structures providing overall tonal unity in later major-minor works such as the sonatas of Corelli. They are a characteristic feature of many of Monteverdi's best madrigals, and Monteverdi often reinforced them by adding strings of suspended dissonances, so that the final progression to

Ex.2 *Io mi son giovinetta* SV 86, structure underlying bars 76–88

the tonal goal comes to seem all the more 'inevitable' in both musical and affective terms.

Such structures are less often found in the works of the Venetian period that more obviously project major-minor tonality. Their place is now taken, characteristically, by simpler structures – ground basses and techniques of variation over repeated bass patterns, set as accompanied duets rather than five-voice textures and typically controlling entire movements rather than contrasting sections. Such patterns are used to great effect, for example, in such works as *Zefiro torna e di soavi accenti* SV251 or the *Lamento della ninfa*. Some of the differences between these structures and the earlier ones are more apparent than real; in particular, the trio textures that are obvious in the Venetian works are structurally fundamental in the earlier works as well. But the avoidance of the disguised consecutive perfect triads in the later style, with a marked increase in the use of 6-3 sonorities, represents a substantial change of style and of musical language; this is true even of the short duet between Fortuna and Virtù in the prologue to *L'incoronazione di Poppea*, which is once again built on a steady stepwise descent (ex.3).

6. 'IMITATIO' AND USE OF MODELS. Composers of this period made frequent use of a procedure that may be described as *imitatio* or *emulatio*: the conscious use of material from a specific composition by an earlier composer in order to construct a new work, whether in order to pay homage to the earlier composer or for some other reason. Monteverdi's use of models in constructing works by no means necessarily indicates that such works date from his apprenticeship as a composer, and it may indeed be fundamental to an understanding of the

Ex.3 *L'incoronazione di Poppea*, prologue, 'Human non è' (bars 148–65)

development of his style in general. Its prevalence has been increasingly recognized in recent decades, notably in Tomlinson's monograph (D1987), and sometimes with an uneasy sense that it compromises Monteverdi's reputation for originality (as in Horsley, G1978). But it is unlikely that the full extent is yet appreciated of the process by which Monteverdi used existing models as the basis for creating novel styles. He may indeed sometimes have taken *imitatio*to require the closest possible literal adherence to the model coupled with the greatest possible alteration of the sense of the model. The following discussion is provisional, and aims merely to offer a few distinctive examples of approaches to modelling by the composer.

To a modern observer the most obvious use by Monteverdi of *imitatio*no doubt occurs in his *Missa a 6 voci da cappella* SV205 (1610) based on points of imitation, in the other, modern sense, drawn from Gombert's motet *In illo tempore* (published in 1554). This mass is written in an austere, archaic style, avoiding madrigalisms or word-painting, and was evidently designed to demonstrate compositional prowess. Ten *fughe*, or contrapuntal points of imitation, from the motet are printed at the head of the mass in the partbooks, and are worked out with 'unremitting imitation investing all parts [to such an extent] that the *Missa in illo tempore* may be considered more reactionary than conservative' (Kurtzman, H1978); the imitative polyphony gives way to homophony only in 'Et incarnatus' and 'Benedictus'.

A comparable approach, but usually with a less clearly academic purpose, can be found in many other works, and as early as the motet *Quam pulchra es et quam decora amica mea* from Monteverdi's first published collection, the *Sacrae cantiunculae* of 1582. This short motet is closely modelled in almost every detail on a four-voice motet with the same text by Costanzo Festa, first published in 1521, via a three-voice version published in 1543 and modernized merely through the omission of the contratenor. Although Monteverdi's piece is scarcely 'modern' for the 1580s, it is not academically archaic in the manner of the mass.

Other examples, more representative of the composer's intertextual use of *imitatio* in his mature work, are allusive to a greater or lesser extent. They include the nod towards Marenzio's *Non vivi mai dopo notturna pioggia* in the modern-style Tasso setting *Non si levav'ancor l'alba novella*, given pride of place at the beginning of Monteverdi's second book, which borrows its opening *fuga*, as well as some other features, from its model. Another example is the Pietro Bembo setting, in an archaizing style, that closes that collection, *Cantai un tempo, e se fu dolce il canto*, whose intertext is *Cantai, mentre ch'i arsi*from Rore's first book of five-voice madrigals (1542); here the allusions seem to be less close. But one of the most remarkable examples of Monteverdi's early *imitatio*, also from the second book, is *Ecco mormorar l'onde*, discussed below (§7), in which Monteverdi contrives to develop a quite novel structural principle directly from features that are latent in the model: in this case, *imitatio* simultaneously represents adherence to tradition and departure from it.

Examples of *imitatio* discussed in the literature tend to be drawn from works up to and including this period, probably because it has been assumed that Monteverdi used the procedure only during his apprenticeship as a composer. The extent to which *imitatio* is in evidence in works of his maturity is, therefore, insufficiently understood, though it is clear in isolated works. Thus *Sfogava con le stelle* owes a substantial debt to Caccini's setting of the same text as an accompanied song in *Le nuove musiche*, and appeared almost immediately after the publication of Caccini's collection (and may have a setting by Salomone Rossi as a further intertext): Horsley (G1978) has suggested that 'it may have been composed as a reaction to Caccini's polemic against the polyphonic madrigal found in the prefatory material to *Le nuove musiche*' and that it takes account of such details as the quantitative setting of syllables.

7. EARLY WORKS. Monteverdi's first publication was the set of three-voice *Sacrae cantiunculae* SV207–29 (1582), miniature motets in a remarkably out-of-date, yet very competent, style (see §6 above). They were followed by a volume of *Madrigali spirituali* SV179–89 (1583), of which only the bass partbook survives: these appear to have contained no striking madrigalisms, and so were also not in the most modern vein for the period.

A different picture is painted, however, by Monteverdi's first venture into secular music, in the *Canzonette a tre voci* SV1–21 (1584). These brief three-voice pieces draw on the airy, modern style of the villanellas of Marenzio, while not at every point equalling Marenzio's technical assurance. Like Marenzio's pieces, they draw on a substantial vocabulary of text-related madrigalisms even though they are strophic, including distinctions between syllabic and melismatic setting, expressive dissonances and disguised sequences of consecutive 5ths for parodic purposes. Most of them have a high tessitura (which together with the florid style suggests the textures of the *concerto delle donne*) and a flat signature, but there is a variety of clef combinations and hence tessitura, with some pieces alluding to the standard low-clef duet of upper voices notated in C clef on the top line of the stave. More noteworthy still is the extended range within a single piece effected by a combination of high and low clefs, as in *La fiera vista e'l velenoso sguardo* and *Vita de l'alma mia, cara mia vita*; Monteverdi was later to exploit exceptional, wide ranges not suggested by clef combinations in such madrigals as *Sfogava con le stelle* and *Or che'l cielo e la terra e'l vento tace*, besides the expansion of range that accompanied the introduction into his works of instrumental voices.

Like Marenzio's villanellas, these canzonettas belong to a light genre in which composers could feign unconcern. Yet the florid trio texture, in which the lowest voice is a true structural bass, in which the upper voices, rather than any voice in a tenor range, play a crucial role in defining the tonal type of the piece, and in which each phrase is tonally structured in terms of a clear cadential progression, represents the true basis of up-to-date five-voice madrigals of the 1580s, and of much of Monteverdi's own subsequent output.

So canzonettas offered serious composers an ideal vehicle for gaining technical competence, and characteristics of the canzonetta are ubiquitous in madrigal collections, as they are in Monteverdi's first book of madrigalsSV23–39, published in 1587. Tomlinson relates the purely playful, pastoral settings in this book to the style of Marenzio, and those that invoke affective dissonance to the style of Luzzaschi. Of the latter, Monteverdi's setting of Guarini's *Baci soavi e cari* is the

best-known madrigal in the volume, with Luzzaschi's *Gratie ad amor, o me beato e lui*(1582) as a possible intertext. The piece prefigures later Monteverdi madrigals in its informal but clear division into two sections of roughly equal length, the second beginning after a full cadence with theatrical, homophonic declamation. The volume is notable also for the first two of Monteverdi's cycles of linked madrigals, which represent an important device of the period for constructing extended musical forms. In *Ardosì, ma non t'amo – Ardi o gela a tua voglia – Arsi et alsi a mia voglia*the intertext is Ingegneri's setting of the same poems (by Guarini and Tasso), and the cycle provides a graceful compliment to his teacher with which to end the volume.

With the second book of madrigals SV40–59 (1590) Monteverdi, whether or not he was already working at Mantua, had 'spiritually left Cremona' (Arnold, D1963). The influence on this and the third book SV60–74 of the work of Giaches de Wert has often been noted; it reflects a concern with an affective, audience-orientated aesthetic just as much as do the monodies of the period. *Ecco mormorar l'onde*, the most celebrated madrigal in the second book, is closely modelled on Wert's *Vezzosi augelli in fra le verdi fronde*; to support the description of a lakeside dawn, Monteverdi exploited a varied range of madrigalisms within Wert's narrowly circumscribed tonal range (with hardly any variation within an F-final tonal type), including his distinctive use of homophony and of static recitation on single notes.

But the emotional thrust of the piece comes less from these than from Monteverdi's deployment of descending, stepwise diatonic chains of thinly disguised 5-3 chords, which are indeed not unique to this madrigal in the second book, and which were recognized by Leichtentritt (G1909–10) as typical of the composer's mature style. This feature is introduced very significantly at the point, in the final rhyming couplet, where the verse turns from describing external nature to the expression of the poet's amorous feelings, with a play of words on the name Laura: 'L'aura è tua messaggiera, e tu de l'aura, / ch'ogn'arso cor ristaura'. The clear, almost schematic structure provides the work with a seemingly inexorable musical logic, increasing in power towards the final cadence, which strongly underlines the affective power of Tasso's verse.

8. WORKS FROM THE MANTUAN YEARS. Besides introducing Monteverdi to the music and the aesthetic of Wert, the court of Duke Vincenzo I Gonzaga provided him with the stimulus for creating a number of different styles, and some of his largest and most impressive and complex works, such as *Orfeo*, *Arianna* and the Vespers. It was here also that his classic madrigal style (as this has usually been regarded in Monteverdi reception, represented above all in the third and fourth books) was formed, and here, stimulated by the controversy with Artusi, that he articulated his notions of a *seconda pratica*.

The first publication for Mantua was the third book of madrigals SV60–74 (1592), which already contains some of Monteverdi's best work; many of the madrigals again show the influence of Wert in the expressive, chromatic (and distinctly modern) approach that Monteverdi takes. This is well suited to the 'heroic style' (Tomlinson, D1987) of the settings in this book of passages from Tasso's *Gerusalemme liberata*, distinguished by Tomlinson from an 'epigrammatic style' that characterizes the settings of Guarini in the third book and also in the fourth and fifth books.

The epigrammatic style of many of these Guarini poems closely matches a poetic and musical ideal of the period: the resolution, in a final clinching 'acumen' or dénouement, of a witty (often paradoxical) conceit developed in a preceding 'expositio'. To create these dénouements, tonally unified musical structures were particularly suitable owing to their capacity to generate a fiction of inevitability: hence the epigrammatic style often depends on strong, final cadential progressions, with or without the intensification provided by chains of suspended dissonances. An example of such dissonances from the third book, though for an intermediate cadence suggested by the verse 'non può morir d'amor alma fedele', is the Guarini setting *Stracciami pur il core*, still remembered in the 18th century as a prime example of Monteverdi's irregular dissonance practice (*BurneyH*; G.B. Martini, G1775/*R*) (ex.4).

Guarini settings continued to dominate the fourth book of madrigals SV75–93 (1603) and the fifth book SV94–106 (1605), which contain works composed by Monteverdi since the late 1590s, as is attested by the quotation of several of them by Artusi. The epigrammatic ideal underlies what are arguably the finest madrigals in the fourth book and some of the finest Monteverdi ever composed: here the objective narration of the initial *expositio* is clearly demarcated in formal terms from the final *acumen*. For example, in the setting of Guarini's *Cor mio, mentre vi miro* the *expositio*, with objective narration set largely in Wert's block-chord declamation, concludes at a clear formal cadence halfway through the madrigal; the second half begins with a rhetorical outburst, still in

Ex.4 *Stracciami pur il core* SV64, bars 73–83

homophonic declamation, and the *acumen* of the final rhyming couplet gradually resolves into affective, imitative polyphony through a transition in which the bass of the outburst serves as a countersubject. Similar transitional devices, and a similar final resolution into tonally unified, goal-orientated polyphony for the *acumen*, are effectively used in *Sfogava con le stelle*: this madrigal, one of whose intertexts is Caccini's setting of the same words (see §6 above), has a wide variety of types of declamation, differentiated for formal purposes, and also exploits anomalous wide ranges for the sake of increasing contrasts; its varieties of declamation famously include unmeasured chanting on a chord in the manner of *falsobordone*. And in Guarini's *Ohimé, se tanto amate* the three-part structure of the verse is matched in a tripartite form in the music (bars 1–19, 20–38, 39–67); in the lengthy third section, the affectiveness of the conclusion is achieved mainly through the multiple repetitions of the word 'ohimé' rather than through thorough-going polyphony.

The extensive exploitation in the fourth and fifth books of Wert's block-chord declamation, especially in the settings of texts from Guarini's *Il pastor fido* in the fifth book, is indicative of a certain degree of theatricality, even though the settings are for five voices, and even when (as in *Cruda Amarilli, che col nome ancora* and *O Mirtillo, Mirtillo anima mia*) the texts are monologues in their dramatic context rather than choruses. (This is not to claim, however, that the madrigals in either of these books were used for theatrical performances, despite the performances of *Il pastor fido* at Mantua in 1598.) The extent of the theatrical, declamatory style in the fifth book, which is especially prominent in the madrigal cycles, such as *Ecco, Silvio, colei che in odio hai tanto*, is such that affecive polyphonic endings are often avoided, and (even though the tonal structure of these madrigals is usually closed) the structures in consequence have far less of the sense of an ending than do those of earlier collections. The theatrical style of these pieces is reinforced by the dissonance treatment that was criticized by Artusi, as for instance in the unprepared 7ths and 9ths in *Cruda Amarilli, che col nome ancora*: these divergences from strict practice are justified by the rhetorical demands of the text. In fact they are less infringements of the rules of counterpoint than extensions of them: the required preparations and resolutions of dissonances are usually found in voices in the texture other than those formally required; but it is their origin in extemporized ornamentation that is significant in the present context.

Another innovation of the fifth book is Monteverdi's provision for the first time for continuo settings in the madrigal, though this is an essential part of the texture only in the last six madrigals in the volume. Apart from solo sections within madrigals, he ignores solo monodies in the volume, even though they were highly popular at the time. His very individual combination of the expressive potential of the new medium with the sonority and rhetoric supplied by traditional polyphonic procedures is brilliantly exemplified in *T'amo mia vita, la mia cara vita*. The opening words, sung by a solo soprano, alternate antiphonally with the rest of the poem sung syllabically by an ATB trio, until the final 18 bars, when the quinto enters for the first time and the opening words are taken up polyphonically by all five voices, the phrase of text is at last completed and the music reaches its tonal goal, providing a strong emotional release of tension.

The fifth book, then, may resemble some of the theatre music in various genres, notably ballets, *intermedi*, operas and incidental music to plays, that Monteverdi was required to compose during his Mantuan employment. It is, however, not altogether like the operas *Orfeo* (1607, published in full score) and *Arianna* (1608) that were also products of this period: this new genre, unlike Guarini's pastoral tragicomedy, was not prestigious enough to raise serious literary controversy, and contemporaries as yet felt no need to justify its non-compliance with Aristotelian literary theory, nor to concern themselves about the unities. And there are numerous links between Monteverdi's early operas and other ephemeral courtly entertainments: works such as *Orfeo* are put together in eclectic fashion from established styles and elements as well as modern ones (balli with dancing, madrigals, monody, echo effects etc.). Nevertheless, there is some justification for interpreting these operas in terms of historically significant innovation: they were highly regarded by contemporaries for their capacity to 'move the passions' to an extent unknown in other entertainments, and this psychological interest lays the foundation for most later opera.

Both the poetry and the music of *Orfeo* are modelled in a number of respects on Peri's *Euridice*, which, like it, is a *favola pastorale*; but *Orfeo* is a work of much greater dimensions. It also draws on a much larger instrumental ensemble, with differentiated instrumentation used in traditional fashion to symbolize the various spheres in which the drama is played out (recorders for the pastoral scenes, trombones for the underworld etc.). The work is hardly homogeneous: there is a good deal of variety in the monodic sections and waywardness in the recitative, and indeed the printed librettos show that the ending of the work may have been altered, from a more traditional ending with a confrontation between Orfeo and the Bacchantes. Yet substantial sections of the work, especially in Acts 1 and 2, are constructed as unprecedentedly large-scale unified forms. 'Lasciate i monti' from Act 1, for instance, is virtually a balletto in the style of Gastoldi, with the clear tonal unity that one would expect from such a piece, even though it vacillates between a G major and G minor tonal type and is thus far from modally unified in the old-fashioned sense. These forms are clarified with short recurrent instrumental ritornellos which act as refrains, and the ritornellos themselves are unified through unambiguous tonal goal-orientation. At the heart of the opera is the remarkable Act 3 set piece 'Possente spirto e formidabil nume': this great set of strophic variations, with elaborate, virtuoso instrumental ritornellos, in which Orfeo charms Caronte to sleep, is presented with two alternative versions of the vocal line, one plain and the other highly ornamented (ex.5). The latter is perhaps, as Pirrotta suggested (*PirrottaDO*), an authoritative exemplar of the *genere rappresentativo*, and the piece as a whole may be viewed 'as an important landmark on the road to the "natural way of imitation"' (Fenlon; see Arnold and Fortune, D1968, 2/1985, p.275).

The style of some of the arias in *Orfeo*, such as 'Vi ricorda, o boschi ombrosi' from Act 2, with syllabic setting and swinging hemiola rhythms, is reflected also in the first set of *Scherzi musicali* sv230–45, also of 1607. These three-voice pieces (in fact accompanied duets,

Ex.5 *Possente spirto, extract*

though all three voices are texted) are strophic, with instrumental ritornellos. Most of the verse is by Gabriello Chiabrera and exemplifies his new Anacreontic canzonetta genre, crucially important to the modern style of the period, with stanzas typically of six to ten verses, with an extreme variety of syllabic length (many very short). It is possible that Chiabrera's poetic style is associated with French influence in Monteverdi's music (see Pirrotta, G1968). The composer's brother Giulio Cesare was responsible for editing the collection (himself contributing two of the pieces) and he appended to it the *Dichiaratione* as an apologia for the 'perfections of modern music', one of the key documents for an understanding of the *seconda pratica*, which may be exemplified above all in these works (see Ossi, I1992).

Monteverdi's next opera, *Arianna* (1608), seems to have outshone *Orfeo* in the eyes of his contemporaries: indeed there was one confirmed revival of it. It is now lost except for the libretto, by Rinuccini, and for the setting (surviving in multiple versions) of Arianna's lament, 'Lasciatemi morire' SV107, a work which itself supplied models for *imitatio*to numerous later composers (e.g. Porter; see Fenlon and Carter, F1995). This is highly regrettable, because the work clearly marked an advance: Tomlinson (D1987) has pointed out that, unlike the monody in *Orfeo*, the version of this lament that was sung on stage may have been a solo song accompanied polyphonically by viols – not monody but 'pseudo-monody'; and the opera itself laid claim to greater generic pretensions than *Orfeo*, being described as a tragedy rather than a *favola*. Nevertheless, there were clearly points of similarity between the two, with interpolated choruses being used to construct larger forms, and similarities are only to be expected given that the composer was obliged to work in haste. Other more minor entertainments of the same year include the *Ballo delle ingrate*, again with a libretto by Rinuccini, which was published in the eighth book of madrigals (1638). For publication the work was altered, although the full extent of the alterations (which included re-scoring for strings alone) is not clear.

Two years later, in 1610, Monteverdi published his *Vespro della Beata Vergine da concerto* SV206–206*a* (dedicated to Pope Paul V), even though he was not engaged at Mantua as a composer of sacred music. The volume contains the highly conservative Mass *In illo tempore* SV205 mentioned above (§6), as well as psalms for Vespers and motets ostensibly without a liturgical purpose; but the latter two elements in effect form a portmanteau of several Vespers settings, which make use of a variety of styles including the most modern. Monteverdi provided music for a celebration of Vespers accompanied by virtuoso instrumentalists as well as one accompanied by the organ alone, with two separate settings of the *Magnificat* (one for six voices and one for seven, the latter probably a parody of the former) corresponding to these two possibilities, quite apart from the further possibilities of omitting some of the numbers, omitting or retaining the optional ritornellos etc.. The question of the original purpose of the work has received extensive discussion (summarized in Whenham, H1997), and is still not quite settled; broadly, Monteverdi seems to have published the collection as a compositional portfolio to demonstrate mastery in a variety of contemporary church styles, and the work, or part of it, was very possibly originally used for the solemn Vespers sung at the inauguration by Vincenzo Gonzaga, at Mantua in 1608, of a new order of chivalry in honour of Christ the Redeemer (see Fenlon, H1977).

It is not surprising, then, that the 1610 Vespers has many features, and some specific music, in common with *Orfeo*, and that it is written for essentially the same forces. Indeed the initial 'Domine ad adiuvandum' SV206/1 is a reworking of the instrumental toccata with which *Orfeo* begins, with the addition of choral *falsobordone* chanting; and the splendid setting of the 'Duo Seraphim' SV206/7, for three tenors, has much directly in common with 'Possente spirto', Monteverdi representing the singing of the angels with his most ornate style. Some of the procedures used in the Vespers are traditional ones – cantus firmus, *falsobordone*, Venetian canzone, separated choirs – but are presented in a highly modern aspect; others are drawn from the modern madrigal style, with madrigalisms including echo effects and chains of dissonances used for expressive and rhetorical purposes, and with ritornellos constructed to project a unified, unambiguous tonality, with schematic (often sequential) forms like those of the instrumental ritornellos in *Orfeo*. In the Vespers, as in *Orfeo*, Monteverdi showed great skill in constructing large, symmetrical formal structures; but 'the organizing force underlying nearly all of the 14 pieces is the process of variation, expanded and deepened far beyond anything found in *Orfeo*' (Kurtzman, H1978). Both these aspects are amply illustrated in the great 'Sonata sopra "Sancta Maria, ora pro nobis"' SV206/11, which was very possibly intended as a substitute for a *Magnificat* antiphon (Blazey, H1989). It is an essentially instrumental piece, one of the largest and most impressive of the period, with 11 statements by a soprano voice of a simple plainchant litany invocation as a cantus firmus, each time to the text 'Sancta Maria, ora pro nobis', over continuous variations in the instrumental voices. The

whole movement falls into a large ternary structure: the first of the sections is apparently a purely instrumental ritornello, preceding the first statement of the cantus firmus, including rhythmic transformations of the sort used at the period, and by Monteverdi, for pairs of dances; but even this turns out at the end to be a further variation, and accompanies the final two invocations of the litany. Such inventiveness takes the work well beyond its obvious resemblance, often noted, to the style of Giovanni Gabrieli.

9. Works from the Venetian years. Monteverdi's first publication after his appointment at Venice was the sixth book of madrigals sv107–16, which appeared in 1614; two of the pieces in this book survive also in earlier versions (*Misero Alceo, dal caro albergo fore* sv114*a*, with a simpler middle section for tenor; *Presso a un fiume tranquillo* sv116*a*, with alternative transitions between the sections: see Watty, G1985–6). The collection no doubt preserves a repertory written at the end of Monteverdi's Mantuan period: pride of place in it is given to the extended lament from *Arianna*, in a version (sv107) for five voices, and Monteverdi is known to have been working in 1610 on the other major work in this collection (also a lament) the *sestina Lagrime d'amante al sepolcro dell'amata* sv111. Besides these there are several settings of verse by Marino, such as *Presso a un fiume tranquillo*, structured in concertato fashion by setting closed sections in near-homophonic choral declamation (for the narration) against sections for solo voices or duets in which the pastoral characters speak in the first person; these may be the newest works in the volume, though, like the other works in the sixth book, none of them requires independent instrumental parts other than the continuo line.

Up to 1628 Monteverdi was continuing to write works for Mantua; several were completed and others left unfinished. The ballo *Tirsi e Clori*, on a much smaller scale than the Mantuan operas or the Vespers, is one that was completed and performed in 1616 (it was published at the end of the seventh book of madrigals). It is a short dialogue-madrigal for two singers accompanied by a string ensemble; Tirsi's interventions, and then a concluding duet by both singers, are in a dance-like triple time, ending with a recurrent refrain; Clori's are in a more expressive monodic vein. This dialogue is followed by a *ballo a 5 con istrumenti e voci, concertato e adagio* (i.e. 'ad lib'), an extended madrigal.

In the same year, 1616, Monteverdi was required to set a *favola marittima*, *Le nozze di Tetide*; he presumed that an operatic setting was required, and the libretto seemed to him quite inappropriate to the demands of the genre, because, as he wrote to Striggio,

> I see that the interlocutors are winds, *amoretti*, *zefiretti* and sirens, so that many sopranos will be needed; and also that winds – west winds and north winds – have to sing. How, dear sir, if winds do not speak, shall I be able to imitate their speech? And how, by such means, shall I be able to move the passions? Arianna moved us because she was a woman, and Orfeo did the same because he was a man and not a wind . . . I find that this tale does not move me at all and is even difficult to understand . . . Arianna inspired in me a true lament, and Orfeo a true prayer, but I do not know what this will inspire in me.

But the piece was intended as a set of *intermedi*; and the notions of affective 'truth' that Monteverdi invokes are irrelevant to that genre. In any case, the commission was cancelled in 1617. Lost works that were completed and performed at this time include the opera *Andromeda* (1620) and *Apollo* (also 1620, known only from the letters of Monteverdi), which was possibly a pastoral with a ballo.

In 1619 the seventh book of madrigals sv117–45 was published, with the general title 'Concerto'; this volume significantly contains few monodies in the true sense (with the notable exception of the two 'love letters', both described as being *in genere rapresentativo* (in other words to be 'acted' as well as sung), *Se i languidi miei sguardi* and *Se pur destina e vole*). Monteverdi alluded to monody in his own ways, however: *Con che soavità, labbra adorate*, to a text by Guarini, for example, is an extensive solo for soprano alone accompanied by, and alternating with, three instrumental choruses of unparalleled sonorous splendour. But this piece bears out Tomlinson's point (D1987) that Marinist aesthetics still dominate in this volume: even when Monteverdi returns here to setting Guarini he is interested mainly in following moment-by-moment imagery rather than in constructing affective conclusions to madrigals, as he had in the Guarini settings in the fourth book of madrigals. This is less the case in *Interrotte speranze, eterna fede*, a setting of a sonnet (also by Guarini), another piece that (despite being a duet for two tenors) seems to be effectively an elaboration of a monody: the final sestet of the sonnet is given a musically expansive setting, with imitative polyphony, which well matches the *acumen* of the ending, particularly since the octave of the sonnet is set in a

3. Final page of autograph letter (10 September 1627) from Monteverdi to the Mantuan court chancellor, Alessandro Striggio, giving his reasons for refusing to return to the service of the Gonzagas (I-MAa; trans. in Arnold and Fortune, p.73)

manner that is highly unified tonally and restrained from the mimetic point of view.

Nevertheless, rather than monodies the volume overwhelmingly favours chamber duets, some requiring considerable virtuosity from the singers, and also larger works with contrasting successive sections for full ensemble (some also with instrumental groupings) and solos or duets. And the best known of the works in the seventh book are duets that combine clear tonal structure with the principle of continuous strophic variation, and it is their structure that makes them effective, whether in the repetitive bass pattern of the romanesca *Ohimé, dov'è il mio ben, dov'è il mio core?*, over which the two high voices weave expressive dissonances within tightly unified minor-mode tonality, or in the cheerful major-mode *Chioma d'oro*. The latter is equally unified tonally, being a canzonet to which a threefold ritornello is added (the three ritornellos themselves being interrelated), with each stanza a variation over the bass line; it was reworked with highly interesting further variations as a Vesper psalm, the first *Beatus vir* SV268, in the *Selva morale e spirituale* of 1641 (details in Steele; see Finscher, D1986).

For a private performance for Girolamo Mocenigo in Venice in 1624 or 1625 Monteverdi composed the *Combattimento di Tancredi et Clorinda*, a setting of stanzas from Tasso's *Gerusalemme liberata*; and further extracts from that poem formed the text for his *Armida abbandonata* (lost), written for Mantua in 1626–7. The *Combattimento* is in sharp contrast to *Tirsi e Clori*: besides the two combatants, Tancredi and Clorinda, there is a *testo* (narrator) and short programmatic interpolations by the (string) orchestra representing horses trotting, battle being joined, Clorinda dying etc.; the vocal sections are in a fragmented recitative style verging on arioso. Most strikingly, Monteverdi uses his *genere concitato*, the 'excited genre' that depicts battle through the division of long notes into rapid repeated semiquavers, in some of the orchestral interpolations (ex.6).

The work was published in the eighth book of madrigals: Monteverdi included it as a proof that his *genere concitato* was by no means novel in 1638, and provided it in that volume with instructions for performance in extraordinary (and perhaps intentionally intimidating) detail. And indeed this work reflects a new aesthetic ideal, exemplified particularly clearly in the

Ex.6 *Il combattimento di Tancredi e Clorinda* SV153, bars 164-5

genere concitato. This ideal, probably datable to the early 1620s, resembles the poetic aesthetic of Marino and is perhaps derived from it. It finds its expression in the vivid, mimetic representation in the music of pictorial conceits, ostensibly remote from the world of the love poetry into which they are introduced, that change rapidly from moment to moment; and it is reflected also in Monteverdi's approach to Strozzi's *La finta pazza Licori* as expressed in a series of letters of 1627. This lost, probably unfinished, opera was a comedy whose heroine was to simulate madness in order to please Aminta, and various disjointed, non-musical, programmatic effects were to be exploited in order to represent her psychology; Monteverdi wrote that 'the imitation of this feigned madness, being concerned only with the present and not with the past or future, consequently must be based on the single word rather than the sense of the phrase'.

In 1632 a further volume of *Scherzi musicali* SV246–51 was published, containing simple strophic continuo songs for solo voice together with masterly works making use of continuous variation over repeated bass patterns. One such is *Quel sguardo sdegnosetto*, with three stanzas which have almost identical basses but are set with continuous, inventive melodic variation in the vocal part; the surface simplicity of the canzonetta style and the diatonic tonality are offset by the irregularity in design, with five-bar as well as four-bar phrases. The outstanding work in the collection is the great *ciaccona* for two tenors, *Zefiro torna e di soavi accenti*, whose text (by Rinuccini) is a sonnet modelled on the Petrarch sonnet already set by Monteverdi in the sixth book (*Zefiro torna e'l bel tempo rimena*). By far the greater part of this piece consists of repetitions of a bass pattern (also used for a transition in *Quel sguardo sdegnosetto*), which ensures tonal unity of a simple kind, owing to its being framed as a simple cadence in a G major tonal type: over these repetitions, outstandingly inventive variations unfold in virtuoso passage-work. But, characteristically, the repetitions of the chaconne bass do not suffice to generate the form. Instead, the triple-time motion is startlingly interrupted for the word 'piango', first with an (apparently) discontinuous E major triad in duple time, and then a second time, also in duple time, with striking dissonances; this twice allows for resumption of the chaconne bass and finally for a peroration, giving a sense of a closed form that would otherwise have been difficult to achieve.

An aesthetic that is in some respects rather different from that projected by the Mantuan and Venetian worlds of previous collections is encountered in the eighth book of madrigals SV146–67, otherwise known as the *Madrigali guerrieri, et amorosi*, which is dedicated to the Habsburg Emperor Ferdinand III. In the preface Monteverdi set out an apparently doctrinaire antiquarian agenda:

The principal passions or affections of our mind are three, namely anger, moderation and humility or supplication; so the best philosophers declare, and the very nature of our voice indicates this in having high, low and middle registers. The art of music also points clearly to these three in its terms 'agitated' [*concitato*], 'soft' and 'moderate'. In all the works of former composers I have indeed found examples of the 'soft' and the 'moderate', but never of the 'agitated', a genus nevertheless described by Plato . . . in these words: 'Take that harmony that would fittingly imitate the utterances and the accents of a brave man who is engaged in warfare'. And . . . I have applied myself with no small diligence and toil to rediscover this genus. After reflecting that according to all the best philosophers the fast pyrrhic measure was used for lively and warlike dances, and the slow spondaic measure for their opposites, I considered the semibreve, and proposed that a single semibreve should correspond to one spondaic beat; when this

was reduced to sixteen semiquavers struck one after the other and combined with words expressive of anger and disdain, I recognized in this brief sample a resemblance to the passion which I sought.

This should perhaps not be taken literally as a manifesto of the *seconda pratica* (whatever that may have meant to him at this stage in his career and with his Viennese patron in mind): Monteverdi may merely be indulging a rhetorical conceit in order to illustrate a rhetorical topos and in so doing to justify an elaborate compliment to his patron. But in any case he provided a precise description of the *concitato* genus in technical terms; and the description matches the passages in the collection that prominently feature semibreves divided into semiquavers in this manner, often using no other notes than those of the G major triad in any voice, and uncomplicated rhythms without syncopation, at points where 'war' or related ideas are touched on in the text. (Of course from one point of view this is only an extreme example of the mimetic Marinism, the isolation of external images that can be imitated in musical effects, that is thoroughly Italian and already encountered in other Monteverdi works. And from another, it represents a return to the traditional fanfare motifs that had been a part of the *battaglia* tradition in the wider European context, and, before it, of the love poetry using bellicose imagery as a conceit, that stretches back to the late Middle Ages in France.)

Monteverdi had been cultivating connections with the Habsburgs since the early 1630s or before, and may have sent the contents of the eighth book (or some of them) to his patron in manuscript well before he revised it for publication (see Saunders, G1996). Even the works in this collection that were clearly written earlier, for Venice, such as the *Combattimento di Tancredi et Clorinda*, seem likely to have been revised, perhaps in order to conform with the agenda outlined in the preface quoted above: for example, wind instruments were eliminated from the ensembles, and it may not be coincidental that Plato disapproved of them.

The volume is carefully laid out in two symmetrical halves, with 'warlike madrigals' in the first and 'amorous madrigals' in the second; each half begins with a large six-voice Marino setting (*Altri canti d'Amor, tenero arciero* in the first, *Altri canti di Marte e di sua schiera*in the second), followed by a large-scale Petrarch setting (*Or che'l cielo e la terra e'l vento tace* SV147; *Vago augelletto che cantando vai*). Each half continues with duets for tenors and other works, and concludes with a theatrical piece (the *Combattimento*and the *Lamento della ninfa*) followed by a ballo to a text by Rinuccini.

It is perhaps unsurprising that the works usually regarded as the masterpieces of this volume, *Or che'l cielo e la terra e'l vento tace* and the *Lamento della ninfa*, are among its most expansive. Nevertheless, *Or che'l cielo* is among the most fragmented and from some points of view disjointed. It is a setting for six voices, two violins and continuo, of a Petrarch sonnet; the first four verses of the poem describe a nocturnal land- and seascape, and are set by Monteverdi as a self-contained tonal unit beginning with evocative declamation in the style of Wert, and of some of his own early madrigals, tutti, in a low register on a single chord. Similar homophonic declamation concludes the next two verses. Declamation thus frames, and supplies a secure context for, the very fragmented, declamatory exclamations that Monteverdi uses for the text 'veglio, penso, ardo, piango'. But the last two verses of the octave of the sonnet break through this unity, with two substantial sections on G major triads making use of the *genere concitato* for the text 'guerra è il mio stato', even though the *prima pars* of the madrigal concludes once again with tutti declamation. The *secunda pars*, *Cosí sol d'una chiara fonte viva*, again illustrates much of the text in a moment-by-moment way; but the final madrigalism, the illustration of the word 'lunge', is calculated by Monteverdi so as to provide a more than satisfying ending. The solo tenor sings the word to an extraordinary melisma over seven bars, covering an octave and a 6th – and then the full ensemble caps this with a melisma in which the bass covers almost two octaves, and the full range of the ensemble is three and a half octaves, as the music moves into the final cadence.

The celebrated *Lamento della ninfa* is a setting in the *genere rappresentativo* of a ten-stanza strophic canzonetta text by Rinuccini, with rubrics for the performance. Earlier composers (e.g. Antonio Brunelli and Kapsberger) had set this text in simple strophic fashion, but Monteverdi virtually eliminated the strophic structure. He set the first three strophes, omitting the refrains, for TTB ensemble, in an almost pure declamatory style, as an introduction; the last stanza is similarly set and concludes the piece. Between these sections, which are cast in a third-person narrative voice, the remaining six strophes are set as a chaconne, the soprano voice taking the part of the nymph in first-person declamation against comment (mainly the refrain) from the male-voice trio. The work is typical of the Marinist aesthetic in that it sacrifices coherent unity as a structural whole, whether modally in the older sense or tonally in the modern sense, to moment-by-moment depiction of changing emotional states (the introduction and conclusion are quite fragmented). Yet a fiction of coherent unity is nevertheless projected, on the strength of the central chaconne, which is based on a short bass pattern comprising a descending tetrachord: as an 'emblem of lament' (Rosand, G1979) this is a powerful symbol of affective unity, and as one of the paradigmatic progressions underlying the early 17th-century tonal language (Chew, J1989) it is an equally powerful generator of tonal unity within the extensive section in which it is used. Thus the work combines more than one of the aesthetic positions espoused by Monteverdi during his career, even though they are ostensibly incompatible; and in doing so it is quite representative of his achievement as a whole.

In 1641 (some partbooks are dated 1640) there was published the *Selva morale e spirituale*, and a comparable volume, the *Messa et salmi*, appeared posthumously (1650). Between them these volumes contain a large amount of liturgical and other sacred music, which still no doubt represents only a selection of the works written throughout Monteverdi's service in Venice. In these works the divided-choir manner of earlier Venetian church music is abandoned but a broad spectrum of styles is nevertheless represented. The volumes include two mass settings with organ accompaniment SV257/257*a* (*Selva morale*) and SV190 (*Messa et salmi*). These are concise settings, much less consciously academic than the 1610 *Missa a 6 voci da capella* SV205 and essentially in a modern diatonic style, but they project the *stile antico* by avoiding irregular dissonance practice and madrigalisms; homophonic declamation is mainly limited to short passages in the Gloria and Credo. However, the alternative version of the *Selva*

morale mass, SV257*a*, is more mixed in style, substituting concertato settings of the 'Crucifixus', 'Et resurrexit' and 'Et iterum' (with violins) for the corresponding *a cappella* versions.

Besides these, there are numerous Vesper psalms, canticles, hymns and settings of the final Marian antiphon *Salve regina*. The psalms are mostly in concertato style, but, unlike the 1610 psalms, without plainchant cantus firmi; but a few are in the old *a cappella* style. As Stevens has pointed out (*Monteverdi: Sacred, Secular and Occasional Music*, D1978), the collection provides in effect for a Vespers celebration with up to eight soloists, a string ensemble and three or four trombones, and another with few soloists and no more than two violins. The concertato works draw heavily on the canzonetta style, with closed tonality, refrain and rondo structures, and imitation of text images in the Marinist manner; for instance, the great monody for bass voice and continuo from the *Selva morale*, *Ab aeterno ordinata sum*, resembles the virtuoso bass monodies in the eighth book, being cast in an expansive section in duple time, fragmented in expression through numerous madrigalisms (downward leaps of almost two octaves for 'abissi', semiquaver runs for 'aquarum' and 'flumina', sharply rising phrases for 'montes' etc.), followed by a canzonetta-like triple-time section and concluding with a brief coda. Other elements drawn from secular music include the echo effects used in a troped *Salve regina* with violins SV283; in this work the violins accompany the text of the actual antiphon, with continuo alone used for the tropes (each concluding with an echo effect, '. . . porta orientalis? Talis', '. . . introducta autem vita? Ita' etc.), and a characteristic large-scale structure is thereby created. The most uncompromising of these settings is the *Laetatus sum I* SV198 from the *Messa et salmi*, for six voices, trombones, bassoon, violins and continuo: a *basso ostinato* is here taken to the limits, with a single-bar motif repeated (in a manner reminiscent of *Zefiro torna e di soavi accenti* SV251) more than 100 times in duple time, then more than 70 times in triple time. Over this there are constantly changing phrases alternating with ritornellos, changing combinations of voices and instruments, and one or two madrigalisms illustrating details of the text (for example a divided scale rising through an octave and a 4th for 'ascenderunt'). An electrifying change, very like that in *Zefiro torna* at the equivalent point, ushers in the Gloria, but (another madrigalism) there is a return to the ostinato at 'et semper et in saecula' to bring the piece to a close with more repetitions, 'world without end'.

And in 1640 Monteverdi entered the operatic scene at Venice. *Arianna* was revived that year, and two new operas based on Greek and Latin epic were produced: *Il ritorno d'Ulisse in patria* (1640, surviving in a not quite complete version) and *Le nozze d'Enea in Lavinia* (1641, lost). There are problems of attribution with *Il ritorno d'Ulisse* but no-one has ever suggested that the work is remote from Monteverdi's original conception. In it, as also in *L'incoronazione di Poppea*, the various different aesthetic and technical ideals of earlier works are again brought into new syntheses. However, the backbone of *Il ritorno d'Ulisse* is no longer recitative, as in *Orfeo*. Instead, 'neutral' communication is now to some extent the province of aria, meaning not only tunefulness and tonal unity but also closed musical forms. (Badoaro, the librettist of *Il ritorno d'Ulisse*, acknowledged in the preface to *L'Ulisse errante* the consequent obvious lack of verisimilitude in opera of this period, but defended it on the grounds of utility ('to give more time for the changes of scene') and of fashion ('devoting ourselves to pleasing modern taste').) Once again, this opera is governed by the aesthetic requirement to mimic larger-than-life emotions on a constantly changing basis. (It is no doubt for this reason that Monteverdi anticipated later composers in being prepared at times to override the implicit direction of his librettist. For instance, Eumaeus's triple-time aria 'O gran figlio d'Ulisse' (II.ii) was cast by Badoaro as recitative in seven- and 11-syllable verses, and owes its highly affective (but within the work anomalous) style of word-repetition to the fact that Monteverdi ignored the implicit claims of the text.) The climactic scene in Act 2, in which Ulysses alone is able to draw his bow, typically combines this Marinist mimetic aesthetic with seemingly incongruous elements as found in works of the Mantuan period: it has a rondo-like refrain structure (a brief, tonally unified instrumental sinfonia following each unsuccessful attempt by the suitors), interrupted at Ulysses's intervention by a *sinfonia da guerra* in the *genere concitato* (with repetitions of G major fanfare motifs and rapid, measured repetitions of G in the bass in the style of the eighth book) which, together with claps of thunder, accompanies an entry of Minerva in a stage machine.

In the 1642–3 season Monteverdi's last opera, *L'incoronazione di Poppea*, often considered his supreme masterpiece, was first performed in Venice. This is a setting of a highly unusual historical libretto by Busenello: in the dénouement not only are reason and morality defeated in the final triumph of love, but this triumph is itself obviously evanescent and illusory. Busenello was a senior member of the Accademia degli Incogniti, a group with sceptical and heterodox views, who outspokenly rejected the authority of the Ancients; however, their historiography was shaped by Tacitus, on whom this libretto is based. Serious doubts have been cast on the extent of Monteverdi's responsibility for this work in the surviving versions: Curtis (B1989), for instance, regards the role of Otho as having been rewritten and the final scene as having been added by other hands. But the compositional technique relies on the same Marinist mimetic devices that were used in *Il ritorno d'Ulisse* and that Monteverdi had outlined as his own for *La finta pazza Licori*: rapidly changing images corresponding to single words in the text, sacrificing the musical continuity in order to mirror rapidly changing psychological states in the characters. This is particularly marked in the music for Nero, underlying the unstable psychology of the character.

Another, apparently opposed, characteristic of these late operas may in fact also be due to the influence of Marino: the frequent use of canzonetta forms and techniques for dramatic dialogue, even that of a serious or tragic character. Moreover, such canzonetta structures may even be cast in recitative verse, allowing Monteverdi considerable freedom in the manner in which he makes use of them. Otho's aria in Act 1 scene i, for example, represents a typical form for this period. The verse is written in seven- and 11-syllable lines, and thus apparently as recitative; yet it falls into four matching stanzas, each of one seven-syllable verse and a rhyming pair of 11-syllable verses. Monteverdi's setting of the first stanza begins as recitative, yet turns to arioso at the end; each

succeeding stanza is set as a triple-time aria (a procedure necessitating a good deal of textual repetition) and each represents a variation on the same material, with a good deal of flexibility in the vocal line. These stanzas are tonally self-contained in a D-final tonal type; yet they are formally separated from one another by a short unvarying instrumental ritornello in a C-final tonal type. One of the finest of such canzonetta structures in the opera occurs in Act 2 scene iii; Seneca's companions are given a chromatic setting of aria verse comprising eight-syllable lines, with three different textures, interspersed between instrumental ritornellos, to create a large-scale symmetrical structure that recalls some aspects of the structure of *Orfeo*.

Finally, another important posthumous publication besides the *Messa et salmi* appeared, far more miscellaneous in structure than any supervised by Monteverdi during his lifetime: the ninth book of madrigals SV168–78 (1651). This contains a substantial number of pieces that had appeared earlier, from the eighth book and from other collections, together with numerous previously unpublished works, mostly trios (some very slight) from a generation earlier. One triple-time trio for three sopranos, in alternating stanzas, *Come dolce oggi l'auretta*, with a text by Giulio Strozzi, is the sole surviving number from the opera *Proserpina rapita* of 1630.

10. HISTORICAL POSITION. Various problems beset anyone seeking to assess Monteverdi's historical position. Firstly, in every period since the early 17th century he has had the reputation of being above all else a Modern, a breaker of rules, against the Ancients, those who deferred to ancient authority. In the 17th and 18th centuries he may have needed to be defended against his adversaries on this account; since the Enlightenment (Burney in particular), he may rather have needed to be defended against his friends, those who have regarded him enthusiastically as a torch-bearer, at last bringing an understanding of modern music to realms of obscurantist darkness. (These friends have not been solely musicologists: enormous interest has been shown – and still is – by composers in studying his work and using it as the basis for their own.)

Secondly, Monteverdi's music has surprisingly often been cited by avant-garde musicographers of various hues for their own ends; in every case the considerable gains in understanding so attained have eventually been offset to some extent by the need of later scholars to deconstruct their original agendas. Thus Choron and Fayolle (*Dictionnaire historique*, 1810–11), and the 19th-century writers, including Fétis, who followed their lead, worked out a new French theory of tonality on the basis of Monteverdi's works, one that was immensely fruitful, while concealing the extent to which it reflects 19th- rather than 17th-century musical concepts. Notions of Baroque and Renaissance styles, of an essentially 20th-century variety, have also been constructed, more recently, on the basis of readings of some of Monteverdi's works. And since the late 1980s gender studies have found a fruitful pasture in Monteverdi's works (McClary, F1989; Cusick, I1993 and F1994; Gordon F1999; and others); their insistence on taking narrative complexity seriously is a welcome corrective to some tendencies in the traditional literature, though it is too early to see whether in other respects they will be more than a local American specialism, or how they may usefully contribute towards defining Monteverdi's historical position.

On the basis of the account above, it may be concluded that Monteverdi himself was scarcely interested in securing a reputation as a revolutionary or as a conservative; with a few significant exceptions (for example keyboard and lute music) he made use of an exceptionally wide range of techniques and genres throughout his life, showing what can only be described as an opportunistic and eclectic willingness to use whatever lay to hand for the purpose. Thus he could be numbered among the 'progressive' composers and theorists, since he was content to use modern techniques; but equally he was concerned to be seen as a competent composer in the *stile antico*. This means that his achievement was both retrospective and progressive: he sums up the late Renaissance (in a variety of aspects) while at the same time summing up much of the early Baroque. And in one respect in particular, his achievement was enduring: the effective projection of human emotions in music, in a way adequate for theatre as well as for chamber music.

WORKS

Editions: *Claudio Monteverdi: Tutte le opere*, ed. G.F. Malipiero (Asolo, 1926–42, 2/1954–68) [M]
Claudio Monteverdi: Opera omnia, ed. Fondazione Claudio Monteverdi, IMa, *Monumenta*, v (1970–) [F]
Claudio Monteverdi: Composizioni vocali profane e sacre (inedite), ed. W. Osthoff (Milan, 1958) [O]
Claudio Monteverdi: Il quinto libro de madrigali, ed. K. and J.P. Jacobsen (Egtved, 1985) [J]
Catalogue: *Claudio Monteverdi: Verzeichnis der erhaltenen Werke (SV): kleine Ausgabe*, ed. M.H. Stattkus (Bergkamen, 1985) [SV]

Only principal sources are given (see SV for fuller details). Incipits are full first lines as styled in Fabbri (D1985). Precise details of vocal scorings are given in works for three or fewer voices (except the 1584 Canzonette (all S, S, A or S, S, T) and the 1607 Scherzi musicali (all S, S, B)); optional parts are given in parentheses.

TIM CARTER (1–3, work-list), GEOFFREY CHEW (4–10, bibliography)

Monteverdi, Francesco. Italian singer and composer, elder son of Claudio Monteverdi. *See* MONTEVERDI, CLAUDIO, §3.

Monteverdi, Giulio Cesare (*b* Cremona, bap. 31 Jan 1573; *d* Salò, Lake Garda, ?1630/31). Italian composer, organist and writer on music, younger brother of CLAUDIO MONTEVERDI. In 1600 he was briefly organist of Mantua Cathedral. In August 1602 he was in the service of the Duke of Mantua. He wrote the music for the fourth *intermedio* (to words by Chiabrera; music lost) in the performance of Guarini's play *L'Idropica* given on 2 June 1608 during the wedding celebrations at the Mantuan court. In 1609 he was appointed *maestro di cappella* to Francesco Gonzaga, then governor of Monferrato, and it was in this capacity that he wrote his opera *Il rapimento di Proserpina* (libretto by Ercole Marigliani), which was composed for the birthday of Francesco's wife and performed at Casale Monferrato in 1611 (music lost). In 1612 he was dismissed, along with his brother and other artists, from the Gonzaga family's service. He soon became organist of the principal church at Castelleone, near Crema, where he seems to have remained until, on 10 April 1620, he was appointed *maestro di cappella* of Salò Cathedral. He probably died of the plague of 1630–31. The small amount of his music to survive shows to some extent the influence of his brother. The 25 motets of his only surviving collection, *Affetti musici, ne quali si contengono motetti a 1–4 et 6 voci, per concertarli nel basso per l'organo* (Venice, 1620), are competent in the manner of the concertato for few voices; they lack secular influences but are pleasantly melodious. There is a madrigal for three voices and continuo (in RISM 1605[12]), and his two pieces in his brother's three-part *Scherzi musicali* (1607[21]), each with a three-part ritornello, are very similar in style to the rest of the volume (edns in *C. Monteverdi: Tutte le opere*, ed. G.F. Malipiero, x, Asolo, 1929, pp.58ff). He is more important for the fact that he edited that volume and in doing so included as a *Dichiaratione* a detailed explanation (facs., ibid., 69ff; Eng. trans. in O. Strunk: *Source Readings in Music History*, New York, 1950, pp.405ff) of Claudio's ideas as expressed in the preface to his fifth book of madrigals written in response to Artusi's attacks on him.

DENIS ARNOLD

Monteverdi Choir. London chamber choir founded in 1964 by John Eliot Gardiner. *See* LONDON (i), §VII, 3 and GARDINER, JOHN ELIOT.

Montevideo. Capital of Uruguay. Sacred music was first heard at S Francisco de Asís, which was founded in 1724 with a rudimentary choir; its first organ was inaugurated in 1772. The church's first musicians were the organists Tiburcio Ortega (*c*1780), Bruno Barrales (1786) and Benito de San Francisco de Asís (1800); the most important *maestros de capilla* were Blás Perera (*c*1803), Hermenegildo Ortega (*c*1810), José María de Arzac (until 1830), Juan José de Sostoa (*c*1790) and Fray Manuel Ubeda (1802).

The foundation stone of Montevideo Cathedral was laid in 1790 and the building was consecrated on 21 October 1804 by the Bishop of Buenos Aires, Benito Lué y Riega. It had a choir and later a rudimentary organ, which was improved around 1830. It employed some good organists, including Sostoa (*c*1750–1813) and Arzac (1832–6). The best musical period was under three important *maestros de capilla* who were also accomplished composers: two Spaniards, Antonio Sáenz (from 1829) and Carmelo Calvo (from 1871), and most notably the Italian Giuseppe (José) Giuffra (from about 1850).

Sacred music heard in Montevideo until the mid-18th century consisted of popular religious songs derived from the Spanish troubadours, *pastorelas*, *gozos*, *salves* etc., accompanied mostly by the harp and other string instruments. In the second half of the century more elaborate works were heard, such as masses for three or

four voices with organ accompaniment. After 1830 a third period of religious music developed, strongly influenced by Italian opera.

The archives of S Francisco contain primitive liturgical songs and polyphonic works, among them several masses. There are 194 complete works from the colonial period to 1890, of which the most important historically is Manuel Úbeda's Mass for All Souls Day (1802), the first known composition written in Uruguay. There are also some religious works of the colonial period in the musicology section of the Museo Histórico Nacional.

Theatre music was derived initially from the Spanish theatre and was first heard in the Casa de Comedias (inaugurated 1793); the repertory included *tonadillas escénicas* (musical intermezzos), *melólogos* (melodramas) and zarzuelas, and their popularity lasted until about 1825, by which time more than 300 *tonadillas* had been performed. The composers and some of the most famous works were Pedro Aranaz (*El chusco y la maja* and *El chasco del mesón*), Pablo Esteve (*El granadero*, *Los esclavos del mundo*, *La jardinerita del gusto*, *La cortesana pastora*, *El amante tímido* etc.), Fernando Ferandiere (*Los españoles viajantes*), Manuel García (*La maja y el majo*) and Blás de Laserna (*El novio sin novia*, *La vida del petimetre*, *El tribunal de las quejas*, *Los majos celosos*, *El marido sagaz* etc.).

In 1820 elements of Italian opera arrived with Rossini's overtures, arias and duets, and in 1830 the first complete opera was heard: Rossini's *L'inganno felice*. The Casa de Comedias stage was rebuilt; the building was later demolished and the Nuevo Teatro S Felipe (1880) was built on the same site. From 1830 to 1860, 60 operas were given by ten important companies, which included performances by the Tanni brothers (1830–40), Ida Edelvira (1851–2), Justina Piacentini (1849–54), Eliza Biscaccianti (1854) and Sofia Vera Lorini (1855–7). The Teatro Solís, with five tiers and 1584 seats (now with about 2800), opened in 1856 with Verdi's *Ernani* and became one of the leading houses in South America. With annual performances between April and August, its stage received important singers such as Enrico Tamberlik (1857), Anna Bishop (1858) and Carlotta Patti (1870). The celebrity of that epoch, Adelina Patti, sang at the Solís in 1888. After Maria Barrientos (1901) and Edoardo Garbin (1902) came the golden age of the Solís: in 1903 Toscanini brought a 285-person company from La Scala headed by Enrico Caruso in the tenor's first visit to Montevideo; in 1904 he came with Rosina Storchio in *Madama Butterfly*, and in 1906 with Salomea Krusceniski singing Wagner. A stream of internationally renowned singers followed. Richard Strauss conducted his *Elektra*. José Oxilia, Victor Damiani and José Soler were among the best Uruguayan singers who performed at the Solís. Other theatres of the period – the Cibils (1871), S Felipe (1880) and Politeama (1889) – no longer exist. The Stella d'Italia has been much altered since its opening in 1895, by which time there were 15 theatres in Montevideo. The 3000-seat Teatro Urquiza opened in 1905 with Sarah Bernhardt in Sardou's *La sorcière*; it was bought by the Uruguayan broadcasting service (SODRE) and in 1930 became a studio-auditorium that continued to function until it burnt down in 1971. Both the Urquiza and SODRE had opera seasons, but they were never as distinguished as those of the Solís. The Solís continues to function as a theatre, with brief opera seasons given by national casts and occasional visiting companies.

Early concert life flourished in the musical soirées of the colonial salons. Small groups such as duos and trios became larger and were the source of professional quartets and chamber ensembles and of the Sociedades Filarmónicas (1827–93), out of which grew the first orchestras. The Orquesta de la Sociedad Beethoven (1897–1902), under the Spanish conductor Manuel Pérez-Badía, was followed by the Orquesta Nacional (1908–14) under the Uruguayan composer, violinist and teacher Luis Sambucetti. This was the most important among the early orchestras because it performed not only contemporary European works (in particular Debussy, Franck, Ravel, Rimsky-Korsakov), but also new works by Uruguayan composers. The Sociedad Orquestal del Uruguay (1929–31), conducted by José Segú, Benone Calcavecchia and Vicente Pablo, played the standard symphonic repertory. Among chamber ensembles the Asociación Uruguaya de Música de Cámara was the most distinguished, playing the classical and contemporary repertories from 1910 to 1931.

The OSSODRE (Orquesta Sinfónica del SODRE), founded on 20 June 1931, remains the most important symphony orchestra in the country. The SODRE broadcasting service has four radio stations and a television channel; they all broadcast musical and cultural programmes. The Orquesta Municipal, founded by Carlos Estrada in July 1959 and conducted by him until his death in 1970, changed its name in 1992 to Orquesta Filarmónica de la Ciudad de Montevideo; the conductor in the 1990s was Federico García-Vigil.

The main concert halls around the beginning of the 20th century were those of the Conservatorio Musical La Lira (600 seats, 1878–1950); the Instituto Verdi (800 seats, from 1890), which became the Teatro Verdi (*c*1960); the Victoria Hall (600 seats, from *c*1920), now the Teatro Victoria; and the Sala Vaz Ferreira, the auditorium of the Biblioteca Nacional, which opened in 1972 and is one of the best.

Public musical education began in the late 19th century; between 1873 and 1906 six conservatories were founded. La Lira (1873), the Instituto Verdi (1890) and the Liceo Musical Franz Liszt (1895) were the most important, each with a large auditorium and a chamber ensemble; La Lira and the Instituto Verdi each had its own orchestra and choir. In addition there were the Escuela Musical Falleri, the Conservatorio Musical de Montevideo, the Conservatorio Wilhelm Kolischer, the Conservatorio Balzo and others. The Conservatorio Nacional de Música became the Escuela Universitaria de Música in 1986 and was directed in the 1990s by the composer Antonio Mastrogiovanni. The former Instituto de Musicología, founded in 1946 as part of the Facultad de Humanidades, later became part of the Escuela Universitaria de Música. The Concurso de Intérpretes Luis Cluzeau-Mortet, founded in 1992, is an annual award given by the University of Montevideo to young performers and small ensembles to promote works by Uruguayan composers.

Montfort, Corneille de. *See* BLOCKLAND, CORNELIUS.

Montfort, Hugo von. *See* HUGO VON MONTFORT.

Montgeroult, Hélène-Antoinette-Marie de Nervo de [Countess de Charnage] (*b* Lyons, 2 March 1764; *d* Florence, 20 May 1836). French virtuoso fortepianist and composer. She was trained in Paris as a fortepianist by N.-J. Hüllmandel, Clementi (1784) and then J.L. Dussek; still later she studied with Antoine Reicha. In 1784 she married the Marquis de Montgeroult (*d* 1793), then Charles-Hyacinte His, whom she divorced in 1802, and finally the Count du Charnage (*d* 1826).

In 1795 she was appointed *professeur de première classe* at the newly established Paris Conservatoire, where her pupils included L.-B. Pradher, A.P.F. Boëly and I.A. Ladurner. Her home was later recognized as one of the most important Parisian musical salons. At the turn of the century she published her two collections of *Trois sonates pour le forte-piano* and later a *Cours complet pour l'enseignement du forte-piano* (in three volumes, ?1820), which Marmontel praised as an important resource of musicianship. A passionate admirer of Handel, Montgeroult applied the art of singing to playing the piano. She died while travelling in Italy and is buried in the cloister of S Croce in Florence.

JULIE ANNE SADIE

Montgomerie, Hugh. *See* EGLINTON.

Montgomery, Kenneth (*b* Belfast, 28 Oct 1943). Northern Ireland conductor. He studied at the RCM with Boult, and in Siena with Celibidache, and was on the music staff at Glyndebourne from 1964 to 1968, making his conducting début with *L'elisir d'amore* in 1967. He was a staff conductor with Sadler's Wells Opera (1967–70) in a wide repertory and, while working successfully with the Bournemouth SO and Sinfonietta, appeared at the Wexford Festival in *Oberon* (1970) and *Il rè pastore* (1971). In 1970 his conducting of *Ormindo* with the Netherlands Opera began a long and fruitful association involving a wide range of operas from Cavalli to Janáček and Stravinsky. His Covent Garden début was in 1975 with *Le nozze di Figaro*. He was music director of Glyndebourne Touring Opera, 1975–6, when he conducted *Der Freischütz*, but resigned to become principal conductor of the Netherlands RSO and to strengthen his ties with the Netherlands Opera. In 1985 he became artistic director of Opera Northern Ireland in his native city. He has frequently appeared as a guest conductor with the WNO and Canadian Opera, and in 1990 conducted *Alcina* for Vancouver Opera.

ALAN BLYTH

Montgomery, Wes [John Leslie] (*b* Indianapolis, IN, 6 March 1923; *d* Indianapolis, 15 June 1968). American jazz guitarist. He began to teach himself the guitar about 1943 and was soon playing in local bands. He toured and recorded with Lionel Hampton from 1948 until the beginning of 1950. In 1959 he organized his own trio with organ and drums, and its first recording, *The Wes Montgomery Trio*, initiated a series of albums for Riverside. These represent Montgomery at his peak, accompanied by the finest rhythm sections available, and brought him belated recognition.

Montgomery worked with John Coltrane in 1961–2. In 1964 his recordings began to make use of string orchestras and large jazz bands. Though unrepresentative of his talents, these considerably broadened his audience; his rendition of *Goin' out of my Head* (1965, Verve) won a Grammy Award, and *A Day in the Life* (1967, A&M) was the best-selling jazz LP of 1967. In live performances, however, Montgomery continued to appear in small groups, notably with the Wynton Kelly Trio and in a quintet that included his brothers Monk (double bass) and Buddy (piano and vibraphone). He died unexpectedly at the height of his career.

Critics generally consider Montgomery the most important and influential jazz guitarist after Charlie Christian. Like Christian, whose recorded solos he memorized in his youth, Montgomery invented perfectly shaped phrases with tremendous rhythmic drive. But he also took advantage of contemporary developments in jazz harmony and melody, as well as improvements in the construction of electric guitars, to create an individual style. Instead of a plectrum he used his thumb for various kinds of strumming, achieving a softer attack and leaving his fingers free to pluck octaves and chordal passages. His mastery of technique created a sensation among younger guitarists, and the playing of octaves, in particular, became a trademark of the Montgomery style.

Montgomery tended to build his solos from melodies in single notes to octave passages and finally to chords. He had a highly original melodic imagination and, at his best, constantly produced refreshing ideas that broke off unexpectedly. Even when he paraphrased a melody he managed to invest it with rhythmic excitement. Montgomery's playing abounded in subtle embellishments, deep blues sentiment and a highly expressive use of portamento, tremolo and other effects. In his sincere, unsensational way, he expanded the resources of the jazz guitar, and his influence has been acknowledged by many later guitarists. Two volumes containing transcriptions of Montgomery's solos have been published.

LEWIS PORTER

Monti. Italian family of singers and at least one composer, prominent in the 18th century in the development of Neapolitan *opera buffa*.

(1) **Laura Monti** (*b* ?Rome, after 1704; *d* Naples, 1760). Singer. She was a member of comic opera companies at the Teatro Nuovo, Naples, 1726–32, singing second and third comic parts. From 1733 she sang at the royal theatre, S Bartolomeo, in intermezzos between the acts of serious operas, until 1735, when Carlo III replaced intermezzos with ballets. Among her roles was Serpina in the première of Pergolesi's *La serva padrona* (1733); Hasse and Leo also wrote parts for her. In 1738 she took part in the entertainments celebrating Carlo III's marriage, and sang at the newly opened S Carlo in Pietro Auletta's expanded intermezzo *La locandiera*, the first and for many years the only comic opera produced in the royal theatre. After appearances at the Teatro Nuovo (1743) and the Fiorentini (1745–6) she seems to have retired. Her sisters Anna Maria Monti (*b* 1704) and Grazia Monti were also singers: Anna Maria made her début at the Fiorentini at the age of 13 in Falco's dialect opera *Lo mbruoglio d'ammore*, in the first regular season of comic opera, and sang there until 1727, chiefly in comic servant roles; Grazia appeared at the Nuovo in Giuseppe de Majo's *La milorda* (1728).

(2) **Marianna Monti** (*b* Naples, 1730; *d* Naples, 1814). Soprano, cousin of (1) Laura Monti. She made her début in Carnival 1746 in Conforto's *La finta vedova* at the Teatro dei Fiorentini and from then until 1759 appeared regularly there and at the Teatro Nuovo, singing comic servant parts. She enjoyed the patronage of the Marchese di Gerace, with whom she was arrested suddenly in 1760 by the theatrical censors, who presumed impropriety; but after petitions and protests both were freed (there were testimonies to her 'honest, philanthropic life, without any scandal' and her regular attendance at church) and after two months she was able to resume singing at the Fiorentini theatre. For almost 20 years Monti was perhaps Naples's most popular *prima buffa*. The best composers of the period created roles for her: Cocchi, Latilla, Logroscino, Jommelli, Traetta, Piccinni, Sacchini, Guglielmi, Paisiello and Cimarosa. Her style almost certainly influenced the development of Neapolitan *opera buffa*. She helped popularize in the south the modern comic opera dramaturgy, with its greater variety of vocal textures and aria forms and longer and more complex finales, developed by Goldoni for Venice and introduced in Naples in the early 1760s, particularly by the librettist Antonio Palomba. Her public career ended with the Palomba-Curcio *farsa*, *Il millantatore* (Carnival 1780), at the newly opened Teatro del Fondo.

(3) **Gaetano Monti** (*b* Naples, *c*1750; *d* ?Naples, ?1816). Composer, younger brother of (2) Marianna Monti. Early reports that he was the brother of the poet and librettist Vincenzo Monti (1754–1828) are unfounded. According to Florimo, he first appeared in public in 1758 at the age of eight, singing a skirt part in a revival of Piccinni's *Il curioso del suo proprio danno* at the Teatro Nuovo along with his sister who had the lead. This short part (Stellante) was probably written specially for him, since the character did not appear in the original production of 1756 and was in excess of the seven characters then customary for *opere buffe*. In 1776 he was admitted to the musical staff of the Tesoro di S Gennaro as *organista straordinario*, a position he appears to have held until at least 1788. After writing one serious opera for Modena in 1775, he confined himself to productions for the comic stage, usually including a part for his sister until her retirement in 1780. He is said to have composed church music (none of which is known to survive). In 1776 the impresarios of the S Carlo listed him among the 20 best composers then living in Naples. His two most popular operas, *Le donne vendicate* and *Lo studente*, were performed outside Naples as well as revived there; Gerber remarked on the popularity of his music in Germany.

WORKS

opere buffe unless otherwise stated

L'Adriano in Siria (os, P. Metastasio), Modena, Corte, 31 Jan 1775
Il cicisbeo discacciato Naples, Nuovo, spr. 1777
La fuga (G. Lorenzi), Naples, Nuovo, sum. 1777, *I-Nc*
Il geloso sincerato (Lorenzi), Naples, Fondo, aut. 1779
La contadina accorta (int), Rome, Capranica, 4 Jan 1781, *D-Dl*
Le donne vendicate (Il gigante) (G. Palomba), Naples, Nuovo, 17 Oct 1781, *I-Nc*
Il Molaforbice (Palomba), Naples, Nuovo, 26 Dec 1781
Lo sposalizio per dispetto (G. Bertati), Venice, S Moisè, 26 Dec 1781
La viaggiatrice di bell'umore (int), Rome, Capranica, carn. 1782
Lo studente (F.S. Zini), Naples, Nuovo, carn./spr. 1783
La donna fedele (Zini), Naples, Fondo, ? 1 Sept 1784

Music in: Tritto: La Scuffiara, 1784; Gazzaniga: La donna soldato, 1793; I tre gobbi (int), *Nc*

6 concerti a 6, *Mc*; aria, *GB-Lbl*

JAMES L. JACKMAN

Monti, Giacomo (*fl* Bologna, 1632–89). Italian music publisher, father of PIER MARIA MONTI. He began his publishing activities in Bologna in 1632, establishing a printing press near the church of S Matteo delle Pescherie. Two years later he entered into partnership with Carlo Zenero, and the press was moved to Via S Mamolo in 1638. Its first musical publication was Corbetta's *Scherzi armonici: suonate sopra la chitarra spagnola* (1639), followed in the same year by the second volume of Piccinini's *Intavolatura di liuto*. Shortly thereafter the partnership was dissolved, and Monti continued the business alone, publishing mostly historical and sacred works. In 1662 he resumed his musical activities, having moved to a shop under the vault of the Pollaroli, and until 1689 his musical production was intense, consisting chiefly of works by Bolognese composers. He seems to have worked completely independently at first. During this period his typographical mark was a figure of St Petronius, the patron saint of Bologna.

In about 1668 the Bolognese bookseller Marino Silvani associated himself with Monti, at first using his presses for several of the anthologies he himself edited (*Sacri concerti*, 1668; *Nuova raccolta di motetti sacri*, 1670; *Canzonette per camera a voce sola*, 1670; *Scielta delle suonate a due violini, con il basso continuo*, 1680), as well as for music by Filippini (op.10), G.B. Bassani (opp.1

and 5), Albergati (op.2), Domenico Gabrielli (op.1) and Corelli (reprint of op.1), all within the period 1683–4. Apparently Silvani and Monti then made an agreement that gave Silvani the exclusive rights to sell Monti's publications. From 1685 all the publications of Giacomo Monti carried the indication 'sold by M. Silvani at the sign of the violin', and the typographical mark was nearly always a violin with the motto 'UTRElevet MIserum FAtum SOLitosque LAbores'. The secular production of the firm during this period was somewhat limited but included madrigals by G.B. Bassani, Mazzaferrata, G.B. Bianchi and G.M. Bononcini (i) and canzonettas and chamber cantatas by Bononcini, Cazzati, Cherici, Cossoni, Legrenzi, Mazzaferrata and Penna. For sacred and instrumental music, however, production was far more extensive, preferred authors being G.P. Colonna, Cossoni, Filippini, G.B. Vitali, Bononcini, G.B. Degli Antoni, G.B. Bassani, Mazzaferrata, Cazzati, Albergati, Corelli, Berardi and Penna. Monti published an index, probably in 1682, of works printed by the firm (*Indice dell'opere di musica sin'hora stampate da Giacomo Monti in Bologna*). In 1689 the business passed to Pier Maria Monti.

ANNE SCHNOEBELEN

Monti, Pier Maria (*fl* Bologna, 1689–1702). Italian music publisher, son of GIACOMO MONTI. He succeeded his father in 1689, taking over a well-established printing house that had been active in Bolognese music publishing since 1639. Like his father's, his publications were sold by Marino Silvani, and later also by Lelio Della Volpe. The composers whose works were published by the Monti firm during these years (mostly between 1690 and 1695) included Giovanni Bononcini, Domenico Gabrielli, Corelli, G.P. Colonna, Elia Vannini, Jacchini, G.B. Bassani and Francesco Passarini. Monti's last musical edition seems to have been a reprint of Trolli's *Modo facile di suonare il Sistro nomato il Timpano* (1702, printed under the name Paradossi). After his death his heirs continued the non-musical part of the firm's publishing activities, becoming the official printers for the Holy Office; the music publishing was taken over by the Silvani firm. In general the typography of the Monti press (both father and son) lacks care and elegance and has a commercial character.

For bibliography *see* MONTI, GIACOMO.

ANNE SCHNOEBELEN

Montibus, Iacobus de. *See* JACOBUS OF LIÈGE.

Monticelli, Angelo Maria (*b* Milan, *c*1712; *d* ?Dresden, ?1758). Italian castrato soprano. He began his career in Venice in 1728, then went to Milan (where he often appeared throughout his career) and Rome (where he sang prima donna roles opposite Caffarelli). He appeared for ten years in secondary roles throughout Italy before being engaged as primo uomo for London (1741–6, returning to Milan for the 1745 carnival). According to Horace Walpole, he was 'infinitely admired' at the King's Theatre, and he sang in two operas by Gluck in 1746. The Viennese court employed him from 1740 although his only confirmed public appearances date from 1748. He sang at the S Carlo in Naples for two years and then joined Hasse's Dresden troupe as primo uomo (1753–6). His last known performance was in Genoa in October 1756; according to Fürstenau, he died in Dresden in September 1758. Monticelli had a lyric, agile voice and was a great actor, praised by Burney, Walpole and others. He was responsible for much of the popular dispersion of Pergolesi's *L'olimpiade*, whose arias for Megacles he often sang. He has often been confused with the other singers of the time called Monticelli (particularly Maria Marta). (*FürstenauG*)

DALE E. MONSON

Montichiaro, Zanetto da. *See* ZANETTO DA MONTICHIARO.

Montirandé (Fr.). A 16th- and 17th-century variety of BRANLE in duple metre with dotted rhythms. It was mentioned by Arbeau (as the 'branle de mostierandel'), Mersenne ('branle de montirandé') and François de Lauze, who defined it simply as the fifth branle of a series (*Apologie de la danse*, 1623; ed. J. Wildeblood, 1952). Examples can be found in Jean d'Estrée's *Tiers livre de danseries* (1559), Anthoine Francisque's *Le trésor d'Orphée* (1600) and Michael Praetorius's *Terpsichore* (1612). A manuscript in Uppsala contains a number of *montirandés* for ensemble.

□

Montoya (Salazar), Ramón (*b* nr Toledo, 2 Nov 1880; *d* 1949). Spanish flamenco guitarist of Gypsy origin. He launched his career at the turn of the century playing in Madrid cafés, and went on to make his name as accompanist to the renowned famous *cantaor* Antonio Chacón from 1912 to 1926. Llobet Soles, who was known to Montoya, may have inspired him to adapt traditional flamenco songs such as *soleares*, *siguiriyas* and *bulerías* for solo guitar. Today these songs are standard repertory for the flamenco *tocaor*. Montoya gave a landmark recital to a packed Salle Pleyel, Paris, in 1936, and also made some important recordings there collected in Harmonia Mundi's 'Grandes figures du flamenco' series (1988).

The first solo flamenco guitarist (as opposed to a flamenco *tocaor* who played solos), he helped turn what had traditionally been an instrument of accompaniment into one that could be listened to in concert conditions. He was also the only flamenco guitarist to have performed privately for British royalty (in 1938) when he performed with a famous flamenco dancer, La Argentinita, in front of the future Queen Elizabeth II. He is remembered for his lyric innovation, technical expertise and great modesty (he always considered his solo work inferior to his role as an accompanist).

Montre (Fr.). *See under* ORGAN STOP.

Montreal. City in Canada. It has long been a leader in the country's musical life, challenged only by Toronto. It is a bilingual city (roughly three quarters French- and one quarter English-speaking), and music is one of the few

cultural activities that unites and receives support from both language groups.

1. History. 2. Institutions.

1. History. Founded by the French as a missionary outpost in 1642, the early colony was too preoccupied with such basics as shelter, food and defence to pay much attention to cultural development. Music consisted of French folksongs and, in the religious services, some plainchant and a few motets. It was discovered that the Amerindians of the region responded readily to liturgical music, and the latter became a vital tool in their conversion to Catholicism: native children were taught canticles and simple Gregorian chant, with words in the appropriate Amerindian language. A number of musical instruments were brought by the colonists, and particularly by those who were sent to govern them. Indeed, there are 17th-century references to flutes, trumpets, drums, fiddles, lutes and guitars, which were played in connection with wedding celebrations, government functions and military ceremonies.

Quebec City, founded 34 years earlier than Montreal, was the seat of French government, and secular music developed more rapidly there than in the purely religious settlement of Montreal; however, the commercial and military importance of Montreal – the highest navigable point on the St Lawrence River at that time – soon came to be recognized and exploited, and the town began to lose its exclusively religious character. By the end of the 17th century an imported French organ had been installed in the parish church; the first recorded organist is J.-B. Poitiers du Buisson (1645–1727), who took up the post at the age of 60. Although the existence of secular instrumental music in 17th- and early 18th-century Montreal is confirmed by the records of an occasional ball organized by a government official or a member of the seigneurial class, such activity was discouraged by the Gentlemen of St Sulpice, the seigneurs of the Montreal settlement. Music remained either a folk tradition, barely tolerated by the church, or an instrument of the divine service. The music of the native tribes was not regarded as worthy of notice. A few Amerindian tunes were written down as curiosities in the 17th century, but only when they showed some resemblance to European music.

After the conquest of Canada by the British (1759), the bands of British regiments stationed in the larger towns formed the nucleus of a new and somewhat more active musical life. Army commissions were purchased by the wealthy, and commanding officers vied with each other in the quality of their bands; the musicians, many of them German, seem to have been both competent and versatile. In Montreal they gave regular weekly concerts of about two hours on the old Champs de Mars, and the bands also provided the musicians for the frequent balls held during the winter.

Montreal acquired a French musician of some wit and skill during the American Revolution: Joseph Quesnel (1749–1809), a sea-captain from St Malo captured by a British frigate in 1779 while running supplies and ammunition from France to the USA. After his release he eventually settled in the Montreal area, managing the general store of Boucherville, an adjacent village, and writing songs, chamber operas, and quantities of essays and poetry. One of his operas, *Colas et Colinette, ou Le bailli dupé* (1788), was performed in Montreal in 1790; it is a pleasant if rather conventional work, owing more to Grétry and Rousseau's *Le devin du village* than to Mozart. Quesnel arrived in Canada as a mature musician, and Montreal had as little influence on his work as he had on the citizens of his adopted country. His assessment of the cultural life of the town was not high; in one of his poems, *Epitre à M Généreux Labadie*, he wrote: 'At table they sing you an old Bacchic song; in church there were two or three old motets, accompanied by organs missing their bellows'.

In 1848 the first Philharmonic Society was organized in Montreal by an English organist, R.J. Fowler, for the presentation of orchestral and choral works. Fowler's musical resources must have been severely limited at the time, and the career of the organization was ended abruptly by the great cholera epidemic of 1852. Sporadic attempts were made to organize concerts on a regular basis, but the majority were short-lived. The first group to survive for any length of time was the Montreal Mendelssohn Choir, founded in 1864 and conducted by Joseph Gould (1833–1913), who continued to direct the group of some 100 voices in several concerts each year until the choir's dissolution in 1894. The extensive collection of musical material acquired by the organization was left to the faculty of music at McGill University.

A few French choral groups enjoyed brief success during the same period: the Société Musicale des Montagnards Canadiens, the Orphéonistes de Montréal (both founded by François Benoit) and the Société Ste-Cécile, founded in 1789 by Adélard J. Boucher. The latter also launched a music publishing business and acted as an impresario for visiting artists.

The development of Boston and New York was much more rapid than that of the French and British settlements in Canada, and by the mid-19th century the musical celebrities of Europe already found it profitable to tour the USA, with brief sallies into the larger Canadian towns across the frontier. In this way Montreal heard such musicians as Patti, Christine Nilsson, Gottschalk, Joseffy, Bülow, Rubinstein, Wieniawski, Vieuxtemps and Ole Bull. In 1850 a touring orchestra from Berlin, known as the Germanians, gave nine performances in Montreal's Theatre Royal with great success.

The revival of the Philharmonic Society of Montreal in 1875 was an event of great consequence in the development of musical taste in the city. In its 24 years of activity it presented over 120 large orchestral and choral works, many of them for the first time in Canada. Although choral groups were flourishing at this period the formation of an adequate orchestra presented problems; musicians were imported from Boston, Quebec City and Ottawa to supplement the local band for the society's concerts. The first director of the Philharmonic concerts was P.R. McLagan, succeeded in 1879 by Joseph Gould and Fred E. Lucy-Barnes. In 1880 the direction of the concerts was taken over by Guillaume Couture, who continued to lead the performances until 1899, when the organization suspended its activities. During that period the Philharmonic Society presented such important works as Handel's *Judas Maccabaeus* and *Acis and Galatea*; Mendelssohn's *Elijah* and *Paulus*; Mozart's Requiem; Haydn's *The Creation* and *The Seasons*; Beethoven's Ninth Symphony and *Christus am Ölberge*; a concert version of Wagner's *Der fliegende Holländer*; and the first Canadian performances of Cherubini's Requiem, *Das*

Paradies und die Peri by Schumann and *Samson et Dalila* by Saint-Saëns.

Guillaume Couture, who sustained the Philharmonic Society and accounted for much of its success, was the first outstanding Montreal-born musician. In 1873 he was sent by a generous patron to Paris, where he completed his studies with Romain Bussine and Théodore Dubois. He returned to Canada permanently in 1878, and after the failure of the Philharmonic Society in 1899 confined himself to teaching and to his post as organist of the Cathedral of St Jacques. He composed several religious works, including the oratorio *Jean le Précurseur*, first performed in Montreal in 1923. Several of his pupils contributed significantly to Montreal's musical development. Another musician of importance in Montreal during the last quarter of the 19th century was the Belgian violin virtuoso Frantz Jehin-Prume, teacher of Ysaÿe and successor to Bériot as violinist to the Belgian king. He toured with the Rubinsteins, Jenny Lind, Esipova and others, and during one of his American visits married the Canadian soprano Rosita del Vecchio. Settling in Montreal in the 1860s, he organized and conducted a number of orchestral and chamber music concerts, exercising considerable influence on the quality of music in the city, both through the imaginative choice of programmes and his professional level of performance. He was also a close friend and supporter of Calixa Lavallée, who composed Canada's national anthem and was one of the country's most gifted and productive musicians.

2. INSTITUTIONS. Towards the end of the 19th century a number of attempts were made in Montreal to form a permanent orchestra, the most important being that of J.-J. Goulet, a Belgian violinist who went to Montreal in 1890. He organized the remnants of a short-lived cooperative orchestra founded by Guillaume Couture, and from 1897 was able to sustain a series of four or five concerts annually for more than ten years, under the name of the Montreal SO.

During the 1920s Goulet and J.-J. Gagnier again tried to form a permanent orchestra. In 1928 the latter founded the Montreal Little SO and the Montreal SO, two ensembles that prepared the way for the foundation of the Montreal Concert Symphonic Orchestra (1930–41) and the Société des Concerts Symphoniques de Montréal (1934–).

Following the development of the film soundtrack in the late 1920s many of the pit musicians, who supplied background music and accompaniments for cinemas and vaudeville houses, found themselves unemployed. Their situation was aggravated in 1929 by the financial crisis and subsequent depression. A group of these musicians approached Douglas Clarke, dean of the faculty of music at McGill University, with a view to forming an orchestra with Clarke at its head. The orchestra offered 25 programmes in its first season (1930–31), but this was reduced to 20, then 18, in succeeding seasons. Concerts took place at His Majesty's Theatre on Sunday afternoons, and the programmes compared favourably with those of other American orchestras.

Clarke, a pupil of Vaughan Williams and Holst, was a well-schooled and perceptive musician. He refused payment for his services throughout the 11-year existence of the orchestra and contributed generously to its collection of scores and parts. He led the musicians through the first Montreal performances of many works now regarded as part of the standard repertory, and he invited leading musicians to take part in the concerts either as guest conductors or as soloists, among them Enescu, Jan Kubelík, Bauer, Zimbalist, Holst and Grainger. In 1934 the board of directors of the Montreal Orchestra split in a dispute with Clarke over the choice of programmes, and the dissatisfied faction, largely French-speaking and led by Athanase David, set up a new series of concerts under the name of the Concerts Symphoniques. Performances were given in the auditorium of the Plateau School; there were a dozen concerts that year, and most of the musicians were those employed by the Montreal Orchestra. Whereas before 1930 there had been no permanent orchestra, by 1935 the community was called upon to support two.

One of the founders of the new concert series was Wilfrid Pelletier, a Montreal conductor on the staff of the Metropolitan Opera in New York. His commitments in New York prevented him from playing a very active role in the direction of the Concerts Symphoniques in the early years, but his association with the organization later became closer, and the quality of performance improved.

An important offshoot of the Concerts Symphoniques was an annual summer festival, first held in 1936, in which Wilfrid Pelletier played a more creative role. These summer concerts began with large choral works, but by 1945 the project had expanded to include opera, ballet, orchestral concerts and theatre in both French and English. Between 1941 and 1944 Beecham conducted a number of the choral performances. The Montreal Festivals enjoyed their greatest popularity during the 1950s, although a notable event was the Contemporary Music Week in July 1961, which attracted leading composers from most Western countries.

Clarke's Montreal Orchestra was dissolved in 1941, and the Concerts Symphoniques continued alone; in the 1940s the Belgian Désiré Defauw was engaged as artistic director. The rift between the two language groups gradually closed. Programmes became bilingual, and in 1954 the organization was renamed Orchestre Symphonique de Montréal – Montreal SO. Since 1979 it has been known by its French name. Permanent musical directors succeeding Defauw have been Klemperer (1950–53), Markevich (1956–60), Mehta (1961–7), F.-P. Decker (1967–75), Frühbeck de Burgos (1975–6) and Charles Dutoit (1977–). By 1998 the Montreal SO had undertaken 33 national and international tours, most of them under the direction of Charles Dutoit; the orchestra has also made over 75 recordings with Dutoit for Decca, several of which have won international awards.

Since 1981 Montreal has had a second orchestra, the Orchestre Métropolitain. This consists of 65 young musicians, and aims to make great works of the classical and popular repertory available to audiences who do not attend the concert halls in the city centre. It also gives concerts in various parts of the Ile de Montréal and even in subway stations. In 1995 Joseph Rescigno became conductor of the orchestra and chorus of the Orchestre Métropolitain.

In 1940 Madge Bowen and Ethel Stark founded the Montreal Women's SO. Consisting of 75 instrumentalists conducted by Ethel Stark, the orchestra gave about ten concerts a year until it was disbanded at the end of the 1960s. It was the first women's symphony orchestra in Canada and the first Canadian orchestra to play in Carnegie Hall, New York.

The first attempt to establish a permanent opera company in Montreal was made in 1910. Generously underwritten by F.D. Meighen, the company was headed by Albert Clerk-Jeannotte, a singing teacher at the McGill Conservatorium. Organized as a repertory company, it mounted 13 operas in its first three-month season, and included a tour of Toronto, Rochester, Quebec City and Ottawa. The personnel numbered as many as 100 instrumentalists and singers, including 23 principals, and was under the musical direction of Agide Jacchia and Louis Hasselmans. Most of the singers were guests (e.g. Leo Slezak and Edmond Clément), but there were several Canadians, some of whom have distinguished themselves abroad (e.g. Beatrice La Palme and Louise Edvina). The theatres of the time were not large enough to make Meighen's scheme workable; the company was kept afloat for three years, then disbanded just before World War I. For many years Montreal was dependent on occasional visits by the Metropolitan Opera of New York and by smaller touring companies.

Hoping to provide Montreal with a permanent music drama company, Honoré Vaillancourt (1892–1933) founded the Société Canadienne d'Opérette in 1921. From 1923 to 1933 the company presented some 90 works and over 300 shows. Lionel Daunais and Charles Goulet continued Vaillancourt's work by founding the Variétés Lyriques in 1936. With a repertory made up largely of popular operettas by Friml, Lehár, Lecocq, Messager and others, they won a large public (17,000 subscribers annually), particularly among the French-speaking community. During the next 19 years at the Monument National, the company offered over 1000 performances of 83 works, of which 13 were from the serious opera repertory. With the development of national television networks in the 1950s their audience dwindled, and the company closed at the end of the 1955 season.

Meanwhile, in 1942 the Opera Guild of Montreal was founded with Pauline Donalda as artistic director. The aims of the company were much more modest and realistic than Meighen's. Beginning with two productions annually, each of which was given two performances, its programme was cut back in 1950 to one opera a year. Local artists were strongly supported, and although most of the operas were chosen from the popular repertory, more adventurous items were included, such as *The Golden Cockerel* (1944), *The Love for Three Oranges* (1952), *Louise* (1953), *Boris Godunov* (1954), *Falstaff* (1958) and *Macbeth* (1959). The musical director of the company for 19 of its 28 years was the Russian conductor Emil Cooper, who had directed the première of *The Golden Cockerel* in Moscow in 1909. The guild closed in 1969.

From 1964 Montreal's opera programme was augmented by productions organized by the Montreal SO in collaboration with the directors of the Place des Arts. The quality of performance was high, and opera became a regular feature of the orchestra's season, supported by additional subsidies from both the Canada Council and the Minister of Cultural Affairs of the Province of Quebec. In 1971, wishing to consolidate its opera investments, the Quebec government formed the Opéra du Québec, which absorbed the opera programme of the Montreal SO as well as a small company in Quebec City, the Théâtre Lyrique de la Nouvelle France. Excellent productions of such works as *Otello, Salome*, Puccini's *Il trittico* and *Tristan und Isolde* were offered, along with standard repertory, first in the Place des Arts, then in Quebec's Grand Théâtre. After four seasons the Quebec Minister of Cultural Affairs suspended the operation, which already had an accumulated deficit of more than a million dollars.

The Opéra de Montréal was founded in 1980, taking over from the Opéra du Québec, which had closed in 1975. Two decades after its foundation, with seven annual productions, 10,000 subscribers and average audiences of 85,000, the Opéra de Montréal is among the ten most important opera companies in North America. Although its repertory is mainly French and Italian, the company stages operas of all genres and all periods, including contemporary works. Major productions by the company, which was directed first by J.P. Jeannotte (1980–89) and then by Bernard Uzan (1989–), have included *Tristan und Isolde* (1986), *Dialogues des Carmélites* (1989), *Adrianna Lecouvreur* (1990), *Madama Butterfly* (1993), *The Consul* (1995), *Turandot* (1997) and *Jenůfa* (1997). The Opéra de Montréal is recognized as the principal opera company in North America for hiring out sets and costumes.

The Little SO, an ensemble patterned on the late 18th-century orchestra, flourished between 1942 and 1951, offering a mixture of classical and modern works. Conductors were engaged on a permanent basis, and they included Bernard Naylor, George Schick, Fritz Mahler and Carl Bamberger. The role of the Little SO was taken over by the McGill Chamber Orchestra, which has continued to offer a popular series of eight concerts each season, first under its founder, Alexander Brott, and since 1990 under Brott's son, Boris. Basically a string orchestra (it began in 1939 as a quartet), the McGill Chamber Orchestra varies in size from 12 to 25 musicians; its concerts are given in the Théâtre Maisonneuve.

In 1983 Yuli Turovski formed I Musici di Montréal, a string ensemble of 16 musicians. The ensemble has a repertory ranging from Baroque to contemporary works, has undertaken several concert tours and has made a large number of recordings, many of which have received awards. I Musici de Montréal became a permanent ensemble in 1990, and offers its subscribers a season of 48 weeks.

Choral singing is an important part of the musical life of Montreal. Notable choral ensembles since the 19th century include the Mendelssohn Choir (1864–94), the Montreal Philharmonic Society (1875–99), the Montreal Elgar Choir (1922–85), Les Disciples de Massenet (1928–), the Petits Chanteurs de Mont-Royal (1956–), the Tudor Singers of Montreal (1962–91), the Studio de Musique Ancienne de Montréal (1974–) and the Société Philharmonique de Montréal (1978–).

The Ladies' Morning Musical Club, founded in 1882, is one of the oldest musical organizations on the continent. Despite the name, the annual 13 recitals and chamber concerts take place in the afternoon and are not confined to ladies. The club has a record of unusual success in finding gifted performers, from Ysaÿe to Ferrier, before their reputations had carried them beyond its financial capabilities. Similar in its objectives is the Pro Musica Society, founded by Constant Gendreau in 1948, which offers eight concerts annually, also at the Théâtre Maisonneuve.

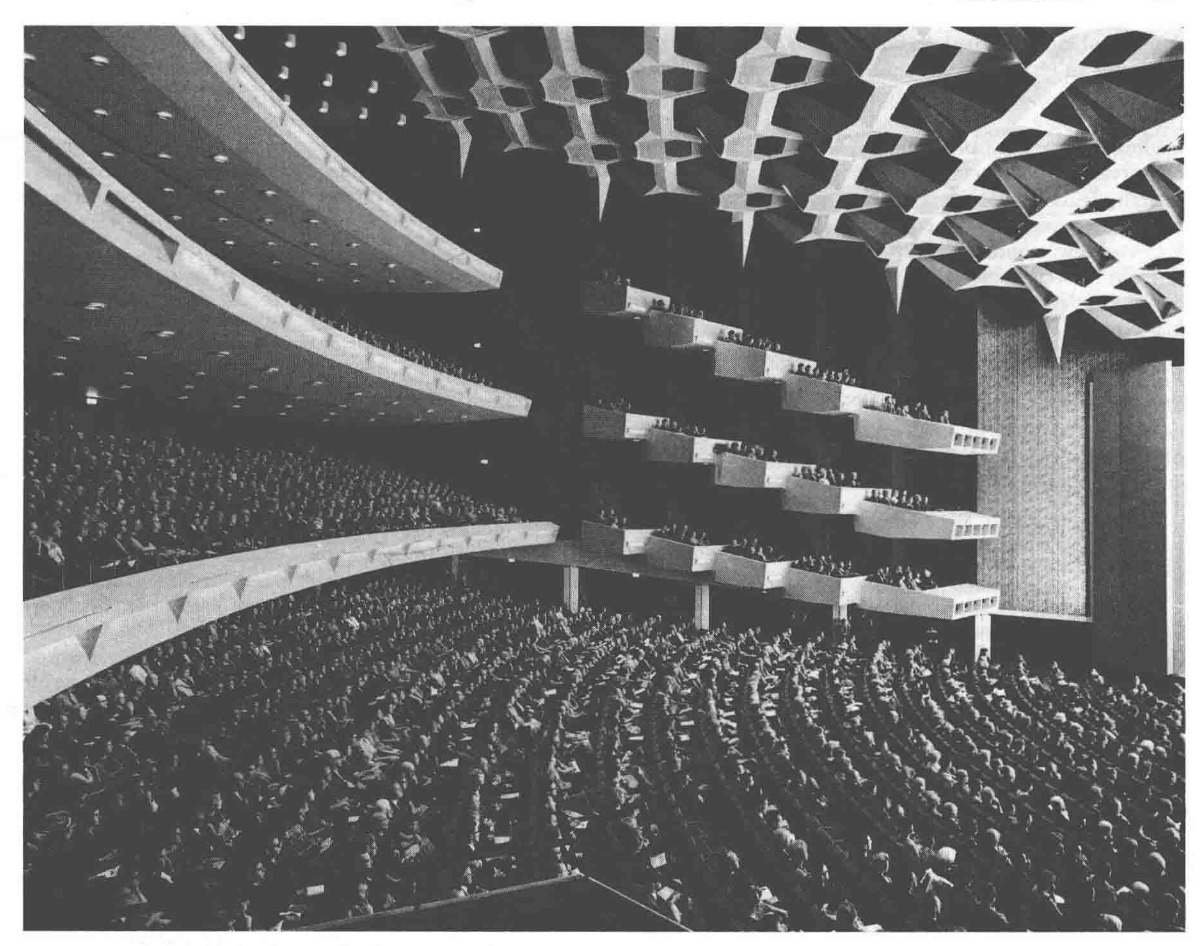
A wide spectrum of the new music is offered by the Société de Musique Contemporaine du Québec (SMCQ), founded in 1965. The first musical director was the well-known Canadian composer Serge Garant (1929–86), who trained a basic ensemble of 12 musicians to meet the exigencies of this specialized repertory. Gilles Tremblay succeeded Garant as musical director and held the post until 1988. Since then, under the musical direction of Walter Boudreau, the ensemble has pursued its original aim of promoting new music. Its SMCQ Jeunesse section organizes concerts for young audiences. The ensemble's headquarters are in the Salle Pierre Mercure of the Centre Pierre Péladeau.

The Nouvel Ensemble Moderne (NEM) was founded in 1989 by Lorraine Vaillancourt, who since then has fulfilled the dual role of conductor and artistic director. This ensemble of 15 musicians is in the residence at the faculty of music of the University of Montreal. It soon made itself a name for excellence and creativity, and it has gone on many national and international tours and made a number of recordings. An offshoot of the activities of the NEM is the journal *Circuit* (1990–).

By the end of the 20th century Montreal at last had an excellent network of concert halls and theatres. Built between 1960 and 1992, the Place des Arts de Montréal comprises five halls: the Salle Wilfrid Pelletier (cap. 3000); the Théâtre Maisonneuve (1200); the Théâtre Jean Duceppe (823); the Du Maurier Studio Theatre and the Cinquième Salle. As the location of the Museum of Contemporary Art and the headquarters of many musical companies, including the Opéra de Montréal, the Montreal SO, the Orchestre Métropolitain, the McGill Chamber Orchestra, the Pro Musica Society and the Grands Ballets Canadiens, the Place des Arts in the largest multifunctional arts complex in Canada.

Part of the university complex of the Université du Québec à Montréal, the Centre Pierre Péladeau, opened in 1992, contains the Salle Pierre Mercure (cap. 875); its remarkable acoustics and intimate character make it a favourite location for concerts and recordings. Conceived in partnership with the music department of the Université du Québec à Montréal and the Société de Musique Contemporaine du Québec, the Centre Pierre Péladeau accommodates the Société Philharmonique de Montréal and the Société de Musique Baroque de Montréal (Les Idées Heureuses). It also co-produces, with CBC, the radio concerts of the Centre Pierre Péladeau, which are broadcast throughout the country.

Other halls in Montreal are linked to the institutions of musical education. The largest is the Salle Claude Champagne (cap. 1600), which is attached to the Ecole Vincent d'Indy; it was opened in 1964. The building, which was owned by the nuns of Les Saints Noms de Jésus et de Marie, was brought by the Université de Montréal in 1980 to accommodate its department of music. Pollack Hall (cap. 600) was opened in the Strathcona Music Building of McGill University in 1975, but designed to meet the needs of the music faculty, its availability to other music organizations is strictly limited. Also on the campus of McGill University, Redpath Hall is used for performances of early music.



There is a flourishing summer festival season in Montreal. The Montreal International Music Competition was founded in 1963 and was the first international music competition in Canada. The first competition (piano) was held in June 1965; the second (violin) in 1966; the third (singing) in 1967. Since 1974 the competition has followed a four-year cycle: violin, piano, singing, and then a rest year. An unpublished Canadian work is compulsory for performers in the final round. Directed since 1965 by Monique Marcil, one of the founder members, the competition quickly became one of the most famous in the world.

Known as the 'city of a hundred steeples' and famous for the quality of its organs (the majority made by the firm of Casavant Frères), Montreal has maintained its reputation as the organ capital of North America. Since 1971, under the artistic direction of Raymond Daveluy, the Concert Spirituel has organized the Organ Festival of the Oratory of St Joseph, which features organists from all over the world and allows a large public to hear the magnificant Beckerath organ installed in the basilica in 1960.

The Festival International de Jazz de Montréal, also held annually each summer, was founded in 1980 by Alain Simard and André Ménard. Attendance in 1998 was assessed at over a million spectators. The festival is regarded as one of the major jazz events in the world.

During the 18th century and most of the 19th, music education in Montreal consisted of little more than basic solfège and classroom singing; only a few private teachers offered more advanced training. From 1876, however, a number of attempts were made to create a specialized music school, but most of them were short-lived. With the creation of the Dominion College of Music in 1894, music education had a more solid basis; for about 50 years it organized graded examinations, issuing degrees and diplomas in association with Bishop's College (now Bishop's University). In 1904 the McGill Conservatorium was founded through a gift of Lord Strathcona and Mount Royal, chancellor of McGill University. In 1921 the university formed a faculty of music, associated with the conservatorium, with H.C. Perrin as dean. The department and conservatorium (now the preparatory school) continue to thrive, having had a particularly active period of growth during the decade 1965–75.

In 1905 Alphonse Lavallée Smith founded the Conservatoire National de Musique, which offered courses leading to music degrees in association with the Université de Montréal, and which continued to play an important role through the 1930s. The Ecole Normale de Musique was founded in 1926 by the Dames de la Congrégation de Notre-Dame. At first affiliated to the Université de Montréal, it was integrated into the Université du Québec à Montréal in 1976. In 1933 the nuns of Les Saints Noms de Jésus et de Marie gave their school of music, founded in 1920, the name of the Ecole Supérieure de Musique d'Outremont. Renamed the Ecole Vincent d'Indy in 1951, this school, initially affiliated to the Université de Montréal and then to the University of Sherbrooke, has been a private music college since 1978. The Conservatoire de Musique et d'Art Dramatique was created by the government of Quebec province in 1943, on the model of the Paris Conservatoire; it has branches in other principal cities of the province. In 1950 the Université de Montréal founded its own faculty of music offering courses in interpretation, composition and musicology. Following the example of the other universities of Montreal, Concordia University has offered music courses since

Interior of the Salle Wilfrid Pelletier in the Place des Arts, Montreal

1974; since 1990 its music department has had a concert hall of its own (cap. 600).

At the beginning of the 20th century Montreal was very active in the field of recording. It was the headquarters of the Berliner Gramophone Company, the first recording company in Canada, and of Compo Company Ltd, founded in 1918 and the largest Canadian record-manufacturing firm of the time. This branch of the music industry took off again in and after the 1960s, when many Montreal companies were founded, including Gamma Records Ltd (1965), the Société Nouvelle d'Enregistrement (1977), Les Disques Audiogram Inc. (1982), Analekta (1987–), Atma (1989–) and Fonovox (1994–). The Montreal branch of the Canadian Music Centre, opened in 1973, plays an important role in collecting and promoting music from Quebec and other parts of the country.

ERIC McLEAN/HÉLÈNE PAUL

Montreux. Town in Switzerland. Situated on the north-eastern shore of Lake Geneva, it has a pleasant climate and views of the Alps. Until the last quarter of the 19th century there was nothing in its musical life to distinguish it from other Swiss centres of comparable size. But its celebrated climate attracted increasing numbers of foreigners and this led in 1881 to the foundation of the Kursaal Orchestra, which gave about 30 concerts annually until 1914, when it was disbanded because of the war; such conductors as Oskar Jüttner and Ernest Ansermet chose novel and eclectic programmes. From 1911 to 1914 Ansermet gave the first Swiss performances of many French and Russian works, including Stravinsky's Symphony in E♭ (2 April 1914).

Between the two wars Montreux suffered a depression and, apart from its folk festivals, was musically less active.

An annual music festival, founded in 1946, helped to give the town an international reputation. Known initially as the Septembre Musical, the Montreux Music Festival now runs from late August to early October and attracts leading orchestras and soloists. Its programmes are conservative, and include chamber music concerts and recitals, some of which are given in Vevey and other nearby towns. A new concert hall, the Auditorium Stravinski, was opened in 1993. Montreux is also host to a world-famous jazz festival, founded in 1967. The town has always attracted musicians; Tchaikovsky worked on his Fourth Symphony there in 1877 and his Violin Concerto in the following year. Chausson composed his *Poème* for violin and orchestra there in 1896, and Stravinsky completed *The Rite of Spring* and *Le rossignol* nearby, at Clarens, in 1913 and 1914. Other musicians of distinction including Furtwängler, Hindemith and Duparc lived for some years in or near Montreux.

PIERRE MEYLAN/ANDREW CLARK

Montsalvatge, Xavier (*b* Gerona, 11 March 1912). Spanish composer and critic. He studied at the Barcelona Conservatory with Millet, Morera, Costa and Pahissa (1923–36). In 1934 he received the conservatory's Rebell Prize for his Impromptus for piano, and two years later he was awarded the Pedrell Prize for the *Suite burlesca*. By temperament he tends towards the theatrical, and is particularly conscious of rhythm, so an early interest in the ballet was natural. In 1936–7 he worked on the ballet *El ángel de la guarda*, which remains unpublished, and during the 1940s wrote 19 ballet scores for the Goubé-Alexander company of Monte Carlo, including *La muerte enamorada* (1943), *Manfred* (1945) and *La Venus de Elna* (1946). It was at this time, too, that he began work as a critic, becoming music critic of the weekly *Destino* of Barcelona in 1942. In 1962 he began to write for the *Vanguardia española*. He has taught in Barcelona at the San Jorge Academy, the Destino Seminary and the conservatory.

Montsalvatge reacted against the Germanic leanings of his Catalan teachers and their generation, being drawn instead to Stravinsky and the French, particularly (early on) Les Six, as well as to his Spanish and Catalan nationalist forebears. A series of 'West Indian' works in the 1940s and 50s suggests the strong influence of Milhaud, though they may equally be seen as a reflection of the then current vogue, in both Barcelona and Paris, for African American music (during the 1930s Marian Anderson had popularized Negro spirituals in Barcelona). For Montsalvatge, however, West Indian, and specifically Cuban, rhythms had a deeper significance because of the close historical ties between Cuba and Catalonia. Many Catalan emigrants who had formed part of the colonial population returned to their homeland after the war of independence, bringing with them hybrid Hispano-African-American songs with strange, exotic rhythms. During the 1940s Montsalvatge travelled around the Costa Brava collecting these songs, publishing many in his *Album de habaneras* (1948). Typical of his West Indian manner are the second of his *Tres divertimenti* (1941), the *Cuarteto indiano* (1952) and above all the *5 canciones negras* (1945–6). These last (particularly the 'Canción de cuna') are his most widely performed songs, particularly in their lusciously orchestrated version of 1949, being light in style and popular in appeal. His Romantic approach and gift for melody are further displayed in two concertante works of the 1950s: the *Poema concertante* for violin (1951) and *Concerto breve* for piano (1953).

A feature of his works of the 1940s and 50s, shared with his fellow Catalan Mompou, is a liking for combining simple, 'naive' melodic material with sophisticated chromatic harmony. Coupled with this is an attraction, also a dominant feature of Mompou's work, to the world of children. Typical of Montsalvatge's approach is his *Sonatina para Yvette* for piano (1962), which combines the simplest diatonic melodies suggestive of children's games and nursery rhymes with chromatically sliding left-hand triads and bouncing cross-accents. Other 'childhood' works include the magic opera *El gato con botas*, staged at the Liceo in 1948, and the *Canciones para niños* (1953) on poems of Lorca, to which was added a narration with orchestral accompaniment, *Viatge a la luna*, first performed in Barcelona in 1966.

Later Montsalvatge's style underwent some marked changes, most notably in an abandonment (though never total or consistent) of straightforward tonality. In the *Cinco invocaciones al Crucificado* (1969), the language is often freely chromatic and elements of serial technique are introduced. But the work is nevertheless deeply Spanish in character and the predilection for simple melodic material, frequently redolent of traditional models, remains. This new style was pursued in *Laberinto* (1971), *Homenaje a Manolo Hugué* (1970), the Cello Sonata (1971), *Serenata a Lydia de Cadaqués* for flute and piano (1970, orch 1972) and the overture *Reflexus* (1973). Some of these works reveal a thematic 'trademark' in the statement of a 12-note row followed immediately by its retrograde.

After his Partita of 1958 Montsalvatge came to be recognized in his own country as a major orchestral composer. In 1985 he was commissioned by the Ministry of Culture to compose a work for the European Year of Music, the result of which was the *Sinfonía de réquiem*, and in the same year he was awarded the National Music Prize. The Montsalvatge Prize for piano was founded in his home town in 1985.

WORKS
(*selective list*)

Ops: El gato con botas, 1948; Una voce in off (1, Montsalvatge), 1962; Babel-1948 (4, Montsalvatge), 1968

Ballets: El ángel de la guarda, 1936–7; La muerte enamorada, 1943; Manfred, 1945; La Venus de Elna, 1946; Perlimplinada, 1956, collab. Mompou

Orch: Poema concertante, vn, orch, 1951; Concerto breve, pf, orch, 1953; Caleidoscopio, 1955; Partita, 1958; 3 danzas concertantes, 1960; Desintegración morfológica de la Chacona de Bach, 1963; Laberinto, 1971; Reflexus, ov., 1973; Conc. capriccio, hp, orch, 1976; Conc. per un virtuoso, hpd, orch, 1977; Concierto de Albayzin, hpd, orch, 1977; Metamorfosis de concierto, gui, orch, 1980; Fanfarria para la alegría de la paz, 1984; 4 variaciones sobre un tema de La flauta magica, 1991; 3 postales illuminades, str orch, 1991; Sortilegis, 1992; Bric-à-brac, 1993

Vocal: Canciones negras, 1v, pf, 1945–6, orch 1949; Egloga del Tajo, chorus, orch, 1945; 16 Album de habaneras, 1948; Canciones para niños (F.G. Lorca), 1953; Cant. (J. Maragall), 1958; Paisatge del Montseny, 1v, small orch, 1961; Viatge a la luna, nar, orch, 1966; 5 invocaciones al Crucificado, S, ens, 1969; Homenaje a Manolo Hugué, S, orch, 1972; Soneto a Manuel de Falla, S, pf,

1972; Sum vermis, S, 2 pf, 2 perc, 1974; Vocaliso, S, pf, 1976; Sinfonía de réquiem, S, orch, 1987; Madrigal sobre un tema popular, S, vc, str orch/pf, 1991

Solo inst: 3 impromptus, pf, 1933; 3 divertimentos, pf, 1941; Ritmos, pf, 1942; Variaciones sobre la españoleta de G. Farnaby, vn, pf, 1946; Cuarteto indiano, str qt, 1952; Sketch, vn, pf, 1953; Self-paráfrasis, cl, pf, 1953; Sonatina para Yvette, pf, 1962; Serenata a Lydia de Cadaques, fl, pf, 1970, orch 1972; Sonata concertante, vc, pf, 1972; Spanish Sketch, vn, pf, 1972; Aureola, org, 1973; Paráfrasis concertante, vn, pf, 1975; Microrapsodía (a la memoria de Pau Casals), vc, pf, 1976; Fantasía sobre un coral luterano, tpt, org, 1979; Alegoría, pf, 1982; Sí a Mompou, pf left hand, 1983; Berceuse a la memoria de Óscar Esplá, pf left hand, 1987; Diálogo con Mompou, vn, vc, pf, 1988; Microcollage mozartiano, cl, 1991; Variaciones sobre un tema anonimo, hp, 1992; Variaciones sobre el tema del impromptu D935 no.2 de Schubert, pf, 1993

Other works: Suite burlesca, before 1936; choral pieces; arrs.; incid music, film scores

Principal publishers: Salabert, Southern, Unión Musical Española/Music Sales

RICHARD PETER PAINE

Montserrat. Benedictine monastery near Barcelona. It has been a very important centre of pilgrimages and devotion to the Virgin Mary from the 11th century. Music has played an important role in these activities especially since the foundation of the Escolanía in the 12th century. The *Llibre Vermell*, a 14th-century manuscript in the monastery archives, records details of the musical life at Mary's shrine. Two abbots, A.P. Ferrer (13th century) and Garcías de Cisneros (16th century), regulated in their *constitutiones* and *regula puerorum* the life of the *escoláns* (boy singers) and their participation in the religious services. The Escolanía was at its zenith from the beginning of the 17th century until its destruction by Napoleon's army (1811); it could be classified as a music school where boy singers were trained. Joan March (1582–1658), who succeeded Victoria as organist of the convent of Descalzas Reales in Madrid, was the first to give the Escolanía its characteristic traits. The pupils of Joan Cererols, who taught there, were much admired throughout Spain and some of his works were published in *Mestres de l'Escolanía de Montserrat*. Miguel López was a choirboy and later a choirmaster at the Escolanía. His works, mostly in a manuscript entitled *Miscellanea musicae* (in *E-Boc*), are indicative of his creative mind and of the performing resources of the Escolanía, which had both singers and an orchestra. His treatise, *Exagoga ad musicem*, is lost. The Escolanía had many of its best teachers during the 18th century: Josep Martí (1719–63), Benet Julià (1727–87), Anselm Viola (1738–98) and Narciso Casanovas. Outstanding students included Soler and Sor. Many of the works of these composers are unpublished; some, however, have been recorded. Following the destruction of the monastery and the Escolanía in 1811 and the subsequent musical decline, musical life was eventually restored in 1852 by Jacint Boada. Manuel Guzmán (1846–1909) consolidated it, and his disciples, Anselm Ferrer, Angel Rodamilans and David Pujol, had contributed to its success by 1953, when Ireneu Segarra became director. Segarra retired in 1998 and was replaced by Jordi-Augustí Piqué. Efforts have been made since then to continue to publish the works of the masters of the Escolanía and to provide the new liturgy with suitable music; international meetings of composers have been held to carry out these objectives. Thousands of Spanish works formerly in the archives of the royal chapel in Madrid are housed in Montserrat's musical archives.

IRENEU SEGARRA/R

Montserrat, Andrés de. *See* MONSERRATE, ANDRÉS DE.

Monza, Carlo (*b* Milan, *c*1735; *d* Milan, 19 Dec 1801). Italian composer. He studied with G.A. Fioroni and probably also with G.B. Sammartini, with whom he was closely associated. When Sammartini was promoted to *maestro di cappella* of the ducal court in Milan in 1768 Monza succeeded him as organist, and on Sammartini's death (1775) as *maestro*. By this time he held similar posts at three Milanese churches (S Maria Segreta, S Giovanni in Conca and the Chiesa Rossa), and had established himself as an important church and theatre composer. He was elected a member of the Accademia dei Pugni and the Accademia Filarmonica, Bologna. On 28 December 1787 he was appointed *maestro* of Milan Cathedral, having twice failed to obtain this post (1773, 1778); he abandoned his successful opera career and became a remarkably active composer of sacred music. Burney wrote favourably of Monza's sacred music that he heard in Milan and Florence in 1770 and called him, along with Melchiorre Chiesa, the best composer of theatre music in Milan. In the same year Alessandro Verri reported that Monza's opera *Germanico in Germania* was well received in Rome.

Monza wrote *opere serie* almost exclusively; most were traditional 'aria' operas for Milan. As a guest composer elsewhere, he also had opportunities to participate in the Franco-Italian synthesis in opera taking place after the middle of the century; in Turin he set *Oreste* (Verazi's libretto *Ifigenia in Tauride*, originally written for G.F. de Majo at Mannheim), and in Milan he wrote *Ifigenia in Tauride* (based on Coltellini's libretto for Traetta). Both contain such French elements as scene complexes, chorus, pantomime, dance and much orchestrally accompanied recitative. Monza proved himself equal to Verazi's challenging libretto, by providing a dramatic crescendo for the storm at sea and following it with brilliant battle music for pantomime during the programmatic sinfonia. He used a variety of textures and string effects, solo wind instruments and occasionally a solo cello to enhance the dramatic effect of accompaniments for arias and obbligato recitative. His melodies are more lyric than declamatory. His experience as a church composer helped him to produce unusually complex, contrapuntal textures for

Coltellini's choruses, and he wrote an extensive concerted finale in which the principals sing antiphonally, in ensemble and in pairs, with the chorus. These operas also represent early steps towards the restoration of death and tragedy to the operatic stage; in each opera the *lieto fine* is accomplished by the staged death of an unrepentant tyrant. His other two works for Turin, *Cleopatra* and *Erifile*, go even further towards tragic endings, though the deaths do not take place on stage.

Monza was among the best of late 18th-century Italian church composers. Although his music for S Gottardo is lost, 228 works for Milan Cathedral are extant in its archive, and demonstrate that he could equal Fioroni's archaic contrapuntal style or, in his brilliant solo motets, the theatrical style of his own operas. Several collections of his instrumental music were published in London in the 1780s; a group of six attractive string quartets with programmatic titles is in the Bibliothèque nationale, Paris.

WORKS

OPERAS

Olimpiade (P. Metastasio), Milan, Regio Ducal, May 1758, *P-La* (2 copies)
Sesostri, re d'Egitto (P. Pariati), Milan, Regio Ducal, 26 Dec 1759, *GB-Lbl* (13 arias), *I-Nc*, *P-La* (2 copies)
Achille in Sciro (Metastasio), Milan, Regio Ducal, 4 Feb 1764, *I-Nc*, *P-La* (2 copies)
Temistocle (Metastasio), Milan, Regio Ducal, 1 Jan 1766, *I-Nc*, *P-La* (2 copies)
Oreste (M. Verazi), Turin, Regio, 18 Jan 1766, *I-Tf*, *P-La* (as Ifigenia in Tauride)
Demetrio (Metastasio), Rome, Dame, 3 Jan 1769, *F-Pn*, *I-Bc*, *Rdp*, *P-La*
Adriano in Siria (Metastasio), Naples, S Carlo, 4 Nov 1769, *I-Nc*, *P-La*
Germanico in Germania (N. Coluzzi), Rome, Dame, 7 Jan 1770, *I-Rdp*, *P-La*
Il finto cavalier parigino (intermezzi in musica, 2), Rome, Valle, carn. 1770, *H-Bn*; as Il cavalier parigino (operetta per musica, 2), Milan, Regio Ducal, 3 Sept 1774, string pts *I-Rdp*
Nitteti (Metastasio), Milan, Regio Ducal, 21 Jan 1771; Venice, S Benedetto, carn. 1777, *P-La*
Aristo e Temira (2, L.V. Savioli), Bologna, Comunale, May 1771 (Bologna, 1771) [printed 12 April 1771 together with Gluck's Orfeo ed Euridice]
Antigono (Metastasio), Rome, Argentina, 18 Feb 1772, arias *I-Rc*, *PAc*
Alessandro nell'Indie (Metastasio), Milan, Regio Ducal, 28 Jan 1775, arias *MAc* (dated ?1770), *Gl*
Cleopatra (C. Olivieri), Turin, Regio, 26 Dec 1775, *F-Pn*, *P-La*
Demofoonte (Metastasio), Alessandria, Città, Oct Fair 1776, *I-MAav*
Caio Mario (G. Roccaforte), Venice, S Benedetto, Ascension Fair 1777, sinfonia *BGc*
Attilio Regolo (Metastasio), unperf., *D-Mbs* [according to Leopold Mozart, composed for Munich, carn. 1777–8]
Ifigenia in Tauride (after M. Coltellini), Milan, Scala, Jan 1784, *F-Pc*, *P-La* (2 copies)
Enea in Cartagine (2, G.M. D'Orengo), Alessandria, Città, Oct Fair 1784, aria *I-Tn*
Erifile (G. De Gamerra), Turin, Regio, 26 Dec 1785, *P-La*

Music in: La lavandara astuta, 1770, arias *A-Wn*

Misattributed: Berenice, Turin, Regio, 26 Dec 1770 [actually by Ignazio Platania]

Arias in *I-Fc*, *Gl*, *Mc*, *MAav*, *MAc*, *Nc*, *PAc*, *PEsp*, *Rc*, *Rsc*, *Tf*

SVEN HANSELL, KATHLEEN KUZMICK HANSELL, MARITA P. McCLYMONDS

Monza, Carlo Ignazio [Carlino] (*b* Milan, late 17th century; *d* Vercelli, 9 May 1739). Italian composer. He has often been confused with his namesake Carlo Monza and others, and has also been referred to as Carlo Antonio. In librettos he is always described as Milanese. There is evidence only for the latter part of his life (from 1735 until his death), when he was *maestro di cappella* of Vercelli Cathedral. His earlier career can be conjectured on the basis of what is known of the places where his operas were performed: in 1714 he must have been in Naples, and in 1716 in Messina, where he probably lived sporadically for some years. In 1722 and 1724 operas and oratorios by him were performed at Ancona, Viterbo and Bologna. He was in Rome between 1724 and 1725, and in 1728 he was in Bologna, where in 1729 he was admitted to the Accademia Filarmonica. On 21 October 1735 he was appointed *Magister cantus seu Phonascus* of Vercelli Cathedral and a year later was ordained priest. He remained in Vercelli until his death.

Monza wrote operas alone and in collaboration with M.A. Gasparini, and numerous arias by Monza were included in operas by Francesco Gasparini. It is likely, then, that Monza knew both the Gasparinis personally and belonged to their circle.

Monza's *Pièces modernes pour le Clavecin* was attributed to G.B. Pergolesi for two centuries. The collection was included in two anthologies, entitled *Eight Lessons for the Harpsichord …* and *A Second Set of Eight Lessons … composed by the Celebrated G.B. Pergolese*, printed in London in 1771 and 1778 respectively; and three of

the pieces were included in Stravinsky's *Pulcinella* as music composed by Pergolesi.

WORKS

OPERAS

Sidonio (P. Pariati), Naples, Fiorentini, 13 Jan 1714
La principessa fedele, Messina, Munizione, 1716, 18 arias in *GB-Lam*; collab. M.A. Gasparini

MARIANGELA DONÀ

Monza, Maria (*fl* 1729–41). Italian soprano. She was the daughter of Bartolomeo Monza, a barber who in 1737–8 was the last director of the Hamburg Opera. She sang in three operas at Venice in 1729–31, six by Bioni at Breslau in 1732, and two at Prague in 1734–5, then for three years at Hamburg, where she was at first very popular, singing in Handel's *Giulio Cesare* and in a number of concerts. Engaged by Handel for London, she made her début at Lincoln's Inn Fields in *Deidamia* (1741), and sang in revivals of *L'Allegro*, the bilingual *Acis and Galatea* and *Saul*. According to Mrs Pendarves, 'her voice is between Cuzzoni's and Strada's – strong, but not harsh, her person *miserably bad*'. Burney dismissed her as below criticism; but Handel, who had written the part of Nernea in *Deidamia* for a singer of limited capacity, recomposed it for Monza, making heavy demands on technique and flexibility and extending the compass to two octaves (*b* to *b''*).

WINTON DEAN

Monzani, Tebaldo [Theobald] (*b* Duchy of Modena, 1762; *d* London, 14 June 1839). Italian flautist, instrument maker and publisher. He apparently played both the flute and the oboe, but gave up the latter after moving to England where he first appeared at a London concert in February 1785, subsequently becoming well known as a solo and orchestral flautist, and remaining active in this capacity until about 1803. In 1787 he established premises in London where from various addresses he published his own compositions (mainly for flute) and other works. From 1789 he sometimes employed the piano maker and music publisher James Ball to print and sell his publications. In 1800 Monzani entered a partnership with GIAMBATTISTA CIMADOR as Monzani & Cimador, from about 1803 occupying a building known as the Opera Music Warehouse. Cimador's arrangement of several Mozart symphonies for flute and strings was allegedly provoked by the refusal of the King's Theatre orchestra to play the works in their original form because of their difficulty; six of these were published by Monzani after Cimador's death. From 1805 Monzani continued alone until about 1807, when he established a partnership with Henry Hill (1781–1839) and the firm became Monzani & Hill or Monzani & Co.; about 1815 it obtained royal patronage as 'music seller to the Prince Regent'. The partnership was dissolved in 1829 and Henry Hill, followed by his widow Anne and his sons, continued the business until 1845 when the firm was sold by auction.

Monzani and his successors issued much sheet music, especially Italian vocal pieces, but their publications also included the piano works of Mozart and Beethoven. Monzani made many flutes and clarinets and had a high reputation as a craftsman, being the first maker to number his instruments. He also wrote a tutor, *Instructions for the German Flute* (1801, 3/*c*1820). His son Willoughby became a flautist and was described by W.N. James (1826) as 'perhaps the most promising performer in England'. A Theobald P. Monzani, probably another son, was active as a flute maker in New York from 1835 to 1866.

Moode, Henry [Harry]. *See* MUDD, (1).

Moody, Dwight L(yman) (*b* Northfield, MA, 5 Feb 1837; *d* Northfield, 22 Dec 1899). American evangelist and popularizer of gospel hymnody. He moved to Chicago in 1856, and after several years in evangelistic and Sunday school work resigned from business to become an independent city missionary. In 1866 he became president of the Chicago YMCA. At a YMCA convention in Indianapolis in 1870 he met the singer Ira D. Sankey and invited him to become his musical associate; in June 1873 the two men went to England to conduct evangelistic services, remaining there until August 1875. Music was highly regarded by Moody for its mass appeal; other singers with whom he worked were Philip Phillips, Philip Bliss, George Stebbins, James McGranahan, Charles Alexander and Daniel Towner. Towner became head of the music department of the Moody Bible Institute in Chicago, a school which exerted a significant influence on

gospel hymnody by training evangelistic singers and composers. Through his use of music and his encouragement of evangelistic singer-composers, Moody fostered the growth of gospel hymnody more than any other evangelist.

HARRY ESKEW

Moody [Manners], **Fanny** (*b* Redruth, Cornwall, 23 Nov 1866; *d* Dundrum, Co. Dublin, 21 July 1945). English soprano. She studied with Charlotte Sainton-Dolby, making her stage début as Arline in *The Bohemian Girl* at Liverpool in 1887 with the Carl Rosa Opera Company, of which she remained the leading soprano until 1898. With her husband, the bass CHARLES MANNERS, she founded the Moody-Manners Company (1898–1916). In 1892 she sang Tatyana in the first English performance of *Yevgeny Onegin* at the Olympic Theatre, London. She created the title role in Pizzi's *Rosalba*, and Militza in McAlpin's *The Cross and the Crescent*, in the Covent Garden seasons that she organized with Manners (1902–3). Her repertory also included Elsa, Gounod's Marguerite and Juliet, Leonora (*Il trovatore*) and Santuzza. Her pleasant light soprano voice and charming stage personality were widely admired.

HAROLD ROSENTHAL/R

Moody, Ivan (William George) (*b* London, 1 June 1964). English composer and writer on music. He studied composition with Brian Dennis at Royal Holloway College (BMus 1985), then privately with Tavener. Moody worked in London for Bruno Turner and Peter Phillips and moved to Portugal in 1990, where he works as a writer and choral conductor. In 1997 he began teaching at the Academia de Artes e Technologias in Lisbon. The main influence on his music is the Orthodox Church, of which he is a member. His works, even when not specifically for liturgical use, invoke a sense of ritual and ceremony that reflects the Orthodox view of sacred art as an icon. Incorporating melodic and textural elements of the Orthodox rite, his melodic writing and use of the *ison* reflect the general influence of Eastern liturgical chant, especially that of the Greek Orthodox Church. His output is predominantly vocal. Several works are scored for Renaissance or Baroque instruments and have been written for individuals or ensembles closely involved with early music, including the Hilliard Ensemble (*Canticum canticorum I*) and the Taverner Consort (*Revelation*). The *Akathistos Hymn*, the first complete setting of the text since the Middle Ages, was first performed in 1999 in the USA. His music has been broadcast widely and performed in festivals throughout Europe.

WORKS
(*selective list*)

Stage: Fables (chbr op, after J. de La Fontaine), 1994
Vocal solo: 3 Poems (A. Akhmatova), S/T, str sextet, 1984; canciones de amor (F. García Lorca), A, hpd, 1985; 4 poemas (F. JAMES CHATER

Moody Blues, the. English rock group. Formed in 1964 in Birmingham, it began as part of Birmingham's answer to the Mersey Beat sound of the Beatles and Gerry and the Pacemakers. Featuring guitarist and vocalist Denny Laine, who later played with Paul McCartney and Wings, the group's first hit single *Go Now* (Decca, 1965) was a cover version of a song first recorded by the American rhythm and blues singer Bessie Banks. When Laine left the group to pursue a solo career, Ray Thomas (flute and vocals), Graeme Edge (drums) and Mike Pinder (keyboards) recruited John Lodge (bass and vocals) and Justin Hayward (guitar and vocals). This new line-up released *Days of Future Past* (Devam, 1967), which had begun as

a rock version of Dvořák's symphony 'From the New World' to be used as a demonstration record for hi-fi stereo systems, and contained the hit singles *Tuesday Afternoon* and *Nights in White Satin*. While keeping the record company's idea of employing an orchestra, the group instead recorded a suite of songs written about a day in the life of one person. The group's extensive use of orchestral timbres in a rock context, often supplied by a mellotron, and their employment of a central theme made *Days of Future Past* the first progressive-rock concept album. The group released several commercially successful studio albums in much the same style until 1973, when the band took four years off. Returning in 1978 with *Octave* (Threshold), the Moody Blues have enjoyed continued success with hit singles such as *Gemini Dream* (1981) and *I know you're out there somewhere* (1988).

JOHN COVACH

Moog, Robert A(rthur) (*b* New York, 23 May 1934). American designer of electronic instruments. His name is primarily associated with a range of synthesizers manufactured by the R.A. Moog Co., which he founded in New York in 1954; early on the name 'Moog' was even used, loosely, to mean any type of synthesizer. He financed his studies at Queens College, CUNY, and later at Columbia University by building and marketing theremins, producing five models by 1962. In 1957 he moved to Ithaca, New York, where he gained a doctorate in engineering physics at Cornell University in 1965. At nearby Trumansburg in the spring and summer of 1964 he began to develop his first voltage-controlled synthesizer modules in collaboration with the composer Herbert Deutsch; they were demonstrated that autumn at the Audio Engineering Society convention in New York. At the end of 1964 Moog's company marketed the first commercial modular synthesizer.

In 1970, faced with competition from newer synthesizer companies, Moog worked with James Scott, William Hemsath and Chad Hunt to develop the Minimoog, a portable monophonic instrument which became especially popular in rock music. It was discontinued in 1981, after some 13,000 had been produced. In 1971 the company became Moog Music and moved to Buffalo, New York. The last synthesizer to which Bob Moog made some design contribution there was the Micromoog (marketed 1973–5). After Moog Music became a division of Norlin Industries in 1973, Bob Moog was involved mainly in promotional and managerial duties. Other synthesizer models included the polyphonic Polymoog (1976–80), Multimoog (1978–81), Prodigy (1979–81), Source (1981–5) and Memorymoog (1982–5). Moog Music closed in 1985, but it was only put up for auction in 1995. Three unrelated new Moog companies have marketed or advertised Moog products based on the original synthesizers: Moog Music Custom Engineering of Buffalo sold Moog modules in the early 1990s; Moog Music Inc. of

Robert A. Moog with three synthesizers designed by him: a Moog Modular System Series 900, c1964 (rear), the Minimoog Model D, c1970 (foreground right), and the Moog Sonic Six, c1970

Cincinnati also sold modules in the late 1990s and advertised a new Minimoog, while Moog Music Ltd of Caerphilly, Wales produced a Minimoog in 1998. After the rights to the Moog trademark reverted to Bob Moog for legal reasons, neither of the two latter companies appear to have survived. Since 1998 Bob Moog's own company, Big Briar, has developed a new Minimoog, for release in 2000. Since the demise of the original company many existing Minimoogs have been upgraded with MIDI by several companies.

At the end of 1977 Bob Moog left Norlin and in the following year started a new company, Big Briar, in Leicester, North Carolina (now in nearby Asheville), manufacturing a range of devices (with touch-sensitive keyboards, theremin-type controllers, touch ribbons, or touch-sensitive plates) for precision control of analogue and digital synthesizers; the advent of MIDI in 1983 led to MIDI versions of some of them. A new range of theremins appeared in the 1990s. In 1999 Big Briar introduced new products incorporating Moog's name, a ring modulator, a phaser and a low-pass filter in the Moogerfooger series of analogue effects modules ('stompboxes').

For many years from 1975 Moog contributed a regular column on synthesizers to *Contemporary Keyboard* (now *Keyboard*). As a pioneer and figurehead of the development of the synthesizer, he has been much sought after as a lecturer and has also appeared at trade fairs, festivals, conferences and competitions (such as the Ars Electronica in Linz). In 1984–8 Moog was Vice President of New Product Research at Kurzweil Music Systems (manufacturer of digital synthesizers) of Boston. Between 1989 and 1992 he was a research professor in the music department of the University of North Carolina at Asheville.

Moog has also developed circuitry for a wide range of applications: guitar amplifiers, effects boxes, mixers, multi-track tape recorders and variable-speed controllers for tape recorders. He has worked closely with both classical and rock musicians, designing and equipping complete electronic music studios, and developing custom-built synthesizer systems for WENDY CARLOS and the rock keyboard player Keith Emerson. He has created specialized electronic instruments and systems for a

number of composers, among which are the dancer-responsive antennae used to activate tape recorders in *Variations V* (1965) by John Cage, and three microtonal Keyboard instruments. In 1992, after 20 years' development, the Multiple-Touch-Sensitive Keyboard was demonstrated, designed by Moog in collaboration with the composer John Eaton; there were no plans to manufacture it.

HUGH DAVIES

Moondaye, John. *See* MUNDY, JOHN.

Moondaye, William. *See* MUNDY, WILLIAM.

Moor, de. *See* MOORS family.

Moór, Emanuel (*b* Kecskemét, nr Szeged, 19 Feb 1863; *d* Mt Pélerin, nr Vevey, 20 Oct 1931). Hungarian composer, pianist and inventor. The son of a cantor, he studied in Prague, Budapest and Vienna before travelling to America in 1885 to pursue a career as a pianist and conductor. In 1888 he settled in England, but travelled frequently to the continent for performances of his works and was encouraged by Brahms, whom he met in 1889. In England his work was championed by George Henschel, who conducted his First Symphony, the Concert Overture and the Piano Concerto in D; the concerto shares with the Second Symphony (1895) a distinctive Hungarian style in its strong rhythms and harmonies. In 1901 Moór moved to Switzerland, where he turned increasingly to opera. Diverse in style and favourably received (most were staged), the operas were nonetheless dropped from the repertory before long, and Moór continued with instrumental composition, finding champions in such performers as Casals (the dedicatee of several works), Marteau, Eugene Ysaÿe and Flesch. Highly rhapsodic and coloured, Moór's music was often inspired by the contrapuntal complexity of J.S. Bach, as well as by his own Hungarian and Jewish background; despite the musical innovations of the first decades of the twentieth century, Moór's work remained rooted in the nineteenth century.

Moór is perhaps best known as the inventor of the 'duplex-coupler' pianoforte (*see* EMANUEL MOÓR PIANOFORTE) in 1920. A two-keyboard instrument, the invention was taken up with enthusiasm by Tovey and the pianists Max Pirani and Winifred Christie (who became Moór's second wife); Bruno Walter was also supportive. In addition Moór invented a new type of violin, but despite initial interest shown in both inventions, they failed to make any lasting impact.

DOROTHY DE VAL

Moor, Karel (*b* Belgrade, 26 Dec 1873; *d* Prague, 30 March 1945). Czech composer, conductor and writer on music. He studied at the Prague Organ School (1895), took the state examination in singing at Vienna (1896) and went to Castelli in Trieste for further lessons (1900). Until 1923, when he settled in Prague, he held brief conducting and teaching appointments throughout Czechoslovakia and Yugoslavia, including that of conductor of the Czech PO (1902) and as a theatre conductor in Brno (1908). In Prague he held several jobs as choirmaster and bandmaster. Moor was one of the later generation of Czech Romantics, and his eclectic musical style incorporates both *fin-de-siècle* and pan-Slavonic elements, the latter evident in his use of Russian, Serbian and Slovak themes.

MILAN KUNA

Moor, William. *See* MORE, WILLIAM.

Moore, Carman (Leroy) (*b* Lorain, OH, 8 Oct 1936). American composer. While in high school he studied the french horn, cello and conducting with teachers at the Oberlin College Conservatory. He then attended Ohio State University (BM 1958) and occasionally played the horn in the Columbus SO. In New York he studied composition privately with Overton and attended the Juilliard School, where his teachers were Berio, Persichetti, Sessions and Druckman (MM 1966); in 1967 he was a pupil of Stefan Wolpe. Moore has held teaching positions at the Dalton School, the New School for Social Research, Manhattanville College, La Guardia College, Queens College, Brooklyn College, Carnegie-Mellon University and Yale University. In addition to composing, he is known as a writer on music and has served as critic for the *Village Voice*; in 1969 he published *Somebody's Angel Child: the Story of Bessie Smith*. In 1972 he formed his own group, Skymusic Ensemble, with whom he has given numerous concerts in New York.

Moore's best-known compositions for orchestra are *Wildfires and Field Songs* (1975) and *Gospel Fuse* (1975). With extensive use of percussion instruments in many compositions, rhythmic passages often feature prominently in a work's structure. He has incorporated in his music elements of jazz, blues and gospel, and includes improvisation as an integral part of the pieces written for his Skymusic Ensemble (e.g. *Righteous Heroes: Sacred Spaces*, 1987).

LUCIUS R. WYATT

Moore, Dorothy Rudd (*b* New Castle, DE, 4 June 1940). American composer. She studied composition with Mark Fax at Howard University, Washington, DC (BM 1963), with Nadia Boulanger at the American Conservatory at Fontainebleau (summer 1963), and with Chou Wen-chung in New York (1965). She taught at the Harlem School of the Arts (1965–6), New York University (1969) and Bronx Community College, CUNY (1971).

Moore was her own librettist for her opera, *Frederick Douglass*, which was commissioned and first performed in New York by Opera Ebony and has received international performances. A singer herself, she has shown preference for the vocal medium and has been committed to setting poems by black Americans. *The Weary Blues*, with its reference to the 12-bar blues form, is the sole instance of black influence upon her musical style. Her works are characterized by dissonant contrapuntal textures, often utilizing block harmonies, clusters, and 4ths used vertically and horizontally. She frequently combines a complex harmonic background with lyricism and emotional intensity as in *Dream and Variations*. A typical use of small motive cells based on 3rds is found in *Dirge and Deliverance*, a composition written for her husband, cellist and conductor Kermit Moore.

DORIS EVANS McGINTY

Moore, Douglas S(tuart) (*b* Cutchogue, NY, 10 Aug 1893; *d* Greenport, NY, 25 July 1969). American composer. The scion of a long-established and well-connected family, he was educated at Hotchkiss School and Yale University (BA 1915, BM 1917), where he studied composition with Horatio Parker. He began to write songs while still at school, and at Yale composed songs for social events, developing a gift for writing melodies in a popular style. This skill was reinforced by further songwriting during his World War I service in the US Navy (from 1917); the resulting collection, *Songs my Mother never Taught me* (1921), co-authored with folk-singer John Jacob Niles, brought Moore his first public recognition.

After his demobilization in 1919 Moore went to Paris, where he studied at the Schola Cantorum with Tournemire (organ) and d'Indy (composition). It is the style of d'Indy, rather than that of Parker, that underlies Moore's mature idiom. While in Paris, his friendship with the writer and poet Stephen Vincent Benét initiated a collaboration that resulted in numerous songs and two of the composer's best-known operas. In 1921 Moore was appointed curator of music at the Cleveland Museum of Art, a post he held for four years. In Cleveland he also studied for a year with Ernest Bloch and gained invaluable experience of practical stagecraft as an actor in leading roles at the Cleveland Playhouse. More significant, however, was a chance meeting in 1923 with the poet Vachel Lindsay (1879–1931), who befriended Moore and encouraged him to use Americana as an artistic resource. The majority of his compositions after 1923 are programme works on archetypal American themes. The first fruit of his encounter with Lindsay was the orchestral *Pageant of P.T. Barnum* (1924), which for a time rivalled the works of Copland in popularity. His compositional style was now formed, and a final year of study in Paris with Boulanger in 1925 proved unproductive.

In 1926 Moore was appointed to the faculty of Columbia University, where he became chair of the music department in 1940, remaining in that post until his retirement in 1962. He gradually became one of the most influential figures in American music, both as a teacher and as a director or board member of many organizations, including ASCAP and the National Institute and American Academy of Arts and Letters.

As his acting attests, Moore had been drawn to theatrical music from an early age. Most of his operas owe a great deal to operetta (especially Gilbert and Sullivan) and early Broadway. *The Headless Horseman* (1936), an operetta for performance by schoolchildren, and the folk opera *The Devil and Daniel Webster* (1938) were highly successful, becoming staples at American universities and high schools until late in the 20th century. *The Devil and Daniel Webster* was so admired at mid-century that Stravinsky did not disdain to study it when composing *The Rake's Progress*. It was *The Ballad of Baby Doe*, composed in 1956 and unquestionably Moore's masterpiece, however, that made him an 'opera composer' in the public eye. Immediately and resoundingly popular, this true story of fateful love in a Colorado boom town has to some extent come to be seen as the 'great American opera'.

Moore's tuneful, popular style was ideally suited to the depiction of American events. Had he become a writer of popular songs, as he sometimes wished, his pre-jazz melodic sense would have led to failure; yet in his chosen métier these same tunes proved vividly evocative of late 19th-century America, ever more so as that era receded into the past. Time has not been kind to Moore's works, however, and even the most successful early compositions have become rarities on concert and opera stages. *The Ballad of Baby Doe*, by contrast, appears destined to achieve a place in the standard repertory (if it has not

done so already), making it likely that Moore is to become one of the many composers remembered for a single opera out of a lifetime of work.

WORKS

all published unless otherwise stated

OPERAS

Oh, Oh, Tennessee (musical comedy), 1925, unperf., unpubd
Jesse James (J.M. Brown), 1928, unfinished, unpubd
White Wings (chbr op., 2, P. Barry), 1935, unpubd, Hartford, CT, 9 Feb 1949
The Headless Horseman (school operetta, 1, S.V. Benét, after W. Irving: *The Legend of Sleepy Hollow*), 1936, Bronxville, NY, 4 March 1937
The Devil and Daniel Webster (folk op, 1, Benét), 1938, New York, 18 May 1939
The Emperor's New Clothes (children's op, 1, R. Abrashkin, after H.C. Andersen), 1948, New York, 19 Feb 1949, rev. 1956
Giants in the Earth (3, A. Sundgaard, after O.E. Rölvaag), 1949, New York, 28 March 1951, rev. 1963
Puss in Boots (children's operetta, Abrashkin, after C. Perrault), 1949, New York, 18 Nov 1950
The Ballad of Baby Doe (op, 2, J. Latouche), 1956, Central City, CO, 7 July 1956, rev. 1958
Gallantry ('soap op', 1, Sundgaard), 1957, New York, 19 March 1958
The Wings of the Dove (1, E. Ayer, after H. James), 1961, New York, 12 Oct 1961
The Greenfield Christmas Tree (Christmas entertainment, 1, Sundgaard), 1962, Hartford, CT, 8 Dec 1962
Carry Nation (2, W.N. Jayme), 1966, Lawrence, KS, 28 April 1966

OTHER DRAMATIC WORKS

Twelfth Night (incid music, W. Shakespeare), 1925, unpubd; Much Ado about Nothing (incid music, Shakespeare), 1927, unpubd; The Road to Rome (incid music, R.E. Sherwood), 1927; Greek Games (ballet), 1930; Friends, Elis, Countrymen (private entertainment, W. Griswold), unpubd; The Cruise (private entertainment, R. Loveman), unpubd; 3 film scores: Power in the Land, 1940, Youth Gets a Break, 1940, Bip Goes to Town, 1941

INSTRUMENTAL

Orch: 4 Museum Pieces, 1923 [arr. of org work]; The Pageant of P.T. Barnum, suite, 1924; Moby Dick, sym. poem, 1928, unpubd; A Sym. of Autumn, 1930; Ov. on an American Tune, 1932; Village Music, suite, 1941; In memoriam, sym. poem, 1943; Sym. no.2, A, 1945; Farm Journal, suite, chbr orch, 1947; Cotillion, suite, str, 1952; 2 student works
Chbr: Sonata, vn, pf, 1929, unpubd; Str Qt, 1933; Wind Qnt, 1942, rev. 1948; Down East Suite, vn, pf/orch, 1944; Cl Qnt, 1946; Pf Trio, 1953; *c*8 student works

KEYBOARD

Prelude and Fugue, org, 1919–22, unpubd; March, org, 1922, unpubd; 4 Museum Pieces, org, 1922, unpubd; Scherzo, org, 1923, unpubd; 3 Contemporaries: Careful Etta, Grievin' Annie, Fiddlin' Joe, pf, *c*1935–40; Museum Piece, pf, 1939; Passacaglia, org, 1939 [arr. band by K. Wilson as Dirge]; Pf Suite, 1948; 4 Pieces, pf, 1955, unpubd; Dance for a Holiday, pf, 1957; Prelude, pf, 1957; Summer Holiday, pf, 1961; Summer Evening, pf; *c*13 student works

CHORAL

Perhaps to Dream (S.V. Benét), SSA, 1937; Simon Legree (V. Lindsay), TTBB, pf, 1937; Dedication (A. MacLeish), SSATBB, 1938; Prayer for England (W.R. Benét), TTBB, 1940; Prayer for the United Nations (S.V. Benét), A/Bar, chorus, pf/orch, 1943; Westren Winde, canon, 2 vv, *c*1946; Vayechulu (Heb.), cantor, chorus, org, 1947–8; Birds' Courting Song, T, chorus, pf, *c*1953; The Mysterious Cat (Lindsay), 1960; Mary's Prayer, S, SSA, 1962; a few arrs. of hymns and carols

SONGS

for 1 voice, piano, unless otherwise stated

The Cuckoo, unpubd; Haying Johnnie, unpubd; Songs My Mother Never Taught Me, collection, 1921, collab. J.J. Niles, A.A. Wallgren; The Apple Boughs Bend, ?1926–7, unpubd; Ballad of William Sycamore, Bar, fl, trbn, pf, 1926; The Cupboard (W. de la Mare), 1928; Fingers and Toes (Guiterman), 1928; Suite from Shakespearean Music, A, fl, hpd, 1928 [arr. from incid music]; Adam Was My Grandfather (S.V. Benét), 1942
3 Sonnets of John Donne, 1942; The Token (Donne), ?1942; Blow, blow thou winter wind (Shakespeare), 1943, unpubd; Brown Penny (W.B. Yeats), 1943, unpubd; The Cat Sat, 1943, unpubd; Not This Alone (P. Underwood), 1943; Spring and Winter, 1943, unpubd; Under the Greenwood Tree (Shakespeare), 1944; Old Song (T. Roethke), 1947; When the Drive goes Down (P. Malloch), 1951; Dear Dark Head (S. Ferguson), 1958; over 30 student songs, 3 children's songs

ANDREW STILLER

Moore, Gerald (*b* Watford, 30 July 1899; *d* Penn, Bucks., 13 March 1987). English pianist. His first piano lessons were from Wallis Bandey at Watford School of Music. In 1913 his family emigrated to Canada, where he studied further with Michael Hambourg and made his first recital appearances as soloist and accompanist. Returning to England in 1919, Moore had lessons with Mark Hambourg, son of his professor in Canada, undertook recital tours as an accompanist, and in 1921 began a long career with HMV as a recording artist. In 1925 he began working as accompanist to John Coates, from whom he claims to have learnt his art and craft. From that time until his retirement from the platform in 1967, Moore accompanied virtually every eminent solo singer and instrumentalist in recitals and raised the art of accompanying at the piano from servility to the highest prestige. Moore's strength lay not only in the beauty of his legato playing, his subtle command of pedalling and his mastery of tone colour, but also in his chameleon-like empathy with every musical partner, whether Casals, Chaliapin or a young débutant recitalist.

Moore was a magnificent interpreter of the duo-sonata repertory even though he never formed a regular partnership for such work. In later years he abandoned solo instrumental recitals to concentrate on his favourite repertory of the song. His lieder performances with Fischer-Dieskau and Schwarzkopf, especially in Schubert, Wolf and Richard Strauss, were paragons for their generation and vastly expanded the known recital repertory. A large number of them were recorded, including all Wolf's mature songs, over 500 by Schubert, and almost all Strauss's. Moore was equally distinguished in Spanish *canciones* (notably with Los Angeles), and French *mélodies* with Maggie Teyte. His partnerships, in earlier years, with Gerhardt, Elisabeth Schumann, McCormack and Hotter were equally celebrated. He began a subsidiary career as a lecture-recitalist when, during World War II, Myra Hess invited him to lecture at her lunchtime National Gallery concerts. This lecture, which was

repeated throughout Britain, assumed literary form as *The Unashamed Accompanist*, and caused further stir when Moore began to give annual lecture tours of the USA in 1954. He also gave masterclasses on the interpretation of song in Europe, Japan and the USA. He was made a CBE in 1954 and Hon. RAM in 1962. In addition to his entertaining and illuminating books Moore published folksong arrangements and piano transcriptions of favourite songs.

WRITINGS
(*selective list*)

WILLIAM S. MANN/R

Moore, Grace (*b* Nough, TN, 5 Dec 1898; *d* nr Copenhagen, 26 Jan 1947). American soprano . She studied singing with Marafioti in New York and then appeared in revue and operetta. In 1926 she sailed for Europe and after working with Richard Berthélemy at Antibes made her Opéra-Comique début as Mimì in 1928. That year she made her Metropolitan début in the same role, remaining there until the 1931–2 season and returning in several seasons up to 1946, singing such roles as Lauretta, Tosca, Manon, Fiora (*L'amore dei tre re*) and Louise. She appeared at Covent Garden in 1935 as Mimì and continued to give concerts internationally until her death in an air accident. She also appeared in numerous Broadway shows and made several films, the most important of which was *One Night of Love* (1934). Moore had a glamorous personality, earning the American accolade 'star of stage, screen and radio', and a sensuous, substantial voice, though it lacked technical finish.

MAX DE SCHAUENSEE/R

Moore, Mary (Louise) Carr (*b* Memphis, 6 Aug 1873; *d* Inglewood, CA, 9 Jan 1957). American composer. She studied in San Francisco with J.H. Pratt (composition) and H.B. Passmore (singing). By 1889 she had begun teaching and composing (a song from that year was later published) and in 1894 she sang the leading role in the première of her first operetta *The Oracle*. The following year she abandoned her singing career; for the rest of her life she taught and composed in Lemoore, California (from 1895), Seattle (1901), San Francisco (1915) and Los Angeles (1926). In Los Angeles she taught at the Olga Steeb Piano School (1926–43) and was concurrently professor of theory and composition at Chapman College, Orange (1928–47), which awarded her the honorary DMus in 1936. Moore was a tireless promoter of American music; she organized an American Music Center in Seattle (1909) and worked for Federal Music Project performances by local composers in Los Angeles (1936–42).

The American music movement of the 'progressive' era greatly inspired Moore as a composer. Her early study of late 19th-century European compositional models was tempered by her location on the West Coast, where the boundaries between élite and vernacular styles in music tended to blur. Moore was at her best in opera, frequently challenging the limitations of the genteel culture to which she remained bound by inclination and family obligations. Her largest work, *Narcissa* (1909–11), based on the 1847 massacre of missionaries Narcissa and Marcus Whitman in the Oregon Territory, has a legitimate claim to be the first major 'American' opera, but it went unrecognized and was misunderstood. Its three productions (1912, Seattle; 1925, San Francisco; 1945, Los Angeles; all with the composer conducting) failed to draw serious attention, though it was belatedly awarded a David Bispham Memorial Medal in 1930.

Moore altered her musical language substantially after *Narcissa*. *David Rizzio* (completed in 1928), whose action takes place during the reign of Mary, Queen of Scots, makes much use of the whole tone scale. In *Legende provençale*, a tale of love, faith and sorcery set in the 15th century, the harmonic vocabulary is expanded still further. In addition to the operas, her chamber works and many of her songs deserve revival; her published works include 65 songs, 15 choral works and piano pieces.

CYNTHIA S. RICHARDSON, CATHERINE PARSONS SMITH

Moore, Thomas (*b* Dublin, 28 May 1779; *d* Sloperton Cottage, nr Devizes, 26 Feb 1852). Irish poet and musician. A 'show child', as he described himself in his

Memoirs, he gave recitations and took part in private theatricals; he published some verses by the age of 11, and at 14 contributed to the *Anthologia hibernica*. As a boy, he learnt French and Italian, and studied music independently and with his sister's teacher. In 1793 Trinity College, Dublin, was opened to Catholics, and Moore went there in 1794; while a student, he made his translation of the odes of Anacreon. Though a friend of Robert Emmet and other revolutionaries, he was not involved in any conspiracy; and in 1799 he went to London and entered Middle Temple as a law student. He made himself a popular figure socially with his verses and his singing; he also wrote the libretto for Michael Kelly's opera *The Gipsey Prince* (1801), and in 1802–3 wrote the words and often the music of many songs which won instant popularity. In 1803 he took up the post of registrar in the admiralty court of Bermuda, but soon relinquished it to a deputy and returned by way of Canada, where he composed his *Canadian Boat Song*. *Epistle Odes and Other Poems* appeared in 1806, and the scathing review in the *Edinburgh Review* by Francis (later Lord) Jeffrey led to a duel, interrupted by the police; Jeffrey's pistol was found to be unloaded, and the two men then became warm friends.

When in 1807 the publisher William Power, impressed by the success of George Thomson's collections, proposed a selection of Irish songs, Moore provided words and tunes, with accompaniments by Sir John Stevenson. The *Irish Melodies* began serial publication in 1808, eventually (after a dispute between Power and his brother James over rights) reaching ten numbers and a supplement by 1834. For the purpose, Moore raided the collections made by Edward Bunting (who was much upset), making only minor musical alterations but freely using originally light or comic melodies for new serious words. It was this collection above all which clinched Moore's already enormous popularity. In March 1811 he married Elizabeth (Bessie) Dyke, an Irish actress, and in the same year wrote the text and (with C.E. Horn) music for an unsuccessful comic opera, *M.P. or The Blue Stocking* and published a *Melologue upon National Music*. By now rich and famous, he could command an advance of £3000 for *Lalla Rookh*: the first edition sold out in a fortnight, and it was reprinted six times in as many months. In 1816 he published the first number of *Sacred Songs*, with music selected and composed by himself and Stevenson, and in 1818 there followed the first of *A Selection of Popular National Airs*. In the same year he learnt of his Bermudan deputy's embezzlement, and became liable for the loss of £6000. Refusing help, he retreated to Paris, also visiting Italy, before returning to England in 1822; by the writings of his exile years he was able to settle a reduced debt of £740. He also published lives of Sheridan (1825), Byron (1830) and Fitzgerald (1831). In his latter years, despite the happiness of his marriage and the support of friends who included Byron, Canning, Peel and Russell (who arranged a pension of £3000 for him), he was ill and depressed: all his five children were dead by 1846, and in these last years his mind began to fail.

Byron, who was devoted to him, wrote that 'Moore has a peculiarity of talent, or rather talents, – poetry, music, voice, all his own; and an expression in each, which never was, nor will be, possessed by another' (Journal, 22 November 1813); and Sydney Smith called him, 'a gentleman of small stature, but full of genius, and a steady friend of all that is honourable and just' (*Edinburgh Review*, 1824). In his day, Moore won a vast following for his verses, songs and stories, partly through his personal charm as a reciter and singer; but an age which delighted in national lore and the revelation of folk melody was ready to find potency even in Moore's feeblest verses (Coleridge was a rare dissenter). Abroad, the enthusiasm for Scott and Burns and all things Scottish was easily extended to include Moore as their counterpart, with his apparent embodiment of the Irish soul in verse and song; and though the work includes covert references to Irish patriotism, the orientalism of *Lalla Rookh* played expertly on Romantic sensibilities that were still enraptured by the *1001 Nights* (whose pattern of a narrative framework for interpolated stories, here in verse, Moore copied). Berlioz, who first read Moore's work in translations by Gounet and others, found it full of 'splendid images' (*Mémoires*), and set and often quoted it.

Though not a methodical collector of Irish folk music, nor markedly skilful as an adapter or arranger, Moore did much by his personal qualities to kindle interest in these little-known tunes. As a poet, he appealed to a wide range of taste with the *Irish Melodies*, and the story-poems of *Lalla Rookh* long attracted composers for their simple and exotic subjects and their opportunities for colourful music.

WORKS SET TO MUSIC

musical settings follow each work or portion of work

The Gipsey Prince, op lib: M. Kelly, 1801
M.P. or The Blue Stocking, op lib: C.E. Horn and Moore, 1811
Lalla Rookh, story with 4 interpolated poems (London, 1817): G. Bantock (sym. poem, 1902); F. Clay (choral work, 1877); Félicien David (op, 1859); C.E. Horn (op, 1818); J. Jongen (sym. poem, 1904); A. Rubinstein (op: Feramors, 1863); A.M. Smith (ov., *c*1865); Spontini (tableaux vivants, 1821; op: Nûrmahal, 1822)
'The Veiled Prophet of Khorassan': C.V. Stanford (op, 1881)
'Paradise and the Peri': J.F. Barnett (choral work, 1870); W.S. Bennett (fantasy-ov., 1862); Schumann (choral work, 1841–3); V.A. Zolotaryov (choral work, 1900)
'The Fire-Worshippers': Bantock (choral work, 1892)
'The Light of the Harem': A.G. Thomas (op, 1879)
Songs to Moore poems by Berlioz, Cornelius, Duparc, Hindemith, J. Ireland, A. Jensen, A. Mackenzie, Mendelssohn, H. Parry, Schumann, S.I. Taneyev, F. Walker, P. Warlock, Weber, etc.

EDITIONS AND COLLECTIONS

The melodies were collected and in some cases altered by Moore; the name of the composer of the accompaniment follows each setting.
A Selection of Irish Melodies (Irish trad.): J. Stevenson, nos.8–10 rev. H. Bishop (London, 1808–34, enlarged 4/1859 with accs. by M. Balfe, 8/1893); Glover (Dublin, 1860); rev. and ed. G.A. Macfarren (London, 1859–61)
Sacred Songs (Irish trad.): Stevenson (London, 1816)
A Selection of Popular National Airs: Stevenson, nos.2–6 rev. Bishop (London and Dublin, 1818–28) [incl. Moore's *Melologue upon National Music*, orig. pubd 1811]

JOHN WARRACK

Moore, Undine Smith (*b* Jarratt, VA, 25 Aug 1904; *d* Petersburg, VA, 6 Feb 1989). American composer. She studied at Fisk University (AB and diploma 1926), Columbia University Teachers College (AM and diploma 1931) and privately with Howard Murphy. A professor at Virginia State University, Petersburg (1927–89), she co-founded and co-directed the university's Black Music Center (1969–72). Her many honours included the Governor's Award in the Arts (Virginia, 1985) and honorary doctorates from Virginia State (1972) and Indiana (1976) universities.

Moore's compositional style is strongly rooted in the tonal tradition and in her spiritual heritage. Many of her choral works set explicitly Christian, often Biblical texts and employ a style derived from southern hymnody. *Who Shall Separate Us From the Love of Christ?*, *Lord, We Give Thanks to Thee* and the seven *Choral Prayers in Folk Style*, intended for liturgical use, reflect her deep religious faith. While spirituals were among her earliest musical memories, her compositional interest in them only took hold once her formal musical education was complete. She notated melodies her mother and father had learned from their parents and referred to them throughout her mature output, most explicitly in her many choral arrangements, but in other works as well, such as the *Afro-American Suite* and the oratorio *Scenes from the Life of a Martyr* based on the life of Martin Luther King.

OLIVIA MATTIS

Moorehead [Moorhead], **John** (*b* Ireland, *c*1760; *d* nr Deal, March 1804). Irish violinist and composer. He received his first musical instruction in Ireland, but went to England when young and was for several years engaged in the orchestras of various country theatres. He was one of the violins at the Three Choirs Festival of 1794, and in 1795, at Thomas Dibdin's invitation, left Manchester to become principal viola and composer at Sadler's Wells Theatre. In 1798 he was engaged in the orchestra at Covent Garden and soon after employed to compose songs and overtures for that theatre. *The Naval Pillar*, one of his more successful works for Covent Garden, contains a tune that became especially popular after being transferred to Thomas Morton's comedy *Speed the Plough* for use as a dance. That tune and the song *The Muffin Man* are still played today, but are rarely attributed to Moorehead. On the whole, his music relies on repetitive melodic elements and tonic–dominant harmonic schemes.

In 1802 Moorehead began to suffer intermittent fits of insanity and finished his scores only by working with collaborators. After committing a series of assaults and property destruction, he was confined successively in Tothill Fields Prison and Northampton House, Clerkenwell. On his liberation he entered the navy as a common sailor, and was quickly promoted to bandmaster, but a short time afterwards he hanged himself in a fit of insanity.

His brother, Alexander Moorehead, was also a violinist of merit and led the orchestra at Sadler's Wells Theatre; he too became insane and died in an asylum at Liverpool in 1803.

WORKS

published and first performed in London, unless otherwise stated

STAGE

all publications are vocal or piano scores; MS librettos in US-SM

LCG – *Covent Garden*

LSW – *Sadler's Wells*

Birds of a Feather, or Buz and Mum (burletta, J. Moorehead), LSW, 25 July 1796; 2 songs (1796)

Alonzo and Imogine; or The Bridal Spectre (pantomimic romance, T.J. Dibdin, after M.G. Lewis: *The Monk*), LSW, 8 May 1797; ov. (Dublin, ?1800)

The Horse and the Widow (farce, 1, T.J. Dibdin, after A. Plumptree's trans. of A. von Kotzebue: *Die Witwe und das Reitpferd*), LCG, 4 May 1799, 1 song (London, 1799)

The Naval Pillar, or Britannia Triumphant (interlude, T.J. Dibdin), LCG, 7 Oct 1799 (1799), lib pubd

The Volcano, or The Rival Harlequins (pantomime, T.J. Dibdin and C. Farley), LCG, 23 Dec 1799, ov. and 2 songs (1799), lib pubd

Speed the Plough (comedy, 5, T. Morton), LCG, 8 Feb 1800, Act 2 dance (originally from The Naval Pillar) arr. as rondo for pf by J. Field (London, 1800)

Boadicea, or The British Amazon (serious pantomime, C.I.M. Dibdin), LSW, 14 April 1800

Old Fools, or Love's Stratagem (burletta, C.I.M. Dibdin), LSW, 14 April 1800

Il Bondocani, or The Caliph Robber (comic op, 3, T.J. Dibdin, after J.-P. Florian: *Fables*), LCG, 15 Nov 1800, ov. and 1 song (1801), lib pubd; collab. T. Attwood

Harlequin's Tour, or The Dominion of Fancy (pantomime, T.J. Dibdin), LCG, 22 Dec 1800 (1800), lib pubd; collab. T. Attwood

Perouse, or The Desolate Island (pantomime, J. Fawcett and G. Colman), LCG, 28 Feb 1801, ov. and 1 song (1801), lib pubd; collab. J. Davy

Harlequin Benedick, or Mother Shipton's Ghost (pantomime, C.I.M. Dibdin), LSW, 29 June 1801, lib pubd

The Cabinet (comic op, 3, T.J. Dibdin), LCG, 9 Feb 1802 (1802), lib pubd; collab. W. Reeve, J. Davy, D. Corri, J. Braham

Family Quarrels (comic op, 3, T.J. Dibdin), LCG, 18 Dec 1802 (?1803), lib pubd; collab. J. Braham, W. Reeve

Harlequin's Habeas, or The Hall of Spectres (pantomime, T.J. Dibdin), LCG, 27 Dec 1802, ov. (1802), lib pubd; collab. J. Braham, J. Davy

Moorish music. *See* MAURITANIA.

Moorman, (Madeline) Charlotte (*b* Little Rock, AR, 18 Nov 1933; *d* New York, 8 Nov 1991). American cellist and performance artist. She studied at Centenary College, Shreveport, Louisiana (BM 1955), and the University of Texas at Austin (1956–7), where she was a cello pupil of Horace Britt. In 1957–8 she began studying with Leonard Rose at the Juilliard School. She played in the Boccherini Players (1958–63) and the American SO (until 1967). Influenced by Yoko Ono, a close friend, in 1963 she founded the annual New York Avant Garde Festival, and in 1964 collaborated for the first time with the composer and video and performance artist Nam June Paik. They interpreted and collaborated on a large number of works diverse in aim, from the *Cello Sonata no.1 for Adults Only* (1965), in which music is associated with sex and violence, to *Global Grove* (1973). Some of these works use non-traditional instruments, as in *TV Cello* (1971), while others juxtapose the human and the technological (*TV Bra for Living Sculpture*, 1969). Moorman's cello performance in Paik's *Opéra sextronique* in February 1967 resulted in her conviction for indecent exposure, an event commemorated by their *The People of the State of New York against Charlotte Moorman* (1977). In such works as Yoko Ono's *Cut Piece* Moorman performed showing her mastectomy scars; on other occasions she played her cello under water, in a gondola or wrapped only in cellophane.

SEVERINE NEFF

Moors [Mors, Morss, de Moer, de Moor]. South Netherlandish family of organists, organ builders and instrument makers. The Lier branch of the family included Mark (i) (*d* Lier, 1525), who built a 'manucordium' in 1508 for the future Emperor Charles V; Hendrik, who built a small organ for Charles in 1517; Mark (ii) (*d* after 1535), who was a member of Charles's chapel; and several organists of St Gummaruskerk: Bernhard (i), Bernhard (ii) (*d* 1558; son of Mark (i)), and Bernhard (iii) (*d* 1597; possibly the son of Bernhard (ii)).

The Antwerp line was founded by Anton (i) (*d* Antwerp, 1539), who was organist of the abbey of St Michiel in the city, as well as a maker of organs and other instruments. He built small organs for the royal chapels in Brussels (1514) and The Hague (1515), and a clavichord for Eleonore of Habsburg, Charles V's sister, in 1516; in 1529 he was working for Margaret of Austria. Of the sons of Anton (i), the organ builder Cornelis (*b* Antwerp, *c*1500; *d* Antwerp, 1557) remained in his home town, but the organ builder Anton (ii) (*b* Antwerp, *c*1500; *d* before August 1562) and the organists Jakob (*b* Antwerp, *c*1515; *d* ?Berlin, between 1585 and 1602) and Hieronymus (*b* Antwerp, 1521; *d* Schwerin, 16 Dec 1598) went to northern Germany. Cornelis built organs for St Michielskerk, Ghent (before 1542), St Walburga, Oudenaarde (1542–3), St Katelijnekerk, Mechelen (before 1543) and elsewhere. Hieronymus was court organist to Duke Albrecht of Mecklenburg by 1538, and also organist of Schwerin Cathedral from 1552. Hieronymus's son Anton (iii) (*b* Schwerin, *c*1555; *d* Rostock, 1619) was organist of the Jacobikirche, Rostock, from 1573 to 1613, as well as a court musician at Güstrow from time to time. Jakob entered the service of the court at Mecklenburg about 1548, became court organist to Elector August of Saxony in Dresden (1554), and moved to Berlin in 1557 to be organist at the court of Elector Joachim II Hector of Brandenburg. Jakob's son Joachim (*b* ?Berlin, *c*1560; *d* after 1605) was court organist, first in Dresden, 1579–81, and subsequently in Berlin. Anton (ii)'s major work was a large new organ for Onze Lieve Vrouw in Dendermonde. He worked also for Duke Albrecht of Mecklenburg, from 1555 to 1557, in Schwerin Cathedral (major repairs and enlargement) and Güstrow Cathedral in 1558, and for Elector Joachim II Hector in Berlin from 1559 to 1560. The specification of the 'Mary Organ' in Berlin suggests that it is also the work of Anton (ii). On the evidence of the Schwerin contract of 1555, Anton (ii) was among those leading Brabantine organ builders who had improved on the indigenous type of instrument by grafting on to it the 'new and strange voices' brought to the Low Countries by the Rhenish masters Hans Suys (*see* SUISSE) and PETER BREISIGER.

HANS KLOTZ

Moosburg Gradual (*D-Mu* 2°-156). 14th-century gradual, kyriale, proser, cantional and troper; *see* SOURCES, MS, §II, 8.

Mooser, (Jean Pierre Joseph) Aloys (*b* Fribourg, bap. 27 June 1770; *d* Fribourg, 19 Dec 1839). Swiss organ builder and piano maker. He was the son of the organ builder Joseph Anton Moser (1731–92), of Niederhelfenschwil, St Gallen, who had settled in Fribourg in the 1760s. He studied with his father, who himself had been schooled in the south German organ-building tradition under Johann Michael Bihler of Konstanz, and was thus not a pupil of Silbermann as is sometimes erroneously recorded. Working in Fribourg, he became the best-known Swiss organ builder of the first half of the 19th century. His organs reflect a south German and early Romantic style. The source of his reputation is the large organ in the cathedral of St Nicolas in Fribourg (1824–34), whose Vox humana, with Swell mechanism, aroused special enthusiasm. Its fame, in fact, rests not only on its quality as an instrument, but above all on a pastoral fantasia, the 'Gewitter', by the cathedral organist Jacques Vogt (1810–69), which has remained on cathedral recital programmes.

Mooser was also well known as a piano maker; the Parisian piano maker Erard attempted to interest him in

a collaboration. He had sons who were organ and piano makers, including Joseph, Alexander and Moritz, but their reputations waned after their father's death.

FRIEDRICH JAKOB

Mooser, R(obert)-Aloys (*b* Geneva, 20 Sept 1876; *d* Geneva, 24 Aug 1969). Swiss musicologist and music critic. His mother was Russian and his father, Jean-Louis (who worked for a time in St Petersburg), was a son of the organ and piano maker Joseph Mooser (1794–1876). He studied the organ with Otto Barblan and theory in Geneva, and then (1896) composition with Balakirev and orchestration with Rimsky-Korsakov in St Petersburg, concurrently working there as organist at the French Protestant church (1896–1909), music critic of the French periodical *Journal de St-Pétersbourg* and a member of the directorate of the Imperial Theatre (1899–1904). Subsequently he was music critic of the Geneva periodical *La Suisse* (1909–62) and director of Auditions du Jeudi, the Geneva concert series of modern music (1915–21). The independent periodical *Dissonances* which he directed, edited and published (1923–46) was particularly concerned with modern, Swiss and Russian works and strenuously opposed German and Italian fascism during the war. Geneva University awarded him an honorary doctorate in 1956.

Mooser, along with Willi Schuh, was the leading music critic in Switzerland, and in the French-speaking area his fame was comparable to Ansermet's; his criticism showed an independence of all schools and doctrines. He enthusiastically supported Honegger, Frank Martin and Malipiero, and though he never appreciated Schoenberg (whom he compared with Meyerbeer), he nevertheless recognized the importance of such figures as Webern, Apostel, Berg, Lutosławski and Nono. His restrained opposition to Messiaen, Boulez, Stockhausen and serial music of the 1960s showed him (in his 80s) to be open to all contemporary developments and prepared to make a thorough study of music otherwise alien to him. His highly informative studies of Russian music history have become standard works in the subject, and his study of the Genevan composer and violinist Gaspard Fritz gives a multi-faceted account of Genevan musical life from 1750 to 1850.

JÜRG STENZL

Moraes Pedroso, Manuel de. *See* PEDROSO, MANUEL DE MORAES.

Morago, Estêvão Lopes (*b* Vallecas [now in Madrid], *c*1575; *d* probably at Orgens, nr Viseu, after 1630). Portuguese composer of Spanish birth. He studied from 1592 to 1596 with Filipe de Magalhães at the Colégio dos Moços do Coro maintained by Évora Cathedral and received his bachelor's degree on 3 March 1596. On 15 August 1599 he was appointed *mestre de capela* of the cathedral at Viseu, Portugal, probably on the recommendation of the new bishop, who had been a canon of Évora Cathedral. He became a priest and a licentiate before 27 September 1605, when the bishop instituted him in a benefice of S Pedro de Cota, to which a half-pay canonry at the cathedral was added on 5 January 1608. After 25 years as *mestre de capela* he wished to see through the press a substantial amount of his church music, and on 14 January 1626 the Viseu chapter gave him a month's leave to negotiate personally with the royal printer at Lisbon. Unable to secure a favourable contract, he returned to Viseu to supervise the copying of one of the two surviving manuscript collections of his music, the title-page of which is dated 15 August 1628. Immediately afterwards he seems to have left for a short visit to Spain. He then continued as *mestre de capela* until April 1630. Later that year, in a gift copy of Magalhães's *Officium defunctorum*, he signed himself a friar minor, possibly as a result of his retiring to the Franciscan house at Orgens, 3 km from Viseu.

The two surviving manuscript miscellanies of Morago's liturgical music (both in *P-Va*) are the above-mentioned collection dated 1628, which is a Vesperal of 111 folios containing three psalms, 18 hymns and four odd-verse *Magnificat* settings, and a 149-folio *Livro da Coresma* (Coleção 771), which is, however, misnamed, because the 81 compositions in it include in addition to Lenten music various works for Sundays in Advent, Christmas, Purification and the Office of the Dead. 35 motets (28 for four voices, five for five, one for six and one for double choir), eight four-part Christmas responsories, three psalms (two for four voices and one for double choir), 18 four-part hymns and four *Magnificat* settings (three for four voices and one for six) have been edited (PM, ser.A, iv, 1961). The sustained popularity of 12 of Morago's hymns, the texts changed to agree with Urban VIII's revision, can be

demonstrated by their having been copied into 18th-century partbooks (of which only the tenor book is now extant, at Viseu). The second of his invitatories for Christmas matins, *Christus natus est nobis*, survives at Viseu with an added continuo part. But like his teacher and his Portuguese contemporaries Brito, Cardoso and Lobo, he always remained too much the Peninsular conservative to write for continuo, to forgo imitation and the equality of the voices or to venture far into chromaticism. For dramatic effect, however, he did place adjacent to each other chords as disparate as those of G minor and E major and B♭ and A major. To add to the harmonic tension he frequently changed accidentals in successive imitative entries (occasionally he wrote an inverted final entry). Many chordal sequences are found in his more expressive motets, as also are chains of suspensions and passing and changing notes. Occasionally he mixed the extremes of fast and slow motion in the same motet, and six of his eight Christmas responsories are in fast triple metre. His shorter motets are frequently monothematic. He sometimes confirmed his endings with long pedals. Despite the triple canon closing his *Magnificat* on the 8th tone he could not begin to match the contrapuntal pyrotechnics of his Spanish contemporaries Vivanco and Aguilera de Heredia; nor was he fastidious about avoiding forbidden consecutives.

ROBERT STEVENSON

Moral, Pablo del (*fl* 1765–1805). Spanish violinist and composer. In 1777 he was violinist at the royal chapel of St Cajetan in Madrid; by then he had also been standing in for more than eight years for violinists attached to the theatrical companies of Madrid. In 1778, after public competition, he was officially named 'violinist of the Madrid theatres', and about the same time began to compose *tonadillas*. In 1790, again after public competition, he was appointed 'composer to the theatres of Madrid', with the responsibility of composing 40 *tonadillas* each year 'as well as everything else needed in the way of music'. In March 1792 he was obliged to abandon the post for reasons of health, but by April 1797 he was able to resume. In 1804 a new post of theatre composer was created, identical with Moral's, and awarded to the Italian G.M. Francesconi, a mediocre but conceited composer, much given to intrigue; Moral, affronted, resigned on 17 April 1805 and disappeared from public life.

In Moral's time the *tonadilla escénica* lost its directness and simplicity, often becoming a miniature comic opera with Italianate music. Subirá published one of his *tonadillas, La ópera casera* (1799), in which there is some virtuoso vocal writing entirely operatic in character. About 150 of his *tonadillas* survive, as well as an opera *La dama inconstante*, several *sainetes*, other theatre music and a symphony (*E-Mm*; symphony ed. in The Symphony 1720–1840, ser. F, iv, New York, 1981); he also composed sacred music, of which two masses, two Compline settings, a *Salve regina* and a litany are known (*MO*).

JOSÉ LÓPEZ-CALO

Morales, Cristóbal de (*b* Seville, *c*1500; *d* ?Marchena, between 4 Sept and 7 Oct 1553). Spanish composer. He is widely recognized as the first major composer from the Iberian peninsula and the most important figure in early 16th-century Spanish music.

1. LIFE. Morales's birthdate is traditionally given as around 1500. The addition of the adjective 'hyspalensis' after his name in numerous documents indicates that he was born in Seville. In his 1544 publication of 16 masses the composer demonstrated pride in his origins by identifying himself as 'Christophorus Morales Hyspalensis', not only in the dedications but at the head of each mass as well. Of his family all that is known is that he had a sister and that their father was dead by the time of her marriage in 1530. Candidates for relatives of the composer in Seville include a Cristóbal de Morales who was a singer of the Duke of Sidonia in 1504, Alonso de Morales, treasurer of the cathedral in 1503, Francisco de Morales (*d* 1505), a canon, and Diego de Morales, the cathedral notary in 1525.

There is no documentary evidence that Morales was a chorister in Seville; but if he was trained there, his musical influences would have included Francisco de Peñalosa, Pedro de Escobar, master of the choirboys from 1507 to 1514, and Pedro Fernández, who succeeded Escobar as *maestro de capilla* in 1514 and remained in the post for 35 years. Certainly Peñalosa's compositional technique resembles that of Morales, and Escobar's motet *Clamabat autem mulier*, a specifically Sevillian work, is cited by Morales in his own setting of that text. Morales's education clearly went beyond the practical musical training of a chorister. He claimed to have studied the liberal arts from early on, and Nicolas Antonio, in *Biblioteca hispana*, referred to him as *musicae artis magister*; the fluent command of Ciceronian Latin demonstrated in his prefaces and dedications (assuming that he wrote them himself) also attests his learning.

Beginning in 1522 there are three references to a Cristóbal de Morales in the chapter acts of Seville, one of which indicates that he was an organist. If Morales was in Seville until his appointment at Avila in August 1526, he was surely present at the wedding of Charles V to Isabella of Portugal on 10 March 1526, which would have presented an early opportunity to meet Gombert, a composer with a style similar to his and with whom he shared a high number of publications.

A now lost reference in the chapter acts of Avila Cathedral listed his appointment as *maestro de capilla* on 8 August 1526 with an annual salary of 37,500 maravedis (100 ducats), but by February 1529 he had transferred to Plasencia with a much higher salary (60,000 maravedis) and a half-prebend. On 4 February the Plasencia chapter granted him a month's leave to attend his sister's wedding in Seville and 40 gold ducats to defray the costs of her

dowry. Morales overstayed his leave, and his salary was temporarily suspended on 31 March. By 9 December 1531 he had resigned the post.

Between January 1532 and May 1534 Morales's whereabouts are unknown. He may have gone to Naples, where the viceroy was Pedro de Toledo, whose daughter Eleanor became the wife of Cosimo I de' Medici, the dedicatee of Morales's first book of masses. Three documents place him in Rome as 'presbyter toletanus' in May and December 1534. He is identified as a chaplain of Fernando de Silva, Count of Cifuentes and imperial ambassador to the Holy See. The count was a poet, attuned to the new style of lyric poetry cultivated by Boscán, and his connection with the composer may be behind the few secular works Morales wrote.

Morales joined the papal chapel on 1 September 1535, though his name does not appear in the chapel diaries until 23 October, with the notation that he had arrived from Naples. In his dedication of the second book of masses to Pope Paul III, Morales mentioned that he owed his appointment to the personal interest of the pope. Under Paul III (1534–49) membership of the chapel increased from 24 to 33 singers and their salaries were raised. Morales's monthly salary was 8 ducats and he was given a servant and, for long journeys, a horse. In order to share in the gifts from which the choir benefited beyond their regular salary, Morales paid 10 ducats into the chest on the day of his admission. The pope undertook a number of travels during Morales's first term in the chapel; although the composer was not among the singers who accompanied Paul to Viterbo in September 1536, he did take part in the journeys to Piacenza and Nice in 1538 and to Loreto in 1539. In addition there were opportunities to sing for such illustrious visitors as Emperor Charles V (in April 1536). It may be inferred that he was a tenor.

In 1536 Morales was granted a pension on the resignation of an unnamed benefice (only the *rubricella* remains), as well as benefices in Avila, Cartagena, Segovia and Sigüenza; by January 1537 he had collated at least those in Avila and Cartagena. He had a benefice in the Villa de Gibraltar, which he resigned to Miguel López in 1537, and in 1539 the pope granted him benefices in Seville and Orense; a record of collation exists for the Orense benefice. A papal letter making him technically a nobleman, as count of the papal palace, has been viewed as a mark of special favour, but such letters were granted routinely to papal chaplains to allow them to collate benefices restricted to the nobility.

On 4 April 1540, having served five years in the choir, he was entitled to a leave of ten months, and he left for Spain. Of his movements in Spain there is no trace; he was apparently back in Rome by 25 May 1541, when the singers' box came to him in rotation, but according to the chapel diaries he was not singing regularly again until 25 August. His second term in the chapel saw the publication of a great deal of his music as well as journeys to Bologna in August 1541, Perugia in August 1542, Castro in January 1543, and an extended sojourn in Bologna and Busseto beginning in February 1543. On 15 May 1543 he obtained a month's leave to travel to Genoa. The purpose of this journey is unknown; perhaps Morales was seeking an appointment as imperial *maestro de cappella*, but it is also possible that the trip had to do with his services to the Count of Cifuentes, since he had remained a member of the count's *familia*.

The Sistine diaries show that Morales had been plagued by intermittent bouts of ill-health since 1535, but these grew more frequent and prolonged during his second term. The journey to Bologna, Busseto and Genoa aggravated his condition, and resulted in several absences from the choir in 1543–5. On 1 May 1545 Morales was granted a second leave of ten months. He sems to have left the door open for a return, since the copy of the constitutions of the choir, completed in November 1545, has a line for his signature.

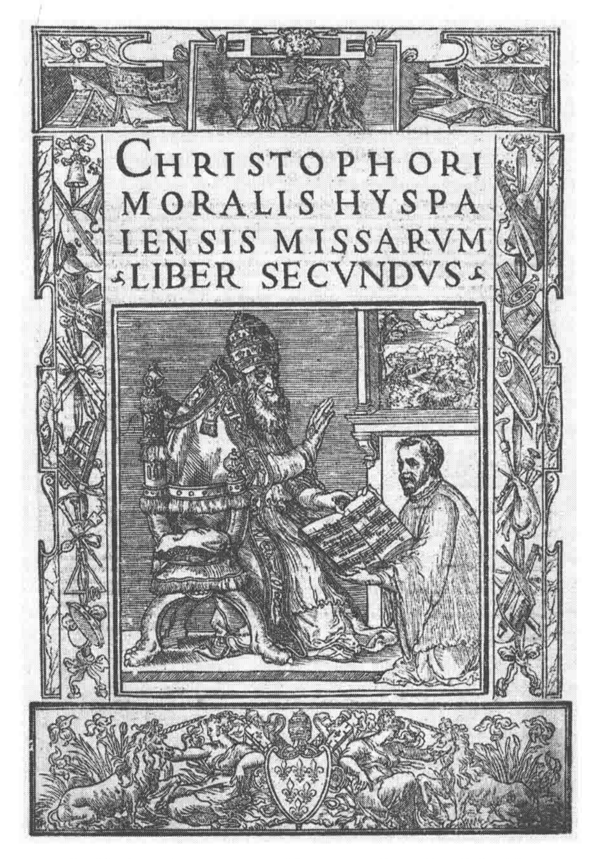
He may have been in Seville at the beginning of his leave, since Francisco Guerrero, in his *Viage de Hierusalem* (1590) wrote that he studied with Morales in Seville when he was 18. By August, however, Morales had been appointed *maestro de capilla* at the cathedral of Toledo, with a salary of 43,000 maravedis. The salary, although larger than that given to any previous Toledo *maestro de capilla*, was little more than what he had earned at Avila and considerably less than his salary at Plasencia nearly 15 years before. Morales was obliged to board the choristers and he fell into debt. On 22 September 1546 he sent one Juan de Castro to Zaragoza to collect monies due from the sale of his 1544 books of masses (sent from Rome) and to sell off any copies remaining in the stock of the book dealer Juan de Cepero (Reynaud, 1996, p.113). But he soon became gravely ill, and on 9 August 1547 he resigned the position.

After Toledo, Morales returned to Andalusia. Juan Bermudo, in *El arte tripharia* (1550), described him as *maestro de capilla* of the Duke of Arcos at Marchena, a post he held from 1548 to 1551; in 1550 Morales wrote a commendatory letter for the second edition of Bermudo's *Declaración de instrumentos musicales*. On 27 November 1551 Morales was appointed *maestro de capilla* to the cathedral of Málaga, but problems with singers not used to his perfectionist demands began a week after his appointment, necessitating reprimands and fines from the canons. A week before Christmas he moved into a house provided by the chapter, where presumably he was in charge of boarding the unruly choristers. When the post of *maestro de capilla* opened up again at Toledo in August 1553, Morales wrote to the chapter asking to be considered. Some of the canons, as well as the school master, were opposed to his return, and although he was by this time widely recognized as one of the foremost composers in Europe, his fame was regarded as no substitute for management skills, and the chapter required him to stand trial in open competition. Morales submitted his application on 4 September 1553, but by the beginning of October he had died.

The restlessness of Morales's career and the tone of the various admonishments he received indicate that, quite apart from his ill-health, he was a man who did not easily co-exist with mediocrities. It could not have escaped him that his skills as a composer were superior to those of virtually every one of his contemporaries. In his work he lays deliberate claim to be the true successor of Josquin and, while fully appreciated by the Andalusian nobility, he may well have struck the bureaucracy as imperious and arrogant.

2. Posthumous reputation. Morales's own self-assessment is confirmed by his reputation in the decades after his death, as his music spread through France, Germany, Italy, the Low Countries and Spain, as well as to the Americas. As early as 1559 his music was sung in

Mexico in the commemorative service for Charles V (noted in Francisco Cervantes de Salazar, *Túmulo imperial*, Mexico, 1560). In 1583 his *Missa cortilla* and motet *Andreas Christi famulus* were sung at Luanda, the newly founded capital of Angola, by native singers (*Monumenta missionaria africana*, 1954). His music dominated the repertory of Cappella Sistina manuscripts copied by Johannes Parvus during the pontificate of Paul III, and Morales is the only composer represented by all liturgical genres in these sources. His works appeared in more than 70 prints before 1600, and his international popularity makes his bibliography more similar to that of Lassus than to those of Victoria or Guerrero. His motets were parodied in masses by Guerrero, Ceballos, Victoria and Rogier. The long list of theorists who cited his works as technical models includes Bermudo and Francisco de Montanos in Spain, Zacconi, Artusi, Baccusi, De Grandis, Bonini and Cerone in Italy, and Antonio Fernandes, João Álvarez Frouvo and Manuel Nunes da Silva in Portugal. His music remained in the repertory of the papal chapel as well as in churches in Spain and the Americas into the 18th century.



In the early 18th century Andrea Adami da Bolsena (1711) listed Morales as the most important composer in the papal chapel between Josquin and Palestrina; Adami particularly praised the masses: for their polish, their learned contrivance and their elevated style. He called Morales's *Lamentabatur Jacob* the most precious work in the Cappella Sistina archives, referring to it as 'a marvel of art'. Fornari (*Narratione istorica*, MS, *I-Rvat*, 1749), discussing Palestrina's text setting in the *Missa Papae Marcelli*, praised Morales as the composer who first showed how to set words intelligibly in a contrapuntal fabric. Juan Bermudo, himself a Spaniard, called Morales 'the light of Spain in music', but at the same time listed 'the excellent Morales' together with the 'profound Gombert' as foreign. In his *Declaración de instrumentos musicales* (1555), he said that he regarded 'our Morales as a foreign composer because, although his music possesses the charm and pleasing sound of Spanish music, yet at the same time it does not lack the profundity, the technical skill and the artifice of foreign music'. Morales generally avoided the melodic and contrapuntal turns that mark much of the music of the *Cancioneros* as distinctively Spanish, even though in his setting of Boscán's *Si no's uviera mirado* he shows supreme command of that idiom as well. Although late 19th-century historians saw Morales through Wagnerian and Cecilian eyes, many of his works were published in modern score. Eslava and Pedrell did him disservice by attributing to him Victoria's motet *O vos omnes*, which they called Morales's most typical work (Pedrell discovered his error when he came to edit the works of Victoria).

3. Works. Almost all Morales's works are sacred. His earliest dated composition is the six-part motet *Jubilate Deo omnis terra*, written for the peace celebration at Nice in June 1538. The motet is based on a plainchant ostinato to the word 'gaudeamus' while the other voices discourse on the merits of the pope, emperor and king. The work invites comparison with Josquin's *Missa 'Gaudeamus'*, which is built largely on ostinatos on the same motif. Among Morales's other occasional compositions is the six-part motet *Gaude et laetare ferrariensis civitas*, sung at Ferrara Cathedral on Sunday 9 March 1539 to celebrate the elevation of Ippolito II d'Este to a cardinalate.

Morales's first published works are two motets included in Moderne's *Motetti del fiore* (RISM 1539[11]) and a madrigal, *Ditimi o s'io no*, in Arcadelt's fourth book of madrigals (RISM 1539[24]). A year later three of his masses were published by Scotto in Venice (RISM 1540[3-4]). For the next two decades a steady stream of his music flowed from publishers in Lyons, Wittenberg, Nuremberg, Augsburg, Antwerp, Milan, Rome and Venice.

Morales's style includes some distinguishing characteristics which are not to be found in the later 16th-century style as codified in the works of Palestrina. Bermudo called particular attention to Morales's occasional use of a diminished triad in root position on a relatively strong beat, a trait which now, given the uncertainty regarding the use of accidentals in 16th-century music, might be subject to 'correction' if it were not for Bermudo's authority and citation of example. Other 16th-century theorists who cited Morales as an authority for procedures that could not be justified from the works of Palestrina are Artusi in *L'arte del contrappunto*, 1586, and Zacconi in *Prattica di musica*, 1596.

(i) Masses. 16 masses by Morales were published by Valerio Dorico in Rome in 1544 in two volumes printed at the composer's request and under his supervision (several had appeared already in anthologies issued by Scotto between 1540 and 1543). The first volume was dedicated to Cosimo I de' Medici, and the second to Pope Paul III (see illustration). The volumes were planned together, and were modelled on Antico's *Liber quindecim missarum* (RISM 1516[1]; for illustration *see* Antico,

Cristóbal de Morales presenting his work to Pope Paul III: title-page from 'Missarum liber secundus' (Rome: Dorico, 1544)

ANDREA). Morales apparently intended to establish his primacy as a mass composer and to attract the prestigious patronage of the dedicatees.

Seven other masses survive in manuscript (of one, *Missa 'Benedicta es caelorum regina'*, only the altus is extant). Three of them are early works, but the *Missa cortilla* and the four-voice *Missa pro defunctis* are late works, composed after his return to Spain in 1545. The *Missa 'Tristezas me matan'* appears also to be a mature work. On the basis of the single remaining voice it is difficult to assess the style of the six-voice *Missa 'Benedicta es'*, but it also appears to be a mature work. Of the masses Morales chose to publish, only the *Missa 'Mille regretz'* is based on a secular model (the *Missae 'L'homme armé'*, given the crusading origins of the tune, are a special case).

For Book I Morales chose his most 'modern' works, and those that had a certain popular appeal (his judgment is confirmed by the later transmission of these pieces). With these masses Morales presents himself as Josquin's true heir. The opening work is the *Missa de Beata Virgine*, which is almost ostentatiously modelled on Josquin's work (McFarland, 1999), and the spirit of Josquin pervades many of the remaining masses (the five-voice *Missa 'L'homme armé'*, for example, is in the 6th mode like Josquin's famous *Missa 'L'homme armé' sexti toni*). The second mass, *Aspice domine*, may be read as a continuation of the book's dedication, asking Cosimo I to come to Morales's rescue and hinting at the strife and demoralization of the college of singers in Rome.

For Book II, dedicated to the musically sophisticated Paul III, the composer selected works more full of contrapuntal artifice, some with vestiges of isorhythm in them and not a single one on a secular model. The motets that serve as models for the three parody masses in Book II come from the repertory of the papal chapel itself. The masses left in manuscript include Morales's only masses based on Spanish subjects, and these, for the most part, show archaic traits that mark them as early works. The transmission of the late *Missa pro defunctis* is extremely complex, suggesting that Morales did not live to edit the work to his satisfaction.

(ii) Magnificat settings. Morales's *Magnificat* settings were his most popular works, but they are the most problematic in terms of reception history. All evidence indicates that they were written for the papal chapel, where the practice was to sing the entire canticle in polyphony. Five of them were published in this manner by Scotto in Venice in 1542 and by Rener in Wittenberg in 1543, and the entire series was copied into manuscript this way in 1576 (*I-Rvat* C.S. 21). The *Magnificat* settings are basically in four voices, with the plainchant appearing in different parts in the different verses, although a few verses in two or three voices make no use of the plainchant. Morales achieves an astonishing variety of textures through subtle changes in scoring, and each canticle ends with an impressive 'sicut erat' where the scoring is expanded by canonic voices. The final verse is preceded in the first *Magnificat* setting by a 'gloria Patri' in sesquialtera.

As Morales was preparing to leave Rome, he took the extraordinary step of publishing his *Magnificat* settings as a double series, dividing them into 16, one series setting the even verses and the other the odd verses. Commercially this made sense, since the *Magnificat* setting was sung *alternatim* outside the papal chapel, but musically it remains a dismaying act perpetrated by the composer on some of his greatest music. Still, even in their mutilated state the *Magnificat* settings went through a large number of editions and manuscript copies well into the 18th century (and they are misleadingly published in this form in the complete edition). Some of the *Magnificat* settings had ad libitum voices added to some sections by Palestrina and Soriano. The additions are interesting as examples of contrapuntal skill and as signs of homage to Morales, but they add nothing to what he wrote.

(iii) Motets, Lamentations and Officium defunctorum. Not counting individual motet *partes* and a section of the five-voice *Missa 'L'homme armé'*, anthologized as separate works, or sections from the *Officium defunctorum* copied separately, there are 88 motets with secure ascriptions to Morales, the great majority (54) being for four voices. In this respect Morales presents a more old-fashioned profile than Gombert or Clemens. Apart from the two ceremonial works, *Iubilate deo* and *Gaude et laetare*, all his motet texts are sacred if not strictly liturgical. There are settings of antiphons, responsories, a hymn, psalms and gospel lessons, but there are also compilations often consisting of a series of antiphons strung together to produce a longer text, as in the impressive six-voice *Veni domine*. In the responsory settings Morales followed the tradition established during his lifetime of setting the text in two *partes* and repeating the concluding music of the first part at the end of the second.

Like Gombert, Morales avoided the duet structure of the Josquin generation, and wrote instead a relatively dense stream of polyphony. But through slight reductions in scoring, occasional use of homophonic passages, melodic repetition and careful attention to the text setting (an aspect not immediately apparent in the text underlay of the *Opera omnia*), he achieved a rhetorical clarity in the presentation of the text unmatched by most of his contemporaries with the exception of Rore, with whom he shared the admiration of theorists in this respect as well as some conflicting attributions. An unusually large number of Morales's motets, including such impressive works as *Emendemus in melius*, the five-voice *Andreas Christi famulus* and the six-voice *Veni domine*, are polytextual, built on an ostinato cantus firmus with its own text. These works are both his most idiosyncratic and his most 'modern' works.

The matter of conflicting attributions in Morales can be extremely difficult because often the only sources ascribing pieces to him are very late. Typical is the case of *Clamabat autem mulier*, printed in Rore's third book of motets (RISM 1549[8]) without attribution, but ascribed to Morales in two late manuscripts (*E-Tc* 17 and *P-Pm* 40). The text of the motet was unique to the liturgy of Seville (the only other settings are by Escobar, Ceballos and Guerrero), strongly supporting Morales's authorship.

The Lamentations and the *Officium defunctorum* present a far more austere aspect than the motets. In the Lamentations, Morales made much use of simple *falsobordone*, and in the *Officium defunctorum* he wrote extremely simple counterpoint that allows the plainchant melodies to be heard. The music of the *Officium defunctorum*, which may be an early work, adheres closely to Spanish traditions, as does the late Requiem, while the five-voice Requiem presents a mixture of Spanish

and Roman traditions in its choice and treatment of chants (see Wagstaff, 1995).

(iv) Secular works. Morales left barely half-a-dozen secular works, two of which survive only in intabulation. Two Italian madrigals, *Ditimi o si o no* on a unique translation of a French poem by François I, and *Quando lieta sperai* on a sonnet by Anguisciola, show a supreme command of the style of the early and middle-period madrigal. The transmission of *Quando lieta sperai*, first published anonymously in Rore's third book of madrigals and identified as Morales's only by Vicenzo Galilei later in the century, led scholars to attribute it to Rore at first, but its clef combination is utterly unlike any work of Rore's and its transmission pattern parallels that of *Clamabat autem mulier*. Similarly, the villancicos *Si no's uviera mirado* and *Juicio fuerte sera dado* reveal that Morales was equally at home in the specifically Spanish stylistic world of the cancioneros. *Quando lieta sperai* was used as a model by Lassus for a *Magnificat* setting and was clearly held in high regard. Morales obviously saw himself as Josquin's successor, and as the most important composer of sacred music in his generation. Contemporary theorists and later historians appear to agree.

WORKS

For full list of intabulations see *BrownI*.

MASSES

Missarum liber primus (Rome, 1544) [1544a]
Missarum liber secundus (Rome, 1544) [1544b]
Others in *E-GRcr, MA, Mmc, Tc, TZ, Vcp*; *GCA-Gc*; *I-Ma, Rvat*
Missa 'Aspice Domine', 4vv, 1544a; A xi, 35 (on Gombert's motet; different Ag II in *E-Mmc*)
Missa 'Ave Maria', 4vv, 1542[3], 1544b; A xv, 32
Missa 'Ave maris stella', 5vv, 1544a; A xi, 104 (canonic)
Missa 'Benedicta es caelorum regina', 4vv, 1544b; A xv, 1 (on Josquin's motet, with references to Mouton)
Missa 'Caça', 4vv, *Mmc* (with different Ag), *TZ, Vp, P-Pm*; A xxiv, 1 (quotes from ensalada by M. Flecha (i))
Missa cortilla, 4vv, *E-Mmc, Tc* (lacks Ag II); A xxiv, 18
Missa de Beata Virgine, 4vv, 1540[4], 1544a; A xi, 1
Missa de Beata Virgine, 5vv, 1540[3], 1544b; A xv, 66
Missa 'Desilde al cavallero', 4vv, *I-Ma*; A xxiv, 58 (on popular Sp. song)
Missa 'Fa re ut fa sol la' [= Missa cortilla]
Missa 'Gaude Barbara', 4vv, 1544b; A xxi, 34
Missa 'L'homme armé', 4vv, 1544b; A xxi, 67
Missa 'L'homme armé', 5vv, 1540[3], 1544a; A xi, 193
Missa 'Mille regretz', 6vv, 1544a, *Rvat* (with different San, Ag I, III); A xi, 238; xxiv, 123 (on Josquin's chanson)
Missa pequeña [= Missa 'Caça']
Missa pro defunctis, 4vv, *E-Vp*; ed. in Musica liturgica, ii/1 (Cincinnati, 1960), Musica hispana, B/iii (Barcelona, 1975)
Missa pro defunctis, 5vv, 1544b; A xv, 114
Missa 'Quaeramus cum pastoribus', 5vv, 1543[1], 1544a; A xi, 148 (on Mouton's motet)
Missa 'Quem dicunt homines', 5vv, 1544b; A xxi, 89 (on Richafort's motet)
Missa 'Si bona suscepimus', 6vv, 1544a; A xi, 274 (on Verdelot's motet)
Missa 'Tristezas me matan', 5vv, *I-Rvat*; A xxiv, 83 (on popular Sp. song)
Missa 'Tu es vas electionis', 4vv, 1544b; A xxi, 1 (tenor mass on versicle from M. de Eguía, Liber processionarius, Alcalá, 1526)
Missa 'Ut re mi fa sol la', 4vv, *E-GRcr, Mmc, TZ* (with addl. Osanna), *GCA-Gc*; A xxiv, 36
Missa 'Vulnerasti cor meum', 4vv, 1542[3], 1544a; A xv, 70 (on ?Févin's motet)

MAGNIFICAT, LAMENTATIONS

Magnificat ... liber primus (Venice, 1545), tones 1–8 in divided series [1545]

Magnificat primi toni, 3–6vv, 1542[9], *E-Tc* (different Anima mea and Quia respexit), *P-Cug* (different Suscepit); A xvii, 1 (odd), 8 (even)
Magnificat secundi toni, 3–6vv, 1542[9], *I-Rvat* C.G. (Suscepit with opt. added parts by Soriano and Palestrina); A xvii, 17 (odd), 25 (even)
Magnificat tertii toni, 2–6vv, 1545, *Rvat* C.G. (Esurientes, Sicut locutus, Fecit potentiam with opt. added parts by Palestrina); A xvii, 34 (odd), 41 (even)
Magnificat quarti toni, 3–6vv, 1542[9], *Rvat* C.G. (Sicut erat with opt. added parts by Palestrina); A xvii, 50 (odd), 57 (even)
Magnificat quinti toni, 4–6vv, 1545; A xvii, 65 (odd), 75 (even)
Magnificat sexti toni, 2–4vv, 1542[9], *Rvat* C.G. (Esurientes with opt. added part by Palestrina); A xvii, 84 (odd), 91 (even)
Magnificat septimi toni, 4–6vv, 1542[9]; A xvii, 100 (odd), 109 (even)
Magnificat octavi toni, 4–6vv, 1545; A xvii, 119 (odd), 126 (even)

Lamentationi, 4–6vv (Venice, 1564) (4 by Morales; 5 others attrib. Morales are by C. Festa); ed. in Watkins
Lamentations, 5vv, Puebla Cathedral, Mexico (with prologue: Et factum est post capitem)

MOTETS ETC.

Accepit Jesus panes, 4vv, *E-E, Vp*; A xx, 10
Ad tante nativitatis, 4vv, *Tc*; A xxxiv, 19
Agnus redimit ovis, 4vv, *Tc* 21
Andreas Christi famulus (2p. Videns Andreas), 5vv, 1556[6]; A xiii, 157
Andreas Christi famulus (2p. Dilexit Andream), 8vv, 1564[1]; A xxxiv, 102
Antequam comedan suspiro (2p. Nonne dissimulavi), 4vv, 1541[4]; A xiii, 42
Apostole Christi Jacobe, 4vv, *V*; A xxxiv, 64
Asperges me, Domine, 4vv, in C. de Morales: Missarum liber primus (Lyons, 1545); A xxxiv, 10
At ille dixerunt (2p. of Cum natus esset Jesus)
Ave Domine Jesu Christe (2p. Ave domine, 3p. Ave domine), 4vv, 1543[5]; A xx, 22
Ave Maria, gratia pleni, 5vv, *Sc, I-Rvat*; A xiii, 75 (fuga in subdiapason)
Ave regina caelorum, 5vv, *E-Vp*; A xiii, 132 (fuga in subdiapason)
Beati omnes (2p. Ecce sic benedicetur), 6vv, 1553[6]; A xx, 153

ROBERT STEVENSON/ALEJANDRO ENRIQUE PLANCHART

Morales, Melesio (*b* Mexico City, 4 Dec 1838; *d* Mexico City, 12 May 1908). Mexican composer. He studied with Agustín Caballero, Felipe Larios (1817–75), Antonio Valle (?1825–76) and Cenobio Paniagua. At the age of 12 he passed off a composition of his own as a 'mazurka by Thalberg'; when the deception was discovered he began to be taken seriously as a composer. At 18 he sketched his first opera, *Romeo e Giulietta* (on Romani's libretto). After revising the orchestration three times he succeeded in getting it performed by the resident Italian company on 27 January 1863. One of the singers, Roncari, advised him to leave Mexico and make a name in Europe. He was unable to leave, however, until the spring of 1866, and in the meantime his second opera, *Ildegonda*, was produced (27 December 1865) after Maximilian had personally intervened to guarantee the costs of production.

Morales spent three years in Europe and shortly before his return saw *Ildegonda* produced at the Teatro Pagliano in Florence (December 1868), where it was received with great acclaim. As predicted his reputation in Mexico was tremendously enhanced by his European success, and he returned a conquering hero. At the Mexico City Conservatory he organized his own department of composition, 'founded on Neapolitan principles', and numbered among his pupils Gustavo E. Campa, Ricardo Castro and Julián Carrillo. Of his later operas two were produced at the Gran Teatro Nacional, Mexico City: *Gino Corsini* (14–15 July 1877) and *Cleopatra* (14–21 November 1891). His last opera, the one-act *Anita*, dealing with the 1867 siege of Puebla, shows *verismo* influence. All his librettos were written in Italian. Morales was the first to conduct Beethoven's symphonies in Mexico. His own orchestral fantasy *La locomotiva*, performed for the opening of the Mexico–Puebla railway (16 November 1869), was an early attempt at an orchestral interpretation of the sound of a locomotive. Almost 100 of his works were published, many of them in Italy, including excerpts from *Ildegonda*.

ROBERT STEVENSON

Morales, Olallo (Juan Magnus) (*b* Almeria, 15 Oct 1874; *d* Tällberg, 29 April 1957). Swedish composer, conductor and critic, of Spanish birth. He moved to Sweden at the age of seven and, after schooling in Göteborg, he studied the piano and composition at the Stockholm Conservatory (1891–9) and in Berlin (1899–1901). He was music critic of the *Göteborgs handels- och sjöfartstidning* (1901–5), the *Dagens nyheter* (1909–11) and the *Svenska dagbladet* (1911–18), and conductor of the Göteborg SO (1905–9). From 1917 to 1939 he taught conducting and other subjects at the Stockholm Conservatory, where in 1921 he was made professor. He was secretary to the Academy of Music (1918–40) and undertook numerous public commissions. As a conductor he appeared in Scandinavia, Germany and Switzerland. His colourful music combines a Spanish Impressionism with Nordic Romanticism.

ROLF HAGLUND

Morales, Rodrigo (*fl* 1540). Spanish organist and composer. He was appointed organist at Seville Cathedral in 1540, sharing the post with the celebrated Pedro de Villada, whose music was commended by Juan Bermudo. Morales' only known work is the *Magnificat* ascribed to 'Ro Morales' in *E-TZ2*. The initial has also been read as an 'F', prompting attributions to a 'Francisco Morales', and also as a 'C', but the works do not correspond to the style of Cristóbal de Morales' published *Magnificat* settings. For further discussion, see E. Ros-Fábregas: *The Manuscript Barcelona, Biblioteca da Catalunya, M.454: Study and Edition in the Context of the Iberian and Continental Manuscript Traditions* (diss., CUNY, 1992).

EMILIO ROS-FÁBREGAS

Morales Nieva, Ignacio (*b* Valdepeñas, 18 Dec 1928). American composer of Spanish birth. He studied theology at the United Evangelical Seminary, Madrid, and then went to the Madrid Conservatory (diplomas in piano, harmony and composition), where his teachers included Conrado del Campo, Joaquín Turina and Julio Gómez. Before moving to Puerto Rico in 1954 he served as organist and choirmaster in Madrid churches; in Puerto Rico he took up the same duties. He became a US citizen in 1960. From 1964 to 1967 he served as organist and choirmaster at the Church of the Holy Family in New York City while studying orchestral conducting at the Manhattan School of Music. Again in Puerto Rico since 1968, he has occupied teaching positions in the Puerto Rico Junior College, in Metropolitan University, in Turabo University and in the Puerto Rico Conservatory of Music. In 1977 he established the Father Antonio Soler Ensemble, a chamber orchestra devoted mainly to the study and performance of Spanish and Spanish American music of the 17th and 18th centuries. In 1990 the Municipal Conservatory of Valdepeñas was renamed the Elementary Music Conservatory Ignacio Morales Nieva in his honour.

Morales Nieva has composed a considerable number of works for existing ensembles, imaginatively utilizing their instrumentation and other characteristics. His works include cantatas, Anglican masses and motets, chamber music, symphonic music and works of lyric theatre. He has also worked as a music critic for the San Juan newspapers *El mundo* (1978–83) and *El vocero* (1984–7).

DONALD THOMPSON

Morality play. *See* MEDIEVAL DRAMA.

Moralt [Muralter; Muralt, von]. German family of musicians, represented by 18 members in the Munich Hofkapelle between 1787 and 1920, and best known for the celebrated Moralt String Quartet of the 19th century. A great-grandson of Jakob Moralt, who played in the first Moralt Quartet, was the conductor RUDOLF MORALT.

(1) **Adam Moralt** (*b* c1741; *d* Munich, 2 Nov 1811). He was orchestral manager at Mannheim and went with the electoral court when it moved to Munich in 1778. No fewer than seven of his sons joined the Munich Hofkapelle. Through his wife Maria Anna Kramer the family was related to the London musical family Cramer.

(2) **Johann Wilhelm Moralt** (*b* Mannheim, 1774; *d* after 1842). Viola player, son of (1) Adam Moralt. He must have gone to London at an early age; he played a prominent part in English musical life and until 1842 was principal viola player in the Philharmonic Concerts.

(3) **Joseph Moralt** (*b* Schwetzingen, 5 Aug 1775; *d* Munich, 13 Nov 1855). Violinist, son of (1) Adam Moralt. He was a supernumerary member of the Hofkapelle from 1787, soon became an official court musician and was made leader in 1800. With his brothers (4) Johann Baptist Moralt, Philipp (1780–1830) and Georg (1781–1818), whose place was taken at his death by Jakob (1780–1820), he formed a string quartet which from 1800 often gave concerts, even abroad, in Switzerland, France and elsewhere – the first quartet known to have toured. Joseph was one of the founders of the Munich Musical Academy and in its concerts made his mark as a 'fiery and discreet' conductor (Spohr). He also conducted the Italian Opera and from 1827, when he was appointed director of instrumental music at court, the German Opera.

(4) **Johann Baptist Moralt** (*b* Mannheim, 10 March 1777; *d* Munich, 7 Oct 1825). Violinist and composer, son of (1) Adam Moralt. He was a violin pupil of Johann Baptist Geiger and Carl Cannabich. He served the Munich Hofkapelle from 1792 and had been promoted to 'court musician' by 1798. He studied composition with Joseph Grätz and produced a large number of instrumental works, some of which became known outside Munich. In collaboration with colleagues in the court orchestra he also published a collection of violin duets for beginners. His instrumental music belongs to the Mannheim-Munich tradition. Various contributions by J.B. Moralt to the contemporary attempts at reforming church music received recognition.

WORKS

Inst: Concertante, 2 vn (Mainz, n.d.); Sym., E♭ (Bonn, n.d.); Sym., G (Leipzig, n.d.); 2 fl qts (Munich, n.d.); Leçons méthodiques, vn (Mainz, n.d.); Concertante, fl, ob, *D-Mbs*

Vocal: Deutsches Traueramt, 4vv, org (Munich, n.d.); choral pieces in K.A. von Mastiaux: Vollständige Sammlung der besten alten und neuen Melodien (Leipzig and Munich, 1812–19); Deutsche Messe, *Mbs*

(5) **Clementine Moralt** (*b* Munich, 9 Oct 1797; *d* Munich, 7 July 1845). Contralto, daughter of (1) Adam Moralt. She was appointed a court singer in 1818 and from 1820 to 1843 was a contralto at the Munich Hofoper. In 1823 she married the highly esteemed bass Giulio Pellegrini (1806–58).

(6) **Peter Moralt** (*b* Munich, 23 Sept 1814; *d* after 1866). Violinist, grandson of (1) Adam Moralt. From 1828 he was a violinist in the Hofkapelle, was appointed a court musician in 1835 and from 1853 to 1865 acted as a conducting member of the court orchestra. From 1830 to 1840 he led a second Moralt Quartet with his brother August (1811–86) and his cousins (7) Wilhelm Moralt and Anton (1812–83) as partners. After 1840, lengthy concert tours as a soloist took him to north Germany, London, St Petersburg and elsewhere. He retired in 1866.

(7) **Wilhelm Moralt** (*b* Munich, 3 July 1815; *d* Munich, 25 Dec 1874). Violinist, grandson of (1) Adam

Moralt. He was second violin in the younger Moralt Quartet, and gained popularity through his compositions and arrangements for the zither, which were published mostly by Aibl (Munich).

FOLKER GÖTHEL

Moralt, Rudolf (*b* Munich, 26 Feb 1902; *d* Vienna, 16 Dec 1958). German conductor. He was a nephew of Richard Strauss. He studied under Walter Courvoisier and August Schmid-Lindner at the university and Akademie der Tonkunst in Munich, and was engaged as répétiteur at the Munich Staatsoper under Walter and Knappertsbusch (1919–23). He was conductor at the Kaiserslautern Städtische Oper from 1923 to 1928, and musical director at the German Theatre, Brno, from 1932 to 1934. After a brief return to Kaiserslautern he was appointed to Brunswick in 1934 and to Graz in 1937. That year he also made his début in Vienna, where he was chief conductor at the Staatsoper from 1940 until his death. A reliable, unaffected and deeply sympathetic conductor, Moralt was responsible for a high standard of repertory performances at Vienna for almost 20 years, and was profoundly disappointed that none of the eight new productions in the rebuilt Staatsoper's first season in 1955 was assigned to him. Though overshadowed by the more famous conductors of his time, with his sureness of style and excellent baton technique he nevertheless achieved many notable performances, especially of works by Mozart, Wagner, Pfitzner and Richard Strauss. He appeared at the 1952 Salzburg Festival and as guest conductor in many other European cities and in South America. His records include *Don Giovanni*, *Salome* and the first recording of Lehár's *Giuditta*.

GERHARD BRUNNER

Moralt, Sophia. *See* DUSSEK, (5).

Moran, Peter K. (*b* Ireland; *d* New York, 10 Feb 1831). American composer and music dealer of Irish birth. He emigrated from Dublin to the USA with his wife, a singer, in 1817. Both were active in New York's concert life, and their daughter made her début as a singer and pianist in 1820 at the age of five. Moran was organist at Grace Episcopal Church (*c*1823–7), and St John's Chapel (1828–31), as well as for the Handel and Haydn Society in 1820 and for the New York Choral Society's first concert in 1824. He played the cello for the García Opera Company in New York in 1825, performed with the Philharmonic Society, and was concertmaster of the Musical Fund Society. From 1822 to 1823 he ran a piano and music store and published about 25 pieces, including 16 of his own compositions and arrangements.

At least 21 works composed or arranged by Moran were published in Dublin before his emigration. Many of these were reissued in New York, where he was second only to James Hewitt as the city's most prolific composer of piano music. Among the most popular of his works were his song *The Carrier Pigeon* (n.d. [1822]), which he arranged as a rondo for piano (*c*1825), and his variations on *Kinlock of Kinlock* (n.d. [1825]), *Stantz Waltz* (n.d. [?1817]), *Suabian Air* (n.d. [?1817]) and *Swiss Waltz* (n.d. [*c*1810]). He also arranged many traditional airs, and religious works by Handel and others.

J. BUNKER CLARK, EVE R. MEYER

Moran, Robert (Leonard) (*b* Denver, CO, 8 Jan 1937). American composer. He studied 12-note composition privately with Apostel in Vienna (1957–8) and composition at Mills College with Berio and Milhaud (MA 1963); in 1963 he returned to Vienna for private study with Haubenstock-Ramati, who had a strong influence on his early works. At various times between 1959 and 1972 he lived in San Francisco, where he founded and codirected with Howard Hersh the New Music Ensemble at the San Francisco Conservatory. He was composer-in-residence at Portland (Oregon) State University from 1972 to 1974 and at Northwestern University (1977–8), where he also directed the New Music Ensemble. Moran has performed in Europe and throughout the USA as a pianist and is a well-known lecturer on contemporary and avant-garde music. Among his awards are one from the Deutscher Akademischer Austauschdienst for study in Berlin (1974) and two NEA grants (1977, 1979); he has also received many commissions. He collaborated with Helps to produce *Waltzes*, a collection of 25 waltzes for piano, each by a different contemporary composer (1978; first performed with the New Music Ensemble, Chicago, May 1978). In 1984–5 he shared with Glass a residency at the Third Street Music School Settlement in New York, to collaborate on children's works.

Many of Moran's compositions are mixed-media pieces, and even in his other works the musicians often have an added theatrical function. His large-scale 'city pieces' allow the audiences to participate in their realization under his guidance. *39 Minutes for 39 Autos* (San Francisco, 1969) employed a 'potential of 100,000 performers, using auto horns, auto lights, skyscrapers, a TV station, dancers, theater groups, spotlights, and airplanes, besides a small synthesizer ensemble'. *Hallelujah* (1971) required many varied musical forces and the entire city of Bethlehem, Pennsylvania. Two similar works in this series are *Pachelbel Promenade* (Graz, Austria, 1975, commissioned by the Austrian Radio) and *From the Market to Asylum* (Hartford, 1982).

Moran has also composed graphic works for a variety of instruments, specified and unspecified, in which he integrates the roles of composer and performer through improvisation and aleatory techniques; multi-orchestral works (*Emblems of Passage* and *The Eternal Hour*, both 1974, and *Enantiodromia*, 1977); and children's theatre works (*Marktmenagerie*, 1975, and *Es war einmal*, 1976, a mixed-media work for the US Bicentennial). His later mixed-media operas are large-scale performance works that explore controversial subjects: *Erlösung dem Erlöser* is based on the death of Wagner; *Hitler: Geschichten aus der Zukunft* was banned in West Germany.

Moran's diverse influences are reflected in the musical materials used in his compositions; he draws from the

western art music repertory, the 'found art' style of the 1960s and 70s, aleatory techniques and world music. *Rocky Road to Kansas* (1994) features drums from Africa, Morocco and the Middle East, while the *32 Cryptograms for Derek Jarman* (1996) is constructed using the bass line from Dido's lament (from Purcell's opera *Dido and Aeneas*), pitch aggregates determined by the *I Ching* and indeterminate dynamics to be chosen by the conductor and performers.

WORKS

STAGE AND MIXED-MEDIA

(*all texts by Moran unless otherwise stated*)

Let's Build a Nut House (chbr op), 1969; Divertissement no.3: a Lunchbag Opera, paper bags, insts, 1971; Metamenagerie (department store window op), 1974; Durch Wüsten und Wolken, shadow puppets, insts, 1975; Marktmenagerie, children, musique concrète, 1975; Es war einmal (children's show), film, slide projections, musique concrète, 1976; Musik für Haustiere, tape, 1977; Music for Gamelan (incid music), 1978; Am 29. 11. 1780, tape, dancers, 1979; Spin Again (ballet, P. Lamhut), amp hpd(s), elec kbds, 1980; Hitler: Geschichten aus der Zukunft (op), 1981; Erlösung dem Erlöser (music-drama), tape loops, pfmrs, 1982; Chorale Variations: 10 Miles High over Albania (ballet, Lamhut), 8 hps, 1983; The Juniper Tree (children's op, 2, A. Yorinks, after J. and W. Grimm), 1985, collab. P. Glass; Desert of Roses (op), 1992; From the Towers of the Moon (op), 1992; The Dracula Diary (op), 1994; Night Passage (op), 1995; Remember Him to Me: an Opera (G. Stein), men's chorus, pf 4-hands, perc, 1996

City pieces: 39 Minutes for 39 Autos, pfmrs, amp auto hns, visuals, 1969, San Francisco, 1969; Hallelujah, 20 bands, 40 choruses, org, carillon, others, 1971, Bethlehem, PA, 1971; Pachelbel Promenade, gui ens, folk insts, str ens, jazz ens, 1975, Graz, Austria, 1975; From the Market to Asylum, pfmrs, 1982, Hartford, 1982; Music for a Fair, 1984, Yellow Springs, PA, 1984

STEPHEN RUPPENTHAL/DAVID PATTERSON

Morandi [née Merolli], **Rosa (Paolina)** (*b* Senigallia, 15 July 1782; *d* Milan, 6 April/4 May 1824). Italian mezzo-soprano. She studied with Giovanni Morandi (son of the composer Pietro Morandi), whom she married in 1804, the year of her début at Vittoria di Montalboddo (now Ostra). In August 1807 she sang at La Scala in Simon Mayr's cantata *S Napoleone*; the following day she took part in the première of Mayr's *Nè l'un, nè l'altro*. Later she sang Dorabella in *Così fan tutte* and Ghita in Paer's *Camilla*. After appearing in Rome, she created Fanny in Rossini's *La cambiale di matrimonio* in Venice (1810). At the Théâtre Italien, Paris (1813–17), she sang in Pavesi's *Ser Marcantonio*, and in *Le nozze di Figaro*, *Il matrimonio segreto*, *Le cantatrici villane* and *L'italiana in Algeri*. She took part in the first performances of Vaccai's *Malvina* (1816) and Rossini's *Edoardo e Cristina* (1819) at Venice. Returning to La Scala, in 1822 she sang the title role of Rossini's *Matilde di Shabran*, and created Adele in Mercadante's *Adele ed Emerico* and Serafina in Donizetti's *Chiara e Serafina* (1822). She also sang Amenaide in *Tancredi* (1823) and Rossini's *Otello* (1824), not long before her death. Her wide repertory included Paer's *Agnese* and Meyerbeer's *Emma di Resburgo*, but it was her Rossini roles that best displayed the flexibility of her dramatic voice.

ELIZABETH FORBES

Morari, Antonio (*b* Bergamo; *d* Munich, early 1597). Italian violinist and composer active in Germany. He is known to have worked at the Bavarian court at least from 1562, and from 1568 he is regularly listed in the court accounts. His brothers Giovanni Battista and Annibale were also employed there as string players. Several factors indicate the high regard in which he was held at court: a salary sometimes higher than that of the Kapellmeister, Lassus; gifts of money; a large discretionary allowance; extra allowances for a servant and a horse; and many long visits to Italy (doubtless on behalf of the duke). Still more significant were his promotion to the positions of chamber musician and chief instrumentalist and the fact that he was the first Bavarian musician to be designated 'Konzertmeister'; it is to be assumed that in this capacity he directed the instrumentalists, as Lassus did the singers. He retired on full pay in 1583 because of ill-health. He published *Il primo libro de madrigali a quattro voci* (Venice, 1587); there is also one five-part madrigal by him in RISM 1575[11] and another in 1585[17] and two of his motets, one for five voices, the other for six, in 1583[2].

HORST LEUCHTMANN

Morata, Ginés de (*fl* 16th century). Iberian composer. He was *mestre* of the chapel of the Dukes of Bragança in Vila Viçosa, Portugal, probably before 1576. All but one of the four Latin-texted works attributed to him are preserved in manuscripts from that chapel (*P-VV*), while 11 songs (all ed. in MME, viii-ix, 1949–50) and a setting of *Pange lingua* are in *E-Mmc* 6829, which contains the date 1569; a number of motets once existed in manuscript in the library of King João IV. Most of Morata's songs are secular, although *Pues para tan alta prueva* concerns a 'Misa nueva' (the first Mass celebrated by a newly ordained priest). Several of the madrigals feature vivid representation of the text; this is less common in the

villancicos, and some of these and other songs with repetition schemes (such as *Llamo a la muerte* and *Tú me robaste*) are stylistically archaic in comparison with the Italianate madrigals. The opening of the villancico *En el campo me metí* quotes that of Navarro's *Siendo míos, dí, pastora*. Among Morata's liturgical works, the setting of three verses of *Gloria laus et honor* (for Palm Sunday) is composed upon the chant. *Aestimatus sum* (ed. M. Joaquim, *Vinte livros de música polifónica do Paço Ducal de Vila Viçosa*, Lisbon, 1953) and *Sepulto Domino* set parts of the eighth and ninth responsories for Holy Saturday and are linked musically.

OWEN REES

Morata, Juan José Joachín (*b* Geldo, 1769; *d* Valencia, 4 Feb 1840). Spanish composer. He served as a chorister in Segorbe Cathedral; by the time he was 15 he had written music for the church, and he became *maestro de capilla* there in 1786. From 1793 to 1815 he was *maestro de capilla* at Játiva, but returned to his old post in Segorbe in 1815 and remained until 1829, when he became master at the College of Corpus Christi in Valencia. Among his works are nine masses (including a Requiem), nine Lamentations, motets, psalms and 79 villancicos for various festive occasions (mostly in *E-SEG*). Two 19th-century copies of a *Magnificat* and *Beatus vir*, both in five parts, by 'Morata' (*CU*) may also be his works.

ELEANOR RUSSELL

Moratelli, Sebastiano (*b* Vicenza, 1640; *d* Heidelberg, 1706). Italian composer and instrumentalist. He went to Vienna before 1660 and entered the emperor's service as a chamber musician. He was also music master to the Dowager Empress Eleonore and her daughter Maria Anna Josepha. When the archduchess married the future Elector Palatine Johann Wilhelm, he went at the dowager empress's request to the Palatine court at Düsseldorf. He remained a member of the court from 1679 until his death. Correspondence between the elector and the Emperor Leopold I reveals that Moratelli was supplying the court with dramatic music for Carnival by 1681. In November 1685 he accompanied the elector and his wife to Vienna, and he went there again in 1689. He was appointed Kapellmeister not later than 1687. In November 1685 he was described as court chaplain and in 1688 as honorary chaplain to the electress; he was appointed spiritual counsellor to the elector before 1695. Because of ill-health he was increasingly assisted from 1696 by his younger colleague and eventual successor, J.H. von Wilderer. In October 1705 the elector sent him to Heidelberg to recover his health, but he died there. A tenor named Sebastiano Moratelli was a member of the Accademia Filarmonica, Bologna, in 1697. His relationship with the composer is not clear.

Extant documents (in *D-Mbs*, *DÜha* and *KA*) indicate that as a musician Moratelli was highly esteemed by his contemporaries. Rapparini stated that he composed several operas and serenades and praised him above all for the naturalness and expressive power of his recitatives. Only one composition survives, the serenata *La faretra smarrita* (in *D-WINtj*) but on the basis of extant librettos, all by Rapparini, the following operas can certainly be ascribed to him: *Erminia ne' boschi* (December, 1687), *Erminia al campo* (Carnival, 1688), *Didone* (1688), *I giochi olimpici, ovvero Che fingendo si prova un vero affetto* (1694) and *Il fabbro pittore* (1695). He may also have written the festival opera *La gemma Ceraunia* (N. Minato) performed at Heidelberg in 1687.

GERHARD CROLL, SIBYLLE DAHMS/DANIEL BRANDENBURG

Moratori Scanabecchi, Angiola Teresa (*b* Bologna, 1662; *d* Bologna, bur. 19 April 1708). Italian composer and painter. Trained in singing, instrumental performance and painting, she composed at least four oratorios: *Il martirio di S Colomba* (1689), *Li giochi di Sansone* (1694) and *L'Esterre* (1695), all to librettos by Giacomo Antonio Bergamori, were for performance on major feast days at the Oratorio di S Filippo Neri; *Cristo morto* (1696), also set to a text by Bergamori, was performed on Good Friday at the oratory of the Arciconfraternita di S Maria della Morte.

Although Moratori's scores do not survive, it is clear from the librettos (*I-Bc*, Lo.O.1252 and Lo.O.1224) that she would have had to compose recitatives, duets and arias in strophic and *ABA* form. Each libretto highlights the contribution of feminine heroism to Catholic tradition: the virgin martyr S Colomba is supported in her endurance by her mother Teodosia; both Esther and Samson are likened in their strength of purpose to the Virgin (to whom the works are dedicated by the composer); and the Virgin and Mary Magdalene are the principal characters of *Cristo morto*, representing in their responses to Christ's death fortitude and humility respectively.

Moratori married Tomaso Scanabecchi Monetta. Her paintings, admired by contemporaries for their architectural conception and intelligence, can be seen in various churches in Bologna (S Stefano, S Giovanni in Monte and Madonna di Galliera) and Ferrara (S Domenico). She is buried in Madonna di Galliera, Bologna, beneath her own painting of S Tomaso.

SUZANNE G. CUSICK

Moravec, Ivan (*b* Prague, 9 Nov 1930). Czech pianist. He studied in Prague with Grünfeldová, then with Štěpánová-Kurzová (1952–3), and later, at Michelangeli's invitation, at his masterclasses in Arezzo (1957 and 1958). He made his début on Prague Radio in 1946, his London début in 1959, his first American recording in 1962, and his New York début with Szell and the Cleveland Orchestra in 1964. From his first European tour he won praise for his rhythmic precision, clarity of articulation, sonorous tone and cantabile playing. His sense of style and of a work's structure is supported by unusual musicality and power

of expression. His repertory comprises mainly Mozart, Chopin, Debussy, Ravel, Beethoven, Schumann and Brahms's concertos as well as the piano music of Smetana and Dvorák. For his sensitive and personal style of playing, he is considered one of the greatest Chopin interpreters of the 20th century. He has returned to the USA regularly for concerts and recordings and has also played in Canada and Japan. In 1967 he began to teach at the Prague Academy (AMU) and he has given masterclasses in Europe and the USA. His recordings include concertos by Mozart, Beethoven, Brahms and Dvořák, and solo works by Beethoven, Chopin and Brahms.

ALENA NĚMCOVÁ

Moravec, Paul (*b* Buffalo, NY, 2 Nov 1957). American composer. He studied at Harvard (BA 1980) and Columbia (MA 1982, DMA 1987) universities. While still a student, he was awarded the Prix de Rome from the American Academy and spent a year in Italy (1984–5). He has taught theory, harmony, counterpoint and composition at Dartmouth (1987–96) and Hunter (1997–8) colleges and at Adelphi University (from 1987). Other honours include a grant from the Rockefeller Foundation (1993) and the Goddard Lieberson Award in American composition (1991). A prolific composer, he combines a respect for and mastery of traditional formal and harmonic structures with a driving individuality; his style can best be described as a fluent, idiomatic, but unusually intense neo-classicism. Critic Terry Teachout has recognized him as a 'new tonalist', one of a group of composers who are 'neither embarrassed nor paralyzed by tradition. Rather they accept it as a given'. *Northern Lights Electric* (1994) gradually blends a musical illustration of the natural phenomenon of Northern Lights with a musical depiction of electric light. The dramatic cantata *Fire/Ice/Air* (1998) examines the physical and spiritual journeys of Captain Robert Falcon Scott, on his expedition to the Antarctic, and Charles Lindbergh, on his trans-Atlantic flight.

TIM PAGE

Moravia. Region of Central Europe, now part of the CZECH REPUBLIC.

Moravia, Jerome of. *See* HIERONYMUS DE MORAVIA.

Moravians, music of the. The Moravians are members of a Protestant denomination founded in Germany in the 18th century but with roots in 15th-century Bohemia and Moravia. Missionary activity during the 18th century led to the establishment of communities in a number of countries around the world, but most notably in North America, where there continues to be a strong Moravian presence. From the earliest days the Moravian Church kept meticulous records of its ecclesiastical, community and commercial life, and has ensured that active communication and sharing of information has been maintained among the various Moravian centres worldwide. The 10,000 music manuscripts and printed works that survive in American Moravian archives and the substantial collections preserved at Zeist in the Netherlands and at Herrnhut in Germany testify to a highly developed musical culture. These sources include orders of service (from the 1700s onwards); instruction books; an extensive manuscript corpus of 18th- and early 19th-century sacred works in an early Classical style, written mostly by Moravians, for chorus and chamber orchestra; instrumental works, ranging from solo sonatas to symphonies (some of them the sole surviving copies), by European composers; and bound collections of sheet music dating from the mid-19th century onwards. After a discussion of the Moravian Church's origins and its worship services, this article focusses particularly on the musical tradition of the American Moravians.

1. The Ancient Unity. 2. The Renewed Moravian Church. 3. 'Moravian' and other liturgical music. 4. Instrumental music, music education.

1. THE ANCIENT UNITY. Spiritually, the Moravians are descendants of the Czech priest Jan Hus, whose attempts at reform led to his martyrdom in 1415. In 1457 some of his followers founded a church body consecrated to following Christ in simplicity and dedicated living (*see* BOHEMIAN BRETHREN). This newly constituted church, officially called *Jednota bratrská* or *Unitas fratrum* (The Unity of Brethren), developed a rich and orderly ecclesiastical life during the 15th and 16th centuries and also made significant musical and literary contributions to the Protestant movement. What is thought to be their first hymnal was published in 1505 (an earlier *kancionál*, a 'little book of songs', had appeared in Prague in 1501, but it is not certain to what extent the Unity was involved in this publication). A revision of the 1505 hymnal was issued in 1519, edited by the prolific hymn writer Lukáš of Prague (*d* 1528), who is also credited with steering the Unity's course through difficult times of persecution and through theological discourse with Martin Luther and other reformers. Neither hymnal has survived (*see* CANTIONAL, §1).

In 1531 Michael Weisse (*d* 1534), a hymn writer, composer, theologian and pastor, compiled *Gesangbuch der Böhmischen Brüder* for the German congregation of the Unity. During the 16th century Jan Roh (*d* 1547) and Jan Blahoslav (*d* 1571) oversaw the publication of several Czech *kancionály*, and other hymnbooks in Czech appeared frequently throughout the early 17th century. The 1566 *Kirchengesang*, compiled by Petrus Herbert (*d*

1571), contained 343 hymns and an appendix of 106 hymns by Lutheran authors; this hymnal was reprinted in 1590, with later versions in 1606, 1639 and 1661. The first Polish-language hymnal of the Unity appeared in 1554. Bishop J.A. Komenský (Comenius), who is credited with preserving the Unity's rich heritage through his writings, edited the Czech *kancionál* of 1659 and the German *Cantional* of 1661. These hymnals (excluding the 1501 *kancionál*) contained tunes as well as texts; many of the melodies were of popular origin, demonstrating the Unity's emphasis on congregational singing.

Jan Blahoslav's translations of scripture into Czech led to the Unity's production of the Kralice Bible (1579–94). In addition, Blahoslav's *Musica* of 1558 is the earliest known music treatise published in the Czech language. It was followed in 1561 by Jan Josquin's *Muzika*; 'Jan Josquin' may have been a pseudonym for Václav Solín, who collaborated with Blahoslav on the hymnals of 1561 and 1564.

2. THE RENEWED MORAVIAN CHURCH. During the 17th century the persecutions surrounding the Thirty Years War (1618–48) and its aftermath virtually destroyed the Unity. In the 1720s a few exiles of this religious heritage, along with various other seekers after truth, found refuge on an estate of the Saxon nobleman Nikolaus von Zinzendorf (1700–60). In its village of Herrnhut the ancient Moravian Unity experienced a rebirth, culminating on 13 August 1727 in a spiritual blessing, whereby its former diversity of purpose was welded into one. In 1732 the Renewed Moravian Church began to send missionaries afield, first to the West Indies, then during the next two decades to North America (via London, 1734), arriving in Georgia in 1735, Greenland, Suriname, South Africa and Algiers, among other countries. The first permanent American Moravian communities were established in Pennsylvania, beginning with Bethlehem in 1741; others followed in North Carolina, of which Salem (now Winston-Salem) was one of the most important (1766).

According to Zinzendorf and the Moravians of his time, every aspect of daily life, even its most mundane elements, could be regarded as 'liturgical', that is, as a type of worship to be offered to God, after the example of Christ himself. A significant addition to Moravian worship was the introduction in 1728 of the *Losungen* (*Daily Texts*). Originally collections of scripture in manuscript, these texts were first published in 1731 and have subsequently appeared in over 40 languages and dialects. They are used by Moravians throughout the world as a daily devotional guide, either in private worship or in the brief congregational morning or evening services. While the majority of the 18th-century texts were drawn from the scriptures, some also consisted of a hymn stanza or a portion thereof. Hymnody and music as a means of expressing theological truths have always been important within the Moravian Church. Zinzendorf encouraged the development of hymn singing, and in the early days at Herrnhut, when the community did not yet enjoy a large hymn repertory, he conducted singing classes in which the faithful would learn not only the hymns but also something of the life and purpose of the author. A large hymnal was produced in 1735, and many more texts were added in its numerous appendixes; slightly more manageable collections were made in 1754 and 1767. In 1778 the influential hymnbook of C.F. Gregor (1723–1801) appeared, containing 1750 hymns, 308 of them written or reworked by Gregor himself; this book remained in use among the German-speaking congregations for about a century. The hymnal (*Gesang-Buch*) contained texts only but was supplemented by a music book (*Choral-Buch*) in which the tunes were arranged by metre.

Gregor's procedure of recombining and adding to the stanzas of hymns, mixing new and old in creative ways, was central to that most characteristic of Moravian services, the Singstunde. The brother or sister presiding at the service would select individual stanzas from various hymns so that a particular Christian truth could be developed as the singing progressed; the congregation, whose members possessed an unusual command of the hymnal, would join in, singing by heart, before the end of the first line of each stanza. No sermon was necessary. The preface to the 1735 hymnal indicates that rarely, if ever, was a complete hymn of 10 or 20 stanzas used: rather, half and whole stanzas were selected as desired. Moravians took the Singstunde practice with them wherever in the world they formed communities, and such services were held regularly in their churches.

The Singstunde also greatly influenced the structure of two other worship services: the Abendmahl (Holy Communion) and the Liebesmahl (Lovefeast). In the Abendmahl, a form of Singstunde incorporating the sacrament, hymns are sung during the distribution of the elements; selected stanzas focus on themes of redemption, Christ's sacrifice, and the heavenly banquet to be shared by the faithful at the end of time. The non-sacramental Liebesmahl, perhaps the most widely known of the special services, is essentially a Singstunde with a fellowship meal included. Its origins lie in the renewing experience of 13 August 1727, when the assembled company gained spiritual nourishment through the sharing of a simple common meal; the Moravians quickly came to recognize the value of continuing such an experience in the context of worship. By 1756 this service was often the high point of the Church's major festivals. To enrich the sense of celebration the hymn stanzas selected to develop the day's theme would be supplemented by anthems. Apart from hymns, most of the pieces known today as 'Moravian music' are the anthems written for these special services.

3. 'MORAVIAN' AND OTHER LITURGICAL MUSIC. Thousands of vocal works in an early Classical idiom were written by European and American Moravian composers for use in worship (works by non-Moravian composers were also widely used, although their texts were often adapted to make them more appropriate to the specific occasion). In most cases the accompaniment is for organ and orchestra, either strings alone or with paired woodwinds and some brass. A few Moravian anthems have independent organ parts that do not double the other instrumental lines, but in most cases the organ either serves as a continuo instrument or follows the orchestral and vocal lines. Composers such as C.F. Gregor and J.F. Peter (1746–1813) used figured bass extensively in their organ parts, also adopting on occasion a form of numeric shorthand that functioned like a 'figured melody', where numbers placed below the treble staff indicate intervals below the melody line, for example, when the first and second violins move in parallel 3rds or 6ths. Peter, in particular, often included instrumental cues as well as a part or even the whole of the text. Thus, where

they exist, organ parts are an extremely practical performance resource.

The organ was rarely used as the sole instrument of accompaniment, except to support the congregation in hymn singing; and solo organ music is not commonly found in Moravian collections before the late 19th century. Preludes were generally based on chorale tunes, with interludes played between phrases of the chorales. In time the interludes became increasingly ornate and were eventually discarded because they were too liable to distract: the organist's essential purpose was to serve and enable worship, and any sort of behaviour or performance style that attracted attention to him as a soloist was regarded unfavourably. In America the organ builder David Tannenberg (1728–1804) constructed some 50 instruments in Moravian, Lutheran and German Reformed churches; the organ at Lititz, Pennsylvania, is one of the few to have survived.

In addition to choral anthems (SATB, SSAB, double choir), many works were written for solo voice or duet, primarily for sopranos, with orchestral accompaniment. The texts are mostly derived from scripture, but hymns are also set. Both vocal and instrumental parts require able performers, but while the music is neither insignificant nor simplistic, it is also not 'virtuoso' in style, for attention would then be drawn away from the message of the text. Textures are predominantly homophonic rather than contrapuntal, but in passages where the voices rest the instrumental writing can be somewhat more complex. Instrumental introductions, interludes and concluding passages are also common.

Among the most notable and prolific composers of anthems with orchestral accompaniment were C.F. Gregor, J.C. Geisler (1729–1815) and J.L. Freydt (1748–1807). Gregor was influential in assembling festival day 'odes' (also known as 'psalms'), which frequently contained an anthem setting of the *Losung* for the day, often so identified on the manuscript. J.F. Peter (1746–1813) wrote what is perhaps the best known of the festival Liebesmahle, the *Psalm of Joy* celebrating the end of the American Revolutionary War. On 18 June 1783 Alexander Martin, Governor of North Carolina, proclaimed that 4 July 1783 should be a 'day of solemn thanksgiving'. However, the proclamation arrived in Salem only a short time before the appointed day, obliging Peter to craft a service using anthems already in the Salem Congregation's collection, with appropriate hymn texts. Despite its hasty composition, the ode displays a high degree of musical craftsmanship and a striking harmonic and formal coherence. The texts of many other festival Liebesmahle are extant.

The only Moravian composer to achieve renown during his lifetime was C.I. Latrobe (1758–1836), who wrote anthems, solos, multi-movement cantatas and a set of three piano sonatas dedicated to Haydn, whose friend he was in England. Latrobe never worked in America, but a significant number of Moravian composers were active there during the 18th and early 19th centuries. Jeremiah Dencke (1725–95), who went to Bethlehem in 1761, wrote a number of concerted anthems that are considered to be the first such works composed in America, the earliest being a simple piece for chorus, strings and organ for the Bethlehem Provincial Synod in 1766. Other works by Dencke include three sets of sacred songs for soprano, strings and organ. Simon Peter (1743–1819), J.F. Peter's brother, served in Pennsylvania and North Carolina as a minister and teacher; the few surviving works bearing his name indicate a remarkable talent. G.G. Müller (1762–1821) arrived in America in 1784 and served as a minister in Pennsylvania and Ohio. More than 100 anthems were written by J.A. Herbst (1735–1812), whose private collection of some 1000 vocal works by over 60 composers – most of them Moravians – is an unequalled resource for the study of Moravian music. D.M. Michael (1751–1827) served in America from 1795 to 1815, during which time he wrote over a dozen anthems, 14 woodwind suites, two larger 'water music' suites and an extended setting of Psalm ciii for soloists, chorus and orchestra. J.C. Bechler (1784–1857) arrived in America in 1806, where he became one of the first professors at the Moravian Theological Seminary in Bethlehem (founded 1807); his interest in music was lifelong and he is known to have composed some 60 choral and liturgical pieces. Composers who were born in America and received their musical training there include Jacob Van Vleck (1751–1831) and J.C. Till (1762–1844); both of them wrote anthems, hymns and liturgies, and Till was also a prolific copyist. Peter Wolle (1792–1871), a student of Michael and Bechler, edited the first Moravian tune book published in America, *Hymn Tunes Used in the Church of the United Brethren* (1836), and wrote over a dozen anthems and sacred songs.

In the later 19th century, Moravian settlements in America gradually became more 'Americanized', with a language shift from German to English and greater assimilation of contemporary American culture. The number of compositions diminished and the musical style lost some of its distinctiveness, but a number of notable composers were nevertheless active at this time. F.F. Hagen (1815–1907), like so many Moravian composers, spent his professional life primarily as a teacher and pastor; his music reflects 18th-century Moravian roots and shows the influence of 19th-century Romanticism. E.W. Leinbach (1823–1901), who served the North Carolina Moravians as organist and choir director and taught music at Salem Female Academy (now Salem Academy and College), was regarded as the most influential composer in Salem in the second half of the 19th century; his best-known anthem is a double-choir setting of the Hosanna.

Although the earlier German music fell out of favour in American culture during the 19th century, it was nevertheless preserved in the church's archives. In the mid-20th century interest in this rich heritage was revived, and in 1950 the first Early American Moravian Music Festival was held in Bethlehem under the direction of Thor Johnson, who was to conduct the first 11 festivals. The Moravian Music Foundation was established in 1956 to preserve and care for this musical culture.

4. INSTRUMENTAL MUSIC, MUSIC EDUCATION. Moravians encouraged instrumental music as a way to hone skills for playing worship music but also as a harmless pastime to help train the heart, mind and body. While Moravian composers preferred to expend their compositional talents on sacred vocal music, a few wrote instrumental works. In addition, huge numbers of instrumental works were copied for the Collegia Musica in Bethlehem, Nazareth and Lititz in Pennsylvania, and for Salem, North Carolina. The term 'Collegium Musicum' was used to refer to musicians of the community, in whatever venue they were

performing; to judge by the surviving music and instruments, such groups must have been quite versatile. In Nazareth the 'Register of Music Performed in Concert', an impressive document providing a list of music performed in the town between 14 October 1796 and 30 January 1845, indicates that actual 'concerts' took place. (The absence of any specific listings for Bethlehem, Lititz or Salem, however, does not necessarily mean that such performances did not take place outside Nazareth.)

The instrumental music in American Moravian collections ranges from unaccompanied violin sonatas to full late-Classical symphonies and large-scale oratorios. Many works in the Collegia Musica holdings were purchased as printed music, usually quite soon after their publication, and others were copied by Moravians, notably J.F. Peter, whose copying activity greatly benefited all the American Collegia Musica. Of the hundreds of works in these collections, several dozen are currently thought to be the only surviving copies, including two symphonies and two trio sonatas by J.C.F. Bach, three symphonies by Joseph Riepel and several cantatas by J.D. Grimm.

Composers of purely instrumental music include J.F. Peter, John Antes (1740–1811) and D.M. Michael (1751–1827). Among the unique works in the Bethlehem collection is the set of six string quintets that Peter wrote during his years in Salem. The manuscript score and parts bear the date 1789; not only are they Peter's only known instrumental works, they are also among the earliest (if not the earliest) instrumental chamber music to have been composed in America. The three string trios by John Antes were published in London in about 1791. Antes is also known to have written string quartets, but no copy survives. In addition to his 24 sacred vocal works, D.M. Michael wrote 14 woodwind parthien and two larger 'water music' suites, all of them charming and inventive in character.

Brass music played a special role in Moravian settlements, even though the repertory was mostly limited to chorales (pieces written specifically for brass are surprisingly rare in Moravian collections). Moravian brass ensembles – a continuation of the German Stadtpfeifer tradition – announced special services and deaths, welcomed visitors, accompanied hymn singing at outdoor services and funerals and marked events of note throughout the community. For a number of years the trombone choir, consisting of four sizes of instrument, was widely employed; this tradition still persists in Bethlehem, Pennsylvania, and has been revived in other areas. In the later 19th century the ensembles became more diverse, and by the end of the 20th some of the functions formerly performed by brass alone were fulfilled by a full-scale band, including woodwinds, though still playing four-part chorales.

The extensive and varied musical life of Moravian communities was supported and enhanced by musical training in the home and, especially, in the school curriculum. Such training not only embraced hymns and sacred vocal works but also reflected the more popular elements of the surrounding culture. Although the Moravians chose to live apart, they were not completely isolated from, or indeed ignorant of, the world at large. Manuscript books belonging to students and teachers at Moravian schools contain an astonishing variety of genres, from love songs to virtuoso sets of variations; some of the music in these books appeared quite soon after being published elsewhere in the world.

In the late 18th and early 19th centuries the Moravians used a wide range of musical forms, and their legacy, which is preserved to a remarkable degree, represents a significant contribution to American musical culture. Their careful record-keeping provides musicians and scholars with a wealth of information and repertory not available from any other source.

NOLA REED KNOUSE

Moravian Quartet. Czech string quartet. It was active in Brno from 1923 to 1959, and was formed by František Kudláček (*b* Milevsko, 11 May 1894; *d* Brno, 26 Aug 1972) who remained its first violin throughout. The other members who were constant from the mid-1920s were Josef Jedlička, violin, Josef Trkan, viola, and the cellist Josef Křenek. An important ensemble in Moravia, they played many contemporary works as well as the standard repertory, and gave the posthumous première of Janáček's String Quartet no.2 'Intimate Letters' at Brno in 1928, performing it according to the composer's instructions given during rehearsals before his death. The quartet also toured in Germany, Italy and Austria. (J. Vratislavský: *Moravské kvarteto*, Prague, 1961)

ALENA NĚMCOVÁ

Moravská Filharmonie (Moravian PO). Orchestra founded in 1945 in OLOMOUC.

Moravská Ostrava. *See* OSTRAVA.

Morawetz, Oskar (*b* Světlá nad Sázavou, 17 Jan 1917). Canadian composer of Czech birth. In Prague he studied the piano with Karel Hoffmeister and harmony with Kricka. Szell offered him a conducting post at the Prague opera in 1937, however, with the rise of Nazism Morawetz left his homeland. He spent brief periods in Vienna and Paris where he continued his piano studies with Julius Isserlis and Lazare Lévy. In 1940 he settled in Toronto where the rest of his family had relocated. His musical education resumed at the University of Toronto with Leo Smith and Alberto Guerrero. He received the BMus in 1944 with his String Quartet no.1 and the DMus in 1953 with his Symphony no.1. In 1952 he was appointed professor at the University, a post he held until 1982.

Essentially self-taught as a composer Morawetz first achieved recognition by winning a Composers, Authors and Publishers Association of Canada award in 1945 for his String Quartet no.1 (1944) and a second CAPAC award in 1946 for his *Sonata tragica* for piano (1945). Other honours followed. In 1962 his Piano Concerto no.1 was awarded first prize in a competition sponsored by the Montreal SO. The *Sinfonietta* for wind instruments and percussion (1965) won the coveted Critics' Award in the International Competition for Contemporary Music, Cava dei Tireni, Italy in 1966. In 1971 *From the Diary of Anne Frank* received a special award from the Segal Foundation of Montreal 'as the most important contribution to Jewish music in Canada'. He has received the Canada Council's Senior Arts Fellowship three times (1960, 1967, 1974) and in 1987 was the first composer to be named to the Order of Ontario. The following year he was made a Member of the Order of Canada. His Concerto for Harp and Chamber Orchestra won a Juno Award for best Canadian classical composition in 1989.

Stylistically Morawetz has chosen only those aspects of 20th-century compositional techniques that assist him in creating the emotional effects he desires in his music. His compositions are always carefully structured even those initially inspired by a loose programmatic outline. He draws frequently on classical forms, paying careful attention to the recapitulation of materials, but never producing an exact repetition. Rather than emphasizing thematic relationships he uses changes of texture and orchestration to delineate different sections. Organic development through the manipulation of motives on both structural and surface levels of the music has been a constant in his compositional approach.

The works of Morawetz's early period are optimistic in outlook featuring vivacious Slavic rhythms. A mastery of orchestration and polyphonic writing is fully evident in the frequently performed *Carnival Overture* (1945), *Divertimento for Strings* (1948, rev. 1954) and *Overture to a Fairy Tale* (1956). Of his string quartets the Second (1952–5) is the most frequently performed. Its serious tone is a precursor of later dramatic and tragic works. The mysterious opening of the second movement was inspired by war scenes the composer had seen on film. In the dynamic climax of the movement clustered trills are combined with the main themes to indicate menacing military drums. Complex rhythmic patterns and frequent metric changes also make an appearance, stylistic features which remain a constant in the works of the next two decades.

Morawetz's songs project sensitive treatments of his chosen texts as well as accompaniments that reflect a variety of underlying moods. The early song *Mother, I cannot mind my wheel* (1954), uses a rather Schubertian

spinning-wheel motif throughout, while *The Juggler* (Four Songs, 1966) is depicted by means of rhythm in perpetual motion. The expressionistic *From the Diary of Anne Frank* (1970) features a vocal line declaimed partly in recitative and partly in melody. After conducting a performance of the work, Karel Ančerl described it as being one of the most moving compositions he had conducted in the last two decades. Morawetz's dramatic setting of *Psalm xxii* (1979) was also inspired by the suffering inflicted by the Nazi regime during World War II.

Although Morawetz has never written purely virtuosic music for the voice or any other instrument, he has continually sought uniquely effective colours and sonorities for each medium. In the *Sinfonietta for Winds and Percussion* (1965) he exploits the timbral possibilities of different combinations of instruments. Mstislav Rostropovich's request for an 'unusual orchestration' resulted in the *Memorial to Martin Luther King* (1968, rev. 1973), for solo cello, winds, piano and percussion. Written shortly after King's death, this work presents the last two days of his life programmatically. The musical culmination arrives with a funeral march based on King's favourite spiritual *Free at last!*, treated polyphonically with antiphonal orchestration. In the Concerto for Harp and Chamber Orchestra (1975) innovative harp techniques create imaginative timbral effects.

A prominent element of Morawetz's output is a recognition that the past informs the present. As well as using music to comment on contemporary tragedies, later in life Morawetz used music to recognize overtly those composers who had strongly influenced his style. *Tribute to Wolfgang Amadeus Mozart* (1990), based on three themes from Mozart's *Requiem*, and *Improvisation on Inventions [4,5,8,9] by J.S. Bach* (1992) pay homage to his compositional predecessors. These works also reflect the increased economy of means and tendency toward thinner textures common to his later period.

Morawetz's compositions have been recorded by Colombia, RCA Victor, EMI, the Canadian Music Centre (Centrediscs), the CBC and Marquis Classics. In 1984 the CBC issued a 7-record anthology of Morawetz's music.

DORITH R. COOPER/ELAINE KEILLOR

Morawski, Jerzy (Józef) (*b* Warsaw, 9 Sept 1932). Polish musicologist. He studied musicology with Chomiński at Warsaw University (MA 1958) and music at the Chopin High School of Music in Warsaw, obtaining diplomas in theory of music (1957) and piano (1961). In 1970 he took the doctorate at Warsaw University with a thesis on the Cistercian sequences in Poland, and in 1997 completed the *Habilitation* at the Jagiellonian University with a dissertation on liturgical recitative in medieval Poland. From 1956 he has worked at the Institute of Arts of Polish Academy of Sciences in Warsaw, where he was head of the department of the history of music (1970–78), vice-director of the Institute (1978–81), and since then as a reader. His main area of research is music of the Middle Ages, and especially the history of plainsong, the theory of music of the period, palaeography and performing practice. He is also interested in music of the Classical and the early Romantic periods. He is a general editor of the periodical *Musica medii aevi* and the series Monumenta Musicae in Polonia.

ZYGMUNT M. SZWEYKOWSKI

Morawski-Dąbrowa, Eugeniusz (*b* Warsaw, 2 Nov 1876; *d* Warsaw, 23 Oct 1948). Polish composer and teacher. In 1904 he completed his studies at the Warsaw Music Institute as a pupil of Noskowski; he also studied painting.

Exiled by the Russian authorities in 1908, he settled in Paris and continued his education with Gédalge (counterpoint) and Camille Chevillard (orchestration), while studying painting further at the Académie Julien and later at the Académie Colorossi with Bourdelle. He returned to Poland in 1930 as director of the Poznań Academy of Music. After several months he moved to Warsaw and, in 1932, succeeded Szymanowski as director and professor of composition at the conservatory. He held that position until 1939. His music, distinguished by colourful instrumentation and rich harmony, shows the influence of the late Romantics and Debussy. (*PSB* (I. Spóz); *SMP* (J. Prosnak))

Moray, Jerome of. *See* HIERONYMUS DE MORAVIA.

Morceau (Fr.). *See* PIECE.

Mordent. A type of ornament which, in its standard form, consists in the rapid alternation of the main note with a subsidiary note a step below. *See* ORNAMENTS.

Mordkovitch, Lydia (*b* Saratov, 30 April 1944). British violinist of Russian origin. She studied in Kishinyov, at the Stolyarsky School in Odessa 1960–62, with Nezhdanova, and with Oistrakh at the Moscow Conservatory. She was a prizewinner in the National Young Musicians Competition in Kiev (1967) and the Marguerite Long-Jacques Thibaud Competition in Paris (1969), and subsequently appeared as a soloist throughout the USSR. She made her début in Britain in 1979 with the Hallé Orchestra under Susskind and in the USA in 1982 with the Chicago SO under Solti. She gave the first performance of Ami Maayani's Sonata for solo violin, which was dedicated to her, and has made many recordings including acclaimed accounts of concertos by Prokofiev, Shostakovich, Dyson and Moeran, and works for solo violin by Bach and Ysaÿe. She was assistant to Oistrakh at the Moscow Conservatory (1968–70), senior lecturer at the Institute of Arts in Kishinyov (1970–73) and professor at the Academy of Music in Jerusalem (1974–80); she was appointed principal lecturer at the RNCM in 1980 and professor at the RAM in 1995.

MARGARET CAMPBELL

More [Moor], **William** (*b* ?Reading, *c*1490; *d* ?London, ?25 March 1565). English composer and harper. More 'the blynde harp' was appointed to Henry VIII's court from 1 September 1515, his fee of 2d. a day being the lowest listed. 'Blind Dick', another harper already in residence, received 6s. 8d. a month. But More's pay was doubled from May 1516 (as Dick ceased service) and was finally raised to 12d. a day from 30 November 1529. At Shrewsbury in 1520 he was described as 'the principal harper in England'. On 20 November 1539 he was a prisoner in the Tower of London for his part in the affairs of the Abbot of Reading, who had been executed five days before: apparently More had carried letters between the abbots of Reading, Glastonbury and St Botolph's Priory, Colchester. Evidently he was soon released, for no interruption to his wages is recorded. More's name frequently appears among those granted 'rewards' at New Year and other times. In 1550 Lady Petre of Ingatestone, Essex, gave 3s. 4d. 'to Blind More the harper'. He retained his court post to Lady Day 1565, 'at which time he died'.

More's duties at court probably consisted of performing improvised songs and ballads of 'old adventures' in the troubadour tradition, accompanying himself on the harp. But it seems his Catholic faith, evident through his dealings with the abbots and the Petre family, led him to compose motets. Thomas Whythorne copied 'divers songs and sonnets that were made by . . . Mr Moor, the excellent harper' and listed him among the 'Masters of Music'. All that now survives is a four-part textless piece, *Levavi oculos* (*GB-Lbl* Add.30480–4), and a single part of *Ad Dominum contribularem* for five voices (*Lbl* Harl.7578).

ANDREW ASHBEE

Moreau, Fanchon [Françoise] (*b* 1668; *d* after 1743). French soprano. Although Titon du Tillet (*Le Parnasse françois*, 1732) stated that she left the stage about 1708, her name disappears from cast lists in 1702; he added that she was still living in 1743. According to J.-B. Durey de Noinville (*Histoire du théâtre de l'Opéra de l'Académie royale de musique en France*, 1753, 2/1757) she made her début in 1683 in the prologue of Lully's *Phaëton* (probably as Astraea). From 1683 to 1692 (when her older sister Louison left the Opéra) both sisters were entered as 'Mlle Moreau' in cast lists. It is known, however, that it was Fanchon who created the role of Oriane in Lully's *Amadis* (1684) and Sidonie in his *Armide* (1686). Between 1692 and 1702 she appeared in several Lully revivals: as Oriane in *Amadis* (1701), Sangaride in *Atys* (1699), Aegle in *Thésée* (1698), Libya in *Phaëton* (1702) and as Proserpina (1699). She also sang major roles in the first performances at the Paris Opéra of many *préramiste* stage works, among them M.-A. Charpentier's *Médée*, André Campra's *L'Europe galante* and A.C. Destouches' *Issé*. She was a mistress of the dauphin (as was her sister, Louison), and later of Philippe de Vendôme for 20 years. François Couperin's bawdy canon *La femme entre deux draps* names Fanchon as one of the women 'between two sheets'; she was the inspiration for his harpsichord piece 'La tendre Fanchon'.

JAMES R. ANTHONY

Moreau, Henri (*b* Liège, bap. 16 July 1728; *d* Liège, 3 Nov 1803). Flemish composer and theorist. He probably studied at the Collégiale Saint-Paul, whose chapter sent him to Rome; he is listed as 'Enrico Moreau' on the registers of the Collège Liégeois from 1752 to 1756, and, according to Henri Hamal (ed. M. Barthélemy: *Annales*

de la musique et du théâtre à Liège de 1738 à 1806, Liège, 1989), studied under Lustrini and Antonio Aurisicchio. On his return to Liège, the chapter of Saint-Paul named him *maître de chant*. On 20 January 1770 he married Marie-Thérèse Toumson, herself the daughter of a musician. In 1777 the *Gazette de Liège* announced the publication of his *Six trios*. In 1783 Moreau brought out *L'harmonie mise en pratique*, a treatise which in its first ten chapters combines the ideas of Rameau and Tartini while using the vocabulary of J.-J. Rousseau. The subsequent chapters are more concerned with musical style, and deal with ideas current throughout France in the second half of the 18th century; one is a critique of Tartini's theory of dissonance, and another is an account of Eximeno's experiments. Moreau's career was not disrupted by the Revolution, and in 1798 he was made a corresponding member of the Institut National de France, thanks to the help of Grétry, who had been his pupil. He was also chosen as director of a planned music school at Liège, but this project came to nothing, and Moreau made his living from individual lessons and a post as warden for the national estate of Saint-Paul. At the end of his life he wrote a second treatise, *Nouveaux principes d'harmonie selon le système d'Antoine Ximenès* (MS, *B-Lc*, Fonds Terry), in which he openly borrowed the ideas of Rousseau and Grétry. His few surviving compositions reflect his concern with the principles of composition and his passion for theory.

Several other musicians named Moreau were active in the principality of Liège. A man by this name was *duodenus* at Liège Cathedral in 1714. Jean-François Moreau, a violinist, offered his services to the chapter of the Collégiale Sainte-Croix in 1742; he sought a job as first violinist at the Liège Cathedral in 1750 and obtained this post in 1751, but without wages. From 1784 to his death, on 11 October 1792, Jean-François Moreau was a member of the Confrérie Sainte-Cécile. His *Sonates à violon seul et basse continue* op.1 (n.d) were engraved at Liège.

WORKS

Sacred vocal: TeD, Alme chare, Jam de coelo (motet), 3 Tantum ergo, all for 4vv, orch, *B-Lc*, Fonds Terry; 4 motets, 1783, lost

Secular vocal: Hae apontî, vox koitt (cant., Walloon dialect), lv, bc, *Lc* (Fonds Terry)

Inst: 6 trios (Liège, 1777), lost

PHILIPPE VENDRIX

Moreau, Jacob François [Jacobus Franciscus] (*b* ?Flanders, *c*1684; *d* Rotterdam, 9 Oct 1751). Dutch organ builder. His parents probably moved to The Hague around 1692. On 7 September 1724 he married his niece Isabella Philippa de la Haye, daughter of the organ builder Louis de la Haye sr of Ghent, who had then settled in Antwerp. Jacob may have been schooled by his father-in-law in the Flemish organ-building tradition.

Later Moreau moved to Rotterdam. While he is known to have made domestic organs and harpsichords, his most important instruments were church organs, including for the Lutheran church, Middelburg (1717), Brielle (1722), Rotterdam (Oosterkerk, 1723, Grote Kerk, 1722–6), Steenbergen (1725), the Janskerk, Gouda (1732–6; three manuals, 52 stops, extant), Bennebroek (1732), Grote Kerk, Goes (1739), and the Laurenskerk, Rotterdam (1744). Another probable Moreau organ survives in Ezinge (*c*1750). The prestigious contract to build the Gouda instrument was won in 1732 with the recommendation of the famous Rotterdam organist Nicolaas Woordhouder.

Moreau's organ cases and specifications mix typical Dutch styles with some Flemish elements. Several of his one-manual organs are well disposed, sometimes with two reed stops. However, his style of voicing was idiosyncratic and he tended to make pipes of thin metal. G.J. Vogler compared Müller's organ in Haarlem and Moreau's organ in Gouda to two women: the first was 'belle, superbe, fière'; the latter (which he preferred) was 'douce, aimable, traitable'. The frontage of the Gouda instrument, which has no divided pipe fields, was designed by the painter Hendrik Carré jr, and was based on the Duyschot organ in the Nieuwe Kerk, The Hague. The instrument underwent complex modernisations during the 19th century, mainly to endow it with greater power.

Moreau's work was continued by his son Johannes (Jan) Jacobus (bap. 16 Oct 1729; *d* after 1764) and his nephew Louis de la Haye jr. The firm added a *Bovenwerk* to the organ of the Waalse Kerk, Rotterdam, in 1758 (case now in Numansdorp) and a forte/piano coupler to the Gouda organ in 1752. New organs were built for the Engelse Presbyteriaanse Kerk, Rotterdam (1754; now in Gameren), and for several small Catholic hiding churches including Oosterhout (1753; now in the Dutch Reform church, Oosterhout), Breda and Kralingen (*c*1760; case only survives). In 1764 Johannes moved to Middelburg and neglected the organs in Rotterdam, resulting in the loss of all maintenance contracts there. Louis de la Haye continued the workshop and built a few organs, including Bergen op Zoom (1771) and the Waalse Kerk, Gouda (1772; now in Moordrecht).

HANS KLOTZ/ADRI DE GROOT

Moreau, Jean-Baptiste (*b* Angers, ?1656; *d* Paris, 24 Aug 1733). French composer. He may have been related to the singer Denis Moreau, an acquaintance of Desmarest. Moreau is thought to have been a choirboy at Angers Cathedral; he had links with the Dandrieu family who were originally of Angers. After a time in Paris he became *maître de musique* at Langres Cathedral from September 1681 to February 1682; Montéclair sang in the choir at this time while it was under Moreau's direction. Moreau is next heard of in Paris in January 1687, when a *Te Deum* by him (now lost) was sung at Saint Cosme in thanksgiving for Louis XIV's recovery from illness. He obtained his first royal commission, for the divertissement *Les bergers de Marly*, in March 1688 just as Louis was organizing work at the school for young noblewomen founded in 1682 by Mme de Maintenon and established

at Saint-Cyr in 1686. The king invited him to provide music for the school and it is in this connection that he achieved his most lasting fame, particularly in collaboration with Racine. Moreau set Racine's *Esther* in 1689; the performance of the latter was attended by the king, Moreau receiving a royal pension as a result of his appreciation, and a gratuity from Mme de Maintenon. In addition to *Esther*, they produced *Athalie* for Saint-Cyr in 1691. The music for *Athalie* was engraved by Baussen, suggesting that Moreau may have been close to the Guise circle.

Moreau seems to have been very unstable both professionally and in his social life and he was removed from his post at Saint-Cyr in the years following the writing of *Athalie*. He was appointed *surintendant* of music for Languedoc in November 1692 (in succession to André Mallet) and he held the post until January 1706. Moreau's fall from favour was probably the result of his own bad conduct and his friendship with the poet Alexandre Laînez (some of whose poems evoke the dissolute life of the musician as a pleasure-seeker and heavy drinker). Laînez, known for his libertine verse at the time, persuaded Moreau to write music for his cantatille *Zaïre*. In 1694 Moreau was asked to provide music for Racine's *Cantiques spirituels* (perhaps by Racine himself) and he sang these works at the sick king's bedside. This episode confirms that Moreau was a singer, but it is probably his namesake Denis Moreau who sang in Lorenzani's *Orontée* and Desmarest's *Didon*.

In spite of his distance from Saint-Cyr, Moreau wrote another work for the school, the *intermèdes* to *Jonathas*, in 1699 or 1700; the texts were by Joseph-François Duché de Vancy, with whom Moreau at least began the Spanish voyage, accompanying the future Philip V to the Spanish border, in December 1700. Moreau was appointed *maître de musique* at Béziers Cathedral in December 1704, but left his post in March 1705 without taking part in the wedding of his daughter Agathe to André Mallet's son. Moreau's disastrous financial situation and a request made by him to the Bishop of Agde are alluded to in a letter from Mme de Maintenon to Cardinal de Noailles dated September 1705, in which she intercedes for Moreau. From 1706 all trace of him is lost. Titon du Tillet states that at the end of his life Moreau obtained a post at St Sulpice, no doubt with the support of the establishment at Saint-Cyr and of the organist Nicolas Clérambault. Some of the manuscripts of the music for *Athalie* contain revisions, probably added by the composer himself around 1725, which shows that he was in touch with Saint-Cyr again at the end of his life.

According to Titon, Moreau was considered in his own day an exceptionally fine teacher of both composition and singing; his composition students included Montéclair, Clérambault and Dandrieu. Singers whom he taught included his daughter Marie-Claude and Louise Couperin. The music to *Esther*, *Athalie* and *Jonathas* consist of a series of solos and choruses, notable for their simplicity and careful word-setting. His *Cantiques* are much shorter, but the individual movements, for solo voices and unison female chorus, are longer. His treatise *L'art mélodique* is lost, but is known to have demanded rhythmic and melodic finesse.

WORKS

Edition: *Musique des choeurs d'Esther et d'Athalie et des cantiques spirituels*, Oeuvres de J. Racine, ed. P. Mesnard, ix (Paris, 1873)

3 intermèdes: Choeurs de la tragédie d'Esther (J. Racine) (Paris, 1689, 2/1696); La musique d'Athalie (J. Racine) (Paris, 1691); Jonathas (Duché de Vancy), 1699/1700, *F-Pn*, *V*

3 divertissements: Les bergers de Marly, March 1688, lost; Le feu de joye pour Monseigneur le duc de Bretagne, extracts in *F-V*; Divertissement pour l'ermitage de Franchard (A. Laînez), perf. Versailles, extract in *V*

Zaïre (Laînez), cantatille, Fontainebleau, lost

[4] Cantiques spirituels (Racine), solo vv, unison chorus [no.4 by M.-R. de Lalande]; pubd as Cantiques chantez devant le roy (Paris, 1695, 2/1699); no.3 ed. C. MacClintock, The Solo Song, 1580–1730 (New York, 1973)

La fable entre mille plaisirs (Laînez), chanson, *Le Mercure de France*, March 1725

Idylle sur la naissance de Notre-Seigneur Jésus-Christ, *Pn*, *V*

Requiem, lost; Te Deum, 1687, lost, announced in *Le Mercure galant*, Feb 1687; In exitu Israel, lost, announced in *Le Mercure galant*, June 1691

EDITH BORROFF/ANNE PIÉJUS

Moreau, Simon (*fl* 1553–8). Composer, presumably active in Antwerp or the vicinity. He is known only for seven motets and one chanson published in collections by Susato, Waelrant and Laet and Phalèse between 1553 and 1558. His motets are typical Netherlandish works for five and six imitative voices while the chanson, *Ung jour advint*, is in a syllabic, almost patter style, with paired imitative voices. In addition, the five-voice chanson *Vous seulement*, transmitted uniquely in the Lerma codex and attributed to 'Simon Morea', may also be by him (Elders). This work, also highly imitative, is based on a short ostinato taken from the opening phrase of Josquin's *Adieu mes amours*, which is stated ten times beginning alternately on G and D with some rhythmic variations.

KRISTINE K. FORNEY

Morecock, Robert (*b* 1511/12; *d* 15 June 1582). English church musician and composer. He was clerk of the choir and master of the choristers at the London parish churches of St Mary Woolnoth (1542–5) and St Michael Cornhill (1547–9), where he was described in 1548 as a good singer aged 36. By May 1551 he had become a Gentleman of the Chapel Royal, and he retained this position until his death. He is a more plausible candidate than THOMAS MERICOCKE for identification with the 'mr. moorecocke' whose three-part setting of *Gloria, laus et honor*, the hymn sung in the Sarum Use during the procession before Mass on Palm Sunday, is in *GB-Lbl* R.M.24.d.2.

ROGER BOWERS

Moreira, Airto (Guimorva) [Airto] (*b* Itaiópolis, Brazil, 5 Aug 1941). Brazilian jazz percussionist. Between the ages of seven and ten he played the tambourine and sang on the radio in Brazil, then at 16 he moved to São Paulo and began playing with jazz groups. He formed the group Quarteto Novo with the pianist and flautist Hermeto Pascoal and began combining percussion instruments with a drum set. After moving to New York in 1970 he joined the Miles Davis band, appearing on the albums *Live at the Fillmore* and *Live-Evil* (both 1970, Col.). He played on the first Weather Report album in 1971 and then he and his wife, the singer Flora Purim, joined Chick Corea's original Return to Forever band, appearing on such albums as *Light As a Feather* (1972, Pol.). He then started his own band and released albums on a variety of labels, and also appeared on albums by Purim, Eumir Deodato, Paul Simon, Milton Nascimento, George Duke, Joe Farrell, Mickey Hart and Al DiMeola. In 1990 he and Purim formed the band Fourth World. Airto had such an impact on jazz in the 1970s that the magazine *Down Beat* added a percussion category to its Readers' Poll after he won the Miscellaneous Instrument category several years in a row. As opposed to the Afro-Cuban style of percussion often featured in jazz groups, the Brazilian approach that he brought to American jazz was more improvisational and less pattern-oriented, with emphasis on colour as well as rhythm. In addition to traditional tambourines and shakers, he also introduced Brazilian instruments such as the *berimbau*, *surdo* and *cuíca* to jazz.

RICK MATTINGLY

Moreira, António Leal (*b* Abrantes, 30 June 1758; *d* Lisbon, 26 Nov 1819). Portuguese composer. On 30 June 1766 he entered the Seminário da Patriarcal in Lisbon, where he was a pupil of João de Sousa Carvalho and where he became an assistant teacher in 1775, as well as organist, and *mestre de capela* in 1787. On 19 May 1777 his *Missa do Espírito Santo* was sung at the acclamation of Queen Maria I, and on 8 August of that year he was admitted as a member of the musicians' union of Lisbon, the Irmandade de S Cecília. Most of his sacred works were composed for the royal chapel and from 1782 onwards serenatas by Moreira were performed at the royal palaces of Queluz and Ajuda.

In 1790 he took the post of musical director at the Teatro de Rua dos Condes, where the production of Italian operas was briefly resumed after a 15-year interval. Three years later *Il natale augusto* was performed at the palace of the financier Anselmo José da Cruz Sobral in Lisbon by a cast which included Luísa Todi, who travelled from Madrid for the event, and five singers of the royal chapel. Also in 1793 Moreira became the first musical director of the newly opened Teatro de S Carlos, where some of his own operas and farces on Portuguese texts, including *A vingança da cigana* (1794), were performed. In 1799 he left the S Carlos, where he was replaced by his brother-in-law, Marcos António Portugal, and by Francesco Federici. In the following year he wrote the music for the pasticcio opera *Il disertore francese*, which was performed at the Teatro Carignano in Turin and at La Scala. From then on he devoted himself almost exclusively to church music. Later he had a brief but distinguished military career during the Peninsular Wars.

In a report written at the time of his death Moreira was praised for the punctuality, probity and interest with which he had performed his duties as a teacher at the Patriarcal for 44 years. Although heavily influenced by Paisiello and Cimarosa, Moreira's stage and sacred works are among the most solidly constructed and technically competent Portuguese masterpieces. After António Teixeira he was the first to compose stage works with Portuguese texts, although the majority of his works are in Italian. In *A vingança da cigana* several numbers are written in a popular, national or even exotic vein. This is the case with Cazumba's song, accompanied on the *canzá*, a Brazilian rattle or scraper, and Pepa's *modinha*.

WORKS

STAGE

first performed in Lisbon, MSS in P-La, unless otherwise stated

dm – dramma per musica

Bireno ed Olimpia (serenata, G. Martinelli), Queluz Palace, 21 Aug 1782
Siface e Sofonisba (dm da cantarsi, 1, Martinelli), Queluz Palace, 5 July 1783
L'imenei di Delfo (drama lírico alegórico, Martinelli), Ajuda Palace, 28 March 1785
Ascanio in Alba (dm da cantarsi, 2, C.N. Stampa), Queluz Palace, 5 July 1785
Ester (orat, Martinelli), Ajuda Palace, 19 March 1786
Artemisia, regina di Caria (dm da cantarsi, 1, Martinelli), Ajuda Palace, 17 Dec 1787
Gli eroi spartani (dm, 1, Martinelli), Ribeira Palace, 21 Aug 1788
Gli affetti del genio lusitano (dm da cantarsi, 2, Martinelli), Real Casa Pia do Castelo de S Jorge, 1 Sept 1789
Il puro omaggio (dm, 3 scenes, Martinelli), Rua dos Condes, 13 May 1791, only lib extant
Il natale augusto (dm, 2, Martinelli), palace of A.J. da Cruz Sobral, 29 April 1793, only lib extant
A saloia enamorada, ou O remédio é casar (farsa, 1, D. Caldas Barbosa), S Carlos, 1793, score lost, 1 aria, *P-Ln*
A vingança da cigana (drama joco-sério, 1, Caldas Barbosa), S Carlos, 1794, *Ln*
L'eroina lusitana (dm, 2, Martinelli), S Carlos, 21 March 1795
Music to: Il disertore francese (ob), Turin, Carignano, carn. 1800, *VV* (with Port. text)
Arias for Gazzaniga: Il serraglio d'Osmano, *VV*

OTHER WORKS

Sacred: 5 villancicos, 1779, *P-EVp*; 4 masses, 2 Mag, 11 sets of responsories, psalms, matins, *La*; other sacred works, *D-HVs*, *MÜS*, *P-EVc*, *La*, *Lc*, *Lf*, *Ln*, *Mp*, *VV*
Other vocal: Moda de Zambumba, 3vv, pf acc., in *Jornal de modinhas*, xxxii (1792/*R* (Lisbon, 1996))
Instrumental: Sinfonia, D, 2 orch, 1793, ed. in *The Symphony 1720–1840*, ser. F V (New York, 1983) *La*; Sinfonia, B♭, 1803, *La*, *Ln*; Sinfonia, D, 1805, *Ln*, *VV*; Sinfonia, 6 org, *Mp*

MANUEL CARLOS DE BRITO, ROBERT STEVENSON

Moreira Sá e Costa, Leonilde. Portuguese pianist, wife of Luis Costa. *See* COSTA (i), (18).

Morel. A number of musicians of this name were active in England, France and the Netherlands in the 16th century. There is no evidence that they were related to each other or to the French composer Clement Morel.

A composer called Morel (*fl* ?*c*1543–70), probably of Dutch origin, may have been in England in the service of Henry Fitzalan, Earl of Arundel. One of his chansons, *Bon jour bon an*, appears in an Arundel manuscript (*GB-Lbl* Roy.App.49–54), and another manuscript (*Lbl* Roy.8.G.VII) contains a puzzle canon, *Honi soit quil mal y pense*, with an inscription: 'Morel viro praeclarissimo domino comiti de Arundell'. In the British Library copy of Susato's *L'unziesme livre contenant 29 chansons* (RISM 1549^{29}), the chanson *Content ou non il fault* is ascribed to Clement Morel in the three lower parts but is anonymous in the superius partbook. A 16th-century scribe has added 'Morel ex familia excellen comtis d'arundell' to the superius and has erased the first name from the other partbooks. A similar emendation appears in the chanson *Vivions, vivons joyeusement* in the British Library copy of Phalèse's *Premier livre des chansons* (RISM 1554^{22}) which formerly belonged to Arundel. This not only suggests that Morel was employed there, but also raises the possibility that some chansons in continental publications are misattributed to Clement Morel.

Jenin Morel, a Netherlander, was a singer in Charles V's chapel from 1518 to 1521. Jean Morel was listed as a 'basse-contre' in the chapel of Philip II of Spain in 1561, described as 'newly arrived from Flanders'. His name reappears in the Spanish court records of 1566 and 1572. Nicholas (or Nicolas) Morel (*b* Rouen, ?*c*1550) was *maître des enfants de choeur* at Rouen Cathedral. In 1584 at the Puy de Musique at Evreux he received a silver lyre for his chanson *Je porte en mon bouquet*; two years later he was awarded a silver lute for his *D'ou vient belle*. Both these works are now lost. FétisB Vander StraetenMPB, i, vii, viii.

JANE A. BERNSTEIN

Morel, Clement [Clemens] (*fl* Nevers, 1534–52). French composer. In 1552 he was *maître des enfants* in Nevers and declined an invitation to the Ste Chapelle, Bourges. His first chanson appeared anonymously at Paris in 1534 but was ascribed to him in another of Attaingnant's anthologies 12 years later. 13 more chansons by him were included in Attaingnant's second series (1536–49); the rest were printed by Du Chemin, Susato, and Phalèse. Most of his settings are courtly poems with decasyllabic lines by François I and his generation (e.g. Marot, Fontaine), set for four voices in the style of Sermisy, Sandrin and the contemporary Parisian school; he respected the prosody and generally preferred homophony enlivened with a few imitative entries. His motets (published at Lyons, Paris, Antwerp and Nuremberg) are more consistently polyphonic.

An eight-voice canon and six-voice chanson copied in manuscripts connected with Henry Fitzalan, Earl of Arundel (*GB-Lbl* Roy.8.G.vii, *Lbl* Roy.App.49–54) are attributed to 'Morel', but may be the work of a different composer. A Nicolas Morel, *maître des enfants* at Rouen Cathedral, won prizes for his chansons at the Puy d'Evreux in 1584 and 1586.

WORKS

4 motets, 4vv, 1539^{11}, 1551^{1}, 1553^{5} (1 also attrib. S. Moreau)
18 chansons, 4vv, 1534^{13}, 1536^{4}, 1536^{5}, 1540^{11}, 1543^{8}, 1546^{14}, 1549^{20}, 1549^{21}, 1549^{29}, 1552^{4}, 1554^{22}, 1557^{11}; 1 ed. in PÄMw, xxiii (1899/*R*), 2 ed. in RRMR, xxxviii (1981)

FRANK DOBBINS

Morel, François (d'Assise) (*b* Montreal, 14 March 1926). Canadian composer. He studied with Champagne at the Conservatoire de Musique du Québec à Montréal (1944–53). Unlike many of his contemporaries who continued their training in Paris, Morel remained in Montreal, though his contacts with Varèse in New York in 1958 were decisive. During that same year he helped to found the association Musique de Notre Temps for the promotion of contemporary music and began to work as a composer for the CBC (composing incidental music, popular songs, etc.), a position he held until his appointment to Laval University in 1979. He also founded the Ensemble Bois et Cuivres du Québec. His honours include the rank of Chevalier in the Order of Quebec (1994) and the Quebec prize (1996). His concert works, almost all instrumental, can be divided into three phases: the first culminated with *L'étoile noire* for orchestra (1962), which also marked his development towards the second, a period characterized by greater individuality, restraint and attention to organization; *Départs* (1969) and *Radiance* (1971–2) initiated the third phase, a period of greater maturity.

Several works of Morel's first period show the influence of Champagne, who advised him to liberate himself only gradually from his chosen models. The orchestral *Esquisse* (1947), for example, was inspired by Debussy's *Images*, the *Quatre chants japonais* (1949) are reminiscent of Ravel, and the rhythmic experiments of the String Quartet no.1 (1952) were influenced by Bartók and Stravinsky. In *Antiphonie* for orchestra (1953) he used a *Salve regina* plainsong to give continuity to the music, treating it in an austere modal style that owes something to Messiaen. His spatial manipulation of the relatively static theme, however, shows that he was already moving in a direction that would be encouraged by Varèse. The impact of Varèse on Morel's style is demonstrated most obviously in *Boréal* for orchestra (1959) and *Nuvattuq* for flute (1967); it also led to the composition of *L'étoile noire* (1962).

During his second period, Morel explored dodecaphonic principles and Varèsian ensembles of wind and/or percussion instruments. *L'étoile noire* derives its 12-note series from Beethoven's op.135; the Second String Quartet (1963) is constructed on a mirror series based on the B–A–C–H motif; the Sinfonia for jazz band (1963) also uses a mirror series; and *Nuvattuq* (1967) is built on two series, one a permutation of the other. The 1967 work, *Prismes-anamorphoses*, is notable for its alternation of strict sections, based on a series made up entirely of tones and semitones, and freer, often non-serial, passages. Morel's third period saw a continued subordination of serial organization in favour of motivic refinement. With *Radiance* (1971–2), which derives a serial rhythmic

structure from the intervals of the pitch set, he returned to writing for full orchestra after a gap of 10 years. Works composed after 1980 exhibit great lyricism and a mastery of orchestration.

WORKS
(*selective list*)

Orch: Esquisse, small orch, 1947; Antiphonie, 1953; Boréal, 1959; Rituel de l'espace, 1959; L'étoile noire, 1962; Départs, 12 str, hp, gui, 2 perc, 1969; Iikkii, 18 insts, 1971; Radiance, 1971–2; Jeux, 1976; Melisma, pf, orch, 1980; De subitement lointain, 1989; Die Stelle des Zwillinge, 1992; Et le crepuscole se trouva libre, 1996; Metamorphoses, 1998

Wind/brass ens: Symphonies pour cuivres, brass, perc, 1956; Le mythe de la roche percée, wind, perc, 1961; Sinfonia, jazz band, 1963; Requiem, wind, hp, cel, perc, 1966; Neues d'espace et reliefs, wind, hp, cel, perc, 1967; Prismes-anamorphoses, wind, hp, cel, pf, perc, 1967; Aux marges du silence, band, 1982; Aerea, wind, perc, 1986; Aus couleurs du ciel, band, 1987; Les voix de l'ombre, wind, perc, 1987; Lumières sculptées (Litanies de la réconciliation), wind, 3 perc, 1992

Chbr: Dyptique, 1948–54; Str Qt no.1, 1952; Cassation, 7 wind, 1954; Spirale, wind, hp, cel, perc, 1956; Rythmologue, 8/6 perc, 1957, rev. 1970; Brass Qnt, 1962; Str Qt no.2, 1963; Etude en forme de toccate, 2 perc, 1965; L'oiseau-demain, 12 fl, 2 cl, 3 perc, 1982; Divergences, vn, gui, 1983; Talea, fl, ob, cl, 1984; Fulgurance I, fl, va, hn, vc, pf + cel, hp, 2 perc, 1986; Lyre de crystal, 6 perc, 1986; Doulet I–II, 2 fl, 1982–8; Figures-Segments-Ellipses, cl qnt, 1990; Fulgurances II, 13 insts, 1990; Paysage dépaysé, 2 vn, va, 2 vc, 1990; Distance intime, fl, pf, 1991; Les éphémères, 4 hn, tuba, 1995

Solo inst: Ronde enfantine, pf, 1949; 2 études de sonorité, pf, 1954; Prière, org, 1954; Nuvattuq, fl, 1967; Alléluia, org, 1968; Me duele España, gui, 1975, rev. 1977; Stèle, cl, 1991; Ekleipsis, mar, 1993; Imaginaire, gui, 1996

Songs (S, pf): 4 chants japonais, 1949; Les rivages perdus (W. Lemoine), 1954

Principal publishers: Berandol, CMC, Jaymar, Ricordi, Doberman-Yppan, Quebec

LYSE RICHER/MARIE-THÉRÈSE LEFEBVRE

Morel, Jacques (*fl c*1700–49). French viol player and composer. He was a pupil of Marin Marais, to whom he dedicated his *1er livre de pièces de violle* (*c*1710/*R*). In these four suites for seven-string bass viol he adopted Marais' signs for bowing and ornamentation, though his suites are generally simpler than those of Marais. They are printed in score, 'pour la commodité de ceux qui voudront les jouër sur le clavecin'. He also published a setting in French of the *Te Deum* (Paris, 1706), dedicated to the Duke of Aumont, and a volume of solo cantatas entitled *Les Thuilleries* (Paris, 1717). He may be 'Le Sieur Morel, former organist at Soissons', whose book of pieces for the pardessus de viole was announced in the *Mercure de France* (December 1749). The description of these works as 'pièces ajustées au pardessus à cinq cordes' suggests that they may have been pieces for bass viol adapted for the fashionable five-string pardessus. In 1730 his privilege to publish 'des pièces de viole et autres pièces de musique' was renewed and his *1er livre* was probably reprinted at that time (see Clérambault's copy, *F-Pn* Rés.856, in which several alterations were made, including the removal of the date in the privilege).

Three other musicians of the name Morel have been confused with Jacques. Antoine Morel, a *basse-taille* singer, was at the royal chapel in 1669 and later at the Opéra, where he created two Lully roles (Arcas in *Thésée*, 1675; Indien Chantant in *Le triomphe de l'amour*, 1681). Another Morel (first name unknown, called 'de la Ferronerie') was active in Paris from about 1696 to about 1739; several of his chansons appeared in the *Mercure de France*, 1727–39, and other vocal pieces were issued in Ballard's *Recueils* or survive in manuscript (*F-Pn*, *GB-Lbl*). A harpsichord maker called Morel lived in the rue Quincampoix in Paris in the 1770s.

MARY CYR

Morel, Jean (*b* Abbeville, 10 Jan 1903; *d* New York, 14 April 1975). French conductor and teacher. In Paris he studied the piano with Isidore Philipp, theory with Noël Gallon, music history with Maurice Emmanuel, composition with Gabriel Pierné, and the lyric repertory with Reynaldo Hahn. From 1921 to 1936 he taught at the American Conservatory in Fontainebleau. During this period he also conducted a variety of French orchestras, but both the educational side of his work and the American link were to bear the more evident fruit. From 1940 to 1943, having moved to the USA, he taught at Brooklyn College, but it was in his dual capacity, 1949–71, as a teacher at the Juilliard School, New York, and as conductor of the Juilliard Orchestra that he wielded his strongest influence on a generation of American students, including Levine, Mester and Slatkin. He conducted opera in Rio de Janeiro and Mexico and at the New York City Center Opera Company, and also, from 1956, at the Metropolitan Opera.

BERNARD JACOBSON

Morel [Scibona], **Jorge** (*b* Buenos Aires, 9 May 1931). Argentine guitarist and composer. His early guitar studies were with his father (from the age of seven) and with Pablo Escobar (from 1945) at the Academy of Music in Buenos Aires. After graduating he often joined Escobar in radio and live performances. He made his radio début in 1955, and live concert débuts in New York (Carnegie Hall) in 1961 and in Buenos Aires (Teatro Odeon) in 1968, before studying with Rudolf Schramm in New York for some years from 1969 and becoming a professor at Lehman College, CUNY. Morel's recordings, including *The Warm Guitar* (1961), *The Artistry of Jorge Morel* (1968) and *Jorge Morel Plays Broadway* (1982), have mainly featured his solo arrangements of Broadway musicals by Bernstein and Gershwin, and film music classics. The exception is his *Virtuoso South American Guitar* (1981), which features his own compositions (primarily single-movement works incorporating South American dance rhythms such as *Malambo*, *Cancion*, *Choro* and *Danza Brazilera*), for which Morel is best known. These works have been performed and recorded by a number of contemporary guitarists, including Angel Romero, Jason Vieaux, Susan McDonald, Steven Novacek and Eliot Fisk.

THOMAS F. HECK

Morelia. City in Mexico. It was founded in 1541 by Viceroy Mendoza as Valladolid and was renamed Morelia in 1828. In 1580 the Cathedral of Michoacán was moved to Valladolid from Pátzcuaro, where it had been from 1540. Pátzcuaro was the largest centre of instrument making (recorders, shawms, trumpets and bells) in 16th-century Mexico, and at a Corpus Christi procession in 1556 the earliest extant *zarabanda* was sung there. The first virtuoso Indian organists mentioned by name in a colonial Mexican imprint were a father and son who were cathedral organists at Pátzcuaro in 1567 and at Valladolid after 1602 respectively. Juan Matinez Navarro was *maestro de capilla* in Valladolid in 1626, and Matheo de Quicoces in 1636. In 1625 the *tiple* Juan de Ortega (who enrolled as a soprano in 1608) rose to become *maestro* of plainchant and polyphony. Antonio de Mora (*d* 1668) was followed as *maestro de capilla* by Alonso de Vargas, active until at least 1683. Morelia Cathedral, dedicated in 1705, was built between 1660 and 1744, and in the 18th century the leading *maestro de capilla* was José Gavino Leal, active from 1732 to 1768. The Colegio de S Rosa de S María founded for poor girls in 1738 flourished as a music school from 1756 to about 1857 when it was suppressed by anticlericalists; it has an archive containing not only works by Gavino Leal but also by Gregorio Remacha (dated 1738–60), Manuel de Zendexas (1758, 1763), Cayetano de Perea (1771), Francisco Javier Ortiz de Alcalá (1754, 1768, 1776) and other local musicians. Overtures by Rodil and Sarrier indicate a high level of instrumental performance at the college around 1780. Elízaga, a child prodigy born in 1786 at Valladolid and trained there from 1795 to 1799 by the eminent cathedral organist José María Carrasco, was later patronized by the Emperor Iturbide and his wife, both of whom were natives of the town.

The Teatro de Ocampo, constructed in 1828–9, was rebuilt in 1869–70 and inaugurated with a brilliant vocal and instrumental concert on 15 September 1870. Leading 19th-century Morelia musicians included the organist Ramón Martínez Avilés, the composer of sacred music Benito Ortiz, the internationally acclaimed writer of popular music Miguel Lerdo de Tejada (1869–1944) and the military band director Encarnación Payén. Miguel Bernal Jiménez, the most widely known Morelia composer, organist and scholar of the 20th century, studied with Ignacio Mier Arriaga in the Escuela Popular de Bellas Artes de la Universidad Michoacana (founded in about 1920). In 1957 Alfonso Vega Núñez became director of the school; he was also cathedral organist and arranged international organ festivals for many years. Other important 20th-century figures are the composer Bonifacio Rojas (*b* 1921), founder of the Morelia SO (1961) and sometime director of both the Conservatorio de las Rosas (refounded in 1939) and the Escuela de Música Sagrada, and Rubén Valencia Cortés, a teacher in both institutions whose technical accomplishments and innovative tendencies made him Bernal Jiménez's most highly regarded local successor. Roberto Medina, born in Morelia in 1955, made his reputation in Mexico City. From 1939 to 1956 a valuable sacred music quarterly, *Schola cantorum*, was published at Morelia. The Niños Cantores of Morelia was a boys' choir that toured extensively in the USA and Europe in the 1950s. From 1988 the annual Festival Internacional de Música de Morelia has provided a forum for the city's chief musical organizations. In 1994 Luis Jaime Cortez (*b* 1960) was appointed director of the Las Rosas Conservatory, and in this capacity has infused new musical life into the area.

ROBERT STEVENSON

Morell, Thomas (*b* Eton, 18 March 1703; *d* Turnham Green, Middx, 19 Feb 1784). English classicist, clergyman, author and librettist. He studied at Eton College and King's College, Cambridge. He was ordained in 1725, and graduated BA in 1726, MA in 1730 and DD in 1743. His church appointments were as curate at Twickenham, rector of Buckland, Hertfordshire (a college living), chaplain to the Portsmouth garrison and sub-curate of Kew; at Kew he was mortified to be replaced in Queen Caroline's regard and as preacher by the ignorant 'thresher poet' Stephen Duck, whose verse he had praised. He never prospered, which, according to one contemporary, was because he kept low company, especially with musicians, and was irremediably improvident. But he was respected as a scholar and held in affection by his friends, who included James Thomson, David Garrick and William Hogarth (he contributed to Hogarth's aesthetic treatise, *The Analysis of Beauty*, London, 1753). Living at Twickenham gave him contact also with the Burlington family and with Frederick, Prince of Wales, to whose patriot opposition cause Morell attached himself as early as 1731 with some deft verses in the *Gentleman's Magazine*. At Queen Caroline's suggestion he wrote a commentary on John Locke's *Essay on Human Understanding* (published posthumously, in 1794). In 1738 he became a Fellow of the Society of Antiquaries and in 1768 its assistant secretary and a Fellow of the Royal Society. He edited and translated plays by Aeschylus, Sophocles and Euripides, translated Seneca's epistles, produced a lexicon of Greek prosody that remained in use into the 19th century, and, aged 70, revised Ainsworth's Latin dictionary. A letter in the archives of King's College on Sophocles's versification proves his sensitivity to metrical variation and other details of aural effect. As his manuscript verses show, Morell was a lifelong natural versifier, practising a wide range of styles and moods and engaging with political issues of his time. His religious verse publications contribute to the contemporary defence of orthodox Christianity against freethinking and shed interesting light on his oratorio librettos for Handel. According to his own account of their collaboration (printed by Deutsch), Morell began writing for Handel in response to a request from the composer backed by the Prince of Wales. He provided the librettos for *Judas Maccabaeus* (dedicated to the Duke of Cumberland in celebration of his suppression of the 1745 rebellion), *Alexander Balus*, *Theodora*, *Jephtha* and possibly the

new text required for *The Triumph of Time and Truth*. Handel bequeathed him £200. He subsequently confected oratorio librettos to existing music by the composer, *Nabal* (1764) and *Gideon* (1769). He was reputedly a good organist, and his portrait (1762) by his friend Hogarth, capturing his raffish liveliness, depicts an organ as background (reproduced in J. Simon, ed.: *Handel: A Celebration of his Life and Times*, London, 1985, p.211). Morell's manuscripts in the British Library include his commonplace-book (Add.28846) and annotations in Greek and English copies of the New Testament (3006.t.6, 1219.m.3).

RUTH SMITH

Morellati [Morellato], **Paolo** (*b* Vicenza, 2 May 1740; *d* Vicenza, 17 Feb 1807). Italian keyboard instrument maker and composer. He studied first in Vicenza with Andrea Bottelli, then in Bologna with Martini from April 1762 to November 1763; his counterpoint exercises and 43 of his letters to Martini are extant (in *I-Bc*). In October 1763 he was admitted to the Accademia Filarmonica. From 1768 until his death he was organist at Vicenza Cathedral.

Morellati was known primarily as a maker of harpsichords and pianos; only a few of his compositions (mainly those from the period of his study with Martini) seem to be extant (in *I-Bc* and *I-VId*). Morellati constructed a piano with a new kind of hammer mechanism (an escapement action) and described it in a letter published in the *Giornale enciclopedico* (vii, July 1775) and the *Antologia di Roma* (xli, 1780, pp.324–7). Sacchi wrote that in 1775 Morellati gave an excellent harpsichord he had made to Farinelli, who in turn presented it to the Duke of Parma. There are unconfirmed reports that Morellati collaborated with the Erards as well as with English and German piano makers, and that he declined the offer of a position in London. A fine portrait of him with one of his keyboards, by Gaetano Scabari, is in the Civico Museo Bibliografico Musicale, Bologna.

He was the father of Pietro Morellati, who succeeded him as organist at Vicenza Cathedral in 1807, and Stefano Morellati (1772–94), a double bass player, who studied with Dragonetti and succeeded him in the Eretenio theatre orchestra at Vicenza.

HOWARD BROFSKY

Morelli, Cesare (*fl* late 1660s–1686). Italian singer, lutenist and composer of Flemish origin. He was taught music in Rome. After visiting England he spent four years in the service of a Portuguese nobleman in Lisbon where he was discovered in 1673 by Thomas Hill, a merchant friend of Samuel Pepys. On Hill's recommendation, Pepys took him into his service, and Morelli eventually arrived in London in April 1675. Pepys was highly impressed with his abilities, commenting that 'he is a thorough-bred scholar, and may be the greatest master of music of any we have'. His Catholicism, however, proved a great burden to Pepys during the persecution of Catholics in London in 1678, and consequently Morelli was forced to spend most of his time in the country. He nevertheless was able to teach Pepys to play the guitar (publishing a tutor, *A Table to the Guitar*, n.p., 1680), and he kept him supplied with songs until, in 1682, he returned to Flanders. Four years later he unsuccessfully asked Pepys to try to get him a place in James II's Catholic chapel, after which he is not heard of again. The songs that he wrote out for Pepys, which survive in four volumes (*GB-Cmc* Pepys 2591 and 2802–4), are for bass (to suit Pepys's voice) with simple tablature accompaniment. They include some by Morelli himself, among them a recitative setting of 'To be, or not to be', as well as arrangements of operatic arias by Carissimi, Cesti, G.B. Draghi, Lully, Reggio and Stradella. His other known works are a lute piece (in *J-Tn* n-4/42) and a duet which is included in a folio of Italian arias in the Royal Music Library (*GB-Lbl* RM 23.f.4).

ROGER SHORT

Morena [Meyer], **Berta** (*b* Mannheim, 27 Jan 1878; *d* Rottach-Egern, Tegernsee, 7 Oct 1952). German soprano. She studied in Munich with Sophie Röhr-Brajnin and Aglaja Orgeni, and made her début in 1898 at the Munich Hofoper as Agathe (*Der Freischütz*). She remained with the company until her farewell in 1927, being especially admired in Wagner roles. She made her Metropolitan début in 1908 as Sieglinde and later sang Elisabeth, Leonore, Brünnhilde and Santuzza there. When she appeared at Covent Garden in 1914, as Isolde, Sieglinde and Kundry, she was praised more as an actress (she was a woman of great beauty and distinctive stage presence) than as a singer.

HAROLD ROSENTHAL/R

Morendo (It.: 'dying'; gerund of *morire*). A word used in musical scores as an instruction to die away gradually, characteristically found at the end of a section, as for instance at the end of the slow movement in Beethoven's String Quartet op.74. It is particularly common in Verdi's work. *Smorzando* has a similar meaning but is less strongly confined to the ends of sections; *al niente* ('to nothing'), *diluendo* and CALANDO also appear. Koch (*Musikalisches Lexikon*, 1802) gave an entry under 'Moriente' (the present participle of *morire*).

DAVID FALLOWS

Moreno, Antonio Martín. *See* MARTÍN-MORENO, ANTONIO.

Moreno (Sánchez), Joan-Anton (*b* Granada, 1953). Spanish composer. He trained at the Barcelona Conservatory, and went on to study composition with Brncic and Vaggione, and the application of computer techniques to electro-acoustic music with Lluís Callejo. He took part in the 12th and 13th Manuel de Falla competitions in Granada, and attended composition seminars at the Miró Foundation in Barcelona, the New Music one-day seminars in Sitges, the 1st GME Composition seminar in Cuenca and the International Contemporary Music Competition in Darmstadt. He collaborated with the Phonos electro-acoustic music studio in Barcelona. His compositions have figured in the programmes of international concert cycles and festivals specializing in contemporary music, and have been broadcast on the main national radio channels.

Moreno's music has its origins in the encounter of two very disparate worlds: the fundamental western musical tradition and the theories of electro-acoustic composition. In some ways his attitude towards composition may be defined by his complete lack of preconceived ideas and by his search for new ways of organizing sound. (*68 compositors catalans* Barcelona, 1989)

F. TAVERNA-BECH

Moreno (Andrade), Segundo Luis (*b* Cotacachi, Ecuador, 3 Aug 1882; *d* Quito, 18 Nov 1972). Ecuadorian musicologist, composer and educationist. His early educational and musical experiences were confined to Cotacachi until he entered the National Conservatory of Music in Quito in October 1906. There his principal teacher, Dominico Brescia, persuaded him to begin collecting and studying the indigenous music of his own country. From 1915 until 1937 Moreno was a band director in the Ecuadorian army, a post which caused him to be stationed in various parts of Ecuador thus giving him the opportunity of learning the musical traditions of the Indians in many provinces.

Moreno was director of the conservatories in Cuenca (1937–40) and in Guayaquil (1940–45). The musical examples and descriptions of ceremonies which appear in Moreno's musicological writings are particularly important since they often constitute the only surviving records of these indigenous practices.

CHARLES SIGMUND

Moreno-Buendía, Manuel (*b* Murcia, 25 March 1932). Spanish composer. He studied composition at the Madrid Conservatory with Julio Gómez and Conrado del Campo. In 1955 he was appointed a teacher of solfège and theory at the Madrid Conservatory. The following year he went to Italy to study composition and conducting at the Accademia Musicale Chigiana, Siena, and in 1957, composition at the Venice Conservatory. He was a founder-member of the Grupo Nueva Música (1958), whose members aim to develop their aesthetic in synchrony with the rest of Europe. He was co-ordinating director of the Escuela Superior de Canto in Madrid (from 1970) and musical director of the Compañía Lírica Titular of the Teatro de la Zarzuela in Madrid (1970–81). In 1980 he was appointed professor of harmony at the Madrid Conservatory and became its deputy director in 1981.

Moreno-Buendía has won many prizes, among them the Samuel Ros Prize (1955) for his Piano Quartet, the National Music Prize (1958) for his *Suite concertante* for harp and orchestra and the first prize for polyphonic music at the 1968 Torrevieja competition for *Dos canciones amatorias*.

His orchestral works up to and including the Concerto in F minor (1997) all reflect a solid training in the post-nationalist tradition. He is the author of two lyrico-musical dramas of international acclaim, *Los vagabundos* (1977, with text by Joaquín Deus based on the novel by Maxim Gorki) and *Fuenteovejuna* (1981, with text by José Luis Martín Descalzo after Lope de Vega), and also of the ballet *Eterna Castilla* (1965), whose première outside Spain took place at La Scala, Milan, and which has toured the world.

WORKS

(*selective list*)

Dramatic: Carolina (comedia musical, 2, E. Barber), 1963; El sueño de unos locos de verano (comedia musical, 2, J.L. Coll, V. Uve and M. Ruzi Castillo), 1964; Eterna Castilla (ballet, 1, V. Vila Belda), 1965; El embrujado (incid music, R.M. Valle Inclán), 1969; Ligazón (incid music, Valle Inclán), 1969; La isla de los sueños posibles (comedia musical infantiles, 2, G.L. Bueno), 1970; Los vagabundos (drama lírico-musical, 2, J. Deus, after M. Gorki), 1977; Antonio y Cleopatra (incid music, E. Llovet, after W. Shakespeare), 1980; La cena del Rey Baltasar (auto sacramental, 1, P. Calderón de la Barca), 1981; Fuenteovejuna (drama lírico-musical, 2, J.L. Martín Descalzo, after L. de Vega), 1981

Choral: 2 canciones amatorias (J. del Encina), mixed chorus, 1968; Por el mar (I. Pareja), T, mixed chorus, 1971

Orch: Suite concertante, hp, orch, 1958; Danzas sinfónicas españolas, 1986 [based on Eterna Castilla (ballet)]; Concierto del buen amor, gui, orch, 1992; Concierto neoclásico, hp, mar, str, 1994; Concerto, f, eng hn, orch, 1997 [orch of sonata by C. Yvón]
Chbr: Concertino, ww insts, 1955; Pf Qt, 1955; Suite popular española, fl, va, hp, 1985; Phonos, 3 tpt, 2 hn, 2 trbn, tuba, 1987

MARTA CURESES

Moreno Gans, José (*b* Algemesí, Valencia, 3 March 1897; *d* Buxia, La Coruña, 26 Aug 1976). Spanish composer. He studied harmony and composition with del Campo at the Madrid Conservatory and then, under a grant from the Fundación Conde de Cartagena, continued his studies in Paris, Vienna and Berlin. In 1928 he won the National Music Prize for *Pinceladas goyescas*, a brilliantly orchestrated work in which he attempted to depict impressions of different streets painted by Goya. He won the prize for a second time in 1943 with the Violin Sonata in F minor. Among his other works are the *Sinfonia de estampas levantinas*, a Symphony in A major for small orchestra, a Piano Concerto, a String Quartet in D major and a Piano Sonata in C major.

ANTONIO RUIZ-PIPÓ

Moreno Polo [Moreno y Polo; Moreno, Polo]. Spanish family of musicians.

(1) (Pedro) José Moreno Polo (*b* La Hoz de la Vieja, Teruel, 17 July 1708; *d* Madrid, bur. 23 Sept 1774). Organist and composer. He studied music in Zaragoza and became second organist of the cathedral of La Seo in 1729. He was then second organist at Nuestra Señora del Pilar (*c*1740) and organist at the parish church of S Pablo Apóstol (1742–3) and at the Santuario de Nuestra Señora del Portillo (1749–51). On 4 May 1751 he was appointed *maestro de capilla* at Albarracín Cathedral, a post he held until the following year, during which time he was probably ordained priest. In 1752 he sat the public examination for the post of first organist at Pamplona Cathedral. Despite coming top in composition he was not appointed. In 1757 he became fourth organist at the royal chapel in Madrid (a post that had been suppressed since 1749) with the task, according to Mitjana, of accompanying the choir of 18 voices who sang plainchant. In 1768, after José Nebra's death, he was promoted to third organist, and remained there for the rest of his life. He continued to be held in high esteem years after his death, as revealed in the eulogies dedicated to him in 1781 by Juan de Sessé y Balaguer, second organist at the chapel.

It has not always been possible to attribute accurately works ascribed simply to 'Moreno'. Latassa attributed to José Moreno 100 sonatas and other keyboard works whose whereabouts are presently unknown. The three sonatas edited by Preciado, probably intended for organ, each comprise a single movement. The movements are bipartite and monothematic but include characteristics of the *galant* style.

WORKS

Vocal: Mass, 5vv, insts, Casa Parroquial, Laguardia, Spain; Dixit insipiens, *E-Sc*; Iudica me Domine, *Sc*; De brillante hermosura, aria, *Asa*; Rasgóse ya la esfera, recit and aria, 1750, *ALB*; 3 villancicos: Ah de los montes, Aves y flores, Vaya pastores, 1750–51, *ALB*
Kbd: 3 sonatas, ?Archivo Parroquial, Valderrobres, ed. in Preciado; Obra llena, ?lost, cited in Preciado

(2) Juan (Domingo) Moreno Polo (*b* La Hoz de la Vieja, bap. 2 Feb 1711; *d* Tortosa, 2 June 1776). Organist and composer, brother of (1) José and (3) Valero Moreno Polo. He entered Zaragoza Cathedral as a chorister in December 1719 and in 1730 applied, unsuccessfully, for the vacant post of organist. On 3 August 1731 he was appointed organist at Tortosa Cathedral, where he remained for over 45 years until his death; because of illness, however, from 1774 his place was taken by the second organist Salvador Aicart. During his time at Tortosa Cathedral he was ordained priest, and his younger brother, Valero, was appointed *maestro de capilla* there from 1743. Some of his keyboard works are written in fugal style, while his sonatas have *galant* characteristics. According to Pedrell, his works also contain a high degree of melodic invention and harmonic daring.

WORKS

? Lost: Versos para órgano para el Himno del Espíritu Santo, cited by Saldoni; sonatinas, cited by Mitjana

(3) Valero Moreno Polo (*fl* 1739–76). Composer and *maestro de capilla*, younger brother of (1) José and (2) Juan Moreno Polo. From 10 September 1743 he was *maestro de capilla* for at least 33 years at Tortosa Cathedral, where his brother Juan was organist. A *Miserere* and sequence, *Summi regis cor*, survive at Roncesvalles and a Christmas villancico, *Cómo es el niño que nace*, dated 1739, at Albarracín. He may also have composed a group of pieces, originally from Tortosa Cathedral (now in *E-Bbc*), attributed by Pedrell to his brothers Juan or José.

MARÍA GEMBERO USTÁRROZ

Moreno Torroba, Federico (*b* Madrid, 3 March 1891; *d* Madrid, 12 Sept 1982). Spanish composer, conductor and critic. He first studied music with his father, José Moreno Ballesteros, an organist and teacher at the Madrid Conservatory, and with whom he collaborated on his first zarzuela, *Las decididas* (1912). He later studied composition with Conrado del Campo at the Royal Conservatory, where his tone poem *La ajorca de oro* was first performed in 1918. In 1924 he married Pilar Larregla, the daughter of a Navarrese composer; the folk music of Navarra along with that of Castile was to serve as a major source of inspiration in his music. Although not a guitarist himself, in the 1920s his growing friendship with Segovia inspired him to begin writing for the guitar, and the resulting compositions such as *Sonatina* (1924) and *Piezas características* (1931) are among his finest works. He also established himself as a composer for the stage, and his zarzuela *La mesonera de Tordesillas* was first performed to critical acclaim in 1925, while his most famous zarzuela, *Luisa Fernanda* (1932), is a representative of the last flowering of the *zarzuela grande*. Between 1925 and 1935 he was active as a music critic for Madrid periodicals, especially *Informaciones*, and used this position and his brief term in the Second Republic's five-member Junta Nacional de Música to promote greater government support for music.

With the outbreak of the Civil War in 1936, Moreno Torroba retreated to Navarra with his family, avoiding involvement in the conflict. With the ascendancy of Franco he became one of the dominant figures in Spanish music, along with Turina and Rodrigo. Rejecting the European avant garde, they embraced a conservative nationalist aesthetic that was accepted in the new political environment. In 1946 he formed a zarzuela company that toured the Americas for two seasons (he had directed productions of his zarzuelas in Buenos Aires annually since 1934). In the 1950s Moreno Torroba's satirical zarzuela *Bienvenido, Mister Dolar* (1954) reflected the growing political and military cooperation between the USA and Spain along with the influx of American capital and culture, while *María Manuela* (1957) became his most popular zarzuela of the decade.

His output diminished as the public appeal of the zarzuela waned in the 1960s and his own work became increasingly seen as dated. Consequently, he devoted more time to conducting and recording, returning several times to Latin America to conduct performances of his own works. He continued to compose for the guitar, however, writing the *Concierto de Castilla* (1960) for Segovia, *Homenaje a la seguidilla* (1962) and *Diálogos entre guitarra y orquesta* (1977), among the best of his concertos. The two books of *Castillos de España* (1970 and 1978) for solo guitar are among his most notable successes in that genre. Among his last works is his second opera *El poeta*, first performed in 1980 with Plácido Domingo.

Moreno Torroba was a major figure in Spanish music of the 20th century who flourished despite the political and social upheavals that surrounded him. His music has often been described as '*castizo*', employing elements of folk and art music which are of distinctly Spanish 'pure cast'. A nationalist, he believed that fidelity to Spain's heritage, rather than imitation of foreign models, would lead to the universality of Spanish music. His musical palette was not limited to strict folklorism, and he acknowledged a wider musical influence through the works of Debussy, Ravel, Franck, Wagner and, in later years, Bartók. His accessible, lyrical style maintains a strong sense of tonality through the use of conventional forms while judiciously employing extended triadic harmonies, modality, remote modulations and colourful orchestration. His zarzuelas also draw upon expressly regional motifs and references to traditional and contemporary urban culture.

Moreno Torroba held many prominent positions including Comisario del Teatro Zarzuela, director of the Compañía Lírica and, from 1974, president of the Sociedad General de Autores de España, through which he served as a cultural diplomat. He was elected as the director of the Academia de Bellas Artes de S Fernando in 1978, and died four years later at the age of 91.

WORKS

STAGE

La virgen de mayo (op, 1, P. Max and F. Luque), Madrid, Real, 14 Feb 1925

El poeta (op, 4, J. Méndez Herrera), Madrid, Zarzuela, 19 June 1980

WALTER AARON CLARK, WILLIAM CRAIG KRAUSE

Morera (i Viura), Enric [Enrique] (*b* Barcelona, 22 May 1865; *d* Barcelona, 12 March 1942). Catalan composer. From 1866 he lived with his family in Córdoba, Argentina, where his father worked as a musician. At the age of 18 he returned to Barcelona to study the piano with Isaac Albéniz (who dedicated his *Córdoba* to him) and Carlos Gumersindo Vidiella, and harmony with Felippe Pedrell. In 1885 Moreva moved to Brussels, where he stayed for five years. Here he studied privately with Fiévez and Gilson. In 1890 he returned to Barcelona, where he was received in avant-garde circles as a revolutionary. The Sociedad Catalana de Conciertos gave first performances of his *Introducció a l'Atlàntida* (1892) and his *Dansa de gnoms* (1893). He founded the Catalunya Nova choral society (1895), which he conducted until the early 1900s, and began composing stage works such as *Les monges de Sant Aimant* (1895) and *La fada*, first performed at the Festa Moderna initiated by the painter and poet Santiago Rusiñol (1897). In 1901 he formed the Teatre Líric Català company, which performed plays with incidental music, *quadros líric* (short, single-scene operas) and other short pieces of comic music theatre. Despite its failure, he directed the lyric section of the Graner Espectacles-Audicions in the Teatro Principal, Barcelona (1905–8), offering music, drama, cinema and other entertainments. In 1909 he went back to Argentina, where the president commissioned him to write a hymn commemorating the centenary of Argentine independence (1910). He returned to Barcelona in 1911 and was appointed deputy director of the Escuela Municipal de Musica (retired 1935). He was professor of harmony there and he taught some of the great Catalan composers, such as Pahissa and Montsalvatge.

Although Morera continued to write for the concert hall, his real passion was the stage, for which he composed about 50 works, operas and zarzuelas, most of them in Catalan. Some, like *Don Joan de Serrallonga*, were very popular with the Barcelona public. He also wrote some of the most famous sardanas for brass band, such as *La santa espina* (from the opera of that name), *L'empordà*, *Les fulles seques*, *Festa major* and *La sardana de les monges*. He has always been considered one of the greatest representatives of 20th-century popular Catalan music.

WORKS
(*selective list*)

STAGE WORKS
in Catalan, and first performance in Barcelona, unless otherwise stated

Ops: La boja (A. Guimerà), 1894, ?unperf.; Les monges de Sant Aimant (Guimerà), 1895; La fada (1, J. Massó i Torrents), Sitges, Prado, sum. 1897; Emporium (3, E. Marquina), Liceo, 20 Jan 1906; Bruniselda (3, Puigdolles y Mací and A. Masriera), Liceo, 21 April 1906; Titaina (2, Guimerà), Liceu, 17 Jan 1912; Tassarba (1, J. Vallmitjana), Liceo, 18 Jan 1916; Don Joan de Serrallonga (3, Sagarra), 1922; La santa espina

Zars: El tío Juan (1, C. Fernández Shaw), 1902, collab. R. Chapí; Su alteza imperial (3, S. Delgado), 14 March 1903, collab. A. Vives; La canción del náufrago (3, C. Arniches and Fernández Shaw), Madrid, Price, Feb. 1903 [in Sp.]; La vuelta de Pierrot (A. Gual), 1904 [in Sp.]; Nit de trons (1, J. Benapres), sum. 1904; Los cortesanos de Farsalia (R. Nogueras Oller), Madrid 1905 [in Sp.]; La Paula en té unes mitges [El maco dels encats] (2, L. Planas de Taverne), Victoria, 8 Oct 1924

Quadros líric (all in 1 act; first perf. at the Teatre Tivoli unless otherwise stated): L'alegría que passa (S. Rusiñol), 1898, 12 Jan 1901; Les caramelles (I. Iglésias), 12 Jan 1901 [in Sp. as Caramellas, Madrid, Apolo, 13 March 1902]; La reina del cor (Iglésias), 15 Jan 1901; La Rosons (A. Mestres), 28 Jan 1901; L'adoració dels pastors (C. Verdaguer), 1 Feb 1901; L'aligot (C. Capdevila), 1901; Cigales i formigues (Rusiñol), 20 Feb 1901; El firaire (J. Orpinell), 1901; Rondalla (A. Capmany), 1901; Villa blanca (J. Llopart), 1901; La barca (Mestres), Principal, 26 Sept 1903; La nit de l'amor (Rusiñol), Intim, 20 Jan 1905

OTHER VOCAL

Sardanas (for chorus): Lo cançó dels catalans (Sagarra), 6 mixed vv; L'empordà (J. Maragall); La font de l'Albera (Pons-Violet), 5 mixed vv, pf; Les fulles seques (Guimerà), 5 mixed vv; Les neus

que es fonen (Guimerà); La santa espina (Guimerà), 4 mixed vv/6 mixed vv; La sardana de les monges (Guimerà)

Other choral: Himno conmemorativo del centenario de la independencia de Argentina, 1910; Ave Maria, S, 6 mixed vv, org; La bandera (E. Guanyabens), 4 male vv, 4 mixed vv; Himne de l'arbre fruiter (Maragall), T, 4 male vv; La marsellesa (Iglésias), 5 mixed vv; Missa de rèquiem en honor del Gran Rei en Jaume el Conqueridor, 4 male vv; El poema de la nit i el dia i de la terra i de l'amor (Llongueras), 6 mixed vv; Salve Regina, 4 mixed vv

Solo vocal: Cançons de carrer (J.M. de Sagarra), 1v, pf/gui; Enterro (Guanyabens), 1v, pf; Serenata, 1v, pf; Sonata, 1v, pf; other songs, 1v, inst acc.

Arrs. (all trad. songs): Bon caçador, 4 mixed vv; El comte Arnau, 5 mixed vv, children's chorus; La mare de Déu, 6 mixed vv, hmn; Muntanyes del Canigó, 4 mixed vv; Sant Ramon, 4 mixed vv; Sota de l'om, 4 mixed vv; El testament d'Amèlia, 4 mixed vv

INSTRUMENTAL

Orch: Dansa de gnoms, 1893; Introducció a l'Atlántida, sym. poem, 1893; Vc Conc., 1917; Poema de la nit i del dia, 1919; Confidència; Enterro; Festa major, sardana; Indíbil i mandoni; Serra amunt; Somni; Traïdoria

XOSÉ AVIÑOA

Morera, Francisco (*b* Villa de San Mateo, Castellón, 4 April 1731; *d* Valencia, 19 Oct 1793). Spanish composer. In 1741 he became a chorister at Valencia Cathedral, where he remained until on 15 June 1753 he was made acting organist at the Colegio del Patriarca in the same city; his appointment was made permanent on 7 June 1755, by which time he had composed 'many works, which on being sung were warmly applauded'. In 1757 he competed for the post of choirmaster at the cathedral, which was awarded to Pascual Fuentes. Later that year he went as organist to Castellón, and in April 1758 he was appointed choirmaster at Cuenca Cathedral. Finally, on 18 July 1768, on the strength of his reputation and without the usual competition, he was appointed to the same post at Valencia Cathedral, where he remained until his retirement in July 1793, three months before his death. His music includes many masses, a Requiem, psalms and other Latin works as well as 217 Spanish villancicos (mostly in *E-VAc* and *CU*; also *MO*, *VAcp*).

JOSÉ LÓPEZ-CALO

Moresca [morisca] (It.: 'Moorish'; Sp. *morisca*). (1) A dance of exotic character which occurred widely in Europe during the Renaissance. Generally there was a Moorish element in the costumes or action; the dance often took the form of a stylized battle between Moors and Christians, reminiscent of the medieval wars in Spain. Certain recurring features of the *moresca*, however, are apparently of more ancient origin. Blackening of the face, bells attached to costumes, the presence of a fool (sometimes a man disguised as a woman) and the swordplay element itself have been traced back by Sachs and others to primitive fertility rites. The English morris dance – a variety of the *moresca* encountered as early as the 14th century – displays many of these features.

In the latter part of the 15th century *moresche* were danced in carnival processions and (especially in Italy) in *intermedi* between the acts of courtly dramatic entertainments. Although the dance is mentioned frequently in such connections, no detailed choreographic descriptions from this period have been preserved. Some indication of the character of the *moresca* can be obtained from contemporary sculptures and paintings; for instance, ten statuettes carved by Erasmus Grasser in 1480 for the Tanzsaal of the town hall at Munich, and now in the Stadtmuseum, Munich, clearly convey the grotesque, whirling movement of the dance. In the courtly sphere the *moresca* seems to have been performed mostly by professional dancers, to the accompaniment of pipes and tabors (see illustration).

Musical sources for the *moresca* are not plentiful, and those that exist do not conform to one rhythmic type. There are a few 16th-century German examples, of which the earliest is Johann Weck's *Tancz der schwarcz Knab* followed by its *Hopp Tancz* (both in triple time) in Hans Kotter's keyboard tablature of 1513–32 (*CH-Bu* F.IX.22; printed in Merian). Arbeau in *Orchésographie* (1588) recounted having seen in his youth 'la dance des Morisques' performed as a solo dance by a young man with the usual blackened face, and bells attached to his legs. Arbeau described the *moresca* as in 'mesure binaire',

Moresca: engraving by Israhel van Meckenem (ii), second half of the 15th century

and he gave for it the tune shown in ex.1. A version of this tune had already appeared in Susato's *Het derde*

Ex.1 Arbeau: Air de la Morisque, *Orchésographie*, f.94*v*

musyck boexken (Antwerp, 1551) among the basses danses, with the title 'La Morisque'. The Susato/Arbeau melody is loosely related to 'The Morris', a tune occurring with many variations in English sources from the 1590s onwards, and doubtless associated with village morris dancing over the next three centuries: Cecil Sharp noted parallels with Arbeau's tune and steps in what he encountered in England about 1900. 'The Kinges Morisck', in *Parthenia inviolata* (no.1) and the Fitzwilliam Virginal Book (no.247), was on the other hand probably masque music originally, perhaps for Beaumont's *Masque of the Inner Temple* (1613; see Ward, p.314). It is a miniature medley of five strains, with an echo of ex.1 in the third strain and a metrical change (duple to triple) in the last.

Other continental *moresche*, unrelated to the Susato/Arbeau line, include five in G.C. Barbetta's *Intavolatura di liuto* (Venice, 1585), each one based on different musical material. 'La Moresque' in Praetorius's *Terpsichore* (Wolfenbüttel, 1612) is given in two settings (*a* 4 and *a* 5); the same melody appears in Mersenne's *Harmonie universelle* (1636–7; see ex.2).

In the 17th century the term 'moresca' was also applied to ballet or pantomimic dance in opera, for example the *moresca* at the end of Monteverdi's *Orfeo* (1607). The 'Entrée de' Mori' at the end of Act 2 of Handel's *Ariodante* (1735) has an eccentric musical character that links it to the *moresca* tradition.

For further illustration *see* DANCE, fig.7.

(2) A carnivalesque vocal genre popular in the 16th century whose texts parody the speech of Moors, then defined broadly as Muslims or narrowly as inhabitants of the Barbary Coast.

Moresche are settings of free verse in which sections in binary time alternate with dance-songs introduced by onomatopoetic imitations of instruments. Stock characters are invoked at the beginning with formulaic motives declaiming their names. Composers of *moresche* for three voices appropriated the strident high-pitched sound and parallel 5ths of the VILLANELLA. The first anthology of *moresche* contains eight anonymous pieces and was published in Rome (*VogelB* 1555[5]). A *moresca* attributed to 'Orlando', but conceivably by Nola, is among the six

Ex.2 Mersenne: La Moresque, *Harmonie universelle* (Livre second des chants, p.171)

published in Venice by Gardano (RISM 1560[13-14], 1562[14]). Lassus reworked three pre-existing *moresche* for four voices and three for six, demonstrating his natural flair for burlesque. These works circulated among his patrons before being published in 1581, and some were performed by 'six flutes and as many resonant voices' at the festivities for Duke Wilhelm V's wedding in 1568. Other composers who contributed one *moresca* apiece to the repertory are Corneti (1563), Troiano (1567), Califano (1567), Andrea Gabrieli (1574), Metallo (1577) and Bianchi (1588).

Moors acquired through the slave trade were valued as domestic servants in the households of European aristocrats, particularly in Naples, Rome, Venice and Munich, and their presence in these places stimulated production of comic musical scenes evoking the antics of stock couples such as Lucia and Martina. They are represented as purely carnal creatures, and their scatalogical dialogue, a concoction of southern Italian dialects and pseudo-Moorish jargon, is filled with zoomorphizing images redolent of Carnival. Connections have been drawn between the *moresca* and the Maltese dance known in Naples as the 'ballo di Sfessania' (or 'Lucia'), which is immortalized in Callot's etchings (*c*1620; ed. K. Klose, Vienna, 1924) and described as a dance-song in 17th-century Neapolitan literature.

ALAN BROWN (1), DONNA G. CARDAMONE (2)

Moreschi, Alessandro (*b* Monte Compatri, nr Rome, 11 Nov 1858; *d* Rome, 21 April 1921). Italian soprano castrato. He became known as 'the last of the castrati' thanks to six doubtfully representative recordings made in 1902–3. He sang in the local choir and studied in Rome at S Salvatore in Lauro. He also studied with Gaetano Capocci or Nazzareno Rosati, or perhaps with both, and joined the choir of S Giovanni in Laterano in 1873. From 1883 to 1913 he was a member of the papal (Sistine) choir, while also singing at concerts. In 1900 he sang at the funeral of King Umberto I in the Pantheon. After Pope Pius X formally banned castratos from his chapel in 1903 Moreschi still sang at S Pietro. Haböck, who heard him there in 1914 and interviewed him, stated that his range, *d-d‴* in the first 25 years of his careeer, had later shrunk to *a-g″*. He reported that Moreschi's voice was powerful

and like a wind instrument in its crystalline clarity and purity, with a matchless *messa di voce*, but that it had never compassed a good trill or coloratura. This description is hard to square with the recordings; Haböck, who considered that they did Moreschi an injustice, detected sudden 'hooting' ('fistulieren'), to which one might add wavering intonation and unpleasing timbre. Made as they were in the infancy of the gramophone, these unique recordings (of 16th- and 19th-century works) are tantalizing, but they give no reliable notion of the castrato voice at its best.

JOHN ROSSELLI

Moret, Norbert (*b* Ménières, Fribourg canton, 20 Nov 1921; *d* Fribourg 17 Nov 1998). Swiss composer. He studied in Paris (1948–50) with Honegger, Messiaen and Leibowitz, and in Vienna (1950–51) with Furtwängler and Clemens Kraus. For over 20 years he made his living by teaching. The Swiss musical world knew nothing of his work as a composer until 1974 when his *Germes en éveil* was performed at the Festival of Swiss Musicians, Amriswil. In 1978 Sacher gave the first performance of his *Hymnes de silence* in Basle; subsequent premières of his cello and violin concertos by Rostropovitch and Mutter respectively brought him to international attention. His sudden success and the prestigious support he received from Sacher and Rostropovich have baffled more than one critic, seeming at odds with the modest attitude that enabled him to draw inspiration from subjects of a naively poetic nature. His honours include the composer's prize of the Swiss Musicians' Association (1983), the European music prize (Strasbourg, 1983) and an honorary doctorate from Fribourg University (1989).

Moret's style is not easy to place within the currents of the 20th century, even if it belongs incontestably to its time. To many he was considered a romantic, not because he was a reactionary, but because he always placed inspiration in the centre of the creative process.

WORKS
(*selective list*)

Op: Visitations (1, Moret), 1981–2, Basle, 20 Jan 1983

Inst: Gastlosen, org, 1974; Couleurs de temps changées, pf, 1975; Rituels, hpd, 1975; Hymnes de silence, 3 trbn, str, org, 4 perc, 1976–7; Suite à l'image du temps, 2 str orch, 1979; Double Conc., vn, vc, chbr orch, 1981; Sacher-Serenade, b cl, vib, regals, org, 1981–2; Tragiques, orch, 1982–3; Triple Conc., fl, ob, hp, str orch, 1984; Mille et un soleils de joie, chbr orch, 1985; Vc Conc., 1985; En rêve, conc., vn, chbr orch, 1988; 3 pièces, chbr orch, 1988; Symphonie pour une fête académique, orch, 1989; Divertimento, ob, hn, vc, perc, str, 1991–2; Gui Conc., 1993–4; Hn Conc., 1995; Org Conc., 1996; Tpt Conc., 1997

JEAN-PIERRE AMANN

Moretti, Isabelle (Cécile Andrée) (*b* Lyons, 5 May 1964). French harpist. She studied in Lyons with Germaine Lorenzini, who has remained her mentor throughout her career. She was awarded a *premier prix* at the Paris Conservatoire in 1983, and also gained first prizes in Munich (1983), Bordeaux (1984) and Geneva (1986) before winning the important Israel Harp Contest (1988). Isabelle Moretti limits her teaching to the Paris Conservatoire, where she has given an influential harp class since 1995. Her preferred repertory is 20th-century French music, although she has recorded concertos by Boieldieu, Parish Alvars and Rodrigo. She won the *grand prix* of the Nouvelle Académie du Disque for her 1995 recording of French chamber music.

ANN GRIFFITHS

Moretto, Nelly (*b* Rosario, Argentina, 20 Sept 1925; Buenos Aires, 24 Nov 1978). Argentine composer and pianist. She studied at the National Conservatory in Buenos Aires and at the University of Illinois. On her return to Argentina she studied contemporary techniques with Juan Carlos Paz and composed her first works, beginning with chamber and symphonic music. From the mid-1960s, while working at the electronic institute of the University of Buenos Aires, she began to add electroacoustic techniques to traditional ones. She was a member of the Agrupación Nueva Música from 1951 until her death (vice-president from 1970) and participated in its educational work.

RAQUEL C. DE ARIAS

Moretus, Joannes [Moerentorf, Jan] (*b* Antwerp, 22 May 1543; *d* Antwerp, 26 Sept 1610). Flemish printer who managed the Antwerp publishing business established by his father-in-law CHRISTOFFEL PLANTIN.

Morgan, Frederick (*b* Melbourne, 8 April 1940). Australian recorder maker. He began making hand-made instruments in 1970, after visiting workshops and instrument collections in Europe and the USA with the assistance of a

Churchill Memorial Fellowship. His craft is based on the study of old instruments, and he has made recorders modelled on those of Denner, Stanesby the elder, Bressan, Bizey and Italian makers of the 16th and 17th centuries, using European boxwood and Canadian maple. He has also designed new instruments of many sizes and types, including flageolets and large Renaissance recorders. In 1989 he employed an assistant, Dieter Mücker, a specialist wood-turner and tool maker. Morgan's instruments are regarded as some of the finest of the 20th century, and they may be heard on a large number of recordings made since 1975, including Frans Brüggen's performance of Corelli's Sonatas op.5. Other players of Morgan recorders include Kees Boeke, Walter van Hauwe and Dan Laurin.

MICHAEL ATHERTON

Morgan [Riggins], **Helen** (*b* Danville, IL, 2 Aug 1900; *d* Chicago, 8 Oct 1941). American singer and actress. She began her career singing in Chicago honky-tonks and won several beauty pageants, enabling her to study in New York with Eduardo Petri of the Metropolitan Opera School. She alternated between appearances in speakeasies in New York and Chicago, and small roles in Broadway musicals: her performance of 'Nobody Wants Me' in *Americana* (1926) caught the attention of Jerome Kern, who cast her as Julie in *Show Boat* (1927), from which his 'Can't help lovin' dat man' and 'Bill' became closely identified with her. In 1929 she starred in the acclaimed musical film *Applause* ('What wouldn't I do for that man', 'I've got a feeling I'm falling'), and in Kern's *Sweet Adeline* ('Why was I born?', 'Don't ever leave me') on Broadway. Further film appearances inluded a cameo in *Go Into Your Dance* and a lead in *Frankie and Johnny* (both 1935), but it was her re-creation of Julie in the 1936 film of *Show Boat* that crowned her career, despite subsequent night club and stage appearances in Europe and the USA.

Morgan was the most famous torch singer of the 1920s, but her style had little in common with subsequent stereotypes. She was a classically trained soprano who sang mostly in head or mixed voice; her lower register was practically non-existent, unlike later female singers, although her voice darkened somewhat in the late 1930s. She took few rhythmic liberties, and had a fast, somewhat throaty vibrato, employing portamento sparingly. In performance, her chaste, elegant and reserved musicianship contrasted wonderfully with her stylized demeanour, as she perched on top of a piano, with sad eyes and quivering lips, clutching a handkerchief. A full account of her career is given in G. Maxwell: *Helen Morgan: Her Life and Legend* (New York, 1974).

HOWARD GOLDSTEIN

Morgan, Justin (*b* West Springfield, MA, 28 Feb 1747; *d* Randolph, VT, 22 March 1798). American composer and singing master. Although he probably received no more than rudimentary musical training in a singing school, his natural genius was great. In 1788 he settled in Vermont, but his duties as a singing teacher led him to travel, probably as far south as Pennsylvania. He also worked as a schoolteacher, a farmer and a horse breeder; the 'Morgan horse' is named after him. Morgan never published a tune book of his own, and no manuscripts of his music have come to light. Of his nine known compositions – two plain tunes, five fuging tunes, an anthem, and a moving lament, *Despair*, on the death of his wife – all but the lament were first published in Asahel Benham's *Federal Harmony* (1790). His fuging tune 'Montgomery' was reprinted more than 50 times before 1811; his lengthy *Judgment Anthem* is particularly striking, with its vividly pictorial text, insistent rhythms, athletic vocal lines, and startling shifts between E minor and E♭ major (though edited by Kroeger in E minor and E major). The power and pathos of his text settings, the strength of his melodies and the sensitivity of his harmony make Morgan one of the most eloquent composers of the period.

NYM COOKE

Morgan, Robert Porter (*b* Nashville, TN, 28 July 1934). American theorist, composer and musicologist. He completed his undergraduate studies in 1958 at the University of California, Berkeley, where he worked with Andrew Imbrie. He was a graduate student at Princeton University; his teachers included Roger Sessions and Edward T. Cone, and he earned the PhD there in 1969. He also studied with Harald Genzmer at the Hochschule für Musik, Munich (1960–62). Morgan taught at Temple University (1967–79) and the University of Chicago (1979–89), after which he joined the faculty of Yale University.

Morgan was trained as a composer and was active as such until around 1980; he wrote chamber, orchestral and vocal music, and his trio for flute, cello and harpsichord was recorded. His current academic interests include music analysis, theory and aesthetics, as well as the music of the 19th and 20th centuries. He has explored such broad musical trends as Futurism and Modernism, and he has also investigated the compositional styles of Berg, Ives and Mahler. His survey of 20th-century music, for which he also prepared the accompanying anthology of music (*Anthology of Twentieth-Century Music*, New York, 1992) is one of the standard monographs on the subject.

PAULA MORGAN

Morgan, Thomas (*fl* 1691–9). Organist and composer, probably Irish. It seems very likely that the 'Mr Morgan' to whom a number of late 17th-century songs and instrumental pieces are attributed was the Thomas Morgan appointed organist of Christ Church Cathedral, Dublin, in 1691, who left almost immediately for England to 'endeavour to attain the perfection of an Organist'. *Mercurius musicus* (1699) contains a song stated to be 'the last he made in Ireland'. His *Collection of New Songs ... and a Sonata for Two Flutes* (1697) contains pieces from Motteux's *Europe's Revels* (1697) and Powell's *Imposture Defeated* (1697), on the whole of rather inferior quality. John Eccles's *Theatre Musick* (RISM 1698[6]) contains instrumental music by Morgan, who wrote act music for the following plays: Scott's *The Mock Marriage* (1695), Behn's *The Younger Brother* (1696), an unknown play 'Matchles' (? *The Matchless Maids*), and revivals of Dryden's *Secret Love*, Shadwell's *Psyche* and Lacy's *The Old Troop* (in *GB-Lbl* Add.30839, 39565–7, 35043; *Lcm* 1172, ed. in MLE, A3, 1987; *Ob* Mus.Sch.C.73; *Och* 351–2; *US-LAuc* B217M4 S 948, 'Finney Partbooks'). *Come, come, ye inhabitants of heaven*, described as 'A Mad Song ... being the last he made', was published separately, probably in 1699. Further details are given in C. Price: *Music in the Restoration Theatre* (Ann Arbor, 1979).

Morhange, Valentin. *See* ALKAN, VALENTIN.

Morhard [Mohrhardt, Mohrhart], **Peter** (*d* Lüneburg, 1685). German composer and organist. He is first heard of in 1662, when he became organist of the Michaeliskirche, Lüneburg; he held the post until his death and was succeeded in it by his eldest son, Friedrich Christoph. His nine surviving chorale arrangements, which were recorded about 1670 in tablature by his Lüneburg colleague, Heinrich Baltzar Wedemann, show typical stylistic features of the generation of north German organists between the pupils of Sweelinck and Buxtehude, though in the quality of their contrapuntal writing they fall short of works by, for instance, Weckmann or Tunder. They show the influence of Scheidemann, but it does not follow that he must have been his pupil. The types of chorale arrangement that Morhard took over from Scheidemann were almost exclusively the modern ones, for example the organ chorale with decorated cantus firmus and above all the chorale fantasia typified by its virtuosity, refined sonority and plentiful use of echo effects, the latter a particularly notable hallmark of Morhard's style.

WORKS

Org arrs.: Ky; Allein zu dir, Herr Jesu Christ; Alle Welt, was lebt [kreucht] und webet; Aus tiefer Not schrei ich zu dir; Gelobet seist du, Jesu Christ; Herr Gott, dich loben wir [with prelude]; Meine Seele erhebt den Herren; Wacht auf, ihr Christen alle; Was fürchtst du, Feind Herodes, sehr: *D-Lr*; all ed. in CEKM, xxiii (1973)

11 vocal works, formerly in *Lm* according to Seiffert, now lost

WERNER BREIG (with PIETER DIRKSEN)

Mori. English family of musicians.

(1) **Nicolas** [Nicholas] **Mori** (*b* London, 24 Jan 1796/7; *d* London, 14 June 1839). Violinist and music publisher. The son of an Italian wig-maker in the New Road, London, he played a concerto by his teacher F.-H. Barthélemon at the King's Theatre in 1805. From 1808 to 1814 he studied with Viotti, and in 1813 joined the Philharmonic Society's orchestra. In 1816 he became one of the orchestra's leaders, appearing regularly in chamber music items and as a soloist. He also led the King's Theatre orchestra under Costa, played in several London concerts and at provincial festivals, and from 1823 was a professor at the RAM. In 1836 he and Robert Lindley established annual series of Classical Chamber Concerts in competition with the Quartett Concerts set up by Henry Blagrove.

Mori was one of the leading English violinists of the 1820s and 30s; the *Quarterly Musical Magazine and Review* admired his bold, free and commanding bow-arm, his firm, full and impressive tone and the force, precision and facility of his playing, but noted that his style lacked 'the nice points of finish and . . . graces and delicacies of expression'. He composed a number of works for violin, including several unpublished concertos; he also made arrangements of operatic excerpts for solo violin, and of orchestral works for chamber ensemble. Although Dubourg (*The Violin*, London, 1836, 5/1878) notes that Mori married Elizabeth Lavenu, widow of the publisher Lewis LAVENU in 1819, marriage records indicate that the wedding did not take place until 1826, some years after the birth of their sons. From about 1827 until Mori's death the firm operated as Mori & Lavenu.

(2) **Frank** [Francis] **Mori** (*b* London, 21 March 1820; *d* Chaumont, France, 2 Aug 1873). Composer and conductor, son of (1) Nicolas Mori. He studied with W.S. Bennett and later (1836) had lessons from P.-J.-G.

Zimmermann in Paris. A well-known London musician, he directed and managed the short-lived London Orchestra (established 1854), which gave concerts in its own right and was available for hire. He composed a cantata *Fridolin* (Worcester Festival, 1851), an operetta *The River Sprite* (Covent Garden, 9 February 1865, vocal score, London, 1865) on a libretto of George Linley, and many songs and ballads.

(3) **Nicholas Mori** (*b* London, 14 Jan 1822; *d* ?*c*1890). Composer and violinist, son of (1) Nicolas Mori. He studied with his father and Charles Lucas and later in Paris. From 1836 he appeared in the Classical Chamber Concerts, and on the death of his father in 1839 joined the Philharmonic orchestra as a rank-and-file violinist. His compositions include music to W.S. Gilbert's fairy comedy *The Wicked World* (1873) and a setting of Psalm cxxvii.

KEITH HORNER/CHRISTINA BASHFORD

Moriani, Napoleone (*b* Florence, 10 March 1806/1808; *d* Florence, 4 March 1878). Italian tenor. He made his début at Pavia in 1833 in Pacini's *Gli arabi nelle Gallie*. Between 1840 and 1844 he frequently sang in Vienna and Germany; in 1841 he was made a *Kammersänger* to the Austrian emperor. From 1844 to 1846 he appeared alternately in London and Madrid (where he was awarded the Order of Isabella), and made his Paris début in 1845 at the Théâtre Italien; he also sang at Lisbon and Barcelona, then for two years in Italy. His last important engagements were at the Théâtre Italien (1849–50) and Madrid (1850).

Moriani combined sweetness of tone with great dramatic intensity. With his gaunt good looks he excelled in death scenes: impressed by his performance in revivals of Donizetti's *Lucia di Lammermoor* and *Pia de' Tolomei*, composers wrote for him parts portraying the hero in a prolonged death agony, as in Vaccai's *La sposa di Messina* (1839, Venice) and Federico Ricci's *Luigi Rolla* (1841, Florence). He also sang in the premières of Mercadante's *Le due illustri rivali* and Donizetti's *Maria de Rudenz* (both 1838, Venice) and *Linda di Chamounix* (1842, Vienna). For a revival of *Attila* at La Scala in 1847 Verdi wrote an alternative romanza for him, to be inserted in the last act.

JULIAN BUDDEN

Mori da Viadana, Jacobi. *See* MORO, GIACOMO.

Morigi, Angelo (*b* Rimini, 1725; *d* Parma, 22 Jan 1801). Italian violinist and composer. He was a pupil of Tartini for the violin and of Vallotti for theory. He was in London by May 1751 when he performed at a benefit concert for Francesca Cuzzoni, and his first compositions were published there. He entered the service of the Duke of Parma in about 1758 (according to the dedication of his sonatas op.4), became first violinist on 1 April 1766, and was appointed director of music on 6 September 1773. He was well regarded both as a violinist and as a teacher of composition, his most successful pupil being Bonifazio Asioli who posthumously published Morigi's counterpoint treatise. Morigi's compositions resemble Tartini's, tending in melody and texture towards the early *galant* style. A letter to Padre Martini in 1772 reflects his dissatisfaction with the new, more brilliant style, and perhaps explains why all of his published works appeared early in his career.

CHAPPELL WHITE

Mörike, Eduard (Friedrich) (*b* Ludwigsburg, 8 Sept 1804; *d* Stuttgart, 4 June 1875). German writer, Lutheran clergyman and teacher. He attended the monastery school in Urach, and after his father's death studied theology at the university seminary of Tübingen. Here he met a 21-year-old Swiss woman named Maria Meyer, a beautiful but disturbed vagrant; his decision to send her away in July 1824 and the sudden death of his beloved brother August shortly afterwards were crucial events in his life. Maria Meyer was the model for the five poems of the 'Peregrina' cycle and for the half-gypsy character Elisabeth in the novella *Maler Nolten* (1832). Mörike was ordained in 1826 and was assigned to various pastoral positions in his native Swabia, but retired in 1843 after years of hypochondriacal and real ailments brought on in part by his detestation of sermon-writing and his religious doubts. In 1851 he married Margarete von Speeth and settled in Stuttgart as a teacher of literature at the Katharinenstift until his retirement in 1866.

Music was of utmost importance in Mörike's life and writings. His brother Karl was a composer and his brother Adolphe a piano-builder, while his closest friends included the amateur pianist Wilhelm Hartlaub and the composers Ernst Friedrich Kauffmann (whose son would later befriend Hugo Wolf) and Ludwig Hetsch. The beautiful poem *An Wilhelm Hartlaub*, possibly inspired by hearing his friend play Mozart's C minor Fantasy, is one example of Mörike's lifelong veneration of Mozart, manifest also in the poem *Ach, nur einmal noch im Leben* (which is prefaced by a quotation from *La clemenza di Tito*) and

the justly famous novella *Mozart auf der Reise nach Prag* (1855), in which the beauty of Mörike's imagery and language is lent to an exploration of the mystery of creativity. Evocations of music are found in many of his poems: the wind-blown Aeolian harp of *An eine Äolsharfe*, the sacred choral music and organ strains of *Josephine*, the pianist who transforms the skeletal old mare of a piano into an Arabian steed dancing along a golden ladder of tones in *Auf einen Klavierspieler*, or the shepherds' flutes and songs from an antique bacchanale in *An einem Wintermorgen, vor Sonnenaufgang*. Such was his preference for the Classical style (he loved the piano sonatas of Haydn and Beethoven), that he and his circle became ardent opponents of Wagner after the middle of the century.

Mörike's poetry is marked by the influences of folk poems, Lutheran hymnology, Greek and Roman classical literature (he translated Anacreon, Theocritus and others) and German Baroque devotional-mystical verse, as well as Goethe and Lichtenberg. Many of his best poems have to do with Eros and Death (themes perhaps emanating from the formative tragedies of his youth), time and memory, the language drenched in complex symbolism and wonderfully vivid; Mörike was a master of ingenious, ever-changing rhythms, rhymes and metres. In poems now known as *Dinggedichte*, intense concentration on an object (e.g. *Auf eine Lampe*) was perhaps Mörike's way of escaping time and his own isolated self; his poems on real or imaginary paintings are also notable (*Auf ein altes Bild* or *Schlafendes Jesuskind*), based on a lost painting by Francesco Albani. Despite this innate pessimism, Mörike also created a distinctive vein of humorous poetry which attracted Hugo Wolf in the 1880s.

Mörike welcomed musical settings of his poetry, but the diatonic, primarily strophic works by his friends Kauffmann and Hetsch, Emilie Zumsteeg, or Silcher (1 song) seem too simple to convey his complex symbolism. Later, Hugo Distler (48 part-songs), Schumann (five solo lieder, including *Das verlassne Mägdelein* op.64 no.2 and *Der Gärtner* op.107 no.3, as well as four part songs), Robert Franz (nine songs), and Brahms (two songs including *Agnes* op.59 no.5 and 1 duet) devised a more nuanced, chromatic language for these poems. Nevertheless, the depths of this poetry largely went unnoticed by composers until the end of the century. Hugo Wolf, in four early songs (among them the delightful *Mausfallen-Sprüchlein*) and the 53 mature songs composed in 1888, rediscovered Mörike, sparking a renaissance of interest in 'this half-forgotten Swabian master' and creating a post-Wagnerian musical language whose complex extensions of tonality are worthy concomitants to Mörike's profound poetic art. Other composers followed in Wolf's wake with musical settings of Mörike, among them Othmar Schoeck's, with a total of 47 settings, including the large cycle *Das holde Bescheiden* op.62 (mostly poems not set by Wolf).

SUSAN YOUENS

Morin, Charles. *See* CRABBÉ, ARMAND.

Morin, Jean-Baptiste (*b* Orléans, 2 Feb 1677; *d* Paris, 27 April 1745). French composer. The sixth of nine children born to Michel Morin, weaver, and Catherine Robié, he was baptized as 'Jean'. He was a choirboy at St Aignan in Orléans until at least 1692, where his master was Canon Oliver Trembloit. In about 1698 he moved to Paris, where he regularly attended the concerts at St André-des-Arts and met the poet Jean Serré de Rieux, a lover of Italian music, to whom he attached himself. He became *ordinaire de la musique* in the service of the Duke of Orléans (the future regent) in about 1701, and took part in musical soirées at Sceaux. He probably composed some *petits motets* (published by Ballard in 1704) before composing the first French cantatas around 1700, giving musical shape to a poetic form imitated from the Italian by J.-B. Rousseau. *Euterpe* is 'the first of those he wrought' (Bachelier). A manuscript with the title *Cantates de Mancini* includes five by Morin. Ballard published two volumes of Morin's cantatas (1706, 1707), as well as his second book of motets (1709) and *La chasse du cerf* (also 1709). This last work, a divertissement with a libretto by Serré de Rieux, was dedicated to the Princesse de Conti who had it performed before Louis XIV at Fontainebleau on the feast of St Louis, 25 August 1708; it was later sung at the Concert Spirituel (1728–33) and was revived there after Morin's death.

Morin lived with 'Mr de Seré' and his family from some date probably earlier than 1708 until 1720. In 1712 he obtained a ten-year *privilège*, which he used only twice: for *Cantates* (1712) and for the epithalamium *L'Himen, et l'Amour* (1714). In about 1721 Serré retired to Rieux, near Beauvais. Still *ordinaire* to the regent, Morin entered the service of the regent's daughter Louise-Adélaïde, abbess of Chelles, in 1719 as *maître de la chapelle et de la chambre*. Eventually he became *surintendant de la musique* at this Benedictine convent, which was still enjoying a long and prestigious history (the princess's *demoiselle d'honneur* was the poetess Marthe de Dangy). The abbess undertook to restore singing at the convent, and Morin arranged a *Processional* (Paris, 1726), drawing on music by other, earlier composers (Dumont; Nivers); his cantata *Esther* and a *Te Deum*, also written for Chelles, are lost. He was made a *chevalier-servant de Saint-Lazare* on 21 December 1722, and the princess awarded him a life pension of 500 livres from her private purse, then (on 26 October 1723) an additional 1500 livres from the archdiocese of Rouen (the see to which the regent's almoner was appointed the following day). She made Morin other gifts, including her portrait-medallion engraved by Jean Leblanc and a full-length portrait.

After leaving the princess's service, Morin lived from 1731 to 1743 in the house of a Parisian equerry, Jean-Baptiste-Hubert de la Fontaine, who had close ties with the convent at Chelles. He was the husband of Claude-Angélique Bertin de la Doué, daughter of the composer and harpsichordist. Although he no longer had a royal patron, Morin continued to compose: hunting fanfares (published in *Les dons ... poëmes dédiés au roy*, 1734),

airs, cantatas (lost) and funeral music (also lost). Like Serré de Rieux, he admired Handel's Italian operas. He was also interested in the theatre and poetry, reading Jesuit and Jansenist literature with equal interest, as well as the Whig periodical *The Spectator*. He died in the rue Simon Lefranc, where he had been the neighbour of the convent bursar.

A modernist and formal innovator, proponent of a highly ornate and italianate style, Morin nevertheless sought to unite Italian grace and vivacity with French *douceur*; in the binary French *airs* or da capo arias of his cantatas, charm is as important as expression, and figuralism is never overlooked. His *petits motets* are similarly conceived: the *airs*, less often da capo, and some of the recitatives introduce the same expressive melodic leaps and melismas. He cultivated small forms. The forces for *La chasse du cerf*, a kind of extended cantata and the epitome of his style, were reduced on publication to a trio: hunting horn, oboes (or violins ad libitum) and continuo. Yet the *airs*, choruses, fanfares and *airs à boire* match their contents with convincing truthfulness. He simplified his style in the *Processional* and used fauxbourdon, 'this ravishing form that never fails to astonish the hearer' (Racine).

WORKS

all printed works published in Paris

VOCAL

[10] Motets ... livre premier, 1–2vv, insts (1704, 2/1748): Venite exsultemus, ed. in Cantio sacra, l (Cologne, 1963); Gaudete mortales; Ad mensam, ed. in Cantio sacra, xlv (Cologne, 1963); Ave regina; Animae amantes; Ite gemmae, ite flores; Anxiatus est; Festivi martyres; Regina coeli; Nisi Dominus

[6] Cantates françoises ... livre premier (1706/*R*1990 in ECFC, i): Euterpe, S, bc; L'impatience, S, bc; Circé, S, bc; L'Amour dévoilé, S, bc; Enone, S, 2 vn, fl ad lib, bc; Les amants mécontents, S, S, bc

[6] Cantates françoises ... livre second (1707/*R*1990 in ECFC, i): L'absence, S, bc; L'aurore, S, bc, ed. J. Arger (Paris, 1910); La rose, S, vn/fl, bc; L'incertitude, S, vn/fl, bc; Bachus, B, 2 vn/fl, 2 ob ad lib, bc; Junon, et Pallas, S, S, bc

La chasse du cerf, divertissement, 25 Aug 1708 (1709)

[6] Motets ... livre second, 1–2vv, insts (1709): Domine cor meum; O splendide stellae; Voces letae; In convertendo; Parce mihi; Lauda Jerusalem

[6] Cantates françoises ... op.6 (1712/*R*1990 in ECFC, xiii): Le sommeil de l'Amour, S, bc; L'absence, S, bc; La jeune Flore, S, bc; Le naufrage d'Ulisse, S, fl, vns, bc; Dom Quixotte, B, vn, bc; Psiché, et ses soeurs, S, S, S, bc, extract ed. J. Turellier (Paris, 1971) as Charmant amour

L'Himen, et l'Amour, divertissement ... et receuil d'airs a boire a deux voix ... op.7 (1714); extracts ed. J. Turellier (Paris, 1970) as Belle Corinne

La chasse du coeur, parody (1725, 2/1726)

Processional pour l'Abbaye royale de Chelles (1726)

4 airs in Recueils d'airs sérieux et à boire (1704, 1707, 1712, 1713); 5 airs in Parodies nouvelles, v (1735), vii (1737)

Cants., *F-Pc*: L'infidelité (early version of livre premier, no.6); L'incertitude (early version of livre second, no.4); Philomèle; La violette (doubtful); La Rose (= livre second, no.3); L'esloignement (= livre second, no.1)

Recitatives in Le triomphe de l'amour et de l'Himen, 1747, *Pn*

Lost: Esther, cant. (text in *Mercure de France*, May 1724, pp. 852–5); Te Deum, 7 July 1726 (mentioned in *Mercure de France*, May 1724, p.1684); Cantates, livre cinquième (?1737–42); Cantates, livre sixième (?1737–42); Music for funeral of Louise-Adélaïde d'Orléans (mentioned in *Mercure de France*, Aug 1743, pp.1882–3)

INSTRUMENTAL

[6] Nouvelles fanfares in Les dons des enfans de Latone (1734); ed. Broekmans and van Poppel in *Franse fanfares* (Amsterdam, 1947)

Airs de simphonie in Le triomphe de l'amour et de l'Himen, 1747, *F-Pn*

FRANÇOIS TURELLIER

Morin, Léo-Pol [Callihou, James] (*b* Cap Saint-Ignace, PQ, 13 July 1892; *d* Lac Marois, PQ, 29 May 1941). Canadian music critic, composer and pianist. After studying with Gustave and Henri Gagnon in Quebec and with Guillaume Couture and Arthur Letondal in Montreal, Morin won the Prix d'Europe in 1912, enabling him to complete his musical education in Paris with Isidore Philipp, Raoul Pugno, Ricardo Vinès and Jules Mouquet. On his return to Montreal in 1914, he gave numerous concerts and began his career as a critic, co-founding the avant-garde publication, *Le Nigog* in 1918. He moved to Paris in 1919 and there soon gained a respected position as both pianist and critic, serving as a contributor to *Le monde musical* (1920). Settling in Montreal from 1925, he was secretary of the Montreal branch of the Pro Musica Society of New York (1926) and a music critic and chronicler for *La patrie* (1926–9), *La presse* (1929–31) and *Le Canada* (1933–41). He held the post of professor of music at both the Conservatoire National de Musique (1929–41) and the Ecole Supérieure de Musique d'Outremont (1936–41). As a soloist and chamber-musician, and as a sought-after lecturer, Morin devoted himself, in both Europe and America, to the cause of 20th-century music, particularly to French, Spanish, Russian and Canadian repertories. At a concert given by Ravel on 19 April 1928 in Montreal, Morin joined the composer in the four-hand piano piece *Ma mère l'oye*. A pioneer of music criticism in Canada, his most significant articles were republished in *Papiers de musique* (1930) and *Musique* (1944). His compositional activities include arrangements of French-Canadian folksongs and a number of original works, many for voice and piano, written under the pen-name James Callihou. The *Suite canadienne* for piano is his only published work (Montreal, 1945).

HÉLÈNE PAUL

Morino, Egidius de. *See* EGIDIUS DE MURINO.

Morisca (Sp. 'Moorish'). *See* MORESCA.

Morison, Elsie (Jean) (*b* Ballarat, Victoria, 15 Aug 1924). Australian soprano. She studied with Clive Carey both at the Melbourne Conservatory and at the RCM. She made her English concert début at the Royal Albert Hall in *Acis and Galatea* in 1948 and that autumn joined Sadler's Wells Opera, appearing regularly there until 1954. She was ideally cast when she sang Anne Trulove in the first British staging of *The Rake's Progress* (1953, Edinburgh) and at her Glyndebourne début the following year. After a notable Covent Garden début (1953) as Mimì, she sang there regularly until 1962. In such roles as Susanna, Pamina, Marzelline, Micaëla, Antonia (*Les contes d'Hoffmann*), Mařenka, and Blanche in the British première of Poulenc's *Dialogues des Carmélites* (1958), she was admired for the touching sincerity of her acting and the lyrical warmth of her voice. In 1955 she created the title role of Arwel Hughes's *Menna* for the WNO. Among her recordings, those of Purcell, Handel and Tippett's *A Child of our Time* capture well the grace and conviction of her singing. She was married to the conductor Rafael Kubelík.

HAROLD ROSENTHAL/ALAN BLYTH

Morrissey. *See* SMITHS, THE.

Morita, Minoru (*b* Shenyang, China, 19 June 1935). Japanese musicologist. He initially studied Russian at the Tokyo University of Foreign Languages, but switched to musicology at the Tokyo National University of Fine Arts and Music (BA 1963). He began lecturing in musicology at the Miyagi University of Education in 1971, becoming professor in 1982. His training in Slavonic languages has enabled him to deal extensively with source materials in those languages for his research on Russian and eastern European music of the 19th and 20th centuries. He has produced not only the most reliable Japanese studies of Tchaikovsky (1986, 1993), but also Japanese translations of standard Russian music histories (1971, 1995). In addition to his interest in Russian music, he has produced Japanese translations of Parrish and Westrup textbooks.

YOSIHIKO TOKUMARU

Moritz, Landgrave of Hesse (*b* Kassel, 25 May 1572; *d* Eschwege, 15 March 1632). German patron and composer. He succeeded his father as Landgrave of Hesse in 1592 and ruled until 1627, when, under the pressures of the Thirty Years War, he abdicated in favour of his son and retired to Eschwege. He encouraged an exceptionally flourishing musical life at his court and himself studied vocal and instrumental music with Georg Otto, court composer and Kapellmeister from 1586. Moritz also encouraged drama, and the Ottoneum, completed in 1605 and named after Otto, was the earliest court theatre in Germany. His patronage not only of music and the theatre but of other branches of art and learning earned him the title 'Moritz der Gelehrte' (Moritz the Learned), and the Landgraf-Moritz-Stiftung, an important musicological institution founded in Kassel in 1955, is named after him. In 1598 he founded the Collegium Mauritium, a school for the sons of his court aristocracy and for his choirboys, among whom Heinrich Schütz was the most famous. Moritz was the first to encourage the talents of Schütz: he financed his first visit to Italy, in 1609, and appointed him court organist on his return in 1613. Reluctantly, but with a good grace, he allowed him to move to the electoral court at Dresden in 1615, and he presented him with a medallion and other gifts; in 1619 he unsuccessfully tried to persuade him to return as Kapellmeister after Otto's death.

The number of court musicians increased substantially under Moritz; on the occasion of his son's christening in 1600, 36 instrumentalists were among the performers, including musicians recruited from neighbouring courts. His interest in interdisciplinary studies extended to alchemy and philosophical studies in connection with both the sciences and the fine arts. He engaged Michael Mair (alchemist and former medicus of Emperor Rudolph II), who dedicated his *Atalanta fugiens* (1617) to the landgrave, which combines music with alchemist iconography in 50 fugues for 3 voices. Moritz's library (in *D-Kl*) contained concerted works of the time by Giovanni Gabrieli, Schütz and other composers, which suggests that up-to-date music was performed at the court, and Hans Leo Hassler, John Dowland, Christoph Demantius and Alessandro Orologio were among the prominent composers who worked at or visited his court, dedicated works to him or corresponded with him. In 1598 Moritz offered Dowland a permanent position, but Dowland went instead to Copenhagen.

Moritz's own music is conservative. His output, especially of sacred music, was large, but much of it is lost. The sacred works include both solo settings and four-part harmonizations of hymns and psalms, as well as a number of psalms, motets and *Magnificat* settings written either in the *stile antico* or in the Venetian polychoral manner, all without continuo except the 12-voice setting of Psalm cl. A convinced follower of Calvin, Moritz wrote his own melodies for the Lobwasser-Psalter. In his *Magnificat* settings (which use Netherlandish counterpoint and choirbook format, reflecting 16th-century practices) he does not use the common eight *Magnificat* tones but instead Glarean's system of 12 tones. The secular music includes groups of Italian madrigals and villanellas set to Petrarchan texts. A number of pavans, galliards and intradas for a generally unspecified ensemble show the influence of English consort music. Of the four pieces for which instruments are indicated two are for broken consort and two for homogeneous groups, of cornetts and trombones respectively. Moritz also completed commentaries and compositions to the works

gathered by Otto in his *Opus musicum novum*, and prepared for the press a number of works by Valentin Geuck, who was employed at his court and died young in 1596. These compositions were appended to Geuck's incomplete theoretical treatise *Musica methodice conscripta et in ordinem brevem redacta*.

WORKS

VOCAL

24 melodies, 1v, in S. Schadaeus: Christlich Gesangbuch von allerhandt geistlichen Psalmen und Liedern (Geissmar, 1601, 2/1612 with harmonizations); 13 ed. in Winterfeld; 21 ed. in G. von Tucher: *Melodien des ev. Kirchengesangs im 1. Jh. der Reformation* (Leipzig, 1848/R); 14 ed. in K. Ameln and C. Mahrenholz: *Handbuch der deutschen evangelischen Kirchenmusik*, ii–iii (Göttingen, 1942)

16 motets, 6vv, 1603[3]; 21 motets, 5vv, 1603[4]; 3 motets, 8vv, 1604[5]

31 songs, 1, 4vv, in Psalmen Davids, nach frantzösischer melodey (Kassel, 1607)

Hosianna, 8vv, 1618[1]

Mag, 3vv, inc.; Mag, 4vv; 2 Mag in 12th mode, 1600; 2 pss, 12vv, 1 with bc: *D-Kl*

24 villanellas, 4vv (Kassel, 1593–4)

Madrigals; 19 songs, 6–8vv; other vocal works: *Kl*; 4 fugues, 5 madrigals, ed. in EDM, 2nd ser., *Kurhessen*, i/2 (1938)

INSTRUMENTAL

1 pavan, lute, 1610[23]; ed. in Schott's Series of Early Lute Music, i (London, 1958)

Pavans; galliards for various insts.; 9 intradas; 13 fugues, 4vv; canzona 5 toni, 8vv: *Kl*; some ed. in EDM, 2nd ser., *Kurhessen*, i/1 (1936)

HORACE FISHBACK/EVA LINFIELD

Mørk, Truls (*b* Bergen, 25 April 1961). Norwegian cellist. He studied first with his father John Mørk, then with Frans Helmerson at the Swedish Radio Music School, near Stockholm, furthering his studies with Heinrich Schiff. He was a prizewinner at the International Tchaikovsky Competition in Moscow in 1982; the following year he won the Cassadó Competition in Florence and in 1986 the Naumberg Competition in New York. He made his New York recital début in 1986 and his London recital début in 1988. He now enjoys an international reputation as both soloist and recitalist. Mørk is a commanding player and his repertory extends to the Lutosławski Concerto (which he performed under the composer's direction) and Nordheim's *Tenebrae*. Along with such colleagues as Arve Tellefsen, Terje Tønnesen and Lars Anders Tomter he has helped to make Norway a notable centre of string playing. He is the founder of the Stavanger Chamber Music Festival and plays in a piano quartet with Tellefsen, Tomter and Leif Ove Andsnes. He has made a large number of recordings, many of which (including the Elgar Concerto with Rattle) have been highly praised. He plays an instrument by Domenico Montagnana.

TULLY POTTER

Morkov, Vladimir Ivanovich (*b* 1801; *d* St Petersburg, 25 Nov 1864). Russian guitarist and composer. He was a nobleman, and spent his entire career in St Petersburg. A pupil of Sychra, Morkov belonged to the 'St Petersburg school' of Russian guitarists, and like his teacher was opposed to the mannerisms of the 'Muscovite school'. He left over 100 compositions and arrangements, many of them transcriptions from operas by Rossini, Donizetti, Verdi, Wagner, Glinka and Dargomïzhsky; judging from his dedications, Morkov knew Glinka and Dargomïzhsky personally. Besides pieces for solo guitar, he published for guitar duet and guitar and piano. One of the most Western-orientated Russian seven-string guitarists, Morkov published transcriptions from the six-string guitar repertory especially from Sor, Giuliani and J.K. Mertz. The guitars in Morkov's duets are usually tuned a fourth apart, the smaller being called *kvartgitara*. He published a guitar method, *Polnaya shkola dlya 7-strunnoy gitarï* [Complete method for the seven-string guitar] (St Petersburg, 1863). A passionate opera lover, Morkov also wrote the first history of opera in Russia, *Istoricheskiy ocherk russkoy operï, s samogo nachala po 1862 god* [Historical essay on Russian opera, from its very beginning to 1862] (St Petersburg, 1862), which was favourably reviewed by the critic Serov.

OLEG V. TIMOFEYEV

Morlacchi, Francesco (Giuseppe Baldassare) (*b* Perugia, 14 June 1784; *d* Innsbruck, 28 Oct 1841). Italian composer. He studied with his uncle Giovanni Mazzetti, organist of Perugia Cathedral, and with Luigi Caruso, the choirmaster, and began writing church and instrumental music at an early age. In 1803–4 he studied at Loreto with Zingarelli, but this did not satisfy him and he moved to the school of Stanislao Mattei at Bologna. Here in 1805 he was admitted to the Accademia Filarmonica as master-composer, and he came into contact with the young Rossini.

Morlacchi wrote his first operatic works, a farce and a comic opera, in 1807, but it was an *opera seria*, *Corradino*, first performed at Parma in 1808, that really marked the beginning of a brilliant theatrical career, and he was soon receiving commissions from the leading opera houses of

Rome and Milan. His three works for Rome (1809–10) were a comic opera, a farce and an *opera seria*, *Le danaidi*. The success of this last work, whose subject was taken from Metastasio's *Ipermestra*, attracted the attention of the *Allgemeine musikalische Zeitung* in 1810 (v, 412–14), thus making the young composer known to the German public. The anonymous author of the article praised Morlacchi as a composer equally at home in both serious and comic works, and stressed the beauty of his expressive and pleasing melodies (only to be expected of an Italian composer), combined with lively and varied harmonic writing. For La Scala he wrote the comic opera *Le avventure d'una giornata*, performed without much success in 1809, but the cantata *Saffo*, performed in the spring of the same year by the famous contralto Marietta Marcolini, had a happier outcome. The singer, who was a relative of Count Camillo Marcolini, minister at the Saxon court, took Morlacchi to Dresden, where in September 1810 he became assistant to Joseph Schuster, Kapellmeister of the Italian Opera. In 1811 he was appointed Kapellmeister for life.

In Dresden Morlacchi's production of operas slowed down considerably: in contrast to the ten from 1807–10, he wrote only 15 during the rest of his life (two unfinished). As Kapellmeister he was required to write a great deal of church music, as well as cantatas for state occasions. His career at Dresden affords one of the last instances of an Italian composer serving abroad, but his situation was very different from that of his many predecessors active at courts throughout Europe, who merely took Italian operatic forms with them. By the time he arrived at Dresden, German opera was well established, and in his early years there he had to expend much effort in order to satisfy the opposing demands of the court and the city audiences. The often harsh criticisms of him in the *Allgemeine musikalische Zeitung* were culturally motivated: to attack him was a way of expressing hostility to the *ancien régime* of the king and those members of the court who opposed the innovations stemming from Romanticism and the birth of German opera. Morlacchi often found himself at odds with Weber, who was the director of the German opera house from 1817 to 1826.

In *Raoul di Crequy*, his first opera for Dresden, Morlacchi did all he could to adapt to local taste. Abandoning Italian conventions, he abolished *secco* recitative and introduced choruses and dances in the manner of Mayr. The tumultuous storm scenes, and the use of a Turkish band on stage, and of hammers and picks in the orchestra to convey the picture of miners working in the bowels of the earth (almost in anticipation of Wagner), created a deliberately Romantic atmosphere, even if the presence of comic elements made it seem old-fashioned.

A few years later Morlacchi did an about-turn and composed comic operas with an 18th-century flavour such as *La capricciosa pentita* (1816), *Il barbiere di Siviglia* (1816) and *La semplicetta di Pirna* (1817). *Il barbiere* was commissioned by the king and reflected the conservative taste of the court, so that while Rossini in Rome was producing his *Barbiere di Siviglia* (also in 1816), with a new, more progressive libretto by Cesare Sterbini, Morlacchi in Dresden was forced to work with the old text by Petrosellini that Paisiello had set in 1782. Even though his use of the orchestra is reminiscent of early Beethoven or Mendelssohn, he followed Paisiello closely, both in the recitatives (some of which he took straight from the old *Barbiere*) and in the structural and tonal articulation of some of the individual numbers. Rosina's fine aria at the end of the second act, 'Giusto ciel che conoscete', marks an advance on those of the general run of lively resourceful girls in 18th-century Italian opera and displays dramatic and melancholy nuances worthy of Donizetti's heroines.

Morlacchi's major works continued to be performed in the leading Italian opera houses, and *Colombo* inaugurated the Teatro Carlo Felice in Genoa (1828). The one which had the most lasting success and the only one of which a complete vocal score was published was *Tebaldo e Isolina*, first given at La Fenice, Venice, in 1822. The audience enjoyed the libretto by Gaetano Rossi (librettist at La Fenice over a long period), but they appreciated Morlacchi's music even more, as well as the masterly performances of the singers, including Gaetano Crivelli and Giovanni Battista Velluti, who was outstanding in the second-act aria 'Caro suono lusinghier'. After the enthusiastic reception of the première, the opera was performed in some 40 cities in Italy and elsewhere over the next ten years, thanks also to Velluti, who made his role in it his own.

In 1823 Morlacchi wrote *La gioventù di Enrico V* for Dresden; coming after the success of *Tebaldo e Isolina* and before his second Venetian commission, *Ilda d'Avenel* (1824), it forms a kind of comic diversion between the two weightier operas, and the music is fluent and fast-moving. While Morlacchi did his utmost in a vain attempt to produce a new type of *opera seria* for Italian theatres, for Dresden he was still writing frivolous comic works clearly deriving from the old Neapolitan school, as his patrons required. One of his last works, the unfinished *Francesca da Rimini*, shows again his interest in a typically Romantic subject drawn from Dante but at the same time the impossibility of bringing it to a successful conclusion. The dilemma that Morlacchi faced was essentially that of choosing between the old Neapolitan style and the new Romantic style. When he attempted to combine the two, the result was often disjointed or ill-defined.

Morlacchi's oratorios (with the exception of *Gli angeli al divino sepolcro*, which is an anthem at the start of the third part of *La resurrezione del Redentore*) are settings of texts by Metastasio, at the request of those who commissioned the works. Morlacchi, however, implemented some modifications which have the effect of pushing Metastasio's style towards a more Romantic, melodramatic language. In particular he tried to eliminate the monotonous alternation of arias and recitatives, cutting whole sections and enriching the remainder with duets, quartets and concerted pieces. The orchestration is particularly rich, and the recitatives are all accompanied. From *Isacco* onwards, he introduced into his oratorios so-called 'rhythmic declamation' (praised by Weber in an article in the *Abendzeitung*, 20 March 1817), with which, conforming to the taste of the German public, he established a close link between text and music by varying duration and dynamic continuously. As far as the *Passione* and *Isacco* were concerned, Morlacchi's contemporaries complained that his style was too theatrical, with too obvious reminiscences of other composers, superfluous pauses and continuous modulations to distant tonalities. In contrast, *La morte di Abele* was criticized for its sparsely pious style, the lack of unity in its wide-ranging

vocal lines and the difficulty of performance, due to the large number of embellishments. Morlacchi was particularly active as a conductor, both of opera, and, after the final closure of the Italian opera theatre in 1832, of choral music. He conducted Haydn's *The Creation*, Beethoven's *Christus am Oelberge* and Handel's *Messiah* and *Jephtha*, and his performance of Bach's *St Matthew Passion* in 1833 (the second German revival after Mendelssohn's historic performance of 1829) revealed his taste for solemn, grandiose expression on a Berliozian scale.

WORKS

OPERAS

Il poeta disperato (farsa, 1), Florence, Pergola, Feb 1807, *F-Pn**, *I-Fc* (as Il poeta spiantato; No.2, duet*, with words and music different from *F-Pn**)

Il ritratto, o sia La forza dell'astrazione (dg, 2, L. Romanelli), Verona, Filarmonico, sum. 1807, *I-VEc**

Corradino (dramma, 2, A.S. Sografi), Parma, Imperiale, 27 Feb 1808, *D-Dl* (2 copies), *I-Fc*, *PAc**

Enone e Paride (dramma serio, 2), Livorno, Avvalorati, Oct 1808, lost

Oreste (dg, 2, L. Bottoni), Parma, Imperiale, 26 Dec 1808, *PLcon**

La principessa per ripiego (dg, 2, J. Ferretti, rev. F.S. Zini), Rome, Valle, 15 April 1809, *F-Pn*, *I-Fc*, *Rsc** (recits not autograph)

Il Simoncino (farsa, 1), Rome, Valle, June 1809, *PEl*, *PESc**

Rinaldo d'Asti, ossia Il tutore deluso (dg, 1, G. Rossena), Parma, private perf., sum. 1809, *BGc**

Le avventure d'una giornata (melodramma buffo, 2, Romanelli), Milan, Scala, 26 Sept 1809, *Mc**

Le danaidi (dramma serio, 2, S. Scatizzi, after P. Metastasio: *Ipermestra*), Rome, Argentina, 11 Feb 1810, *D-Dl*, *F-Pn*, *I-Fc*, *Mc*, *PEc**

Raoul di Crequy (dramma semiserio, 3, N. Perotti), Dresden, Hof, April 1811, *D-Dl* (2 copies), *F-Pn**

La capricciosa pentita (dg, 4, Romanelli), Dresden, Hof, 10 Jan 1816, *D-Dl*, *I-Fc* (as La nuova capricciosa), *Tco**

Il barbiere di Siviglia (dg, 4, G. Petrosellini), Dresden, Hof, April 1816, *B-Bc**, *D-Dl*, *Mbs*, *I-Fc* (as Il nuovo barbiere di Siviglia), *Nc*, *PEl*

La semplicetta di Pirna (dramma per musica, 2), Dresden, Hof, Aug 1817, *D-Dl**, *I-Fc*

Boadicea (dramma per musica, 2, G.B. Bordesi), Naples, S Carlo, 13 Jan 1818, *F-Pn*, *I-Nc**

Gianni di Parigi (melodramma comico, 2, F. Romani), Milan, Scala, 29 May 1818, *D-Dl*, *F-Pn*, *I-Fc*, *Mc*, *Mr**, *Nc*, *Vt*

Donna Aurora, ossia Il romanzo all'improvviso (melodramma comico, 2, Romani), Milan, Scala, aut. 1821, *IE**

Tebaldo e Isolina (melodramma eroico, 2, G. Rossi), Venice, Fenice, 4 Feb 1822, *D-Dl*, *Mbs* (2 copies), *E-Mm*, *F-Pn*, *I-Bc**, *Fc* (2 copies), *Nc*, *OS*, *PLcon* (Act 1 only), *Vc*, vs (Leipzig, 1823)

La gioventù di Enrico V (opera comica, 2), Pillnitz, nr Dresden, Aug 1823, *D-Dl*, *GB-Lcm**

Ilda d'Avenel (melodramma eroico, 2, Rossi), Venice, Fenice, 20 Jan 1824, *I-MOe**, *Vt*

I saraceni in Sicilia, ovvero Eufemio di Messina (melodramma serio, 2, Romani), Venice, Fenice, 28 Feb 1828, *Mr**, *Vc*, *Vt*; as Il rinnegato, Dresden, Hof, March 1832, *F-Pn*, *I-PEl**

Colombo (melodramma serio, 2, Romani), Genoa, Carlo Felice, 21 June 1828, *D-Dl**, *I-Gl**

Don Desiderio, ovvero Il disperato per eccesso di buon cuore (melodramma buffo, 2, B. Morelli), Dresden, Hof, aut. 1829, *Mc**, *PEl*

Francesca da Rimini (melodramma serio, Romani, after Dante: *Commedia*), inc., *PEl**, ov. (Florence, 1878)

Laurina alla corte, inc. (Introduction only, in Budapest Kutatoközpont, fondo Nemzeti Zenede*)

BIANCAMARIA BRUMANA

Morlaye, Guillaume (*b* ?Paris, *c*1510). French lutenist, editor and composer. He lived in Paris and was active as a 'marchant et joueur d'instruments' from 6 August 1541 when he took on an apprentice and agreed to teach him the viol and the lute. He maintained a variety of commercial interests; in 1548 he was involved in slave-trading and between 1549 and 1553 he dealt in engravings. On 13 February 1552 he obtained from Henri II a ten-year privilege to print, or have printed, music by his teacher, Alberto da Ripa, and tablatures for guitar, spinet and other instruments. On 19 April Michel Fezandat made an agreement with him to bear the whole cost of printing in return for half the proposed 1200 copies; Morlaye had simply to provide corrected proofs. The collaboration proved fruitful and during the next six years Fezandat printed under Morlaye's privilege three guitar (or cittern) books and four lutebooks, and the partbooks of two collections of four-voice psalms. Morlaye's voice, lute playing and Christian charity were praised in poems by Jacques Grévin published in 1560; Grévin also praised the lute playing of Morlaye's daughter, Antoinette. Apart from the collection for soprano and

lute arranged from psalm harmonizations by Certon, Morlaye's intabulations are varied; they usually include a few opening *fantaisies* (short chordal pieces in rambling style), transcriptions of secular and sacred chansons (mostly of four-voice pieces by Parisian composers of the preceding decade, e.g. Sandrin, Janequin, Mithou), a few frottolas, *villanesche*, madrigals and motets; the largest group consists of dances, mainly galliards, pavanes, branles and allemandes, and includes some sets of variations on grounds such as the 'Hornepype d'Angleterre' and 'Conte Clare'.

Although Morlaye's name disappears from Parisian documents after 1560, his signature is inscribed on the cover of a choirbook manuscript containing polyphonic masses, motets and chansons by French composers of the early 16th century, to which have been added various pieces in French lute tablature that must have been copied in the 1560s or 70s. This manuscript (*S-Uu* vok.mus.76b) was copied in the same hand as others presently in Uppsala (*S-Uu* vok.mus.76c, *Uu* vok.mus.87 and *Uu* instr.mus.412) which contain lute intabulations of chansons or airs in the same hand. These one hundred or so lute pieces include preludes, fantasias, dances, a few airs and many ornamented transcritions of chansons, motets or psalms by Janequin, Sandrin, Costeley, La Grotte, Lassus and Bertrand; they accord with the style of Morlaye's published music and could indeed have been composed or arranged by him. However, two pieces are specifically ascribed to H[e]dinthon and others are known to be by Valderrábano or Borrono.

WORKS

published in Paris

Editions: *Guillaume Morlaye: Oeuvres pour le luth*, ed. M. Renault (Paris, 1980)
Guillaume Morlaye: Oeuvres pour le luth II: manuscrits d'Uppsala, ed. J.-M. and N. Vaccaro (Paris, 1989)

INTABULATIONS

lute

Premier livre de tabulature de leut, contenant plusieurs chansons, fantasies, pavanes et gaillardes, composées par maistre Guillaume Morlaye joueur de leut, et autres bons autheurs (1552[34])
Premier livre de psalmes mis en musique par maistre Pierre Certon ... reduitz en tabulature de leut par maistre Guillaume Morlaye, 1v, lute (1554); ed. R. de Morcourt (Paris, 1957)
Second livre de tabulature de leut, contenant plusieurs chansons, fantaisies, motetz, pavanes et gaillardes: composées par maistre Guillaume Morlaye (1558[18])
Troisiesme livre de tabulature de leut ... par maistre Guillaume Morlaye (1558[19])

guitar

Le premier livre de chansons, gaillardes, pavanes, bransles, almandes, fantaisies, reduictz en tabulature de guiterne par maistre Guillaume Morlaye (1552[32])
Quatriesme livre contenant plusieurs fantasies, chansons, gaillardes, paduanes, bransles, reduictes en tabulature de guyterne, et au jeu de la cistre, par maistre Guillaume Morlaye, et autres bons autheurs (1552[33]) (incl. 27 works by Morlaye)
Le second livre de chansons, gaillardes, paduanes, bransles, almandes, fantasies, reduictz en tabulature de guiterne, par maistre Guillaume Morlaye joueur de leut (1553[34])

EDITIONS

Premier livre de tabulature de leut, contenant plusieurs chansons et fantasies, composées par feu messire Albert de Rippe de Mantoue (1552[36])
Second livre de tabulature de leut, contenant plusieurs chansons, motetz et fantasies, composées par feu messire Albert de Rippe (1554[34])
Troisieme livre de tabulature de leut ... par feu messire Albert de Rippe (1554[35])
Quatriesme livre de tabulature de leut ... par feu messire Albert de Rippe (1554[36])
Cinquiesme livre de tabulature de ... par feu messire Albert de Rippe (1555[36])
Sixiesme livre de tabulature de leut, contenant plusieurs chansons, fantasies, motetz, pavanes, et gaillardes composées par feu messire Albert de Rippe (1558)

Premier livre de psalmes et cantiques en vulgaire françoys (1552[3])
Second livre de psalmes et cantiques en vulgaire françoys (1553[18])

FRANK DOBBINS

Morley, Angela [Stott, Wally; Stott, Walter] (*b* Leeds, 10 March 1924). English composer, arranger and conductor, active in the USA since the 1970s. Morley – a transsexual, known until the early 1970s as Wally Stott – played the clarinet and saxophone in dance bands, notably with the bandleader Geraldo (1944–8). She began to write band arrangements, influenced by Robert Farnon, and studied composition with Seiber (1947–50) then Hugh Wood (1966–7) and conducting with Walter Goehr (1949). While composing for BBC radio and TV in the 1950s and 60s, including the music for *Hancock's Half Hour* and *The Goon Show*, she arranged for Philips Records and was a conductor and arranger for singers such as Frankie Vaughan, the Beverley Sisters and Shirley Bassey.

Since the early 1970s she has worked mainly in film music; among her scores is that for the animated film *Watership Down* (1978). She has received two Academy Award nominations for her work as an arranger and composer of additional music for *The Little Prince* (1974) and for her score for *The Slipper and the Rose* (1976). She has also composed music for popular American television series, including *Dallas*, *Dynasty* and *Cagney and Lacey*, has orchestrated parts of such films as *Star Wars* (1977), *Superman* (1978) and *The Empire Strikes Back* (1980), and has written many arrangements for the Boston Pops. As an arranger her film work is characterized by inventive and judiciously colourful orchestration. Between 1974 and 1989 she frequently conducted the BBC Radio Orchestra. Her concert music includes *Tehuantapec* for chorus and orchestra (1965) and *Romance* for cello and orchestra (1976). Her principal publishers are April Music, Carlin Music, Chappell and Warner Bros Music.

MARIE FITZPATRICK

Morley, Thomas (*b* Norwich, 1557 or 1558; *d* London, early Oct 1602). English composer, editor, theorist and organist. He was the most influential figure, as writer and editor as well as composer, in the Elizabethan vogue for

the Italian madrigal, which reached its peak during the eight years in which his works first appeared in print (1593–1601). Although a taste for madrigalian music can be discerned in England for a much longer period, it was Morley who appears to have been chiefly responsible for grafting the Italian shoot on to the native stock and initiating the curiously brief but brilliant flowering of the madrigal that constitutes one of the most colourful episodes in the history of English music.

1. LIFE. A note, 'Thomas Morley aetatis suae 19 an° Domini 1576', appended by John Sadler to one part of his copy of *Domine, non est exaltatum cor meum* (*GB-Ob* Mus.Sch.E.1–5), is the sole record of Morley's date of birth. According to Watkins Shaw his father was a Norwich brewer named Francis Morley, who may also have been a verger at the cathedral between 1562 and 1566. It is reasonable to suppose that Thomas was a chorister there, but the first surviving record connecting him with the cathedral is a patent of reversion from the dean and chapter, dated 16 September 1574, promising him the position of master of the choristers (including the duties of organist) when it was vacated by its current occupant, Edmund Inglott. The post was at various times before and after promised to others, including the author Thomas Tusser and Inglott's son, William. But when Inglott died early in 1583 it was indeed Morley who succeeded him.

Morley's early life, however, cannot all have been spent in East Anglia. When he came to publish *A Plaine and Easie Introduction to Practicall Musicke* in 1597 he dedicated it to Byrd, whom he addressed as his master. We cannot know when or for how long Morley studied under Byrd: Shaw suggested from about 1572 to 1574, between the time his voice broke and the reversionary grant mentioned above, and he cited a special payment made to 'domino Morley' in 1575–6 as evidence that he was resident in Norwich at that time, perhaps as a lay clerk at the cathedral. However long or short that period of study, it nevertheless formed his initial habits of musical thought. These are most clearly evident in his Latin motets and Anglican church music and in the relatively small amount of his surviving instrumental music, but they also affect his response to the Italian idiom in a number of interesting ways.

In May 1587 Morley's house and chambers at Norwich were leased to one Thomas Brown, and the last payment to him as cathedral organist was made in July of that year. The next certain records of him are that he graduated BMus at Oxford on 8 July 1588 and that a son, Thomas, was buried on 14 February 1589 at St Giles, Cripplegate, London. The parish register describes Morley as 'organist'. The fact that he was so at St Paul's is made clear by a reference in the printed text of the Elvetham entertainment (1591), during which the queen 'gave a newe name unto one of their Pavans, made long since by master Thomas Morley, then organist of Paules church'.

It must have been before his promotion to St Paul's that Morley began to digest more fully, and perhaps to imitate, the Italian manner he so energetically promoted during the following decade. He may have been encouraged by the presence at Thorpe-by-Norwich of a musically educated squire, Edward Paston, who owned a considerable collection of books and music. Many of his manuscript partbooks survive, several of them devoted exclusively to Italian madrigals. The connection between the two men is not entirely fanciful, for in a letter dated 3 August 1587 to the 4th Earl of Rutland, a kinsman by marriage, Paston recommended as someone to teach his daughters the virginal the unnamed bearer who, he wrote, 'was placed at Norw*i*ch Organest, And by my p*er*swacion, he hath left his rome to come to your L.'. The date, just after Morley's last Norwich payment, and the wording suggest very strongly that the person in question ('such as in my Judgem*e*nt yo*u*r L. shall hardlie get the like') was no ordinary parish church organist but Morley himself, who may have spent up to a year with the family before going to St Paul's.

Another reason for Morley's friendship with Paston and, as Shaw pointed out, for his desire to leave the puritanically inclined establishment at Norwich may have been his Roman Catholic leanings. These come to light in a correspondence between the notorious Charles Paget, a Catholic intriguer and double agent, and Thomas Phellippes, secretary to Sir Francis Walsingham. In a letter from the Low Countries dated 3 October 1591 Paget indicated not only that Morley (like Alfonso Ferrabosco (i)) was employed as a spy for the government but also that there was some reason for Catholics to trust him as a genuine believer, 'reconciled' (i.e. reconverted) to the Roman church. The passage reads as follows:

Ther is one Morley that playeth on the organes in poules that was with me in my house. He seemed here to be a good Catholicke and was reconsiled, but notwith-standing suspecting his behaviour I entercepted letters that Mr. Nowell [possibly Dean of St Paul's or Henry Nowell the courtier whose elegy concludes the *Canzonets* of 1597] wrote to him Wherby I discovered enoughe to have hanged him. Nevertheles he shewing with teares great repentaunce, and asking on his knees forgiveness, I was content to let him goe. I here since his comming thether he hath played the promoter and apprehendeth Catholickes.

Phellippes's draft reply confirms Morley's activity: 'It is true that Morley the singing man employeth himself in that kind of service ... and hath browht diverse into danger'.

Morley was sworn in as a Gentleman of the Chapel Royal on 24 July 1592. Coming hard on the heels of the above events, the appointment may be interpreted as a reward for political services as well as an acknowledgment of musical excellence. In November of the same year the Cheque Book records his promotion from Epistler to Gospeller.

In 1593 appeared the first of the 11 publications on which Morley's subsequent reputation rests. During this last and most productive period of his life and at least from 1596, he lived in the parish of St Helen's, Bishopsgate. The dedication of the *Canzonets* of 1595 to Lady Periam suggests that Morley may have married again at this time. The contents were 'destinated by my Wife (even beefore they were borne) unto your Ladiships service ... not being able as heertofore still to serve you'. She is named as Suzan in the parish registers recording the birth of a daughter, Frauncys (19 August 1596), who was buried on 9 February 1599, a son, Christopher (26 June 1599), and a daughter, Anne (28 July 1600). In the first of these entries Morley is described as a 'Musitian', in the others as 'gent.', a status he would seem to have attained by the valuation of his property at £5 in the Rolls of Assessments for Subsidies dated 1598 and 1600, a sum indicating a fair standard of middle-class prosperity. Shakespeare, living in the same parish, was similarly assessed in the 1598 document. The possibility of a

connection between the two men has been the subject of much speculation. All that is known for certain is that Morley set a Shakespeare lyric, 'It was a lover and his lass', which was published in *The First Booke of Ayres* (1600). There is no evidence one way or the other that the setting was used in a production of *As You Like It*. And in spite of many ingenious attempts to wed the lyric from *Twelfth Night* to the tune in the *First Booke of Consort Lessons* (1599), 'O mistress mine, where are you roaming?' refuses to fit the popular song which, as Tomkins's list (in *F-Pc* Rés.1122) conveniently explains, is entitled 'O mistress mine, I must'.

In later years Morley was much involved in printing and publishing. The monopoly over music printing that Byrd had held expired in 1596. In a letter of 23 July 1598 to Sir Robert Cecil, Morley petitioned that the new monopoly, for the receipt of which he was prepared to offer half the proceeds to Christopher Heybourne, Ferdinando's brother, should cover 'all, every and any music'. It seems that he had his eye not on such peripheral matters as ruled paper ('it will be little worth') or even partbooks ('the bounteous reward of your Honour to me [for the dedication of the *Balletts* of 1595] was more worth to me than any book or books whatsoever') but on the lucrative business in metrical psalm books. He was granted the patent on 28 September 1598 and accordingly arranged that the first publications issued under his control should include a metrical psalter with music by Richard Allison (and with an extract from the patent figuring prominently among the preliminaries) and a pocket psalter issued by Barley, differing little from that of Thomas East (1592) save for a few new settings, among them four by Morley himself. The Stationers' Company, with which the patent was registered on 6 October 1598, itself held a patent for the psalter, assigned to John Day, and there ensued a battle between the composer and the printer in which even the Bishop of London failed to arbitrate. But the House of Commons took up the whole issue and ruled in 1600 that no further monopoly on music would be granted after the expiry of Morley's patent. Some information about the operation of the patent emerges from the lawsuit over the printing of Dowland's *Second Booke of Songs* (1600) by Thomas East, to whom on 19 May 1600 Morley assigned rights under the patent for a period of three years. Eastland, the publisher, paid Morley and Heybourne 40s. before printing began; and afterwards he had to find another £9 10s., almost as much as the total cost of East's labour.

On 7 October 1602 George Woodson was sworn in as a Gentleman of the Chapel Royal 'in Thomas Morley's room'. Some writers have suggested that Morley resigned from the chapel at this time on account of the increasing ill-health to which he refers in the *Plaine and Easie Introduction* (1597) and again in the preface to the *First Booke of Ayres* (1600). The appearance of his name on the title-page of Dowland's *Third and Laste Booke of Songs* (1603) and the republication of the 1593 *Canzonets* in 1606 with 'some Songs added by the Author' have been taken to support the conclusion that he died at some later date before 1608, when Weelkes included in his *Ayres* a 'Remembrance of my friend M. Thomas Morley', *Death hath deprived me of my dearest friend*. Yet there is no indication of anyone else's having left the Chapel Royal in such a manner, posts there being held (often long past a time when the occupant could be expected to serve usefully) for life; and the references in 1603 and 1606 are misleading, the first being the result of the three-year contract with East, the second copied from the title-page of the 1602 edition. The question is most likely resolved by the discovery during research for this entry in the Act Book of the London Archdeaconry Court (*GB-Lgc* 9050/3, f.165*r*) of letters of administration dated 11 October 1602 to 'Suzunne Morley'. The parish named is that of St Andrew's, Holborn, rather than St Helen's, Bishopsgate, and there are many other Thomas Morleys in the city records of the time; but the widow's first name and the proximity of the date to that of the Chapel Royal reference seem more than mere coincidences, and it is reasonable to assume in the absence of further evidence that the musician died early in October 1602.

2. Works. Morley's musical activities were both more extensive and more varied than those of most English composers of the period. As a composer he evidently tried to emulate his master, Byrd, in the variety of forms and styles he cultivated. His earliest known works are, not surprisingly, two motets, *Domine, Dominus noster* and an ambitious full-scale psalm setting, *Domine, non exaltatum cor meum*; they date from 1576 and clearly reflect the influence of the recently published *Cantiones sacrae* of Byrd – indeed, Morley literally transcribed the last five breves of Byrd's *Libera me, Domine, et pone me* for the conclusion of *Domine, Dominus noster*. Another five-part motet, *Gaude Maria virgo*, is a reworking of a piece by Peter Philips, as Lionel Pike has shown. The four motets in the *Plaine and Easie Introduction* show Morley in more complete control of his material, and the two six-part pieces ascribed to him in Thomas Myriell's manuscript anthology *Tristitiae remedium* (1616) are very impressive indeed. Weelkes imitated one of them, *Laboravi in gemitu meo*, not realising that it was, in fact, by Philippe Rogier (see Phillips, 1982), Morley having perhaps edited it a little.

If the Latin music is serious and weighty, the English sacred music is barely recognizable as the work of the master of the light madrigal and canzonet. Nowhere is the contrast more striking than in *Nolo mortem peccatoris*, a macaronic carol cast in the severe Edwardian anthem mould of Tallis and Tye. Indeed, its style is sufficiently archaic for a shadow of doubt to linger around Myriell's ascription of the piece to Morley. By contrast, the funeral sentences, though ostensibly in the same style, are worlds removed in terms of melodic and harmonic fluency; a late-Elizabethan graciousness shines through their restraint. The five-part full service ('The Three Minnoms') is modelled on Byrd's Third Service; the Short Service has close links to Byrd's Short Service, especially in its seting of the *Nunc dimittis*; and much of the verse music is similarly Byrdian in manner, particularly the lovely *Out of the deep*. Morley's largest service is unusual in comprising some full movements (*Venite*, Kyrie and Creed), a *Te Deum* and Benedictus with some solo passages, and a *Magnificat* and *Nunc dimittis* in an ornate verse style to some extent free of Byrd's influence but still, in contrast to the comparable service by the more ambitious and less skilful Edmund Hooper, Morley's contemporary, a model of the traditional Anglican values of simplicity and clarity.

The keyboard compositions are again reminiscent of Byrd, but here the pupil falls far short of the master. There is a charming alman and a good set of variations

on *Go from my window* (Irving, 1994, argues convincingly against its alternate ascription to John Mundy, allowing that Mundy may have composed the extra variation in the version attributed to him in the Fitzwilliam book, as Dart suggested). But the Quadro Pavan (a mere two statements of the bass with decorated repetitions) is typical in not sustaining a promising opening; and the popularity of the Pavan in F (set by Farnaby and also included in Rosseter's *Lessons for Consort* as Southerne's Pavan) is inexplicable in view of its clumsy phrasing and lifeless divisions. The pavan that appears in Robert Dowland's *Varietie of Lute Lessons* (1610) was set for keyboard by 'Mr Heybourne', the brother, Ferdinando, of the courtier with whom Morley shared the profits of the printing monopoly, and for consort by Peter Philips: perhaps it was the pavan from the missing pavan and galliard for lute in the *First Booke of Ayres* (1600), but Heybourne and Philips each pairs it with a different galliard. Morley's contribution to instrumental ensemble music consists primarily of the important *First Booke of Consort Lessons*, containing pieces arranged for the specifically English consort of treble and bass viols, flute, lute, cittern and pandora. Unlike Rosseter, Morley omits to acknowledge the original composers, and only one of the pieces, an arrangement of *See, see, myne owne sweet jewell* entitled *Joyne hands*, can definitely be attributed to him. The pieces without words in the *Canzonets* of 1595, though each entitled 'fantasie', are identical to the texted pieces in style and are not specifically designated as instrumental; they were no doubt primarily intended for use as solmization songs. A fantasy entitled *Tow Trebels* appears in its source (*GB-Lbl* 37402–6) immediately after an anonymous piece in the same style that may also have been written by Morley; both may derive from vocal models.

If none of this 'English' music had survived, Morley's reputation would remain undiminished by virtue of his madrigalian works. Yet his achievement in connection with the Italian style does not depend upon his ability simply as a composer but also as an editor, translator, arranger, propagandist and entrepreneur, roles which are all reflected in his publications. As editor and translator he produced two anthologies of Italian music of the lighter sort in 1597 and 1598, and in 1595 he published in simultaneous English and Italian editions a book of canzonets and one of balletts that are largely 'arrangements' of popular Italian pieces by Felice Anerio (*Canzonette a 4 voci*, 1586) and Gastoldi (*Balletti*, 1591) respectively. The *Consort Lessons* of 1599, as mentioned above, is another exercise in the art of arranging, this time of English popular music, much of it associated with the theatre and the dance floor. The *Plaine and Easie Introduction* of 1597 is, among other things, a colourful piece of propaganda for Italian music, and a measure of its success in this regard is the degree to which posterity has adopted the notion of a brilliant Elizabethan musical achievement arising mainly from the adoption by English composers of Italian styles, a view that only belatedly came fully into question during the late 20th century. Finally, there are what may be called his entirely original works, though again some of their contents are heavily indebted to models, and the derivation of other pieces will no doubt be discovered. The *Canzonets to Three Voyces* (1593) and *Madrigalls to Foure Voyces* (1594) are the most successful in terms of the complementary balance between Morley's individuality as an artist and his remarkable synthesis of Italian style and English training. The pieces in *Canzonets to Five and Sixe Voices* (1597), which are often expansive to the point of losing the focus and conciseness of the earlier works, make a gesture in the direction of yet another contemporary musical fashion by including a lute accompaniment to the majority of pieces. It is no surprise, therefore, to find Morley turning to the lute air for his last effort, and even though he confesses himself 'no professor thereof, but like a blind man groping for my way' in the preface to *The First Booke of Ayres* (1600), one or two of the songs, including the Shakespeare setting, are among the most delightful in the repertory.

It seems almost as though Morley sought by sheer effort to transform the musical world bequeathed to him by Byrd, and before his comparatively early death he had to a large extent achieved his aims, by stimulating an enormous musical fashion that he himself, always with an eye to business, was already in process of deserting for new and potentially more profitable ventures. It is fitting, however, that his list of publications concludes with *The Triumphes of Oriana* (1601), a collection of madrigals by 23 musical compatriots that Morley most probably conjured into being some time in the late 1590s as an entertainment to honour his queen and to enhance his (and the madrigal's) cause. It is perhaps significant that, of his two contributions to the collection, *Arise, awake* was a rearrangement of *Adiew, adiew, you kind and cruel* from the *Canzonets* of 1597, and *Hard by a cristall fountaine* a rewriting of Croce's *Ove tra l'herbe e i fiori*, which had come from *Il trionfo di Dori* – the collection on which *The Triumphes* was modelled – by way of Yonge's second *Musica transalpina* (1597). And yet here as elsewhere the accusation of plagiarism must be resisted, for the 16th century saw nothing wrong in imitation and borrowing but considered them, on the contrary, normal artistic practices. In this case, as Kerman aptly remarked (1962, p.209), 'Morley's composition, *using identical material*, has life and breadth, and is actually more true to the madrigal ideal which with Croce was already stale'; for Morley, like Handel and other great borrowers, often took full and confident possession of what he borrowed and added considerable musical interest to the loan.

Morley, then, was the true begetter of the English madrigal and the greatest influence on its subsequent development. Yet, as has been pointed out, he was not a 'madrigalist' in the strictest sense of the word, for although in the *Plaine and Easie Introduction* he showed himself fully conversant with all the Italian forms and with the aesthetic considerations behind them, in his own work he favoured the light canzonet style and rarely ventured beyond the less serious kind of madrigal. Within these limits he paradoxically tended to elaborate and develop his material, often for purely musical reasons, in a manner that his Italian contemporaries might not have understood but that his master Byrd would at least have appreciated. This can be seen by comparing his arrangements with their models: *Sing wee and chaunt it*, for instance, enlivens Gastoldi's penny-plain *A lieta vita* by numerous small touches of the most musical kind; but when Morley goes further, as in *What saith my daintie darling?*, based on the same composer's *Piacer, gioia*, the simple delicacy of the original tends to be lost in the welter of counterpoint and harmonic detail. The comparative stodginess of the

1597 *Canzonets* ultimately results from this very tendency to carry each contrapuntal idea a little too far and in the process to diffuse (and therefore defuse) what is ideally a pithy, epigrammatic style.

Morley's lack of interest in dramatic effects, chromatic harmony and even in word-painting of more than an elementary and perfunctory kind places him in sharp contrast to Weelkes and even to the Byrd of the 1589 and 1591 *Cantiones sacrae*. *Deep lamenting* is perhaps his most extremely expressive piece. The refined understatement and subtle treatment of verse that marks the work of Wilbye is also beyond him. The only genre in which he could sustain musical invention successfully over a large stretch is the narrative madrigal (e.g. the marvellous *Hoe, who comes here?*), which seems to have been an original conception. Yet to label him a 'conservative' is, as usual in the case of so talented a composer, to miss the point. It is not even a question of his falling back on an undemanding idiom, but, like Byrd, of his making a positive choice about the way of setting poetry to music that, given the nature of the verse, satisfied the primary criterion of appropriateness or decorum (and incidentally may have won him Byrd's permission to publish). And still today it is the restraint and balance of his settings that guarantee them serious critical consideration while their exuberance and exquisite grace win them affection. Where else in the whole body of English madrigals is there a piece that better exemplifies these virtues than the deservedly well-known *Aprill is in my mistris face*? Morley's strength as a composer, then, lies largely in his sense of style rooted in a surely self-imposed restraint (that Weelkes, for instance, rarely exercised), and it is perhaps not surprising that his energy, which despite illness must have been immense, spilled out in so many other directions. Yet though he had a considerable effect on his successors, and though the discovery of further 'hidden' editions of his sets in the early 17th century provides solid evidence of his initial popularity, nothing is more poignantly expressive of the short life of the movement he initiated and the values he represented than the pointed avoidance of his work by the Jacobean anthologists. It is to the gloomy motets that Myriell paradoxically turned for 'tristitiae remedium', rather than to the gay, graceful and more polished works of the printed sets.

One work that has kept Morley's name constantly before the musical public is *A Plaine and Easie Introduction to Practicall Musicke*, perhaps the most famous musical treatise in the English language. The research it entailed must have been immense; and the lengthy passages on obsolescent matters show that Morley was not entirely willing to spare the reader the pains and labour he himself bemoans in the preface. (The absence of any detailed account of the modes is an intriguing exception, as several writers have pointed out.) In many cases his discoveries led him to take up the cudgels against traditional English practices, and in matters of notation, for instance, he appears to have had an effect in changing the practice of East's printing house. The book is indeed based largely on the authority, and sometimes the very examples, of authors who are mostly but not always acknowledged (see Harman's edition for the details). Yet Morley's method of presenting his material is original and well-considered and his literary style delightful. The book is also, as its title-page boasts, eminently practical – from its division of the material into three sections, with the thornier problems relegated to appendices, to its examples brilliantly constructed to show the pitfalls into which the student of counterpoint habitually falls. Byrd's teaching, as Morley acknowledged, must be reflected on many of its pages, however little the master can have shared his pupil's enthusiasm for all manifestations of Italian musical art. Above all, the book is lively and passionate in manner, written from a refreshingly sceptical point of view that finds expression, for instance, when the pupil Philomathes is confronted with a particularly obscure and difficult table taken from Gaffurius's *De proportionibus musicis*: 'As for musick, the principal thing we seek in it, is to delight the eare, which cannot so perfectly be done in these hard proportions, as otherwise'.

PHILIP BRETT (with TESSA MURRAY, bibliography)

Morley, William (*d* London, 29 Oct 1721). English composer. On 17 July 1713 he took the Oxford degree of BMus along with John Isham. Both appear to have been subordinate colleagues of William Croft, who, together with Pepusch, took his doctorate a week earlier. Having been a supernumerary Gentleman of the Chapel Royal

since January 1712, Morley was formally sworn in on 8 August 1715, when, with royal approval, another four singers were added to the establishment. He is remembered because of the faint interest attaching to his putative authorship of an early instance of the Anglican double chant. Boyce's *Cathedral Music* (1760–73; ii, 306) includes an anonymous double chant in D minor, which Joseph Warren in his edition of Boyce (1849; iii, 471) attributed to William Morley without naming his authority and with an inaccurate biographical note (ibid., 31). The source of the chant given by Boyce has not been discovered; it appeared in *Cathedral Chants* (ed. A. Bennett and W. Marshall, London, 1829), where it was 'said to be' by Thomas Morley but 'more probably' by William Morley. Morley collaborated with Isham in composing *A Collection of New Songs* (London, 1706), to which he contributed six pieces; his most substantial work, however, is the ode in honour of Queen Anne, *Let the shrill trumpet's loud alarms* (score and parts in *GB-Ob*), which probably was his BMus exercise.

Morley-Pegge, Reginald (Frederick) (*b* London, 17 Jan 1890; *d* Cobham, Surrey, 1 June 1972). English horn player and scholar. His aptitude for brass instruments revealed itself during his schooldays, and at 21 he entered the Paris Conservatoire, taking the conducting class and studying under Brémond, who had revived the teaching of valve-horn there in 1896. Though trained on the French valved instrument, to which he remained faithful until quite late in life, Morley-Pegge became an acknowledged master of hand-horn technique, which he regarded as indispensable. During a long career he played in many leading orchestras in Paris and elsewhere; the style and integrity of his playing were much admired. In his Paris days Morley-Pegge recatalogued and photographed the wind instruments of the Conservatoire collection. He was a founder-member of the Galpin Society and contributor to its journal, but his main contribution to scholarship was *The French Horn* (London, 1960, 2/1973); his profound knowledge of the literature and history of his instrument commanded world-wide respect.

Mornable [de Mornable], **Antoine** [Anthoine] (*b* ?*c*1515; *fl* 1530–53). French composer. He was active in Paris. After serving as a chorister at the Ste Chapelle until his voice broke, he was educated at the expense of the canons there between December 1530 and December 1532. His first works were printed by Attaingnant in 1534; the same publisher issued a volume of 25 Latin motets and a book of 17 French psalms in 1546. Both volumes refer to the composer as 'de Mornable', but this form is not found in subsequent anthologies. The title-page of the motets designates him 'most learned musician', but the book of psalms specifies that he was *maître de chapelle* and valet to Count Guy XVII of Laval, a Protestant sympathizer.

Mornable also wrote 43 chansons which were published in collections, mostly by Attaingnant, between 1538 and 1553. The majority are courtly pieces in the style of Claudin de Sermisy and show Mornable's penchant for setting *épigrammes*. An increasing preference for homophony, already illustrated in the psalms of 1546, can be seen in the two *airs* of 1553, *Je ne me confesseray point* and *Je ne sçay que c'est qu'il me fault*, both of which contrast sections in duple and triple metre with great charm.

FRANK DOBBINS

Mornington, Garret Wesley, 1st Earl of (*b* Dublin, 19 July 1735; *d* Kensington, 22 May 1781). Irish composer. His father, Richard Colley (Cowley) (*c*1690–1758), came from an established family of Anglo-Irish landowners, and changed his surname to Wesley on being made heir of Dangan Castle by a distant cousin, Garret Wesley. He named his son after his benefactor. (The surname was not changed to Wellesley until after the death of the 1st Earl.) The father was created Baron Mornington in 1746, and on his death on 31 January 1758 the son inherited the barony. He was created Earl of Mornington and Viscount Wellesley on 2 October 1760: it is said that he owed this honour to his musical talent, which had gained him the favour of George III. His second son was the great Duke of Wellington, who was a talented violinist in his youth, but deliberately broke his fiddle when he thought it might distract him from his career. There is no evidence to connect this family with that of John Wesley.

Mornington's father 'played well (for a gentleman) on the violin', and the boy showed a precocity which attracted the notice of Daines Barrington, who later compared him with Mozart, Samuel Wesley and Crotch. In 1748 Mrs Delany wrote:

> My godson, Master Wesley, is a most extraordinary boy; ... he is a very good scholar, and whatever study he undertakes he masters it most surprisingly. He began with the fiddle last year, he now plays everything at sight; he understands fortification, building of ships, and has more knowledge than I ever met with in one so young.

He also demonstrated early ability in playing the organ and the harpsichord, and in composition. He entered Trinity College, Dublin, in 1751, graduating BA in 1754 and MA in 1757. In the latter year he founded an amateur musical society in Dublin called the Academy of Music which became well known for its charitable concerts. He was also elected to the Irish House of Commons as member for Trim, but left the following year to take his

father's place in the House of Lords. In 1764 he was made MusD and elected the first professor of music in the University of Dublin, a post he retained until 1774. The latter part of his life was spent mostly in London.

As a composer Mornington is known chiefly for his glees, most of which were first published posthumously in collections. The Catch Club of London awarded him prizes in 1776, 1777 and 1779, the last for *Here in cool grot*, which became his most popular piece. His glees are among the most smoothly melodious of their period: two of the best are *Come, fairest nymph* and *When for the world's repose my Chloe sleeps*. Mornington also wrote three madrigals, which show at least a superficial connection with the Elizabethan madrigal. All his part-songs show a due sensitivity to word-setting, though their phrase structure is influenced by that of instrumental music.

Among the unpublished music is a cantata, *Caractacus*, to a text by William Mason. The statement that he wrote cathedral music for St Patrick's Cathedral, Dublin, and that it is preserved there, is found in earlier editions of *Grove* and other reference books, but seems to be a myth (see Bumpus, p.113). His double chant is the only composition still in regular use, but in a debased form; the original version (ibid., p.92) is in its cool serenity among the best of Anglican chants.

NICHOLAS TEMPERLEY

Moro [da Viadana], **Giacomo** [Mori da Viadana, Jacobi] (*b* Viadana, nr Mantua; *fl* 1581–1610). Italian composer. He may have been a Servite monk. According to title-pages he worked in Viadana in 1581, in Bologna in 1599 and in Fivizzano, near Carrara, in 1604. His two earliest volumes were secular (canzonets and madrigals respectively), and he then produced two collections for liturgical rites, Vespers and the Office of the Dead. He is better known, however, for the collections of *Concerti ecclesiastici* that appeared after the turn of the 17th century, in which he followed close upon the heels of Viadana (a colleague from the same town) in experimenting with the new concertato style for a small number of voices with indispensable basso continuo. His 1604 collection is a particularly practical compendium including a *Magnificat*, Compline music, a mass on Giovanni Gabrieli's *Lieto godea*, a Litany of the Santa Casa, Loreto, and some motets, all for double choir, as well as in a more up-to-date style pieces for one to four voices and organ (these include a *Magnificat* too, for two voices); there are also two four-part canzonas for instruments.

JEROME ROCHE

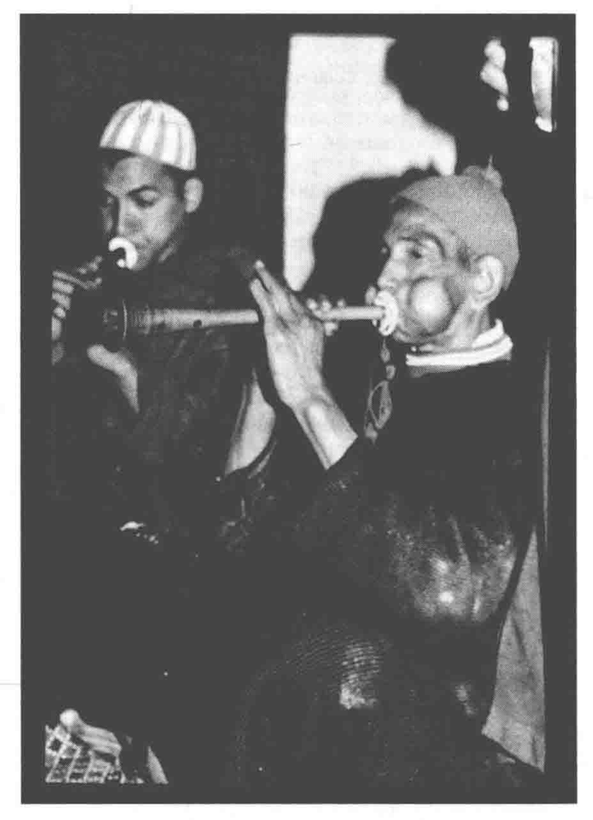
Moro, Il. *See* RATTI, BARTOLOMEO.

Morocco, Kingdom of (Arab. Mamlaka al-Maghrebia). Country in north-west Africa. It lies in the north-west corner of the continent, flanked by the Atlantic ocean and the Mediterranean. Four mountain ranges – the Rif, Middle-Atlas, High-Atlas and Anti-Atlas – divide the kingdom into distinct ecological and cultural zones. These include the different mountain regions themselves, the fertile plains of the Atlantic coast, dry steppe to the east of the Middle-Atlas, and the Sahara desert to the south and east of the High- and Anti-Atlas. This geographical position and topological variety have contributed to great cultural diversity. Many Moroccan musical styles and areas, including the Rif mountains, the Jbala region north of Fez and the desert region of the deep south, have yet to be studied in depth.

I. Introduction

The many varieties of Moroccan music draw on several separate musical cultures from the Middle East, Africa and southern Europe. The indigenous Berber peoples, who have inhabited North Africa for at least 2500 years, are generally divided into three groups: Tarifit-speakers (in the Rif mountains), Tamazight-speakers (Middle-Atlas) and Tashlhit-speakers (High-Atlas, Anti-Atlas and the desert beyond). Half the Moroccan population speaks some variety of Berber.

Arabs moved into Morocco from the first wave of Muslim expansion in the 7th century CE onwards; large-scale migration of eastern Arabs occurred in the 11th century. Arabs settled in the cities and plains, eventually becoming the dominant political and economic force in the country. Almost all Berbers converted to Islam and either assimilated themselves into Arab society or withdrew into the mountains. Moroccan culture was influenced by the Muslim courts of medieval Spain (8th–15th centuries), especially when Muslim and Jewish refugees left Spain under pressure from Catholic armies. Since the 10th century, sub-Saharan African musical practices have been brought by merchants, mercenaries, slaves and students of Islam. During the 20th century, music conservatories and the media gave prominence to both contemporary Middle Eastern Arab music and European and American art and popular music. These different musical cultures have influenced each other in various ways.



1. *Bendīr (frame drum) player, Ouzad*

Within Moroccan music, an important general distinction exists between individual and communal styles. This operates on a continuum, ranging from a solo performer at one end to ensembles with 200 singers at the other. The key difference between the two lies in the relationship of performers to audience. In communal performance most or all members of the assembled gathering are participants in the music-making, as in the early part of a Sufi meeting or at a wedding in the High-Atlas. When specialists perform, on the other hand, a distinct gap between audience and performer is defined by the musician's greater technical ability and (usually) the audience's higher social and economic standing.

Specialist and communal musics generally emphasize different types of instruments. The *bendīr* (frame drum; fig.1) or *ta'rija* (small, hourglass-shaped hand drum) may be played by male or female amateurs or professionals, depending on the context. Melodic instruments are usually the province of male specialists; some, such as the *ghaiṭa* (*ghayṭa*; a double-reed aerophone) or the *ribāb* (*rabāb*; the monochord fiddle of the Ishlhin) are played almost exclusively by professionals, usually from hereditary lineages (fig.2).

Under the French protectorate (1912–56), and even more after Independence, social and economic changes have strengthened the tendency toward specialization and improved the prospects for professionalism. Labour migration to Europe, urbanization within Morocco and the democratization of education led to a depletion of the pool of competent communal musicians. At the same time, the continuing shift to a cash economy has made full-time professionalism a feasible alternative for many performers. Furthermore, music is strongly supported by the state, through conservatories, festivals and radio and television; state support stems in part from administrators' realization that music is a powerful tool for forging national identity, articulating political ideas, and promoting tourism, and in part because King Hassan II (1929–99) was himself an ardent patron of music. The government's sponsorship of folklore troupes, as a device for promoting tourism, inspiring national pride and advertising Moroccan culture abroad, has created a need for specialized cadres of (formerly) communal musicians.

The great majority of Moroccans are Muslims, some of whom object to the performance of music on religious grounds. Although music itself is not directly condemned in the Qur'an or the sayings of the Prophet, some types of popular song are connected to gambling, prostitution and the drinking of alcohol, all of which are forbidden to Muslims. Attitudes vary widely, however, and in certain areas of the Middle-Atlas and the Jbala mountains music-making may be the principal economic activity of an entire village.

2. *Ghaiṭa (double-reed aerophone) player, Marrakesh*

II. Main musical traditions

1. Specialist music: (i) Andalusian music (*al-'alā al-andalusiyya*) (ii) *Malḥūn* (iii) *Shikhāt* (iv) *Rwais* and *imdyazn*. 2. Communal music. 3. Religious music: (i) Call to prayer and Qur'anic recitation (ii) Religious associations (*ṭarīqa*) (iii) Gnawa.

1. SPECIALIST MUSIC.

(i) Andalusian music (al-'alā al-andalusiyya). The origins of Moroccan Andalusian music can be traced to southern Spain, where Muslim courts flourished from the 8th to the 15th centuries. Mutual influences between Spain and Morocco are apparent in the music itself and in documents such as the 13th-century *Cantigas de Santa Maria*. (*See also* ARAB MUSIC §I, 3(iv) and 4(iii).)

Al-'alā al-andalusiyya sounds quite unlike eastern styles of Arab art music (Egypt or Syria) but shares many features, including instrumentation, terminology and organization. Before the 19th century, the ensemble probably consisted of a small group of instruments of contrasting sonority. The *rbab* (*rabāb*; a boat-shaped bowed lute with two heavy strings) sketched the principal points of the melody. One or two plucked lutes, an *'ūd ramal* (small, four-string lute) or *gunibrī* (a three-string semi-spiked lute with a hollowed-out, teardrop-shaped body), provided embellishment in a higher register. The *ṭār* (a small tambourine about 15 cm in diameter) controlled the rhythm and tempo. By at least the 19th century, the *kamanja* (a European violin or viola) was added to the ensemble. The Egyptian *'ūd* (a larger lute with six courses) began to join, and then replace, the *'ūd ramal*.

In the 20th century, under the influence of both European and Egyptian orchestras, the number of instruments grew to as many as a dozen violins and violas and three or four *'ūd*. Some ensembles have added cellos, *nāy* (end-blown reed flute), piano or saxophone. A *derbuga* (*darabukka*, a goblet-shaped drum) usually supplements the more delicate sound of the *ṭār*. A single *rbab* remains the theoretical heart of the ensemble, often played by the leader himself, but the sound is largely drowned out by the rest of the instruments. The *rbab* is currently falling into disuse. The instrumentalists sing in a heterophonic chorus, but a vocal specialist may sing *inshād* (unmeasured vocal solo). Ensembles for radio and television may have a separate chorus.

The foundation of the Andalusian school of music is generally attributed to ZIRYĀB ('Alī ibn Nāfi'), a freed Persian slave, who came to the court of 'Abd al-Raḥmān II in Cordoba from Baghdad in 822. He became a celebrated courtier and advocate for a musical doctrine of humours. Ziryāb proposed a system of 24 modes, one for each hour of the day and each endowed by nature with temporal, seasonal and emotional characteristics (*see* ARAB MUSIC, §I, 3(i)). These provided the framework for *al-'alā al-andalusiyya*. The music is based on two forms of Arabic poetry, the MUWASHSHAḤ and ZAJAL developed in Spain in the 11th and 12th centuries. These represented a dramatic departure from the classical QAṢĪDA, which had dominated Arabic poetry for 500 years. The *muwashshaḥ* maintained the *qaṣīda* distich line form, but its basic unit became the stanza, as varying lines were organized into strophic patterns (seven-line *AABBBAA* or sometimes truncated, five-line *BBBAA*). In *zajal*, poets took even greater liberties with metre and line form, and they expressed themselves in colloquial rather than classical Arabic.

Muwashshaḥāt and *zajal* serve as testimony to the ecumenical spirit that prevailed in Muslim Andalusia. Both forms were clearly influenced by indigenous forms of Iberian poetry and some even included a closing couplet in medieval Latin (Romance). The earliest manuscripts of the new forms are transliterated in Hebrew. Jewish musicians continued to be active practitioners of the Andalusian tradition in both sacred and secular contexts. They sang in both Arabic and Hebrew, sometimes alongside Muslim musicians, or in exclusively Jewish groups (most notably, the *a cappella* ensembles in the synagogue). The major cities of Muslim Spain had variant and competing styles, which were spread through emigration to different cities in North Africa.

The present repertory of *al-'alā al-andalusiyya* in Morocco is based primarily on a compilation of song texts collected in the late 18th century by Muḥammad ibn al-Ḥasan al-Ḥayk, a musician from Tetuan. Al-Ḥayk organized the material in 11 *nūbāt* (from Arabic NAWBA: 'turn'), each identified by its predominant musical mode (*ṭab'*, pl. *ṭubū'*, lit. 'natural, natural endowment'). The compilation includes songs in 26 different *ṭubū'*; al-Ḥayk simply included those *ṭubū'* with a small number of songs in the suite of a related mode, with similar emotional and temporal associations.

Many Moroccan and Middle Eastern modes have similar names and general scale structures, but the systematic use of microtonal intervals typical of the Middle East does not play an important role in Andalusian music. Many Andalusian musicians and conservatory teachers now maintain that the background scale is in effect twelve-tone and equally-tempered, and that the *ṭubū'* themselves correspond to Western major and minor scales or church modes. It is often difficult to find acoustic reasons for the modal classification of the *nūbāt*. *Ramal l-Maya* and *Isbihān*, for example, have an identical scale structure and share at least one melody.

A *nūba* is divided into a series of five large sections, each in a different rhythmic mode. These movements (*miyāzin*, sing. *mīzān*) are subdivided into a slow beginning (*muwassa'*), an accelerating transitional passage (*mahzūz* or *qantra*) and a rapid final section (*inṣirāf*). By the end, the tempo may be more than double the original speed.

The *nūbāt* in al-Ḥayk's compilation are much too long to be played comfortably in one sitting. In a series of recordings of the complete repertory, issued by the government, each *nūba* takes up six CDs. Rather than taking excerpts from the five *miyāzin* (as is the practice in Algeria) Moroccan musicians have tended to play continuously through a single movement, or sometimes parts of two. However, in recent years some performers, such as Massano Tazi, have experimented with taking short segments from each *mīzān* to make a more varied compound form.

A performance generally begins with a *bughia* or *mshelia*, a short prelude in free rhythm, played by the entire orchestra (with individual improvisatory flourishes) to establish the character of the mode. This is followed by a *tushia* (pl. *tuwāshī*), a measured orchestral overture, usually about five minutes in length. *Tuwāshī* are also used as instrumental interludes during the performance of some *nūbāt*. The performance may also include unmeasured, solo instrumental improvisation (*taqsīm*) and its vocal equivalent (*mūwwāl* or *bitein*), both to

demonstrate the virtuosity of the musicians and to separate the sections of the *mīzān*.

Royal patronage of Andalusian music continued into the 20th century. During the reign of Sultan Mūlay 'Abd al-'Azīz, a military conservatory was founded under the direction of 'Umar Ja'īdī. Later, during the French Protectorate, civilian conservatories were founded, both for western European art music and for Andalusian music (begun by Alexis Chottin in 1930 as a 'laboratory' for the study of Moroccan music). Initially, there were music schools only in the largest cities, such as Rabat, Casablanca, Meknes and (particularly in the case of Andalusian music) Fez and Tetouan. In the years since independence (1956), and particularly since the 1970s, there has been a proliferation of conservatories in smaller towns such as Taza and Qsar el-Kebir, which had not historically been centres of Andalusian music.

Royal patronage has also taken the form of broadcasting on radio and television, which serves both as a way to support the musicians and as a way of invoking the majesty of the dynasty (even if it does not reach directly back to Andalusia).

Andalusian music is often used as a filler between programmes, and it is also broadcast during the last hour leading up to the breaking of the fast during Ramadan. During the period of mourning following the death of King Hassan II, Andalusian music and *malḥūn* (see below) were the first musical forms introduced on the radio after several days of Qur'anic recitation.

(ii) Malḥūn. *Malḥūn*, an urban song style closely associated with Andalusian music, is thought to have originated in the Tafilalet, a chain of oases south of the Atlas mountains. Originally practised primarily by artisans and merchants, *malḥūn* is distinguished by the colloquial, but archaic and learned dialect of its long texts. The song is strophic in form, often with a choral refrain (*lazima* or *harba*); each strophe has a complex rhyme scheme, sometimes modelled on the *muwashshaḥ*. *Malḥūn* uses melodies of limited range. The basic metre is 2/4, although in certain sections 5/8 or 6/8 may be introduced. The song is delivered in an understated, almost conversational fashion, but the shifting accents and tight word-play requires a nimble tongue. In the early 1960s *malḥūn* had fallen out of favour with its traditional audience, the urban middle class. Later in the decade, however, a wave of cultural nationalism sparked interest in the form among intellectuals. Their work attracted people in the theatre and, eventually, a new form of urban popular music developed.

The text of *malḥūn* is known as *qaṣīda* (pl. *qaṣā'id*). The poems share many features with the classical Arabic form, including its monorhyme and monometric pattern; under the influence of the *muwashshaḥ* some formal complexity may be introduced. A number of poems have a ternary, or even a quinquinary line form, and lines are usually grouped in stanzas of four to ten lines. Sometimes the monorhyme changes from stanza to stanza. There is almost always a choral refrain consisting of the first line or two of text. A short introductory text (*serraba*), sung to a quick 5/8 metre, is sometimes added and many *qaṣā'id* add three lines of call and response (*nā'ūra*: 'waterwheel') to the beginning of later stanzas. In the last stanza, the singer may include a metric modulation from 2/4 to 6/8 (more rarely 5/8) leading into the final refrain, which is repeated several times at a rapidly accelerating tempo. The singer may also modulate the melody from stanza to stanza, usually by raising the pitch level by one scale degree. Where two or more *qaṣā'id* share the same metric pattern and melody, two soloists may alternate stanzas, each singing from a different text.

(iii) Shikhāt. Across the central belt of the country (from the eastern Middle-Atlas to the Atlantic plains) women are a dominant force in professional music. They are known as *shikhāt* (sing. *shikha*, 'venerable woman', masculine *shikh*), a pseudo-honorific applied to many professional performers. Both Arab and Berber *shikhāt* are accompanied by a small ensemble of male musicians on *kamanja* (or European violin or viola played vertically on the knee), *gunibrī* (a three- or four-string plucked lute) and *bendīr* (a round frame drum). The female singer-dancers range in number from four to more than a dozen and generally carry small hand drums (*ta'arija*) with which they punctuate their phrases and play polyrhythmic interludes. The women perform standing in a line or a circle, swaying gently and moving slowly as a group while they sing. The end of each song, or suite of songs, leads into a faster instrumental section in which the women dance solo or in pairs.

Shikhāt are widely regarded to be prostitutes since they perform in public before men but are not dependent on any single man for love or money. Their male accompanists act as managers and agents for the group and may also train the women and provide them with new texts and melodies. Nevertheless, a well-known female singer, such as HAJIA HAMDAOUIA, can have the dominant voice in group decisions and performances, and some women compose or improvise their own songs.

However, there are differences between the Arabic-speaking plains musicians and the Berber-speaking mountain musicians. The Berber songs (*izlan*) are more tightly coordinated and group-oriented. The Middle-Atlas women generally sing in heterophonic unison to a more pronounced, steady beat. The women of the plains sing *al-'aita* songs, passing the solo lead as they tire or want to add comment. Middle-Atlas Berbers often sing their popular songs in Arabic to reach a wider audience. Over the past 25 years, male and female performers, such as Rouicha Mohamed and Najat Atabou, have achieved national and international recognition.

(iv) Rwais and imdyazn. Berber-speaking peoples in both the Middle-Atlas (Imazighen) and the High-Atlas (Ishlhin) have groups of itinerant musicians who are entertainers and bearers of news and moral lessons. In the past, musicians travelled between villages and markets around harvest time. They played for small donations or hoped to be invited to weddings, rewarded for their services with food and lodging, or perhaps a small payment in kind.

In the Middle-Atlas, these musicians are known as *imdyazn*. Although their poetry is one of high seriousness, the group includes a clown (*bughānim*) who also plays the *zamr* (*mizmār*; a double-clarinet) or *talawat* (end-blown flute). Two other musicians respond to the lead singer (*amdyaz*) and accompany him on a large round frame drum, about 50–60 cm in diameter, known as *bendīr* in Arabic and *allun* in Tamazight. Occasionally a violin or viola may also be included in the ensemble.

In the High-Atlas, professional musicians are called *rwais* (sing. *ra'īs*, 'leader, president'); an analogous term,

shikh, is used among some Arabic-speakers and Middle-Atlas Berbers. While the Middle-Atlas Imazighen use long, flowing diatonic melodies with microtonal intervals and an ambitus of a 5th or less, the High-Atlas Ishlhin people use more angular pentatonic tunes covering a range of an octave and a half.

The most characteristic instrument of the *rwais* is the *ribāb*, a monochord spike fiddle with an oblique string and a rounded frame body, covered with skin on both sides. Like the Middle Eastern *rabāba*, it was probably originally a soloist's instrument, complementing the voice and punctuating long narrative songs. Al-Ḥajj Bel'aid (*c*1875–*c*1945) is credited as one of the first to create an ensemble combining the *ribāb* with the *lotar* (a three- or four-string, semi-spiked plucked lute with a skin-covered, bowl-shaped body) and the *nāqūus* (a bell originally made of a copper tube, now usually made from a car's brake drum). In the past, *rwais* sometimes used a short end-blown flute (*tagwmamt*) and a frame drum to attract attention at the beginning of a performance in a market-place, but during the session of *amarg* (sung poetry) they used only the string instruments and *nāqūs*. Since the 1970s, some *rwais* have included drums (and occasionally an electric guitar) in imitation of other forms of popular music.

Both the *rwais* and the *imdyazn* performed song texts containing political, religious and moral commentary, as well as personal accounts of their own travels. They carried news from tribe to tribe and from the city to the country. They also served as musical mediators. In the 1930s their instrumental repertory included both bugle calls and the military version of Andalusian music called *khamsa u khamsīn*, which they had picked up during performances for Berber troops in their barracks. As well as performing in their own styles, they often join in the performance of local collective styles, such as *ahwash* in the High- and Anti-Atlas, and *ahidus* in the Middle-Atlas. The *rwais* insist that the best melodies come from the countryside; one of their reasons for travel is to pick up melodies from village celebrations or from workers in the fields. In turn, village musicians incorporate songs from the *rwais* into their local styles.

Since the 1930s some Berber professional musicians have expanded their range to reach Berber-speakers settled in Holland, Belgium and, especially, France.

Professional musicians, particularly the *rwais*, have begun to settle in Moroccan cities like Marrakesh, Agadir and Casablanca, where there are substantial populations of Berber-speakers. There they can participate more easily in the cash economy, not only at weddings and other occasions, but also in restaurants and nightclubs, which provide steady work. In the countryside a good transportation network allows them to cover a wide range of territory as opportunities arise.

In performances in the mountains, the mixing of sexes was considered shameful. A group of *rwais* consisted only of men, although young apprentice dancers might dress in women's clothes and jewellery. In the 1930s, however, groups of *rwais* were hired to entertain in brothels maintained for the French protectorate troops, and they began to incorporate female singers and dancers (*raisat*) into their ensembles. Today *raisat* are a fixture in most groups, and some of the best-known singers are women.

2. Communal music. Communal music is particularly associated with the Berbers of the Atlas mountains, but rural Arabs and city-dwellers have their own forms as well. For example, the Jbala, Arabic-speaking peoples in the foothills of the western Rif mountains, have a line dance called *haidus*, whose name and style are reminiscent of the *ahidus* of the Middle-Atlas Berbers. Communal performances are usually made up of two antiphonal choirs of singers and dancers, accompanied by various drums, especially the *bendīr*. In the Souss valley and in the plains at the foot of the north slope of the High-Atlas, Arabs and their Arabic-speaking Berber neighbours combine small frame drums with long (40 cm), slim (10 cm) single-headed drums to play an intensely polyrhythmic form known as *l-unasa*, *hemwada* or *huwara*.

In the cities, impromptu ensembles are a frequent part of wedding celebrations, but there are more fixed urban communal forms. In Taroudant and Marrakesh, groups of women have their own style of *huwara*, and men celebrate 'Āshūrā (the 10th of Muharram, the first month of the Muslim calendar) by beating on *t'arij* (hourglass-shaped drums) and performing *daqqa*, which may last until dawn.

In the High-, Middle- and Anti-Atlas, communal song and dance is widely regarded as both the most serious and entertaining form of music. The ensemble consists of antiphonal choruses accompanied by frame drums, and sometimes other instruments. The *ahidus* form, in the Middle-Atlas, makes frequent use of asymmetrical metres, and the same narrow diatonic scales as the *imdyazn*. The *ahwash* form is sung to pentatonic melodies with, in most cases, duple or compound duple meters. Furthermore, while *ahwash* keeps males and females in separate lines (fig.3), facing each other or in concentric circles, an *ahidus* may mix the two, alternating males and females in the same line. *Ahwash* is the epitome of communal music, in terms of its size and its connection to place. Local style is considered – with pride – to be a marker of village or tribal identity. Melodies, rhythm, instrumentation and language all vary, as do the rules of participation. Sexual segregation is the norm throughout the High- and Anti-Atlas, but its nature differs even within a single valley. In one village men and women may perform separate dances at the same time, in the next only unmarried girls may be allowed to dance in separate lines with the men, while in a third, the female participants may be married women and divorcees.

The basis of the *ahwash* ensemble is the frame drum, found in a variety of different sizes, tunings and names, e.g. *allun*, *tallunt*, *tagwalt*, depending on the size of the instrument and the tribe of origin. High-Atlas frame drums are smaller in diameter (30–35 cm) and shallower than those of Middle-Atlas Berbers or Arabic-speaking Moroccans. The skins are stretched completely over the outside of the frame and stitched to the wood at the bottom. Snares and cymbals are rare. The *ahwash* drum choir includes from three to over 30 drummers, organized into parts. The largest group, usually comprising the least experienced musicians, lays down the basic beat, a second group plays a counter rhythm and a third (usually only one drummer) improvises against both on the tightest, sharpest drum. This stratification is clearest in the music of the central High-Atlas; further west the ensembles are smaller in size and the drums more uniform in timbre. An *ahwash* in the western High-Atlas may also include other instruments such as a short end-blown flute (*tagwmamt* or *tal'awadt*) and, particularly in the style called *taskiwin*,

3. Frame drums accompanying the ahwash dance for the Fête du Trone at Imlil in the High-Atlas

small single-headed and hourglass-shaped hand-drums (*agwal* or *tagwalt*).

A performance usually begins with improvised poetry, in an extended solo or a contest between two or more poets. Poets enjoy the literary or musical challenge, but may also debate issues of local politics. As the contest comes to a close, two large choruses, separate lines of men and women, take up a line of poetry in alternation. After several repetitions (during which a poet may shout out a new line to sing), the drum chorus enters, one or two players at a time, until the whole ensemble settles into a coherent rhythm. The tempo accelerates gradually for several minutes until the lead drummer takes the group into a 'pass' (*tizi*), a metric modulation from, usually, duple to compound duple metres. At the same time, the melody is shortened and split between the choruses. Eventually the singers put more energy into dance and the music focusses on the drums. A single *ahwash* may last from 15 to 45 minutes. As in other communal forms, the outcome is never certain, since some of the musicians may not be experienced or performers may resist the direction of the leaders. This tension and uncertainty adds to the excitement.

3. Religious music.

(i) Call to prayer and Qur'anic recitation. The call to prayer (*adhān*, Moroccan *adan*) is perhaps the most common musical phenomenon in Morocco (and the rest of the Islamic world), recited from mosque rooftops, doorways and minarets. For many people, it is still an important means of measuring time. Qur'anic recitation (*qirā'a*) may be heard almost anywhere, at any time of the day, for example, performed by a group of worshippers after prayer, by a beggar on the street or perhaps by a shopkeeper practising devotional exercises while waiting for customers.

Forms differ according to the reader's region of origin and level of training. *Ṭulba* (Arab.: 'students [of Islam]') are specialists in Qur'anic recitation and hymns of praise. Groups of *ṭulba* are called in to perform at auspicious occasions, such as the dedication of a new building, a wedding and particularly at funerals. Many serve as Qur'anic school teachers, scribes or spiritual doctors. They usually perform on one or two reciting tones, with a discernible pulse but no fixed metre. In the High-Atlas, *ṭulba* preface their recitation with an antiphonal prayer reminiscent of *ahwash* (see §3 below), followed by an energetic rendering of the text punctuated by extended tones ending in a whoop.

Tajwīd is the most complex form of Qur'anic recitation, entailing a set of rules that govern the pronunciation and intonation of each syllable. A good reciter must be a talented musician, even though he may not recognize his art as music. A performance of *tajwīd* resembles the unmeasured improvisation of voice (*mawwāl* or *bitein*) or instruments (*taqsīm*) in secular art music. Indeed, aspiring musicians are frequently advised to model their improvisation on *tajwīd*. (*See also* Islamic religious music, §I, 3 and 4.)

(ii) Religious associations (ṭarīqa). Morocco has perhaps a dozen prominent Muslim mystical religious associations, and many smaller ones. Some of these first rose to prominence in resisting Portuguese incursions in the 15th century. The *ṭarīqa* ('path') offers a way to enlightenment, often using song and sometimes dance to achieve an ecstatic state. Some *ṭarīqat* limit themselves to the recitation of litanies and the singing of hymns. Others, like the Heddawa, accompany their songs with large,

single-headed pottery vase drums (*herrazī*). The Jilāla use a long end-blown flute (*qaṣaba*) and *bendīr* for their ceremonies, while the 'Aissawa and the Hamadsha, two of the largest groups, bring in musicians to perform on the *ghaiṭa* and *tbel* or *ṭabl* (a double-headed side drum).

The *ṭarīqat* generally meet in local lodges on Thursday evening, and they also come together for critical events, such as the marriage, illness or death of a member or associate. Their most visible (and audible) performances, however, take place during pilgrimages to the tomb of their patron saint. In the case of 'Aissāwa and Hamadsha associations, the ceremony (*ḥaḍra*) begins with the recitation of a litany (*dhikr*) and the singing of poems (*qaṣīda*) in honour of Allah, the Prophet and the saints. During the early stages of the ceremony, the devotees may accompany themselves on various instruments. Later the *ghaiṭa* and *tbel* players (generally two of each) come in to accompany dance, which may lead to possession by a saint or spirit (*see also* ISLAMIC RELIGIOUS MUSIC, §II). (These musicians are professionals and not necessarily members of the association; indeed, they may play for other brotherhoods, as well as for processions celebrating weddings and circumcisions.)

(iii) Gnawa. The Gnawa have their roots in communities of sub-Saharan Africans (mostly from the region of the old Mali empire) brought to Morocco as slaves and mercenaries, from the 16th century. (Similar communities, with similar practices, exist in Algeria, Tunisia and Libya). Their background is reflected in their belief system, which draws on Islam and traditional sub-Saharan religions. Many spirits in the Gnawa pantheon have close analogues in West Africa, and others bear the names of tribes in the Sahel, such as Bambara and Fulani (FulBe). Members of the group consider themselves to be good Muslims, however, and follow religious precepts. They sing primarily in Arabic, constantly invoking the names and epithets of Allah, the Prophet Muhammad and other recognized prophets and saints. The multiplicity of their beliefs is resolved in the character of their patron saint, Bilāl, the freed Ethiopian slave who became the Prophet's first *muezzin* (caller to prayer).

Some groups of Gnawa appear frequently in the streets and markets of large cities, as well as some villages in the High-Atlas. They perform acrobatic dances accompanied by large, double-headed side drums (*tbel*) and barbell-shaped metal crotales (*qarāqib*), soliciting passers-by for donations. These public performances appear to be light entertainment, but in another domain Gnawa music is very serious indeed. In all-night ceremonies, known as *derdeba* or *lila*, Gnawa musicians and officiants perform for the pleasure of beneficial spirits and for the propitiation of malicious ones, in order to secure peace of mind and cure the diseases of their devotees. The ritual is marked by transformations of all the senses and structured around a series of dance suites dedicated to seven families of saints and spirits, each characterized by specific colours, odours, flavours, feelings, actions and sounds.

A *lila* ('night') generally lasts from sunset until dawn, and in some cases a full *derdeba* may stretch over several nights. The length depends on the mood of the participants, the number of spirits to be propitiated, the seriousness of each case and the resources of the sponsors. All seven families of spirits must be acknowledged, to varying degrees, in the music.

Drums (*tbel*, pl. *tbola*) have a relatively limited ceremonial role. The *qarāqe ib* are indispensable for trance-dancing, and the principal instrument is a three-string lute known as *gunibrī, sintīr* or *hajhūj*. The *gunibrī* has a semi-spiked construction, with a skin-covered body, sliding leather tuning rings and a sistrum-like sound modifier (*sersāl*) at the end of the neck (fig.4). The morphology and the playing technique of the *gunibrī* are connected to West African instruments such as the *khalam* and *kontingo*, as well as to the American banjo.

III. Modern developments

With the advent of recordings, radio and motorized transport in the 1930s, performers in Morocco were able to reach an audience beyond their village or neighbourhood, or the distance they could travel on foot. Although the first recordings were of traditional regional styles, musicians soon developed new popular styles based on short, light Arabic songs, accompanied by a small ensemble of *'ūd*, violin, and drums. One of the earliest popular stars was HOUCINE SLAOUI, who wrote and performed songs of satirical social commentary from the 1940s to the 1960s. Among these were *'Amr lu sibsi* (about marijuana smoking), *Al-kas hlu* (about drinking alcohol) and *Hadi ras'ek* (about trickery in the marketplace). Among his most famous songs was *l-Amīrikān*, about the effects of the American invasion of North Africa during World War II. Slaoui also experimented with a variety of different instruments in his ensembles, including the clarinet and piano.

During the 1950s and 60s, the commercial music market in Morocco was dominated by popular stars from Egypt (Umm Kulthum and Farīd al-Aṭrash), France (Johnny Halliday) and the United States (James Brown). The most successful local recording artists, like Abdelhadi Belkhayat and ABDELWAHAB DOUKKALI were, for the most part, imitators of Egyptian film style or, more rarely, French pop and American soul. Traditional and regional music was mostly relegated to low-powered radio stations and limited programming time. Commercial recordings of traditional music seldom sold more than a few thousand copies, mostly among emigrant labourers nostalgic for the sounds of home. Recordings were, in any case, largely superfluous, since live performances were so readily available.

In late 1971 a new wave of commercial music appeared in Morocco when several actors formed a group called Nāss al-Ghiwān (The People of Love, or People of Temptation). Within a few months another group, Jīl Jilāla (Generation of Jilāla), had split off from the first and overtaken it in popularity. The two groups rapidly became the most successful in Morocco. Soon after, they launched successful tours in the rest of North Africa, the Middle East and Europe.

Their strongest historical influence came from religious brotherhoods, such as the 'Aissāwa, Jilāla and Gnawa. A second source of inspiration was European and American counter-culture. Many popular musicians visited Morocco during these years, and the Rolling Stones and Led Zeppelin even maintained houses there. As early as the 1960s, groups of Gnawa from Tangier, Marrakesh and Essaouria collaborated with well-known jazz and popular musicians, such as Randy Weston, Don Cherry, Pharoah Sanders and Led Zeppelin, and fusion experiments were organized by a variety of Moroccan artists. Since the 1970s, early music specialists in Spain and, more recently,

4. Gnawa group, Marrakesh, playing qarāqib (metal crotales) and gunibrī (three-string lute)

flamenco musicians have been collaborating with Moroccan Andalusian musicians, exploring the ties between the musics of the two countries. Nāss al-Ghiwān and Jīl Jilāla did not work directly with Western musicians, but they were able to fuse aspects of Western performance with a repertory based on traditional Moroccan songs drawn from varied sources around the country. The resulting synthesis was undoubtedly Moroccan, without being tied to any specific regional or ethnic group. The identity of the groups was open to interpretation on the part of each observer. Like Morocco itself, they could seem by turns conservative and revolutionary, traditional and modern, Arab, African and Western.

To carry the melodic lead, Nāss al-Ghiwān and many of their emulators chose the banjo, while Jīl Jilāla used the Greek *bouzouki*. The groups also included a Gnawa *gunibrī* and a set of traditional drums. Some of the drums, like the *bendīr* and *ta'arija*, have traditionally been used in a variety of different contexts, both sacred and secular; others, like the *herrazi* (a large, single-headed, cylindrical drum) and *tbila* (a pair of pottery kettle drums), have been used primarily in the ceremonies of religious associations. The connection to the religious *ṭarīqa* was enhanced by Jīl Jilāla's occasional use of the Gnawa *qarāqib*. The musicians also used novel playing techniques on their instruments; they played *tbila*, normally beaten with sticks, with their hands.

Nāss al-Ghiwān continues to attract audiences of enthusiastic young fans, but they have not moved far beyond their repertory of the 1970s. Nāss al-Ghiwān and Jīl Jilāla inspired hundreds of similar groups, most of them amateur and short-lived. Their success created new interest in certain forms of traditional music. Later groups, such as the Tashlhit-speaking Usman, began to introduce electric guitars and synthesizers. More importantly, the influence of Nāss al-Ghiwān and similar groups has extended beyond Morocco, particularly to the city of Oran (Wahran) in western Algeria. Young singers adapted the model of the Moroccan groups, drawing on local popular styles accompanied by a mix of traditional and electric instruments, to create the genre RAI.

PHILIP SCHUYLER

Moroder, Giorgio (*b* Ortiséi, 26 April 1940). Italian producer and composer active in Germany and the USA. He trained as an artist and architect before starting his musical career in the late 1960s. Together with the lyricist Peter Belotte, he worked in Munich in the early 1970s and had several hit singles including *Nachts scheint die Sonne* in 1971 which was later re-recorded with an English lyric by Chicory Tip as *Son of my Father*, one of the first synthesizer records to break into the pop charts. Working with the vocalist Donna Summer, Moroder defined disco music on the seminal *I feel love* (1977), a marriage of Kraftwerk-styled robotic beats and Summer's soul vocal: this blueprint became part of the lingua franca of 1980s pop. Although much in demand as a producer in the 1970s and 80s on records by Sparks, Janis Ian, David Bowie, Blondie, Sigue Sigue Sputnik and the Human League's Phil Oakey, Moroder also maintained his solo career and in 1979 released *E=MC²*, the first digitally recorded and mastered album. Moroder also produced a number of lucrative soundtrack albums such as *Midnight Express* (1979) and *Flashdance* (1983), both of which won Academy Awards, *Cat People* (1982) and *Top Gun* (1986). In 1984 he restored, re-edited and provided a soundtrack for Fritz Lang's classic silent film *Metropolis*.

DAVID BUCKLEY

Moroi, Makoto (*b* Tokyo, 17 Dec 1930). Japanese composer. He is the son of Moroi Saburō. In 1952 he graduated from the Tokyo National University of Fine Arts and Music, where he had been a pupil of Ikenouchi; he also studied Gregorian chant privately with Paul Anouilh, and Renaissance and Baroque music with Eta Harich-Schneider. His career started brilliantly in 1953 when two of his works won international prizes: the Partita for flute (1952), a rhapsodic, 12-note piece full of virtuoso writing and rhythmic and dynamic complexities, won an ISCM prize; and the Composition no.1, Moroi's first orchestral work, received a prize at the Belgian Queen Elisabeth Competition, as well as the first prize in the Japanese radio music competition and the government-sponsored Art Festival prize. He was awarded a second ISCM prize for the piano composition *Alpha and Beta* in 1955. In May of that year he went to Europe to work in the Cologne electronic music studio. He returned to Tokyo after eight months and began work at the studio of Japanese radio: in autumn 1956 he completed there his first piece in the new medium, Seven Variations, composed with the assistance of Mayuzumi. The two composers were principal promoters of the summer festivals of new music (1957–63), given under the aegis of the Institute for 20th-Century Music. In 1958 Moroi won yet another ISCM prize for *Kihaku na tenkai*, a 12-note suite for soprano, singing in Sprechgesang style, and chamber orchestra. His other awards include an Otaka Prize (1963) for the *Kyōsō-kumikyoku* for violin and orchestra and an Italia Prize (1965) for the music drama *Gyosha Paetōn*. In 1964 he met the *shakuhachi* player Chikuho Sakai and began to take a serious interest in the instrument; he wrote the virtuoso Five Pieces (1964) for him and gradually extended his interests to other Japanese instruments. In 1968 he was appointed professor of composition at the Osaka Geijutsu Daigaku. He made several trips abroad in 1970–71 and was guest composer at the Brahmshaus, Baden-Baden, in 1971. From the late 1970s to the early 1990s he concentrated on writing essays and articles; on resuming his compositional activities he made particular use of the *shakuhachi* and the *sanjūgen*, a modern 30-string *koto*. In 1994 he became the director of the newly-opened Saitama Arts Theatre.

Moroi is one of the leading composers to have actively introduced Japanese audiences to techniques including 12-note methods, further ramifications of serialism and aleatory music. He is also keenly concerned with contrasting sonorities and instrumental capabilities, as is shown particularly well in his chamber works, such as the *Itsutsu no epigram* for seven instruments (1962), a suite of short Webernian pieces with much use of tremolo and repeated notes. Moroi's music is, however, quite unlike Webern's in its tendency to the lyrical and rhapsodic, which is still more striking in his larger compositions, among them the Symphony (1968) for a Wagnerian orchestra. This work is in two movements, of which the first includes a passage for strings in 52 parts and two brilliant percussion cadenzas; the coda to the second movement uses a tape of a pre-recorded performance. Virtuoso writing and rhapsodic form, principal features of the Symphony, are also characteristic of Moroi's pieces for traditional Japanese instruments. Further information is given in K. Hori, ed.: *Nihon no sakkyoku nijusseiki* ('Japanese compositions in the 20th century', Tokyo, 1999), 260–61.

WORKS
(selective list)

Dramatic: Pitagoras no hoshi [Stars of Pythagoras] (music drama), 1v, insts, tape, 1959; Akai mayu [Red Cocoon] (music drama), chorus, orch, tape, 1960; Nagai nagai michi ni sotte (Die lange, lange Strasse lange) (music drama), chorus, orch, tape, 1961; Yamauba/Yoru no mukashiko [The Mountain Witch/An Old Tale] (op-ballet, 1, U. Itoh), pt 1 of Mittsu no mukashiko [Three Old Tales], Tokyo, Metropolitan Festival Hall, 15 March 1962 [pt 2 by Irino; pt 3 by Shimizu]; Gyosha Paetōn [Phaeton the Charioteer] (music drama, 1), Tokyo, Sankei Hall, 1965

MASAKATA KANAZAWA

Moroi, Saburō (*b* Tokyo, 7 Aug 1903; *d* Tokyo, 24 March 1977). Japanese composer and teacher. He graduated from Tokyo University in 1928, presenting a dissertation on musical forms. At this time he headed the Suruya group, which gave seven concerts of new music between 1927 and 1931. From 1932 to 1934 he was in Berlin, studying composition with Schrattenholz and orchestration with Gmeindl at the Hochschule für Musik. While there he composed the Piano Concerto in C and the First Symphony, both of which were performed in Berlin for broadcasting; they were played again in Tokyo soon after his return, establishing him as the principal advocate in Japan of the German school. The years between 1936 and 1944 proved to be his most fruitful period, during which he wrote, among many other works, two symphonies and three concertos (some of these were heard in Germany as well as Japan); after the war he devoted himself to teaching, producing only a few works. He has served as jury member of the Japanese music competition (1935), inspector of music and adult education for the Ministry of Education (1946–64), director of the Tokyo Metropolitan SO (1965–6) and director of the Senzoku Gakuen Academy of Music, Tokyo (from 1967).

Moroi is a direct descendant from the German academic tradition. His music is always tonal and displays a mastery of polyphonic writing, thematic treatment and orchestration. He is particularly concerned with questions of form, and most of his works are in the standard 'absolute' forms. One of the leading teachers of European music in Japan, he had a number of distinguished private pupils, among them Dan, Irino, Shibata and Toda. (K. Hori, ed.: *Nihon no sakkyoku nijusseiki* [Japanese compositions in the 20th century]; Tokyo, 1999, 258–60)

Moroney, Davitt (*b* Leicester, 23 Dec 1950). English harpsichordist. Although as a keyboard player he is largely self-taught, he also studied with Thurston Dart in London and later with Kenneth Gilbert and Gustav Leonhardt. In 1975 he was awarded a Harkness Fellowship which enabled him to continue his studies at the University of Berkeley, California. In 1980 he settled in Paris, where he began his career as soloist, and in 1983 he was appointed musical director of the Semaine de Musique Baroque in Monaco. Since then Moroney has made a special study of the keyboard music of Louis Couperin and J.S. Bach. He has prepared his own edition of the *Art of Fugue* and his recordings of it won a *Gramophone* award (1986). His other recordings include the *Musical Offering*, *Das Wohltemperirte Clavier*, the complete harpsichord and organ music of Louis Couperin and the complete keyboard music of William Byrd.

NICHOLAS ANDERSON

Moross, Jerome (*b* Brooklyn, NY, 1 Aug 1913; *d* Miami, 25 July 1983). American composer. He held a Juilliard Fellowship (1931–2) and graduated from New York University in 1932. Initially he supported himself by writing ballets and music for the theatre, although his

first complete show, the revue *Parade* (1935), was not a great success. George Gershwin engaged him as assistant conductor and pianist for a West Coast production of *Porgy and Bess*, and Moross began training the principals during the summer following Gershwin's death in July 1937. During this period he went to Chicago for a production of his ballet *American Pattern* and began work on one of his most successful scores, the ballet *Frankie and Johnny*. Other works which established Moross's early reputation include the orchestral pieces *Biguine*, *Paeans*, *A Tall Story* and *Those Everlasting Blues*. When he went to Hollywood in 1940, however, he found that this very reputation effectively prevented him from finding work; his American vernacular idiom was not understood by Hollywood producers, who preferred the romanticized Americana epitomized by such works as Grofé's *Grand Canyon Suite*. So for nearly ten years Moross earned a living as an orchestrator of film scores, collaborating with Copland (*Our Town*), Waxman, Adolph Deutsch, Frederick Hollander and Friedhofer (*The Best Years of our Lives*).

During this period Moross produced a substantial number of works, notably the First Symphony (which received its première in Seattle under Sir Thomas Beecham in 1943) and *Ballet Ballads*, a series of four one-act ballet-operas. Much of Moross's most interesting theatre music was cast in hybrid or experimental forms, such as ballet-opera, or for the semipopular musical stage; he was especially concerned to reconcile elements derived from popular and art genres. The two-act opera *The Golden Apple* (including the song 'Lazy Afternoon') and *Gentlemen, Be Seated!*, a portrait of the Civil War in the form of a minstrel show, belong to this category.

In 1948 Moross composed his first original film score (*Close-Up*), and after the success of *When I Grow Up* (1950) he found himself able to give up commercial orchestration more or less permanently. Other effective scores include *The Proud Rebel*, *The Adventures of Huckleberry Finn*, *The Cardinal*, *The War Lord* and *The Big Country*; the last-named is one of the finest scores written for a western, and was nominated for an Academy Award. Moross assembled the highlights of his film career from 1952 to 1965 in the suite *Music for the Flicks*. He composed less music in other genres during this period, but his ballet *The Last Judgement* (1953) must be ranked among his best works.

Among his last compositions, the Concerto for flute and string quartet and the Sonata for piano duet and string quartet epitomize Moross's facility for writing music which has both spontaneous popular appeal and strength of musical purpose. American folk and popular idioms form the basis of his style, which is plain and vigorous, diatonically simple, and full of lyrical warmth and expressiveness. Reminiscences of rags, blues and stomps abound (e.g. in *Frankie and Johnny*), but these are informed both with formal discipline and individuality. Unfailingly positive in tone, the aggressive, spotlit scoring of his music features instruments at the upper extremes of their ranges (as when a D trumpet crowns the climax of the First Symphony's fugal finale), and his contrapuntal writing is clean and sharp.

WORKS
(*selective list*)

STAGE

Parade (revue), 1935
American Pattern (ballet), 1936
Frankie and Johnny (ballet), 1937–8; arr. as orch suite
Ballet Ballads (4 ballet-ops, each 1, J. Latouche): Susanna and the Elders, 1940–41; Willie the Weeper, 1945; The Eccentricities of Davy Crockett, 1945; Riding Hood Revisited, 1946
The Golden Apple (op, 2, Latouche), 1948–50
The Last Judgement (ballet), 1953; arr. as orch suite
Gentlemen, Be Seated! (op, E. Eager), 1955–6
Sorry, Wrong Number! (op, after L. Fletcher), 1977

FILM AND TELEVISION MUSIC

Film scores: Close-up (dir. J. Donohue), 1948; When I Grow Up (dir. M. Kanin), 1950; The Sharkfighters (dir. J. Hopper), 1952; Captive City (dir. R. Wise), 1952; Hans Christian Andersen (dir. C. Vidor), 1952 [incl. The Little Mermaid (ballet), based on themes by F. Liszt]; The Seven Wonders of the World (dir. T. Garnett), 1955 [only part by Moross]; The Proud Rebel (dir. M. Curtiz), 1957; The Big Country (dir. W. Wyler), 1958, arr. as orch suite; The Adventures of Huckleberry Finn (dir. Curtiz), 1959; The Jayhawkers (dir. M. Frank), 1959; The Mountain Road (dir. D. Mann), 1960; Five Finger Exercise (dir. Mann), 1961; The Cardinal (dir. O. Preminger), 1963; The War Lord (dir. J. Farrow), 1965; Rachel, Rachel (dir. P. Newman), 1967; The Valley of Gwangi (dir. J. CHRISTOPHER PALMER/MICHAEL MECKNA

Morpain (*fl* mid-16th century). French composer. Seven four-voice chansons by him were published in collections by Attaingnant (1539[17], 1540[17], 1545[8], 1547[8]; all ed. in CMM, lxxxvi, 1981). All of his works set courtly *épigrammes* in an essentially homophonic manner similar to that of Sandrin, although some internal lines have close imitative entries. The melodies are mostly syllabic, with occasional melismas.

FRANK DOBBINS

Morricone, Ennio (*b* Rome, 10 Nov 1928). Italian composer. A favourite pupil of Petrassi, he also deputized secretly for his trumpeter father in a light music orchestra. He thus developed two distinct sides to his musical personality: one of these led him to embrace serialism (e.g. in *Distanze* and *Musica per 11 violini*, 1958) and the experimental work of the improvisation group Nuova Consonanza (from 1965); the other gained him a leading role, principally as an arranger, in all types of mass-media popular music, including songs for radio, radio and television plays, and the first successful television variety shows. In the early days of the record industry his innovative contribution played a decisive part in the success of the first Italian singer-songwriters ('cantautori'), including Gianni Morandi and Gino Paoli.

After many minor cinematic collaborations, Morricone achieved wider recognition with Sergio Leone's series of four Westerns, beginning with *Per un pugno di dollari* (1964). There followed important collaborations with

directors such as Bernardo Bertolucci (from 1964), Pier Paolo Pasolini (from 1966) and Elio Petri (from 1968), and particularly successful films with Paolo and Vittorio Taviani (*Allonsanfàn*, 1974; *Il prato*, 1979), Valerio Zurlini (*Il deserto dei tartari*, 1976), Roland Joffe (*The Mission*, 1986) and Brian De Palma (*Casualties of War*, 1989). Despite inevitable self-repetitions over a total of more than 400 film scores, his work provides many examples of a highly original fusion of classical and popular idioms: this is noticeable already, albeit in somewhat crude form, in Leone's series of Westerns, where the music for the opening titles juxtaposes three distinct types of music: a synthetic folk idiom, using the jew's harp, acoustic guitar and harmonica to accompany human whistling; a contemporary, urban rock sound, featuring the electric guitar; and an unabashedly sentimental choral-orchestral style. With *Giù la testa* (1971) Morricone entered an experimental phase in which he developed a technique based on melodic, rhythmic or harmonic 'modules' (usually of 4, 8 or 16 beats in length), each differently characterized and often featuring a particular instrument. These are juxtaposed and combined to create very different stylistic atmospheres. The most impressive application of the modular technique is found in *The Mission*, where the single modules, more extended and clearly defined than before, interact dialectically, assuming very clear symbolic functions.

Morricone's non-film works form a large and increasingly widely performed part of his output. Many of them use his technique of 'micro-cells', a pseudo-serial approach often incorporating modal and tonal allusions, which, with its extreme reduction of compositional materials, has much in common with his film-music techniques. His most fruitful season of concert-music composition began with the Second Concerto for flute, cello and orchestra (1985, from which the *Cadenza* for flute and tape of 1988 is derived) and continued with *Riflessi* (1989–90), three pieces for cello which represent perhaps the highpoint of his chamber music output, attaining a high degree of lyrical tension.

Morricone is an Officier de l'Ordre des Arts et des Lettres and a Commendatore dell'Ordine 'Al Merito della Repubblica Italiana'. Among other honours, he has received four Academy Award nominations, a Grammy and a Leone d'oro. In 2000 he was awarded the Laurea Honoris Causa by the University of Cagliari. Between 1991 and 1996 he taught film music (sharing a post with Sergio Miceli) at the Accademia Musicale Chigiana, Siena.

SERGIO MICELI

Morris, David (*b* Dulwich, London, 23 July 1948). British composer and musicologist. After working in popular music as a pianist, organist and composer of advertising jingles he entered the University of Wales, Aberystwyth (BMus 1973, MMus 1977), continuing his composition studies with Lumsdaine at Durham University (PhD 1981). In 1981 Morris held various academic posts in Northern Ireland before becoming a lecturer in composition and 20th-century music at the University of Ulster in 1985. In the late 1970s he began to develop his early serial style by using the serial matrix as a means to generate harmonic unity. Influenced by Birtwistle, Lumsdaine, Varèse and Stravinsky, his music of this period is exemplified by *In Praise of Ge-Nyan* (1981), winner of the 1990 Lutosławski Prize. In later works Morris has moved away from his earlier complexity and has been increasingly attracted to minimalism (*Anton Bruckner meets Steve Reich*, 1986) and jazz, interests that he combines with an enduring fascination with the music of Messiaen. Morris's finely crafted works demonstrate keen skills in instrumentation and vocal composition. His writings include *Olivier Messiaen: a Comparative Bibliography* (Coleraine, 1992).

MICHAEL RUSS

Morris, Gareth (Charles Walter) (*b* Clevedon, 13 May 1920). English flautist. He studied privately with Robert Murchie from the age of 12 and then at the RAM, making his début as a soloist at the Wigmore Hall in 1939. He played in Toscanini's post-war London concerts, appeared frequently with the London Chamber Orchestra and the Boyd Neel Orchestra, and from 1948 to 1972 was principal flute in the Philharmonia Orchestra, where he was also chairman for six years from 1966. He enjoyed a parallel career as a soloist and a member of the Dennis Brain Wind Quintet and the London Wind Quintet, and made numerous broadcasts. From 1945 until his retirement in 1985 he taught at the RAM. He is the author of *Flute Technique* (Oxford, 1991). Morris gave the first performance in England of Poulenc's Flute Sonata (with the composer) and of concertos dedicated to him by Gordon Jacob and Alan Rawsthorne. He was a strongly individual player, one of the last exponents of the English school of flute playing, characterized by the reedy and resonant tones of the wooden flute.

EDWARD BLAKEMAN

Morris, Harold (*b* San Antonio, TX, 17 March 1890; *d* New York, 6 May 1964). American composer and pianist. He studied at the University of Texas (BA) and the Cincinnati Conservatory (MM 1922), where his teachers included Kelley, Rothwell, Scalero and Godowsky. For a time he toured the USA and Canada as a solo pianist. He taught at the Juilliard School (1922–39) and the Columbia University Teachers College (1935–46), and was guest professor at several universities, including Rice Institute, where he gave the lectures published as *Contemporary American Music* (1934). In addition, he was active in associations promoting modern music and served on the ISCM directorate. His music won many awards and was often performed in the 1930s and 40s. Its style shows neo-Romantic traits: much of it is programmatic or impressionistic, and the influence of Skryabin can be detected in the harmonic and tonal thinking. Some of the thematic material, as well as the use of black American rhythms, draws on both black and white Southern folk music. Morris's form, though skilful, sometimes appears contrived.

BARBARA A. RENTON

Morris, James (*b* Baltimore, 10 Jan 1947). American bass-baritone. He studied with Ponselle in Baltimore and Moscona in Philadelphia, making his début with the Baltimore Civic Opera in 1967 as Crespel (*Les contes d'Hoffmann*). In 1970 he joined the Metropolitan Opera, beginning with the King (*Aida*) and similar parts, graduating to Don Giovanni and other principal roles from 1975. He was heard mainly in lyric Italian roles, including Banquo at his British début (1972, Glyndebourne) and Guglielmo at the Salzburg Festival (from 1982; he recorded the part under Muti). A suggestion that he should sing Wotan led him to study with Hans Hotter, and he first sang the role in *Walküre* at Baltimore in 1984. He added the *Rheingold* Wotan at San Francisco the next year (when he also first sang the Dutchman at Houston), and sang the three *Ring* Wotans first in Munich in 1987 under Sawallisch. The role brought him conspicuous success also at the Deutsche Oper, Berlin (1987), the Metropolitan Opera (1989) and Covent Garden (1988–91), while he recorded it concurrently under both Haitink and Levine. Morris resists typecasting as Wotan, and has sung to acclaim roles such as Hans Sachs, Scarpia, Macbeth and Claggart. His other recordings range from Macheath in *The Beggar's Opera* and Cecil in Donizetti's *Maria Stuarda* to Amonasro, Amfortas, Timour in Massenet's *Le roi de Lahore* and Dr Miracle (*Les contes d'Hoffmann*). His imposing presence is matched by his firm, weighty tone and command of line. His dramatic interpretations, if not always markedly individual, are supported by clear musical insight.

NOËL GOODWIN

Morris, R(eginald) O(wen) (*b* York, 3 March 1886; *d* London, 15 Dec 1948). English musical scholar, teacher and composer. He was educated at Harrow and Oxford, and studied at the RCM in London, where he joined the teaching staff. In 1926 he was appointed head of the department of theory at the Curtis Institute in Philadelphia but left after two years; he returned to England and continued teaching at the RCM until his death.

His first book, *Contrapuntal Technique in the Sixteenth Century* (1922), has had a lasting influence on teaching in England and elsewhere. It broke new ground by drawing a clear distinction between national schools of composition and by insisting that the study of counterpoint should be based on the works of the composers who wrote it rather than on arbitrary rules invented by later theorists. The textbooks that followed came from long teaching experience, and were skilfully designed to satisfy the needs of the average student.

As a composer Morris was less recognized. His music (principally published by OUP) reflected the man, and its cool, fastidious clarity, spiced with the diatonic clashes of the English polyphonists, provided just the vehicle he required. The *Canzoni ricertati* for strings (1931) show how powerfully he was influenced by his study of polyphonic methods, while the choral setting of Herrick's *Corinna's Maying* (1933) and the folksong arrangements are evidence of his lighter vein. One of his most striking works is the Suite for solo cello and orchestra (1931), written in the Lydian mode and originally called *Partita lidica*; in it he seems to have allowed himself a greater freedom of expression than usual. He abandoned composition at about 50 and thereafter never spoke of his own works; as Edmund Rubbra wrote, 'even to mention them was latterly the gravest of social indelicacies'.

H.C. COLLES/HOWARD FERGUSON

Morris, Robert (Daniel) (*b* Cheltenham, England, 19 Oct 1943). American composer and theorist. He studied with La Montaine at the Eastman School (BM 1965) and with Ross Lee Finney and Bassett at the University of Michigan (MM 1966, DMA 1969). He has received awards from BMI (1969), the AMC (1975, 1991), the NEA (1978), was Crofts Fellow at the Berkshire Music Center in 1967 and a MacDowell Fellow in 1975. He has taught at Yale University (1969–77), where he was chair of the composition department, the University of Pittsburgh (1977–80) and the Eastman School (from 1980); he was director of the electronic music studios at Yale and Pittsburgh. He performs as a pianist and with live electronics. As a theorist Morris specializes in atonal music theory, on which he has published a group of seminal papers. In 1988 Morris received the Society for Music Theory Outstanding Publication Award for his book *Composition with Pitch-Classes: a Theory of Compositional Design* (New Haven, CT, 1987). To aid his research in music theory and electronic sounds Morris has created several computer programs in Microsoft Fortran. In his music Morris combines atonal procedures with technical processes from other musics: *Motet on Doo-Dah* (1973) (Stephen Foster's *Camptown Races*) links 12-note techniques with 14th-century isorhythmic motet style and employs ornamentation derived from Korean court music. By such catholic mingling of compositional devices, he achieves polyphonic and timbral textures that reinforce the structural and temporal design of his music. In 1980 Morris began to extend and generalize the use of 12-note organizational techniques to produce new categories of musical form involving the recontextualization and transformation of musical materials. A number of his works have been recorded.

RICHARD SWIFT

Morris, Wyn (*b* Trellech, 14 Feb 1929). Welsh conductor. He studied at the RAM and the Salzburg Mozarteum (with Igor Markevitch), and in 1954 founded the Welsh SO, which he directed until 1957. That year he won the Koussevitzky Memorial Prize in Tanglewood and was invited by George Szell to Cleveland, where he assisted at Cleveland Orchestra rehearsals and conducted the Cleveland Chamber Orchestra and the Cleveland Orpheus Choir. After his return to Britain in 1960 he was appointed musical director of the Royal National Eisteddfod, Wales (1960–62), made his London conducting début, with the RPO, at the Royal Festival Hall in 1963, and served as conductor of the Royal Choral Society (1968–70) and the Huddersfield Choral Society (1969–74). He also taught at the RAM, where he was made a fellow in 1964. In 1965 he founded the Symphonica of London, with which he made a speciality of Mahler's works, giving an acclaimed cycle of the symphonies in London. His Mahler recordings include symphonies nos.1, 2, 5, 8 and 10 (in the completed version by Deryck Cooke) and a pioneering version of *Das klagende Lied*. He has also recorded taut, fiery readings of Beethoven's symphonies nos.3, 4 and 5, and in 1988 made the first recording of Barry Cooper's

realization of the sketches for Beethoven's Symphony no.10.

RICHARD WIGMORE

Morris dance. English folkdance. *See* ENGLAND, §II, 4.

Morrison, (George) Van [Ivan] (*b* Belfast, 31 Aug 1945). Northern Ireland singer-songwriter. His father was a shipyard electrician whose record collection, which included music by Muddy Waters, Leadbelly, Mahalia Jackson and Hank Williams, had a profound influence on the young Van Morrison. At the age of 15, having left school, he began playing the guitar and saxophone with a variety of skiffle groups. Morrison first achieved success as the singer and songwriter for Them, with *Baby please don't go* and *Here comes the night*. The band split up after a tour of America with the Doors in 1966 and Morrison returned to Belfast. Here he wrote his solo album *Astral Weeks* (WB, 1969) which was recorded in New York. The album combines jazz, rock, blues, soul, gospel and other styles that had informed Morrison's childhood, and its three key songs - the title track, *Cyprus Avenue* and the mysterious and evocative *Madame George* - reflect on aspects of his early years in Belfast. *Moondance* (WB, 1970) was a bolder album, a confident jazz-influenced rock exposition with a discernible influence from the Band, with whom he worked the following year on their album *Cahoots*. While *Moondance* revealed Morrison's debt to rhythm and blues, his third solo album, *His Band and the Street Choir* (WB, 1970), drew from country music. Generally underrated yet regarded by some as Morrison's best work, *Saint Dominic's Preview* (WB, 1972) was a distillation of his many influences.

Morrison's mid-1970s output was inconsistent and among his later albums, *Wavelength* (WB, 1978), *Into the Music* (Mer., 1979) and *Beautiful Vision* (Mer., 1982) stand out. Suffused with Celtic imagery, the last was an expression of a life-long quest for spiritual enlightenment, which effectively formed a trilogy with his two subsequent albums, *Inarticulate Speech of the Heart* and *A Sense of Wonder* (Mer., 1982 and 1983). In 1988 he collaborated with the Irish folk group the Chieftains on the widely praised *Irish Heartbeat* (Mer.), which included traditional songs and Morrison originals. In 1995 with Georgie Fame he recorded at Ronnie Scott's night club the live album *How Long Has This Been Going On?* (Verve), on which he sang jazz standards as well as his own material. Speaking about his music Morrison has said, 'What I do is rock music, but what I actually perform and do on albums has nothing to do with rock. It's not played like rock' (Collis). He was made an OBE in 1996.

LIZ THOMSON

Morrow, Charlie [Charles Geoffrey] (*b* Newark, NJ, 9 Feb 1942). American composer. He was educated at Columbia University (BA 1962) and the Mannes College of Music (diploma in composition, 1965), where he was a pupil of Sydeman. In 1968 he founded Charles Morrow Associates to produce commercial music, a field in which he has remained active. In 1973, with La Barbara and others, he began a cooperative improvisational group, the New Wilderness Preservation Band; the same year he became artistic director of the New Wilderness Foundation, which produces concerts and sponsors *Ear* magazine. Morrow has received two Creative Artists Public Service grants (1973, 1975) and an NEA grant (1978); he has won CLIO awards for his commercial music.

Morrow blends spontaneous sounds and movements with organized, pre-planned music and gesture, juxtaposing natural/human with mechanical/synthesized sounds. He draws on diverse instruments among which horns, whistles and trumpets are prominent. For many works he has borrowed elements from other cultures, notably Amerindian rattles and ceremonial chanting, as in *66 Songs for a Blackfoot Bundle* (1971). His outdoor 'events' make use of their surroundings, both aural and visual, and often require very large performing forces; for example, *Toot 'n Blink Chicago*, performed as part of the New Music America festival of 1982, is for boat horns and lights, conducted by radio announcers. A use of old and new technologies has also allowed performances to connect diverse locations via communications media (television, radio, telephone, the internet), such as *Circumpolar Sounds of Spring* (1996), which linked radio stations around the polar circle in a world broadcast. The events are usually planned to coincide with intrinsically significant moments in nature such as the summer solstice. Morrow also works in sound sculpture and interactive media. His CD-ROM 'ScruTiny in the Great Round' won the grand prize at Cannes in 1996.

WORKS

Events: Triangulation Pieces, ens, radio transmitter, 2 repeater pickups, 1970; Blessingway – A Celebration, 1973; Sunrise Event, 1973; New Wilderness Riff Off – Open Jam in Central Park, 1974; Chanting Workshop, 1976; Cross Currents, 2 rock bands, Amerindian and South Indian musicians, 2 composers, dancer, 1977; New Wilderness Country Fair, 100 artists, 1978; Inauguration Event, 1981; An Event for Art on the Beach, conch shells, cymbals, perc, 1981; Heavyweight Sound Fight, 1981; Toot 'n Blink Chicago, marine radios, horns, lights, 1982; Explosion at Penn Station, 1984; Citywave, 4000 pfmrs, 1985, Citywave Copenhagen, 2000 pfmrs, 1985; Artic Radio, 1990; Mars Doppler Shift Echo Event, radar, *c*1990; other works, incl. Summer Solstice series and media (broadcast) events

JOAN LA BARBARA

Morrow, (Norman) Michael (MacNamara) (*b* London, 2 Oct 1929; *d* London, 20 April 1994). English director and co-founder of the ensemble Musica Reservata. *See* MUSICA RESERVATA (ii).

Morrow, Walter (*b* Liverpool, 15 June 1850; *d* Wimbledon, 21 Dec 1937). English trumpeter. He studied with the younger Thomas Harper at the RAM and began to play the cornet and slide trumpet at London concerts in about 1873. When Harper retired in 1885 Morrow was generally regarded as the foremost English trumpeter. Towards 1910 he began to give up concert work. He was a professor at the RCM from 1894 to 1920, and also at the GSM. He was also an accomplished pianist.

Morrow shared with Harper a distaste for the prevailing habit of playing orchestral trumpet parts on the cornet; but unlike Harper, Morrow was not content to use the slide trumpet where feasible and otherwise the cornet. He insistently advocated the use of the valve trumpet in F, then hardly known in England, on the grounds that it alone had the proper length of tubing to reproduce the classical trumpet tone. Among London players he set a fashion for it which lasted roughly from 1898 to 1905, by which time the modern B♭ trumpet had arrived in England. Morrow was opposed from the beginning to the B♭ trumpet, which has merely the tube length of a cornet. He revived the F trumpet at the RCM from about 1910, persuading Stanford to insist that students orchestrate for this instrument, but because of pressure from his colleague John Solomon and his best pupil Ernest Hall (the leading British player of the following years), he began to teach and use the B♭ trumpet, at least occasionally, from about 1912. Morrow also had made a straight two-valve trumpet in A that he introduced at the Leeds Festival of 1886 (*see* BACH TRUMPET). His F trumpet and slide trumpet are now in the Horniman Museum, London. He made a translation (London, *c*1907) of Julius Kosleck's F trumpet method.

ANTHONY C. BAINES/EDWARD H. TARR

Mors [Morss]. *See* MOORS.

Morselli, Adriano (*b* Veneto region; *fl* 1676–91). Italian librettist. He wrote 16 librettos for operas produced in Venice from 1679 to 1692, progressing from minor theatres (S Cassiano and S Angelo) to the more important (S Salvatore and S Giovanni Grisostomo). His *Maurizio*, which enjoyed productions in at least 17 Italian cities between 1687 and 1708, was one of the most widely disseminated operas of the period. His *Tullo Ostilio* and *Teodora augusta* (both 1685) were almost as popular. Alessandro Scarlatti's setting of *Pirro e Demetrio* (1694, Naples, S Bartolomeo) became one of that composer's most widely produced works.

Morselli is described posthumously as 'dottore' on the title-page of *Ibraim sultano* (1692). By 1676 at the latest he had begun to provide occasional poems for the nobility. As house librettist at the Teatro S Giovanni Grisostomo from 1688 until his death, he enjoyed the patronage of the Grimani family who owned it. He wrote a series of sonnets celebrating the accession in 1689 of the Venetian Pietro Ottoboni (1610–91) to the papacy as Alexander VIII. This connection may have contributed to the restaging of several of his works in Rome in the 1690s at theatres under the protection of the pope's nephew Cardinal Pietro Ottoboni (1667–1740).

Although none of his works is entirely lacking in comic elements, Morselli stands out as an early representative of the trend towards librettos on elevated topics, particularly in his works for S Giovanni Grisostomo. Bonlini noted that Morselli's *Incoronazione di Serse* (1690) was among the first librettos to be based on French neoclassical works. Although Vincenzo Grimani had drawn on the subject matter and verse of Corneille's *Horace* for his *Orazio* (1688), Morselli was the first to attempt to incorporate Corneille's concentrated dramatic action and economical plot management into a libretto. Morselli later stated that his new approach was not well received by the audience. *La pace fra Tolomeo e Seleuco* (1691) draws on French drama only superficially, taking only its characters' names from *Rodogune*. *Ibraim sultano*, based on Racine's *Bajazet*, also uses the French playwright's subject without adopting his dramatic style, and Morselli even increased the plot's comic interplay by adding two characters absent in Racine.

HARRIS S. SAUNDERS

Morsolino, Antonio (*fl* 1588–94). Italian composer. In 1588 he was commissioned by Count Marc'Antonio Martinengo of Villachiara to collect and edit an anthology of madrigals by 18 Italian composers all set to the same text, which had been written by Martinengo himself. The result, *L'amorosa Ero*, was published in Brescia (RISM 1588[17]; ed. H.B. Lincoln, Albany, NY, 1968), and includes one setting by Morsolino. He also contributed eight pieces to *Il primo libro delle canzonette a tre voci* (1594[15]). Uomobono Morsolino, organist of Cremona Cathedral, 1591–1611, who wrote four canzonettas for the same publication, was probably a relative.

HARRY B. LINCOLN

Mortari, Virgilio (*b* Passirana di Lainate, Milan, 6 Dec 1902; *d* Rome, 5 Sept 1993). Italian composer. He studied at the Milan Conservatory with Bossi and Pizzetti, and graduated in the piano and composition (1928) at the conservatory in Parma. In 1924 he won the Società Italiana di Musica Contemporanea competition. He

taught composition at the Venice Conservatory (1933–40) and at the Conservatorio di Musica S Cecilia in Rome (1940–73). Together with Casella he was responsible for the establishment and artistic direction of the Settimane Musicali in Siena. He was artistic director of the Accademia Filarmonica Romana (1944–6), supervisor of the Teatro La Fenice in Venice (1955–9), and vice-president of the Accademia di S Cecilia in Rome (1963). In 1980 he was the first Italian to be awarded the Prix Montaigne. He was a member of the Accademia di S Cecilia and of the Filarmonica Romana.

From his very first works, most of them vocal, Mortari's music revealed original strains of caricature (e.g. *La partenza del Crociato*), the childlike (e.g. *Giro giro tondo*) and folklore (e.g. the opera *Secchi e Sberlecchi*). His large output of orchestral and chamber works displays a leaning towards solid formal construction and a strongly neo-classical style of clear, diatonic melody. With these stylistic elements remaining fundamentally unchanged, his postwar theatrical works explored ideas from the eclectic (*La figlia del diavolo*) to the grotesque and the light-hearted (*L'alfabeto a sorpresa*, *Il contratto*). By contrast, in the sacred vocal music Mortari's typical melodic vein was transformed into a mood of serene religiosity (*Laudi*, *Stabat mater*, *Salmi in memoria di A. Casella*).

WORKS

Stage: Secchi e Sberlecchi (chbr op, 2, A. Beltramelli), Udine, Sociale, 1927; La scuola delle mogli (commedia, 3, C.V. Ludovici, after Molière), 1930, rev. VIRGILIO BERNARDONI

Mortaro, Antonio (*fl* 1587–1610). Italian composer. He became a Franciscan friar at Brescia in 1595, and by 1598 had taken the post of organist at the Franciscan monastery in Milan. He was organist at Novara Cathedral in 1602, but returned to Brescia after 1606. He was one of the more important transitional church composers whose works span the pre-continuo and the continuo epochs, and his output also includes a large number of canzonets and some madrigals, and instrumental works, some in keyboard or lute tablature. The majority of his sacred music is for double or triple choir in the Venetian manner of the Gabrielis, although there are conventional polyphonic motets in the 1602 volume and five-part psalms with continuo in that of 1608 (in a more forward-looking style). The three-part motets, first published in 1598 and reprinted at least twice, in 1603 and 1610, are interesting examples of the developing concertato style. Written for two upper voices in equal range with a supporting bass voice, the 1598 publication includes a 'partitio' book in which the three voices are arranged in score for the keyboard player. In the 1610 edition this book is replaced by a genuine basso continuo part. This same trio texture

is apparent in Mortaro's four volumes of *Fiammelle amorose*, canzonets with a pleasing rhythmic gaiety, although here the upper voices are usually not equal. Whatever medium he chose, his works were popular and widely disseminated in anthologies over a 40-year period.

WORKS

SACRED

Missa, motecta, cantica BVM, liber 2, 8, 12vv (Venice, 1595)
Sacrae cantiones, 3vv (Milan, 1598/*R* 1610 with bc)
Messa, salmi, motetti, et Magnificat, 3 choirs (Milan, 1599)
Psalmi ad vesperas, triaque cantica BVM, 8vv (Venice, 1599)
Sacrarum cantionum, liber 1, 5–8vv (Milan, 1602)
Missarum, sacrarum cantionum, liber 3, 9vv (Venice, 1606)
Il primo libro delli salmi, 5vv, bc, op.13 (Venice, 1608)
Il secondo libro delle messe, salmi, Magnificat, canzoni da suonare, e falsi bordoni, 13vv (Milan, 1610)
Litanie, 4vv, bc; lost, listed in *MischiatiI*
Magnificat, 1600[1]; 3 psalms, 1587[1]; motets, 1600[2], 1613[1], 1616[2], 1622[2], 1623[2], 1626[2], 1626[4], 1627[1], 1627[2]; 2 tricinia, 1605[1]

SECULAR

JEROME ROCHE/TIM CARTER

Mortellari, Michele (*b* Palermo, *c*1750; *d* London, 27 March 1807). Italian composer. He moved from Sicily to Naples to study with Piccinni. His career as an opera composer began in Florence and was centred in northern Italy until he moved to London in 1785. Most theatres engaged him to write serious operas, but during a ten-year period, beginning in 1775 with *L'astuzie amorose*, several Venetian theatres commissioned comic operas. These typically begin with an introductory ensemble, each act closing with a finale, and an occasional duet, trio, quartet or quintet is interspersed between the arias. *La fata benefica* is unusual for its many magical scene changes. None of his comic operas achieved complete success, but three serious ones, *Medonte* (*Arsace*), *Armida* and *Antigona*, received two subsequent performances in other cities. In 1785 Mortellari was invited to compose a new version of *Armida* for Florence (*Armida abbandonata*) during a period of intense operatic activity encouraged by Archduke Leopold; this version was repeated in London in 1786.

Mortellari's two successful spectacle operas, *Armida* and *Antigona*, may have earned him the commission to compose *Troia distrutta* for the opening of La Scala in 1778. One of Verazi's most radical operas, *Troia distrutta* opens with a programmatic sinfonia involving chorus and a terrifying spectre. Act 1 closes with a finale spanning four scenes and Act 3 is an enormous scene with soloists, ensembles, chorus and pantomime depicting terror, death and destruction as the Greeks capture Troy. For the next carnival he wrote a new setting of De Gamerra's *Lucio Silla* for Turin, another theatre with a strong interest in spectacle. In 1784 he returned to Milan to set Moretti's innovatory libretto *Semiramide*, the first in a succession of operas based on Voltaire's *Sémiramis*.

In 1785 Mortellari settled in London, where he composed and taught singing; Elizabeth Billington is said to have studied with him in 1786 during her first season at Covent Garden. During the same season some of his arias were incorporated into the pasticcio *Didone*, and his opera *Armida* was performed at the King's Theatre. His cantata *Venere ed Adone* was first performed at the Hanover Square Rooms on 8 May 1787. Although Mortellari was based in England, he travelled to Italy and Russia in the late 1790s: his *Angelica* (1796, Padua) opens with a storm and disembarkation that harks back to Majo's *Ifigenia in Tauride* (1764) and to Gluck's borrowing for Paris (1779); there are also many ensembles and extensive finales here that are typical of opera in the late 1790s. The trip to Russia in 1798 failed to win the favour of Paul I, newly ascended to the throne, but Mortellari served Count Sheremet'yev for some months, before announcing his departure in June 1799.

Burney, having heard Mortellari's *Armida* in London, characterized his taste in singing as being 'of the most refined and exquisite sort' and his music 'less bold, nervous, and spirited, than elegant, graceful, and pleasing'. Mortellari was primarily a melodist with a strong interest in orchestral effects, which he attained through contrasting forces, textural thickening and fast figuration. He used wind instruments liberally, particularly in vocal caesuras and ritornellos, and he frequently wrote for solo instruments. His programmatic orchestrations work well in the finales, and his operas as a whole show evidence of careful tonal planning.

WORKS

STAGE

Didone abbandonata (os, 3, P. Metastasio), Florence, Pergola, 16 Sept 1772

MARITA P. McCLYMONDS

Mortelmans, Lodewijk (*b* Antwerp, 5 Feb 1868; *d* Antwerp, 24 June 1952). Belgian conductor and composer. He studied with Jan Blockx and Peter Benoit at the Antwerp School of Music, and in 1893 he won the Belgian Prix de Rome with his cantata *Lady Macbeth*. Appointed professor of counterpoint and fugue at the Antwerp Conservatory in 1902, he directed that institution from 1924 until 1933 and taught at the Lemmens Institute, Mechelen. He was the first director and conductor of the Nouveaux Concerts d'Anvers, founded in 1914. Mortelmans's teaching attracted many gifted pupils, among them De Jong and Peeters. An enthusiast for the Flemish movement, he was president of the Society of Flemish Composers and made many settings of Guido Gezelle, the leading Flemish poet of the 19th century. In 1921 Mortelmans toured the United States, where his songs met with great praise from both press and public. Several of his works were published by Schirmer of New York and by the Composers' Music Corporation. For the last 20 years of his life Mortelmans lived in the countryside and devoted himself exclusively to composition. He was made a member of the Royal Flemish Academy of Belgium.

His output includes orchestral works, instrumental pieces (particularly Impressionistic piano pieces), choral music and songs. His songs are the most important expression of his development and are of international stature. They are characterized by a profound union between text and music, refined naturalism, dramatic expression and exquisitely phrased melodies arranged in fluid modal harmonies. His piano music evolved from Romantic lyricism to Impressionism, though his orchestral works are reminiscent of Schumann, Brahms and Wagner.

HERBERT ANTCLIFFE/CORNEEL MERTENS/DIANA VON VOLBORTH-DANYS

Mortensen, Finn (Einar) (*b* Oslo, 6 Jan 1922; *d* 21 May 1983). Norwegian composer. He studied harmony with Eken and counterpoint with Egge in Oslo, and composition with N.V. Bentzon in Copenhagen (1956). In 1965 he participated in the composition courses in Darmstadt, and studied electrophony in Cologne with Stockhausen. As chairman of Ny Musikk (1961–4, 1966–7) he invited modernist composers and musicians to perform in Norway; these included Stockhausen, David Tudor, Nam Yun Paik, Kontarsky and Caskel. He was the first director of the Norwegian State Concerts Agency (1967–8). He taught composition at the Oslo Conservatory (1970–73), and in 1973 became the first Norwegian professor of composition at the Norwegian State Academy of Music. He held the presidency of the Society of Norwegian Composers (1972–4) and the vice-presidency of TONO, the Norwegian performing rights society.

His early compositions were written in a neo-classical style. He had thoroughly studied Hindemith's composition technique, which was the basis for his first compositions, opp.1–6. Among these his Symphony op.5 (1953) is especially noteworthy; often performed by Norwegian orchestras it shows Mortensen's admiration of Bruckner's music. His use of polyphony is remarkable, and the symphony's last movement builds to a quadruple fugue. The Wind Quintet op.4 was performed at the ISCM

festival in Stockholm in 1956. Following his studies with Bentzon he turned to 12-note technique, which was strictly used in his op.13, Fantasy and Fugue for Piano (1958), the first 12-note composition by a Norwegian composer. It was performed at the ISCM Festival in Cologne in 1960, and attracted the attention of critics as well as composers abroad. From 1958 he used 12-note series in all his compositions. In the orchestral piece *Evolution* (1961) he made use of 'integral serialism: great expressiveness results from his juxtaposition of 12-notes clusters with linear melodic statements deriving from note rows. In his important compositions from the 1960s, Piano Concerto, *Tone Colours* and Sonata for two pianos, Mortensen introduced aleatory techniques and combined them with his integral serial technique. These compositions are the most representative of the avant-garde style in Norwegian music. From 1970 he moderated his style and developed what he called 'new-serialism', a form of serial technique in which the melody regains a principal role but in combination with serial technique (Suite for Wind Quintet, 1973; Piano Sonata no.2, 1977).

ELEF NESHEIM

Mortensen, Otto (Jacob Hübertz) (*b* Copenhagen, 18 Aug 1907; *d* Århus, 30 Aug 1986). Danish composer, pianist and teacher. In 1925 he entered the Copenhagen Conservatory, where he studied with Jeppesen (theory), Rung-Keller (organ) and Christiansen (piano). He left the conservatory in 1929 after taking the final examination as organist and pianist, and he made his début as a concert pianist in Copenhagen the following year. During the 1930s he studied in Berlin (1930) and Paris (1939, with Milhaud and Desormière); in 1956 he took a master's degree at the University of Copenhagen. He was opera répétiteur at the Royal Theatre in Copenhagen (1937–56) and appeared as a guest conductor for Danish Radio and the Tivoli; he taught at the Copenhagen Conservatory (1942–66) and then was lecturer in music at the University of Århus (1966–74).

Mortensen's fairly sparse output centres on vocal music. Among his instrumental works, the Wind Quintet is notable for its balanced form on a traditional basis. His vocal music is also bound by tradition, but his rare talent for an independent, lyrical continuation of Nielsen's romance tradition earned him a reputation as the most convincing and convinced song composer of his generation, at a time in Danish music when the romance tradition was seen more as a burdensome inheritance to be avoided than a challenge to be taken up. Mortensen became involved in popular musical work in the years after 1930; he also wrote finely constructed choral arrangements of his own songs and Danish folktunes, as well as educational works.

NIELS MARTIN JENSEN/DANIEL GRIMLEY

Morthenson, Jan W(ilhelm) (*b* Örnsköldsvik, 7 April 1940). Swedish composer, writer and theorist. He studied composition with Mangs, Lidholm and Metzger, electronic music with Koenig and aesthetics at Uppsala University; in 1963 he attended the Darmstadt summer courses. In 1974–5 he was chairman of the Swedish section of the ISCM and from 1975 to 1978 vice-chairman of the ISCM council. He was also chairman of Fylkingen (1975–6) and on the board of the Electronic Music Studio (1973–5). He has taught composition at the San Francisco College of Music, and at the Musikhögskolan in Stockholm

and Malmö. In his book *Nonfigurative Musik* (1966) he argued that developments in composition have rendered music of directed movement impossible, since the breakdown of tonal harmony has been followed by similar processes of neutralization in instrumentation, presentation and form. His works take note of the far-reaching consequences of this point of view. After the *Wechselspiel* series (1960–61), which he later criticized as idealistic and formalistic, he made several studies of timbre over various chords (*Coloratura* series, 1962–4) and essays in octave harmony (*Antiphonia I–III*, 1963–70), striving for the most static form in both groups. A note of social-cultural criticism appeared most evidently in his work after 1968 which is dominated by 'metamusic'. For example, *Decadenza II* is 'a funeral march for the decline of instrumental music and musical life over 100 years' which brings together musical characteristics from Bruckner onwards. In the same way he concentrated on church music in *Decadenza I*, funeral music in *Farewell*, string music in *Senza*, the demagogy and mass effect of orchestral music in *Colossus*, and music's demand for physical achievement in *Labor*. Particular notice was given to his *Alla marcia* (1973) for orchestra and a female choir from the Salvation Army; it commentates on the violence in society, of which military music is a contributory part. He has also worked with visual images in a series of film and videotape pieces, moving from simple changing shades of colour in *Interferences I* through lines, volumes and light intensities in *Lux sonora* to the environmental composition *Camera humana*. In the *Sensory Project* series he has explored aural and visual stimuli at the limits of perception, believing that artists of the future may have to work below the threshold of consciousness. On the other hand, his mixed-media piece *Citydrama* used the whole city of Bonn for four days in 1973. As a writer he is critical, polemical and pessimistic, but he always defends the free artist in our culture.

ROLF HAGLUND

Mortier, Pierre [Pieter] (bap. Leiden, 26 Jan 1661; bur. Amsterdam, 18 Feb 1711). Dutch printer of French extraction; he copied some of the publications of ESTIENNE ROGER.

Morton, Jelly Roll [Lamothe [La Menthe, Lemott], Ferdinand Joseph] (*b* New Orleans, 20 Oct 1890; *d* Los Angeles, 10 July 1941). American jazz composer and pianist.

1. LIFE. He grew up in New Orleans, and started to learn the piano at the age of ten. By 1902 he was working in the bordellos of Storyville, playing ragtime, French quadrilles and other popular dances and songs as well as a few light (mostly operatic) classics. Nothing is known

of his formal musical training, but his major youthful influence appears to have been Tony Jackson. Around 1904 Morton became an itinerant pianist, working in many cities in Louisiana, Mississippi, Alabama and Florida. He was also apparently quite active as a gambler, pool player and procurer, though music remained his first 'line of business'. While retaining New Orleans as his base, he later extended his travels to Memphis, St Louis and Kansas City, frequently working for prolonged periods in minstrel shows; eventually he journeyed as far east as New York (where James P. Johnson heard Morton play his *Jelly Roll Blues* in 1911), and as far west as Los Angeles, where he arrived in 1917. During these dozen years of travel Morton apparently fused a variety of black musical idioms – ragtime, vocal and instrumental blues, items from the minstrel show repertory, field and levee

Ex.1 From *Grandpa's Spells*, recorded by the Red Hot Peppers (1926, Vic.); transcr. G. Schuller

hollers, religious hymns and spirituals – with Hispanic music from the Caribbean and white popular songs, creating a musical amalgam that bore a very close resemblance to the music then beginning to be called 'jazz'.

Morton enjoyed such success in Los Angeles that he remained there for five years. In 1922, however, he moved to Chicago, the new centre of jazz activity. His first recordings were made there in 1923: two performances with a sextet and a series of solo piano renditions of his own works. The compositional maturity and the advanced conception of the ensemble and solo writing revealed in these recordings suggest that Morton's style must have crystallized many years previously. By 1926–7 he was recording with his Red Hot Peppers, a seven-or eight-piece band organized for recording purposes and comprising colleagues well versed in the New Orleans style and familiar with Morton's music. The resultant recordings were a triumphant fusion of composition and improvisation. Pieces such as *Grandpa's Spells*, *Black Bottom Stomp* (both 1926, Vic.) and *The Pearls* (1927, Vic.) are masterly examples of Morton's creative talents, not only as a composer and arranger but also as a pianist. These works were ingeniously conceived so as to yield a maximum variety of texture and timbre without sacrificing clarity of form (ex.1); furthermore, unlike most jazz performances in those days, they were carefully rehearsed. Particularly noteworthy is the manner in which Morton provides opportunities for all the performers to contribute significant solos (usually climaxing in exultant two-bar breaks) without losing sight of overall structural unity and a balance between solo and ensemble. As a pianist Morton contributed not only some of his most inspired solos, such as those on *Smoke-house Blues* (1926, Vic.) and *Black Bottom Stomp* (ex.2), but also sensitive countermelodies that were without precedent in 1920s

Jelly Roll Morton, c1926

Ex.2 Morton's solo chorus from *Black Bottom Stomp* (1926, Vic.); transcr. G. Schuller

jazz; similar ideas were taken up only by Earl Hines and, some years later, Art Tatum.

In 1928 Morton moved to New York, where he continued to record. He gradually made use of such 'modern' devices as homophonically harmonized ensembles and laid a greater emphasis on solo improvisation. However, he remained at heart true to the New Orleans spirit of collective improvisation and was never able to assimilate the new orchestral styles advanced in the late 1920s by Don Redman, Fletcher Henderson and John Nesbitt. By 1930 Morton's style, both as arranger and pianist, came to be regarded as antiquated. Ironically, some of his compositions, such as *Wolverine Blues*, *Milenberg Joys* and especially *King Porter Stomp*, continued to be performed regularly, remaining as influential pieces in the repertory throughout the 1930s. Indeed, it was Benny Goodman's performance of the last-named title, in Fletcher Henderson's updated arrangement (1935), that was largely responsible for ushering in the swing era.

In the early 1930s Morton drifted into obscurity. He settled in Washington, where he managed a jazz club and also played intermittently. In 1938 the folklorist Alan Lomax, later Morton's biographer, recorded him in an

extensive series of interviews held at the Library of Congress (issued on disc in 1948 and reissued in 1957). In this invaluable oral history Morton recalled in words and performances his early days in New Orleans, re-creating the styles of many of his turn-of-the-century contemporaries. His accounts, both verbal and pianistic, have the ring of authenticity, and revealed Morton as jazz's earliest musician-historian and a perceptive theorist and analyst of the music. The Library of Congress recordings rekindled public interest in Morton, eventually leading to further recording sessions in 1939–40 and, in tandem with the New Orleans revival, a renewed career; this was cut short in 1940, however, owing to his ill-health.

2. ACHIEVEMENT. Morton was the first important jazz composer. His compositions, many written long before he began recording, represent a rich synthesis of African-American musical elements, particularly as embodied in the pure New Orleans collective style which he helped to develop to its finest expression. Paradoxically, his emphasis on composition and well-rehearsed, coordinated performances was unique and antithetical to the primarily extemporized, polyphonic New Orleans style. In his best ensemble work, especially with the Red Hot Peppers, Morton showed that composition and meticulously rehearsed arrangements were not incompatible with the spontaneity of improvised jazz but could in fact retain and enhance it. In this respect Morton's achievement may be ranked with that of Duke Ellington, Thelonious Monk, Charles Mingus and Gil Evans.

Morton's sophisticated conception of jazz is all the more remarkable since the origins of his style lie primarily in classic Midwestern ragtime and simple instrumental blues. His piano pieces (such as *Grandpa's Spells* and *Kansas City Stomp*, both 1923, Gen.) strongly resemble ragtime in their form, but by elaborating these works with composed and improvised variation Morton was able to transcend ragtime's formal conventions. Ultimately he freed ragtime from its narrow strictures by developing within it an ensemble style embracing homophony, improvised polyphony, solo improvisations, breaks and a constant variation of texture and timbre.

WORKS
(*selective list*)

dates of composition are mostly conjectural; all published for piano solo

GUNTHER SCHULLER

Morton [Mourton, Moriton], **Robert** (*b c*1430; *d* after 13 March 1479). English composer. He was *clerc* and *chappelain* in the chapel choir of the Burgundian court from 1457 to 1476, the final decade of the long reign of Philip the Good and the first eight years of the brief and tumultuous reign of his son Charles the Bold. The document of late 1457 appointing Morton and authorizing payment for clothes describes him as 'chappellain angloix' and is the only evidence that he was English. Because of a lacuna in the documents for the following years, the first surviving payment to him as a member of the chapel is from October 1460: here, and in all subsequent documents, he is styled 'Messire' – a title which, in the context of these particular documents, means that he was a priest.

Morton was seconded to the household of Charles, Count of Charolais, the future Duke Charles the Bold, from 1 June 1464 to 12 March 1465 and again for three months some time between 1 October 1465 and 31 September 1466. He was given leave of absence from 20 July to 13 August 1470. After 19 February 1475 he appears in the daily payment scrolls only for 13–14 June; on 1 February 1476 his position as a chaplain was taken by Pierre Basin, apparently in immediate fulfilment of an expectative granted a year earlier (see Pirro, 118). However, contrary to some earlier statements, he did not die then: in January 1477 a papal document records his paying the annates for a benefice at St Paul, Liège (Roth, 542); and on 13 March 1479 he resigned the parish of Goutswaard-Koorndijk (Holtkamp, 108).

Morton's career in the Burgundian court chapel is perplexing because he remained in the humble position of *clerc* for almost 15 years, becoming *chappelain* only in 1471–2. Normally singers were promoted within three or four years. This delay cannot be explained by the famous emnity between Duke Philip the Good and his son, for Morton was a *clerc* for four more years after Charles became duke. There may have been political reasons for the delay in his promotion, if the composer is identifiable with the Robert Morton (*d* 1497) who later became Bishop of Worcester. During the years 1457–76 none of the documents for the future bishop attests his presence

in England. He succeeded his uncle John Morton (later cardinal) as canon of Salisbury Cathedral and St Paul's Cathedral, London, in 1478 and as Master of the Rolls in January 1479 (having been granted the reversion of it on 30 May 1477). It is an intriguing coincidence that John Morton was an envoy to the court of Burgundy from January to June 1474 and from December 1474 to January 1475, that is, the last months of Robert Morton's tenure in the choir.

Further oblique clues to Morton's life survive. His rondeau *Le souvenir* recalls the arms of Claude Bouton (*b* ?1488), 'Souvenir tue', and might indicate some connection with the Bouton family, at least one of whom was prominent at the Burgundian court during Morton's time there. The poem *Mon bien, m'amour, ma joye et mon desir*, printed in *Le jardin de plaisance* (Paris, 1501) and normally considered the correct poem for the music *Mon bien ma joyeux*, has the acrostic MARIE M[O]RELET, though no person of this name has been identified. The anonymous rondeau *La plus grant chiere* (ed. in Marix, 1937, p.86; text in Marix, 1939, p.207) describes vividly how Morton and Hayne van Ghizeghem astonished everybody with their singing and playing at Cambrai.

Only secular works survive; and all are ascribed simply 'Morton'. However, four of them, ascribed to him only in *I-PEc* 431 (*c*1490), may well be by other composers. Three have more convincing ascriptions elsewhere: *Pues serviçio* to the Spanish composer Enrique (see Fallows, 1992); *Vien'avante morte dolente* to Adrien Basin, a colleague at the Burgundian court; and *C'est temps perdu* to Caron. The other doubtful song appears with many different texts in different sources: 'Vive ma dame' in *F-Dm* 517; 'Hellas madame et que serrace' in *E-TAc*; 'Tu sine principio' in *CZ-HK* II A 7; 'Motectus' in *I-PEc* 431; 'Lent et scolorito' in *I-Bc* Q16; and, most convincingly, 'Ellend du hast umbfangen mich' both in the Schedel Liederbuch (*D-Mbs* Cgm 810, *c*1460) and in Hans Gerle's printed lutebook (Nuremberg, 1533). Moreover, its tenor matches the melody for that text in other German sources, and its style is thoroughly German.

Of Morton's remaining eight works, all are French and in the rondeau form that dominated French song composition of those years, especially at the court of Burgundy. There is no hint of English style in them, unless it be in the open triadic F-tonality of *Mon bien ma joyeux*. The two most successful were *Le souvenir de vous me tue* and *N'aray je jamais mieulx*, both found in sources from the mid-1460s onwards. *Cousine trop vous abusés* seems to match a group of similar pieces dating from the early 1460s; and *Il sera pour vous*, superimposed over the famous melody *L'homme armé*, refers jokingly to Simon le Breton (*see* SIMON, (1)), whose retirement from the court chapel in 1464 may have provided the occasion for the song (see Fallows, 1978, pp.204ff). *Que pourroit plus faire une dame*, with its refreshingly irregular metre, is puzzlingly ascribed to Morton only in *I-PAp* 1158, an autograph of Gaffurius.

Given that context, certain individual stylistic traits can be noted. All Morton's secure pieces have an extreme melodic economy; they avoid the simple 'filling' patterns that a composer such as Hayne van Ghizeghem would often give to the contratenor between musico-poetic lines in the discantus and tenor; the contratenor often uses wide leaps more frequently than in the works of his contemporaries; a preference for the contratenor to use leaps of a 5th tends to anchor the tonalities.

Only *N'aray je jamais mieulx* is ascribed to Morton in more than one source, yet there is ample testimony to his achievement. He was mentioned by Hothby (see *JAMS*, viii, 1955, p.95) and praised by Tinctoris (*CoussemakerS*, iv, 200) as being world-famous. As well as this his most famous pieces were exceptionally widely distributed: *Le souvenir* survives in 15 musical sources and was used as the basis for two works by Tinctoris, one by Arnolfo Giliardi and a lost mass by Gaffurius; *N'aray je jamais mieulx* has 16 musical sources and was used for a motet and three mass cycles (among them Josquin's *Missa 'Di dadi'*). These two songs represent a peak in Burgundian court music to be equalled only by the early works of Hayne van Ghizeghem; they are Morton's true claim to recognition.

WORKS

all 3 voices and probably rondeaux

Edition: *Robert Morton: The Collected Works*, ed. A.W. Atlas (New York, 1981) [incl. all works listed]

Cousine trop vous abusés

Il sera pour vous conbatu/L'homme armé (combinative chanson, anon. in unique source; rev. version, 4vv, *I-Rc* 2856, ascribed 'Borton')

Le souvenir de vous me tue (also intabulated as Salve radix Josophanie; added 4th v *PEc* 431)

Mon bien ma joyeux (text incipit evidently corrupt, and perhaps for poem *Mon bien, m'amour, ma joye et mon desir* in *Le jardin de plaisance*)

N'aray je jamais mieulx que j'ay (added 4th v in three sources)

Paracheve ton entreprise (= La perontina)

Plus j'ay le monde (= Madonna bella)

Que pourroit plus faire une dame (= Numine Ihesu celice)

DOUBTFUL WORKS

forms uncertain

C'est temps perdu (ascribed 'Caron' in *I-Rc* 2856)

Ellend du hast umbfangen mich (= Lent et scolorito and Vive ma dame par amours)

Pues serviçio vos desplaze (ascribed 'Enrrique' in *E-Mp* 1335; text by Pere Torroella)

Vien'avante morte dolente (ascribed 'Basin' in *I-Rc*2856)

DAVID FALLOWS

Morungen, Heinrich von. *See* HEINRICH VON MORUNGEN.

Mosaïques Quartet. String quartet. It was founded in 1985 by the section leaders of the Paris-based period-instrument orchestra Ensemble Mosaïques, which had been formed the previous year. Its members are Erich Höbarth and Andrea Bischof, violins; Anita Mitterer, viola; and Christophe Coin, cello; Höbarth, Bischof and Mitterer also play in Harnoncourt's Vienna Concentus Musicus. With a warmer, rounder sonority and a more flexible style than most comparable groups, the Mosaïques quickly made a reputation as one of the most characterful and technically accomplished of period-instrument quartets, excelling above all in the works of Mozart and Haydn. The group has performed at the Haydn Festival in Vienna, the Salzburg Festival and the Aldeburgh Early Music Festival, and appears regularly at the Wigmore Hall, London, and the Mondsee Festival. The Mosaïques' discs of the mature Mozart quartets and its series of Haydn recordings, two of which have won *Gramophone* awards, have been particularly admired for their insight and imaginative freedom. It has also recorded works by Boccherini and Hyacinthe and Louis-Emmanuel Jadin, and more recently has moved with equal success into 19th-century repertory, with performances and recordings of Beethoven, Schubert, Mendelssohn and Schumann.

RICHARD WIGMORE

Mosca, Giuseppe (*b* Naples, 1772; *d* Messina, 14 Sept 1839). Italian composer. He studied with Fenaroli at the Conservatorio di S Maria di Loreto, Naples; in 1791 his first opera, *Silvia e Nardone*, was performed at the Teatro Nuovo in Rome. For 12 years he composed for various Italian theatres, presenting his operas in Rome, Naples, Venice and elsewhere, usually with much success. In 1803 he went to Paris as *maestro al cembalo* at the Théâtre Italien; he composed additional music when required, but wrote no operas (two operas attributed to him in this period by Florimo were by his brother, Luigi). When Spontini assumed the directorship of the theatre (1810), Mosca returned to Italy.

After the success of Rossini's *La pietra del paragone* (1812), Mosca accused Rossini of having plagiarized his *I pretendenti delusi* (1811), particularly the device of the crescendo, circulating copies of his music as proof. The charge was repeated by critics until Radiciotti discovered that the crescendo had been employed before Mosca's first use of it (in *Il folletto*, 1797) by Simon Mayr (in *La Lodoiska*, 1796). Mosca's style shows a remarkable similarity to Rossini's in many respects – melodic turns, orchestral melodies under vocal patter, multipartite ensemble structures – but it would be difficult to decide who influenced whom.

In 1817 Mosca went to Palermo as musical director of the Real Teatro Carolino, but gave up the post after the Revolution of 1820. A return to Milan revived his career; after several years of touring, however, he settled in Messina as director of another theatre (1827). He composed more than 40 operas; all were written by 1826. Fétis described him as a musician without genius, but gifted with stupendous facility.

WORKS

OPERAS

Silvia e Nardone (int, 2), Rome, Nuovo, Feb 1791

La vedova scaltra (int, 2, L. Ricciuti), Rome, Tordinona, carn. 1796

Il folletto (ob, 2, C. Battimelli), Naples, Nuovo, 1797, *I-Nc*

MARVIN TARTAK (with MARCO BEGHELLI)

Mosca, Luca (*b* Milan, 29 May 1957). Italian composer and pianist. He studied at the Milan Conservatory, taking diplomas in piano (1979, with Antonio Ballista and Eli Pirrotta), harpsichord (1980, with Marina Mauriello) and composition (1983, with Donatoni and Sciarrino). His works have been performed at festivals in Avignon, Cologne, Milan, Venice and Vienna. He teaches at the Venice Conservatory. While his early compositions still betray the influence of his teachers (and especially Sciarrino), *Visite d'amore* for two pianos (1977–81) and the 24 Preludes for piano (1983) show his own style taking shape, one based on formal fragmentation and a frenetic overlapping of ideas. Following several years of reflection on the problem of the restoration of consonance, he abandoned this approach in the 1990s, and instead explored in greater depth asymmetrical rhythms and linguistic fragmentation within a harmonic texture of great tension (*15 divertimenti* for oboe and orchestra, Fourth Piano Concerto). His recent output shows a significant interest in opera, which is linked to his love for Kafka, and he has produced *Nove frammenti* (1995, based on *The Trial*) and *America* (1998, after the novel of the same name).

LICIA MARI

Mosca, Luigi (*b* Naples, 1775; *d* Naples, 13/30 Nov 1824). Italian composer. Most early sources state that he was a student at the Pietà dei Turchini Conservatory in Naples and also, like his brother Giuseppe, a pupil of Fenaroli. He was for many years *maestro al cembalo* at the S Carlo opera house. Through the intervention of Paisiello he also became, after 1802, *vicemaestro* of the royal chamber and chapel. He was considered one of the best singing teachers in Naples, and when Zingarelli became director of the Naples Conservatory in 1813 Mosca was made *primo maestro di canto*. He was a member of the Naples Accademia di Belle Arti. The first of his 18 operas, *L'impresario burlato*, was successfully performed at the Teatro Nuovo in 1797. Though he travelled through Italy staging his operas, most were originally written for Naples. He also composed much sacred music.

Luigi Mosca's musical style is more interesting than that of his brother, Giuseppe; Luigi showed a particular aptitude for setting specific dramatic situations and building a scene, and his use of harmony was richer. Whatever the differences, neither brother's music lasted, and their works are a dim reflection of those of their greatest contemporary, Rossini.

MARVIN TARTAK/MARCO BEGHELLI

Moscaglia, Giovanni Battista (*b* Rome; *d* Rome, 18 April 1589). Italian composer and poet. A document in the Archivio Capitolino, Rome, describes Moscaglia as a Roman citizen. Some time before the composer's birth his father, Angelo, had moved from Asigliano, near Vicenza, to Rome, where he lived in the Campo de' Fiori in the house known as the Casa della Vacca and worked as an apothecary. From 1580 (or earlier) until his death Moscaglia rented the house from the church of S Lorenzo in Damaso. He served as 'cantore, sopranus' in the Cappella Giulia from 21 March 1559 to 31 August 1560. Although he seems to have remained in Rome after 1560, as shown by several title-pages, there is no evidence of his holding any salaried appointment. Indeed, in the dedication of his *Secondo libro de madrigali* (1579) he described his devotion to music as a way of passing his leisure time and pleasing his friends. In Rome he was associated with such composers as G. M. Nanino, Macque, Stabile, Zoilo, Giovannelli and Marenzio, all of whom set his poetry to music on at least one occasion. Moscaglia asked each of these men, among others, to compose a setting for one of his poems to be included in his second book of madrigals for four voices, saying in his dedication that since he was 'unable to set them all to music myself for lack of time, I gave part of them to these excellent musicians of Rome'. Although his dedication was signed on 10 September 1582 the book was not published until 1585. Marenzio apparently tired of waiting for the appearance of his madrigal and published it in his own volume of madrigals for four voices. Two of Moscaglia's dedications indicate that he also knew some important patrons of northern Italy. His third book of madrigals for five voices is dedicated to Count Mario Bevilacqua of Verona, and refers to his famous *ridotto*. In 1587 Moscaglia visited Ferrara, where he was cordially received; on 30 June he dedicated his fourth book of madrigals to Don Alfonso d'Este, uncle of Duke Alfonso II, in gratitude for his favour. A book of *napolitane* for three voices, published in 1585, contains a dedication written by Moscaglia's wife, Lucretia Guidotti, following a common tradition in the late 16th century that composers affected lack of interest in 'minor' forms such as the canzonetta and villanella.

Moscaglia was popular with anthologists in his day; eight of his madrigals appeared in various collections and were reprinted as late as 1630. His *Due rose fresche* from the second book of madrigals for four voices is transcribed for lute in Joachim van den Hove's *Delitiae musicae* (RISM 1612[18]). His last extant published work was one piece for four voices included in a collection of 1590.

WORKS

Il primo libro de madrigali, 4–6, 8vv (Venice, 1575)
Il secondo libro de madrigali, 5vv (Venice, 1579)
Il terzo libro de madrigali, 5vv (Venice, 1585)
Il secondo libro de madrigali con alcuni di diversi eccellenti musici di Roma, 4vv (Venice, 1585[29]); 1 piece transcr. lute, 1612[18]
Il primo libro delle napolitane, 3vv (Venice, 1585)
Il quarto libro de suoi madrigali, 5vv (Venice, 1587)
Several madrigals, 1582[4], 1583[10], 1585[19], 1586[9], 1587[6], 1590[15]

STEVEN LEDBETTER/JAMES CHATER

Moscato, Judah (*b c*1530; *d* 1590). Rabbi and exegete. Music is treated at length in his sermon *Higayon bekhinor* ('Strummings/Meditations on the Lyre'; ed. and Ger. trans. H. Schmueli, Tel Aviv, 1953), the first of 52 sermons in the collection *Nefutsot yehudah* ('Judah's Dispersions'; Venice, 1589). In accordance with his belief that the origins of arts and sciences lie in ancient Israel, Moscato traces the beginnings of music to Jubal (not Pythagoras), recognizes the first 'human' musician as Moses (not Orpheus), explains the Hebrew origins of musical terms ('music' from *mezeg*, mixture or mood) and finds Hebrew prototypes for *musica mundana*, or the harmony of the spheres. The main theme pursued in a number of variations is 'harmony', which Moscato conceives in cosmic and musical terms. He implies that, in music, 'harmony' exists apart from the mode of its composition or realization: thus, by implication, harmony comprises monophony and polyphony, composed and improvised music, vocal and instrumental practices ('and they will sing to the Lord with a lyre, with a lyre and a singing voice'). Since harmony is perfection, and perfection is consonance, Moscato develops the idea of the octave in its musical and spiritual applications: the octave as a perfect interval is paralleled by the eighth day of the Feast of Tabernacles (Simḥat Torah), marking the end of the annual reading of the Torah and its renewal; the study of Torah is the eighth science (beyond the *septem artes liberales*); its content is divine, thus the perfect music is Torah, for it displays the highest form of consonance. Moses is conceived as a perfect musician, because under divine inspiration he composed the Torah. The title of the sermon is explained by an ancient myth: David woke in the middle of the night to study Torah, whereby the 'lyre' (signifying his soul) over his bed 'began to play on its own'. It is symptomatic that Moscato's sermon was composed in an era when Jewish music began to strike out in a new direction as 'art music' (as opposed to synagogal chant): by relating music to *divinitas* it was possible to legitimize its practice as measured song or polyphony.

Moscheles, Ignaz (Isaac) (*b* Prague, 23 May 1794; *d* Leipzig, 10 March 1870). Bohemian pianist and composer. He was of Jewish descent: the extra Hebrew forename Isaac, occasionally added in modern publications, was of purely religious significance and was never used by him professionally. His date of birth is given incorrectly as 30 May in many earlier works of reference. His piano lessons began early, and from 1804 to 1808 he was taught by B.D. Weber, director of the Prague Conservatory, who insisted on an exclusive study of Bach, Mozart and Clementi. But already Moscheles had discovered the 'Pathétique' Sonata, and was keen to explore every new Beethoven piano work. In 1808 he moved to Vienna, where he could come closer personally and musically to Beethoven, while studying counterpoint with Albrechtsberger and composition with Salieri. By 1814, when the publisher Artaria commissioned him to prepare a piano reduction of Beethoven's *Fidelio*, he was one of Vienna's most popular pianists, and his career as a virtuoso had begun. The brilliant display piece *La marche d'Alexandre* op.32 (1815) met with tremendous success at his recitals and became a favourite with other aspiring pianists (later including Schumann). Between 1815 and 1825 his travels as a recitalist took him throughout Germany, often to Paris and London, and also back to Prague. He was first heard in London at a Philharmonic concert on 11 June 1821, and was hailed as an equal and friend by Clementi and J.B. Cramer. It was in 1824 that Moscheles met the 15-year-old Mendelssohn in Berlin and gave him some finishing lessons on the piano.

In March 1825 Moscheles married Charlotte Embden (1805–89) in Hamburg, and they settled in London where he taught the piano both privately and at the RAM, building up a circle of talented pupils, including Litolff and Thalberg. He also became a conductor to the Philharmonic Society (co-director from 1832 to 1841); he conducted the first London performance of Beethoven's *Missa solemnis* in 1832 and very successful performances of the Ninth Symphony in 1837 and 1838. His edition and translation of Schindler was published as *The Life of Beethoven* (London, 1841); it includes an extensive autobiographical preface. Throughout the 1830s he gave concert tours in Britain and on the continent, and continued to produce a steady output of both fashionable and more serious compositions. At the same time he established a series of 'classical chamber concerts' or 'historical soirées', in which he contributed to the newly awakened interest in earlier music by playing Scarlatti and Bach on the harpsichord. The Moscheles family was often host to Mendelssohn in London: the two composers played Mendelssohn's Two-Piano Concerto in E in 1829, and the Mozart Two Piano Concerto in 1832, and Moscheles went to Leipzig to appear with Mendelssohn in his first Gewandhaus concerts in 1835. He also met Chopin and with him played his own *Grande sonate* op.47 to the French royal family in Paris in 1839.

Towards 1840 Moscheles became increasingly occupied with teaching. He finally left London in 1846 to become principal professor of piano at the Leipzig Conservatory, recently founded by Mendelssohn, remaining there for the rest of his life. Mendelssohn's death in 1847 was a profound blow, and he resolved to maintain the high standard of teaching for which his former pupil would have wished. He taught his unique piano method to many pupils, including Grieg, Fibich and Sullivan; he treated them with an almost paternal interest, often inviting them to continue instruction at his home, and finding them suitable professional openings.

Ignaz Moscheles: lithograph by Charles Baugniet, 1846

Moscheles brought a crisp and incisive touch to his own piano playing, and he phrased with clarity and precision. He admired the pianistic innovations of Chopin and Liszt, but was not convinced of their aesthetic validity: though he commissioned Chopin's *Trois nouvelles études* for his piano method, he disliked what he saw as a showy and effeminate side to Chopin's virtuosity. His own piano improvisations were marked by brilliance and variety; some of their atmosphere is probably captured in small pieces like the *Präludien* op.73 or the grander sets of variations on well-known melodies. Moscheles had a great respect for earlier music (he was active both as an editor and as an interpreter of Handel, Haydn, Mozart and Clementi, as well as of Weber). The programme of his first 'historical soirée' (February 1837) included two Beethoven sonatas (op.31 no.2 and op.81*a*), a Weber sonata, three preludes and fugues from the '48' and some Scarlatti and Handel pieces played on a 1771 harpsichord, some of his own newest studies, and vocal items by Purcell, Mozart and Mendelssohn. Hanslick assessed Moscheles as one of the last great representatives of the Classical school and also the beginner of a new epoch.

The majority of Moscheles's compositional output is piano music; some, including the sonatas, is of lasting consequence, while a number of the fantasias, rondos and variations contain more ephemeral music intended for salons or for the newly expanding amateur market. Schumann considered Moscheles one of the best sonata composers of his generation: certainly the one-movement *Sonate mélancolique* op.49 and the two duet sonatas are

imaginatively written, the former with noble restraint. His later *Hommage à Händel* op.92 for two pianos is a tasteful parody, showing his interest in Baroque music. His piano method is best represented in his sets of studies, which are still used: Schumann saw these as bridging the gap between the age of Clementi and that of Chopin and being indebted to Bach's *Clavier-Übung*.

Many of Moscheles's sonatas were written in the Beethovenian environment of Vienna; with the development of his travelling career, he turned more to display pieces and piano concertos, the latter forming the bulk of his small orchestral output. Of these, no.3 in G minor op.60 is still known today: it is masculine in spirit, taking its inspiration from Beethoven, and has delicate touches of orchestration (though Moscheles complained that he found writing for the orchestra difficult). The second movement's string tremolos and quasi-recitative texture anticipate the slow movement of Chopin's F minor Concerto. Later in life he turned to songwriting, in addition to producing the better-known sets of studies (opp.70 and 95). His output also includes chamber works such as the Sextet op.35 and the Septet op.88, both of which include piano and are, in parts, texturally akin to miniature piano concertos.

In all his more serious works Moscheles was capable of skilfully wrought musical structures, in which a Classical balance of thematic ideas is tempered with an early Romantic dynamism. Pathos in general, and chromaticism in particular, are not overplayed, and his music is never sentimental. That this restraint and discernment was as characteristic of the man as of his music can be seen from his wife's biography of him, a fascinating if not always entirely reliable account of his times, which records his dealings with and feelings about many great musicians of the early 19th century.

WORKS

for an almost complete list see C. Moscheles (1872)

many works were published in Leipzig or Vienna, undated, within a few years of composition, but a few appeared first in Berlin or Paris

ORCHESTRAL

Symphony, C, op.81, 1828–9

Jeanne d'Arc, ov., after F. von Schiller, op.91, 1834–5

Pf concs.: no.1, F, op.45, 1819; no.2, E♭, op.56, 1823; no.3, g, op.60, 1820; no.4, E, op.64, 1823; no.5, C, op.87, 1826; no.6 'Fantastique', B♭, op.90, 1833; no.7 'Pathétique', c, op.93, 1835–6; no.8 'Pastorale', D, op.96, 1838

Other works with solo inst: La marche d'Alexandre, pf, op.32, 1815; Französisches Rondo, pf, vn, op.48, 1819; Fantaisie . . . et variations sur Au clair de la lune, pf, op.50, 1821; Souvenirs d'Irlande, pf, op.69, 1826; Anklänge aus Schottland, pf, op.75, 1826; Fantaisie sur des airs des bardes écossais, pf, op.80, 1828; Souvenirs de Danemarc, pf, op.83, 1830; Duo concertant, variations on march from Weber's Preciosa, 2 pf, op.87b, 1833 [collab. Mendelssohn]; Concertante, F, fl, ob, ed. D. Forster (Zürich, *c*1983)

PIANO

for 2 hands unless otherwise stated

Sonatas and sonatinas: Sonatine, G, op.4, before 1815; Sonate, D, op.22, before 1815; Sonate caractéristique, B♭, op.27, 1814; Grosse Sonate, E, op.41, 1816; Grande sonate, E♭, 4 hands, op.47, 1819; Sonate mélancolique, f#, op.49, 1814–19; Grande sonate symphonique no.2, b, 4 hands, op.112, 1845

Pedagogical works: [24] Studien, op.70, 1825–6; 50 Präludien, op.73, 1827; [12] Charakteristische Studien, op.95, 1836–7; Méthode des méthodes [collab. Fétis], 2 studies pubd as op.98 (Paris, ?1840/*R*; Eng. trans., 1841); [59] Tägliche Studien über die harmonisierten Skalen, 4 hands, op.107, 1842–3; 2 other sets of studies

Other works: Variations sur un thème de Händel, op.29, 1814; Allegri di bravura, op.51, 1821; Hommage à Händel, 2 pf, op.92, 1822–35; Hommage à Weber, 4 hands, op.102, 1841; *c*100 other works, incl. 9 for pf duet

OTHER WORKS

Chbr: Sextet, E♭, vn, fl, 2 hn, vc, pf, op.35, 1815; Sonata, A, fl, pf, op.44, 1819; Sonata, G, fl/vn, pf, op.79, 1828; Pf Trio, c, op.84, 1830; Septet, D, vn, va, cl/vn, hn/va, vc, db, pf, op.88, 1832–3; Sonata, E, vc, pf, op.121, 1850–51; Str Qt, d, ed. (Brighton, 1994); 13 other works

Songs: 3 erotische Lieder (E. Ludwig), op.16, ? before 1815; 6 Lieder (L. Uhland, others), op.97, ?*c*1840; Freie Kunst (Uhland), B/A, op.116, ?*c*1845; 6 Lieder (F. Rückert, E. Geibel, Uhland, L. Hölty, F. von Schlechta), op.117, ?*c*1845; 6 Gesänge, op.119, ?*c*1845; Frühlingslied, S/T, op.125, ?*c*1850; 6 Lieder, op.131, ? after 1850; 4 Duette, S, A, op.132, ? after 1850

Numerous edns and arrs., incl. works by Beethoven (Choral Fantasia, Christus am Oelberg, Egmont Ov., Fidelio, syms., pf concs., pf trios, vn sonatas, vc sonatas, pf sonatas and variations), Clementi (pf sonatas), Handel (L'Allegro, il Penseroso ed il Moderato, kbd suites), Haydn (pf sonatas), Weber (pf works)

JEROME ROCHE/HENRY ROCHE

Moscheni [Moschini, Moschenio], **Francesco** (*b* Bergamo; *fl* 1541–66). Italian printer. Along with his brother Simone and an unnamed brother, Moscheni was active from 1541 to 1552 in Alessandria, Pavia and Milan, and from 1553 to 1555 exclusively in Milan. After 1555 only Francesco is named in imprints. With the possible exception of Innocenzo Cicognaro, who printed Hoste da Reggio's *Magnificat* in 1550, the Moscheni press was the first in Milan to use the single-impression method for its music editions, which include madrigals by Hoste da Reggio (1554), Pietro Taglia (1555 and 1557), Boyleau (1558 and 1564), Gioseppe Caimo (1564) and Arcadelt (1566), and other music by Matthias Hermann Werrecore (*Cantum quinque vocum … liber primus*, 1555), 'Diversi autori' (*Canzoni alla napolitana*, RISM 1562[10]), Ghinolfo Dattari (*Canzoni villanesche*, 1564), Vincenzo Ruffo

(*Capricci ... a tre voci*, 1564/*R*) Francesco Cellavenia (*Cantuum quinque vocum ... liber primus*, 1565) and Paolo Aretino (*Musica super hymnos*, 1565).

Moscheni used an excellent new music type specially cut for him, with a unique set of ornamental pieces to terminate the last music staff of each piece. His text underlay uses capitalization, accents and punctuation in a modern way, sometimes with a long dash between syllables. The printer's mark on most of the music books shows a warrior and a scholar, with the motto 'Unum nihil duos plurimum posse', or 'Maggior forza non è se fian congionti'.

Moscheni's non-musical books include some well-known classics but are mostly works by locally connected authors. His last books were printed in collaboration with Cesare Pozzo, his partner since 1558, who used Moscheni's music type in and after 1566 to print works by Boyleau (1566), Caimo (1566), Lodovico Agostini (1567) and Giovanni Battista Villanova (1568). Two books often incorrectly attributed to Moscheni are Boyleau's *Madrigali a quatro* (1546) and Antonio Martorello's *Madrigali a cinque* (1547). These unsigned books, along with Giacomo Fogliano's *Madrigali a cinque* (1547), were printed in Padua by Bernardo Bindoni and Jacobo Fabriano.

THOMAS W. BRIDGES

Moscona, Nicola [Mosconas, Nicolai] (*b* Athens, 23 Sept 1907; *d* Philadelphia, 17 Sept 1975). Greek bass. He studied with Elena Theodorini at the Athens Conservatory and began singing professionally in 1929. After performing throughout Greece and in Egypt and Italy, he made his Metropolitan Opera début in 1937 as Ramfis in *Aida*. He spent the next 25 seasons as a principal bass there, singing over 30 different roles, including Pimen, Colline, Raimondo (*Lucia di Lammermoor*), Sparafucile and Ferrando (*Il trovatore*). He was a favourite singer of Toscanini, who chose him to participate in his recordings of *La bohème*, *Mefistofele*, *Rigoletto* and the Verdi Requiem, which reveal his firm tone and feel for shaping a phrase.

CORI ELLISON/ALAN BLYTH

Moscow (Russ. Moskva). Capital city of Russia. It is the most important centre of Russian musical culture. The city was founded in the 12th century and despite Tartar invasions expanded to become the national capital in the 16th century. In 1703 Peter the Great moved the capital to St Petersburg, and Moscow declined; it was burnt after the Napoleonic invasion (1812), but prospered later in the 19th century. After the Revolution it again became the capital.

1. Before 1600. The earliest written evidence of musical life in Moscow dates from the end of the 15th century, and relates to the activities of the two Moscow choirs of that period, the *gosudarevï pevchiye d'yaki* (ruler's singing clerks) and the *patriarshiye pevchiye d'yaki i podd'yaki* (patriarchal singing clerks and sub-clerks). The former was established by Ivan III after 1472 and took part in all solemn acts of worship and in various court ceremonies. The singers were considered to be in the service of the state, and enjoyed the privileges of courtiers; the choir was firmly established in a superior position to the patriarchal choir, both in performance and in the solution of all problems connected with singing. The patriarchal choir grew out of an earlier metropolitan choir and was of secondary importance. These Moscow choirs became the centre of professional musical culture: music education was concentrated there, chant books were copied out, and their performing style served as a model for other ensembles. Professional training and a thorough knowledge of chant (not only the melodies but also the nature of their performance) was required of the singers belonging to the two choirs. The repository of chant book manuscripts of the singing clerks was the first Russian music library. A census of the city carried out shortly after Ivan IV's Reign of Terror (1547–84) had ended marks the first appearance of professional singers in Moscow: they had no connection with the church and did not take holy orders, and they constituted the tsar's choir in the service of the state. Such civilians made up the choirs of the patriarch and of several high church dignitaries who followed his example. Famous singers and *ustavshchiki* (precentors), such as Ivan Nos and Fyodor Khristiyanin, both of whom had many pupils, were already active at the court of Ivan IV in the 16th century.

2. 1600–1703. With the consolidation of Moscow's importance as the musical centre of Russia in the 17th century, the work of correcting the chant books, improving the ancient *kryukovaya* (hook) system of notation and unifying the forms of the ecclesiastical chant was carried out. Special commissions of experts on ecclesiastical chant (the so-called *didaskalï*) were set up; two of these (1665 and 1668) were engaged in establishing model versions of the chants, and were headed by Aleksandr Mezenets, music scholar and monk of the Savvino-Storozhevskiy Monastery and later a proof corrector at the Moscow printing press. Ivan Shaydur, a Moscow clerk and music theorist, improved the hook notation. At about this time the new polyphonic style known as *partesnoye peniye* (part-singing), originally taken over from Ukraine, became widespread in Moscow. Nikolay Diletsky, the most important theorist of part-singing, worked in Moscow from 1670 to 1680. The Moscow school of polyphonic singing (Vasily Titov and others) took shape during the 17th and 18th centuries.

The music of that time was not, however, confined to church music. The singing of folksongs and the playing of instruments were widespread in Moscow. The art of

the *skomorokhi* (itinerant artists) was especially popular, despite the prohibitions of the church; they were musicians, singers and acrobats who gave improvised performances, often satirizing the clergy, in the squares and streets. The songs and dances of the *skomorokhi* were accompanied by the *gudok* (rebec), *gusli* (zither), *rozhok* (wooden trumpet), *sopel'* (oboe) and *volïnka* (bagpipe). The *skomorokhi* were known as the 'funny people' or the 'cheerful ones'. Secular elements also penetrated the work of the tsar's singers, helped by their independence from the church authorities and by the fact that the tsar's choir (with between 170 and 180 members in the second half of the 17th century) seldom performed at its full strength: the rites of the Orthodox Church did not require so many singers. The singing clerks were sent in small groups to many different secular festivities, court celebrations, welcomes and dinners and as a sign of the tsar's special favour they were allowed to sing in private houses. They were also the first to perform secular cantatas, works composed for the victory of Russian armies at Azov and performed in the streets of Moscow at a specially erected triumphal arch, and the first Russian composers to write for voice and for different instruments, including the organ. The secular orientation of the tsar's choir is also revealed in such details as the clerks' dress: the patriarchal singing clerks were supposed to wear a garment similar to a deacon's cassock of dark cloth, whereas the clothes of the tsar's singers sparkled with bright colours and were made of various materials (crimson breeches, several layers of caftan lined with hare and squirrel fur and made of the English cloth so highly valued at that time – scarlet, cherry or green, trimmed with beaver or blue fox fur, with silver or gilt buttons). Each clerk owned a horse with silver-mounted harness, and thus it is understandable that their appearance in the tsar's train in the streets of Moscow should so grip the imagination of foreign travellers.

With the development of the city's musical culture secular music became more widespread. The penetration of new forms of western European art furthered this diffusion: there are early records of an Italian organist visiting Moscow, and in 1586 Queen Elizabeth I of England sent a small Positive organ and virginals to the Tsaritsa Irina Fyodorovna. As early as the first quarter of the 17th century there were violinists (former *skomorokhi*) in the service of the court. Instrumental music was heard increasingly frequently in the palaces of the educated boyars, several of whom (including A.S. Matveyev and V.V. Golitsïn) maintained domestic instrumental ensembles comprising viols, violins, woodwind and brass.

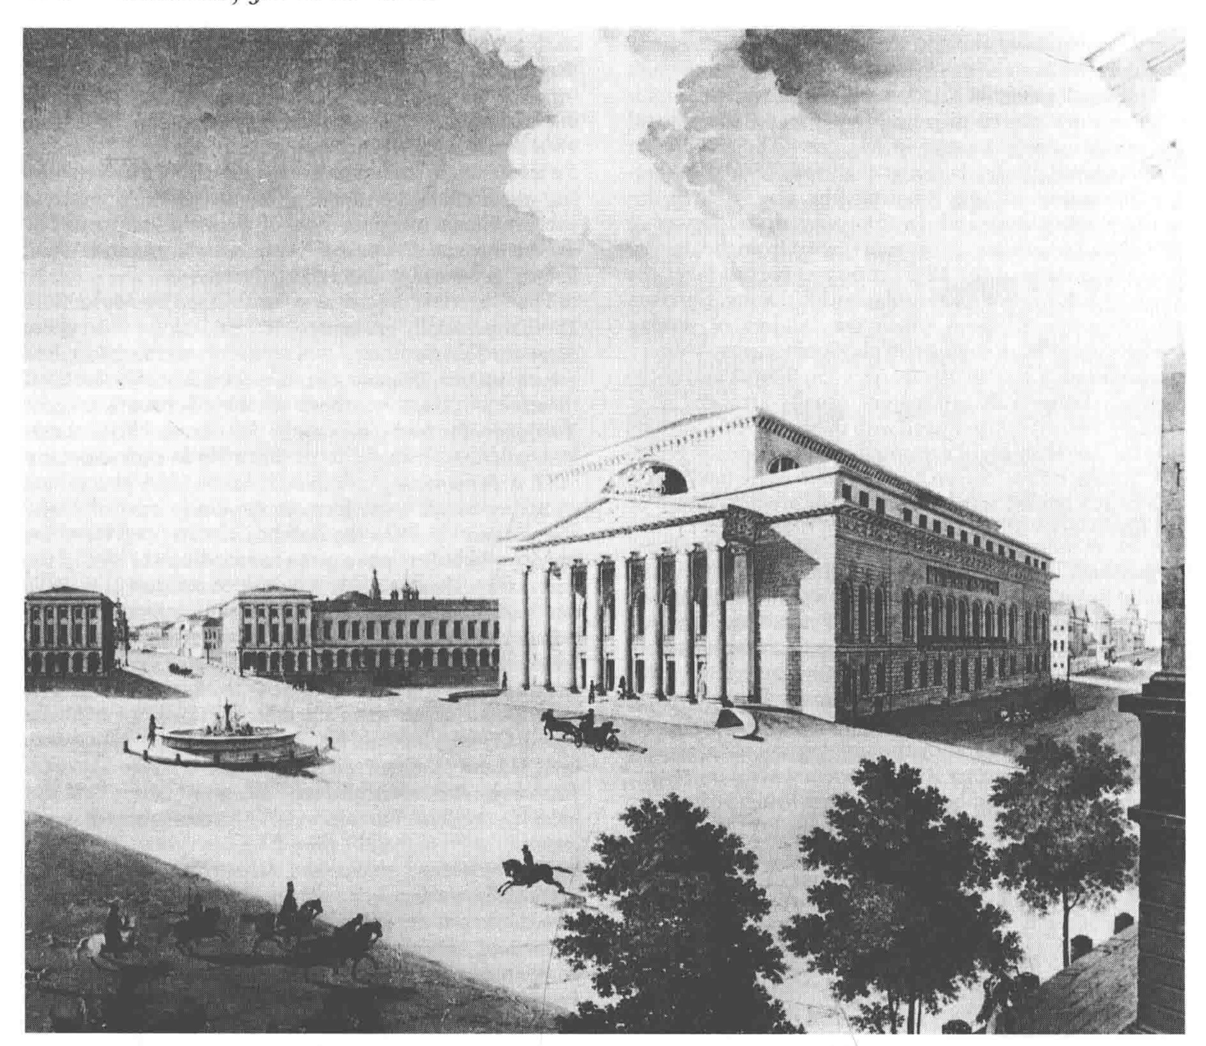
In early 17th-century Moscow there were many instrumentalists, among whom the trumpeters enjoyed special respect, although contemporary archives shed no light on the term 'trumpeter', and it is impossible to determine exactly what instrument was played. A particularly large number of trumpeters appeared in 1660, suggesting an increasing public interest in music. Their performing skill was prized and they were sufficiently highly paid for almost every trumpeter to purchase his own courtyard. In 1660 special teachers, *mastera trubnogo ucheniya* (masters of trumpet teaching), such as S. Burakov, appeared among the trumpeters. During this period the first state school for wind players, the S"ezzhiy Dvor Trubnogo Ucheniya (Assembly Court of Trumpet Teaching), was opened. The number of musicians constantly increased, as did the flow of foreign instrumentalists to Moscow. Sometimes they were specially invited by the tsar's court to explain developments in Western music, and also to accompany dramatic productions.

The picture of Moscow's musical life was changing. Gradually players of *rozhok*, *gusli* and other folk instruments disappeared and organ playing became widespread and was a favourite pastime at court and in the boyars' homes. An organ stood in the Granovitaya Palata (Faceted Palace), where solemn state ceremonies took place; as early as the mid-16th century the organ had been used widely, not only at court and in the houses of the aristocracy but also in folk music. In one of the resolutions of the Stoglavïy Sobor (Assembly of 100) indignation was expressed that not a single folk celebration, fair or wedding went by without organ music (in this case a portative organ was mentioned). It is characteristic that in Russia the organ was used exclusively for secular purposes. In the 1650s there was a workshop for keyboard instruments under the jurisdiction of the Moscow Grand Palace, producing organs and harpsichords. The greatest Moscow organist and organ builder of the time was S. Gutovsky, who worked in the Oruzheynaya Palata (Armoury Palace) from 1654 to 1665. In collaboration with his pupils he built a large number of organs for the Faceted Palace and the houses of eminent boyars. Gutovsky was also the founder of music printing in Russia, for which he constructed a press in 1677.

During the 17th century stage drama also began to develop in Moscow. Religious plays, especially the *Pechnoye deystvo* ('Play of the furnace') enacted in churches shortly before Christmas, were an important element of the church's culture. Despite their conventional content these plays were genuine theatrical presentations with costumes, elaborate scenery and even some mechanical contrivances; the production of the *Play of the Furnace* required extensive preliminary preparation, and each year this task was assigned to a new producer chosen from among the most experienced singing clerks. In 1672 the first court theatre was built; music – the chorus, instrumental ensemble and, in particular, the organ – played an important part in its performances. The organ was used to accompany all productions, and incidental music was played on it during the intervals. Precise details of the organ repertory of this period are not known, but there is evidence to suggest that it included works by Sweelinck, Scheidt and several Polish composers.

A public theatre existed in Moscow from 1702 to 1706; the building erected specially for it in Red Square was named the Komediynaya Khoromina (Palace of Comedy). In 1731 a group of Italian singers and musicians in the service of the Polish king went on tour to Moscow and mounted Ristori's *Calandro*, the first opera staged in Russia. In 1742 Hasse's *La clemenza di Tito* was sumptuously produced for the coronation of the Empress Yelizaveta, in a specially built theatre seating 1000. In 1759 Locatelli's opera company first introduced comic opera to the Moscow public. Moscow's educational institutions played a significant part in the development of drama at this time: the study of music was compulsory, and student productions of the so-called 'school dramas' were put on twice a year by the pupils of the Moscow Slavonic-Greek-Latin Academy. These students also

played instruments and accompanied the singing of *kantï* at public debates and examination.



The development of Russian military music in the mid-17th century played an important part in the general growth of musical culture in Moscow. The training of Russian wind players began at that time; regular orchestras consisting of nine 'oboists' (the general term for military musicians) and 16 company drummers were introduced into infantry regiments (apart from the guards) at the beginning of the 18th century as part of Peter the Great's plan to establish a regular national army. Garrison schools were set up in which the children of serving soldiers could learn to sing and play instruments. Military musicians took part in official state ceremonies and in the specially festive folk processions usually arranged after military victories. Also linked with these state celebrations was the development of a distinctive musical-poetic genre, the 'panegyric' or *privetstvennïy kant* (welcome song), one of the typical features of Russian artistic culture of the first quarter of the 18th century.

3. 1703–1918. With the reforms of Peter the Great secular music came to have a much more prominent place in Russian life. The founding of St Petersburg, to which the court moved, also had an effect on the musical culture of Moscow, which changed radically during the 18th century. At the beginning of the century Russian music was represented by its rich heritage of folksong, by ecclesiastical chants and by the simplest domestic genres; by the end of the century Russian opera was taking shape, symphonic and chamber music were being written by Russian composers, and early examples of the Russian song were beginning to appear. The musical needs of Russian society were growing, its tastes were changing and the circle of educated music lovers was expanding. In spite of the fact that St Petersburg drew great artistic forces to the court, Moscow formed its own professional musical circles. Of particular importance were the serf musicians, who performed as soloists and in the many large serf orchestras.

New educational institutions began to play a significant part in Moscow's musical life in the second half of the 18th century – the university, the Blagorodnïy Pansion (Boarding School for the Nobility) attached to it, and the Vospitatel'nïy Dom (Foundling Hospital), where the teaching of music was established on a serious basis and where stage works, including operas, were produced. The university theatre, which later merged with Locatelli's Italian opera company, was founded under the auspices of the university in 1757. The official opening of the new theatre in the Opernïy Dom (Opera House) was in 1759. A new musical genre, Russian comic opera, evolved in the 1770s in Moscow; and in 1779 *Mel'nik-koldun, obmanshchik i svat* ('The Miller who was a Wizard, a Cheat and a Matchmaker'), with a libretto by Ablesimov and music by Sokolovsky, was produced in the theatre on the Znamenka. Shortly before this Ivan Kerzelli, a member of a family of Czech musicians who made a great contribution to Moscow's musical life in the last quarter of the 18th century and the beginning of the 19th, wrote a comic opera *Derevenskaya vorozheya* ('The Village Soothsayer'). Members of the Kerzelli family were active in various spheres, as composers, conductors, teachers and organizers of concerts and schools of music. Ivan Kerzelli opened a music college with a special department for 'the highborn nobility, the bourgeoisie and serfs' in 1772, and in 1783 M.F. Kerzelli opened a music school intended primarily for the training of serf musicians. Ivan Kerzelli was a composer and conductor who worked as musical director of the Petrovskiy Theatre (built in 1780) from 1801; in 1802 Mozart's Requiem was given its first performance in Russia under his direction. His activities laid the foundations for the intensive development of concert life in the first half of the 19th century. The conductors and composers Mathias Stabinger and A. and F. Sartori were also concert organizers.

The Imperial Theatre was established in Moscow in 1806; this initially brought together a drama and an opera company that numbered among its members many gifted actors, singers, dancers and musicians from the best serf theatres in Moscow, those of the Sheremet'yevs, the Yusupovs, the Stolïpins and the Apraksins. Plays, operas and ballets were staged at the theatre in its early days, but later a separation took place: from 1824 the drama company began to perform in the newly opened Malïy Theatre, and in 1825 the Bol'shoy Theatre (fig.1), where operas and ballets were given, opened on the site of the Petrovskiy Theatre. The Bol'shoy burnt down in 1853 and was rebuilt in 1856. Verstovsky, composer of the popular opera *Askol'dova mogila* ('Askol'd's Grave', 1835), held various posts in the Moscow directorate of the Imperial Theatres between 1825 and 1860, and contributed much to raising the standards of Moscow opera. Concert life, too, was developing. The performance in 1811 of Degtyaryov's patriotic oratorio *Minin i Pozharsky ili Osvobozhdeniye Moskvï* ('Minin and Pozharsky, or The Liberation of Moscow') was a great event.

Public concerts were given daily, or even twice daily, principally during Lent, when the state theatres were closed; they were given by foreign virtuosos, Moscow musicians, soloists from the Russian and Italian opera companies, and also for charity by aristocratic amateurs. From the 1820s concerts were arranged by the theatre directorate (including works by Beethoven performed under the direction of Friedrich Scholz and N.E. Kubishta); and concerts were also given in the Blagorodnoye Sobraniye (Assembly of the Nobility; now the Dom Soyuzov, House of Unions) and the Nemetskoye Sobraniye (German Assembly). Important Russian performers began to appear at this time: the composer-pianists Daniil Kashin and Aleksey Zhilin, and other musicians who had settled in Moscow, such as Johann Hässler, John Field, Josef Genishta, Kubishta, Villuan (teacher of Anton Rubinshteyn) and Dubuque. At the same time there were performances by visiting celebrities such as Lipiński, Vieuxtemps and Berlioz. A key figure of the 1840s and 1850s was the conductor Ivan Johannes, musical director of the Bol'shoy Theatre from 1841, who conducted the first Moscow production of Glinka's *A Life for the Tsar* in 1842; he also directed Sunday concerts at the theatre and conducted the student orchestra of Moscow University from 1850. He gave the first Moscow performances of *Jota aragonesa* and *Kamarinskaya*, and he championed the symphonic works of Mozart and Beethoven. Other popular performers of the period included the singers Yelizaveta Sandunova and Aleksandr Bantïshev, the violinists Gavrila Rachinsky and Nikolay Afanas'yev, and the guitarists Semyon Aksyonov and Mikhail Vïsotsky, the last two being outstanding representatives of the Moscow guitar school founded by Andrey Sikhra. The

guitar was widely used as a concert instrument; the Gypsy choruses and their singers (women soloists with guitar accompaniment) who appeared at the beginning of the 19th century gave added colour to Moscow's musical life and became exceptionally popular. The Gypsy choirs directed by Il'ya Sokolov and I.V. Vasil'yev enjoyed particular fame between 1820 and 1860, and the singing of Sokolov's Gypsy chorus was much admired by Liszt, who went on tour to Moscow in 1842; their repertory consisted of Russian folksongs and songs on subjects drawn from everyday life. Under the influence of the distinctive style of the Gypsies the popular genre known as the Gypsy song appeared in Russian vocal music, strongly influencing the songs of the Moscow composers Aleksandr Gurilyov and Aleksandr Varlamov.

Until the mid-19th century Moscow's musical life was to a great extent centred on a great number of domestic milieux. In the 1820s the artistic tone was set by the circles of Wielhorski and Volkonskaya, and later by those of Botkin, Bakunin and Stankevich. The social upsurge of the 1850s and 1860s, which had an effect on the democratic trend of Russian culture with its enlightening tendencies, laid the basis for a new fruitful stage in the growth of musical Moscow. A number of artistic societies arose, the most important being the Artisticheskiy Kruzhok (Artistic Circle); this existed from 1865 to 1883, and included among its members Ostrovsky, Nikolay Rubinshteyn and the actor P.M. Sadovsky. It also played a large part in arousing interest in Russian folksong; it arranged performances of new literary and musical works and organized lectures and stage productions, thus raising the standards of Moscow's social and artistic life. The founding in 1859, on the initiative of Nikolay Rubinshteyn, of the Moscow branch of the Russkoye Muzïkal'noye Obshchestvo (Russian Musical Society) brought a radical change in the style of concert life and in the organization of musical education.

It is above all with the name of Rubinshteyn that the most productive stage in the growth of social musical life in Moscow is linked: he was the first director (from 1860) of the symphony concerts of the Moscow branch of the Russian Musical Society and the first director of the Moscow Conservatory. The symphony concerts of the Russian Musical Society took place in the halls of the Assembly of the Nobility and in the Manezh (where public concerts were given). The repertory consisted basically of important symphonic and choral works. After Rubinstein's death Max Ermandsdörfer (1882–4) and Vasily

Safonov (1889–1905) conducted the Russian Musical Society's concerts. Concerts were also given by the Moscow Philharmonic Society (founded 1883; directed by Pyotr Shostakovsky until 1895), the Russian Choral Society (from 1878) and the Moscow Synodal Choir.

In 1860 the Russian Musical Society formed its music classes, on the basis of which the Moscow Conservatory was opened in 1866, with such eminent musicians as Tchaikovsky, Rubinstein, Laub, Kashkin and Larosh on its teaching staff. Tchaikovsky's career at the conservatory was of outstanding significance; his music instigated a compositional trend that can conditionally be called the 'Moscow School' (Taneyev, Arensky, Rachmaninoff and others). The educational society Kruzhok Russkoy Muzïki (Russian Music Circle, 1896–1912) played a large part in championing Russian music, as did Savva Mamontov's Moskovskaya Chastnaya Russkaya Opera (Moscow Private Russian Opera). Mamontov brought together in this theatre the leading figures in Russian art, including singers (Vladimir Lossky, Pyotr Olenin, Anton Sekar-Rozhansky, Chaliapin, Nadezhda Zabela-Vrubel', Vera Petrova-Zvantseva, Nadezhda Salina and Elena Tsvetkova), composers (Vasilenko, Ippolitov-Ivanov, Kalinnikov, Rachmaninoff and Rimsky-Korsakov) and artists. Besides Russian works the company performed Western classics, always adhering to its principles of realism in art. Under various names the theatre was in existence from 1885 to 1904; its artistic traditions were kept alive by Sergey Zimin, whose private opera company was founded in 1904 and continued to perform until 1924. From 1907 until 1913 the singer Mariya Deysha-Sionitzkaya organized concerts of new Russian and Western music; and from 1909 the critic Derzhanovsky and the conductor Saradzhev arranged a series of concerts called Evenings of Contemporary Music.

During the early 1900s there was also considerable expansion in the Bol'shoy Theatre's activities; its opera repertory was augmented by several artistically outstanding productions; and many operas by Rimsky-Korsakov, Arensky, Koreshchenko and Rachmaninoff had their premières there. At the same time Aleksandr Gorsky joined the ballet company as ballet master and developed the traditions of Russian ballet, drawing it closer to dramatic art; the dancer V.D. Tikhomirov also played an important role as ballet master, training a whole generation of dancers. Among the conductors at the Bol'shoy were Rachmaninoff (1904–6) and Václav Suk (from 1906), and its singers included Chaliapin, Sabinov and Nezhdanova. The greatest foreign conductors, pianists, violinists and cellists appeared regularly on the Moscow concert platform during these years (Nikisch, Mengelberg, Hofmann, Busoni, Godowsky, Kreisler, Ysaÿe, Jan Kubelík, Casals) as well as many famous singers.

Influenced by the ever-increasing demand for musical education, private schools with high teaching standards opened, notably the music schools of the Gnesins and of V.Y. Zograf-Plaksina, and the music courses of Ye.N. Vizler and others. Music-teaching establishments also existed under the auspices of a music educational institution, the Betkhovenskaya Studiya (Beethoven Studio, founded in 1911 by the pianist David Shor), which arranged historical concerts, lecture-recitals and musical evenings. Such a thriving musical life created ideal conditions for music publishing. Small firms gave way to the large music-publishing houses of Gutheil (1859), Jürgenson (1861) and the Russkoye Muzïkal'noye Izdatel'stvo (known in the West as Editions Russes de Musique, founded by Kusevitsky in 1909, which purchased the Gutheil firm in 1914).

With the revolutionary events of 1905 Moscow witnessed the publication of new journals dealing with social

2. Interior of the Bol'shoy Theatre, Moscow: engraving from 'L'illustration' (16 February 1861)

problems: *Muzïkal'nïy truzhennik* ('Musical labourer', 1906–10), *Muzïka i zhizn'* ('Music and life', 1908–12) and *Orkestr* (1910–12); the influential journal *Muzïka* (1910–16) championed contemporary music. At the same time important new concert organizations were established: the Moskovskaya Simfonicheskaya Kapella (Moscow Symphonic Chapel, 1901–17) of Vyacheslav Bulïchev, the Istoricheskiye Kontsertï (Historic Concerts, 1907–17) of Sergey Vasilenko and the Kontsertï Kusevitskogo (Kusevitsky Concerts, 1908). There was also an increase in music education: by arranging lecture-recitals leading figures in the art world made music more accessible to the general public. In 1906 the first Narodnaya Konservatoriya (People's Conservatory) in Russia was opened in Moscow; it was part of the established Obshchestvo Narodnïkh Universitetov (Society of People's Universities).

During these years the collecting of and research into folksongs flourished. Of particular importance were the activities of the Muzïkal'no-Ėtnograficheskaya Komissiya (Music-Ethnography Commission), formed in 1901 and attached to the ethnography department of the Obshchestvo Lyubiteley Yestestvoznaniya, Antropologii i Ėtnografii (Society of Lovers of Natural Science, Anthropology and Ethnography) under the auspices of Moscow University. The ethnography department had been engaged in research into folk music since the time of the staging of the ethnographical exhibition in Moscow in 1867, and it published the journal *Ėtnograficheskoye obozreniye* ('Ethnographical review') from 1889. Several important Moscow musicians, composers and folklorists (Taneyev, Yuly Mel'gunov, Dmitry Arakchiyev, Yevgeniya Linyova and others) took part in the work of the Music-Ethnography Commission, which conducted folklore expeditions, arranged scientific lectures, published writings and organized ethnographical concerts. The concerts known as Krest'yanskiye Kontsertï (Peasant Concerts) of the famous folklore collector and performer Mitrofan Pyatnitsky were of great significance and featured the well-known folksinger Irina Kolobayeva ('Arinushka'). The Russian folk choir organized by Pyatnitsky was the basis for the Russkiy Narodnïy Khor (Russian Folk Choir), which now bears his name. At that time, too, the Prechistenskiye Besplatnïye Kursï dlya Vzroslïkh Rabochikh i Rabotnits (Prechistenskiy free courses for adult men and women workers) were being given; such outstanding artists as Igumnov and Sobinov took part in the concerts relating to the courses. The widening of musical audiences was typical of Moscow's social life in the period immediately preceding the October Revolution.

4. Since 1918. With Moscow once more established as the capital and seat of government following the October Revolution, the city was also bound to become the most important centre of Soviet music, and its theatres, concert halls and educational institutions now gradually began to take precedence over those in Petrograd. Overseen by Anatoly Lunacharsky, the Narodnïy Komissariat Prosveshcheniya (Commissariat of Public Education), better known by its acronym Narkompros, was given the task of nationalizing all aspects of musical life. The Bol'shoy Theatre had already been taken over by the state in November 1917, and tenor Leonid Sobinov helped to smooth the transition as temporary director. Lenin initially took exception to the large subsidy of a theatre so closely associated with the old regime, but its popularity with the new worker audience and Lunacharsky's commitment to the preservation of the legacy of the past ensured its survival. Yelena Malinovskaya, appointed as commissar of Moscow theatres, attempted to infuse a new energy into productions and raise acting standards at the Bol'shoy by involving leading singers and stage directors such as Stanislavsky and Nemirovich-Danchenko. On the initiative of Stanislavsky, the Opernaya Studiya Bol'shogo Teatra (Bol'shoy Theatre Opera Studio) was opened in 1918. In 1926 it was reorganized as the Opernïy Teatr-Studiya Stanislavskogo (Stanislavsky Opera Theatre Studio), and it was on this basis that the Opernïy Teatr imeni Stanislavskogo (Stanislavsky Opera Theatre) was founded in 1928. In 1919 Vladimir Nemirovich-Danchenko founded his Muzïkal'naya Studiya Moskovskogo Khudozhestvennogo Teatra (Moscow Art Theatre Music Studio), which was reorganized in 1926 as the Muzïkal'nïy Teatr imeni Nemirovicha-Danchenko (Nemirovich-Danchenko Music Theatre). Both theatres explored the innovatory ideas of their musical directors and exerted an important influence on Moscow musical life. Several experimental stagings took place at the Bol'shoy Theatre in the 1920s, and there were also radical opera productions in the early 1920s at the former Zimin Theatre, renamed the Svobodnaya Opera S.I. Zimina (Free Opera of S.I. Zimin), which reflected the theatrical avant garde's preoccupations with construction and popular culture. In 1924 this theatre came under the jurisdiction of the Bol'shoy Theatre.

New bureaucratic organizations were set up to supervise the city's musical life after 1917, headed by the Muzïkal'nïy Otdel (Music Department) of the Commissariat for Public Education, which also became known by its acronym MUZO. The concert section of the Khudozhestvenno-Prosvetitel'nïy Otdel Voyennogo Komissariata (Art Education Department of the Military Commissariat) and the Khudozhestvenno-Prosvetitel'nïy Otdel Moskovskogo Soveta Rabochikh i Krest'yanskikh Deputatov (Art Education Department of the Moscow Council of Worker and Peasant Deputies) also played a significant role in mass educational work during this period. The latter established a theatre and music section in 1918, which arranged and managed concerts for workers in different areas of Moscow (including the booking of venues) and directed local arts institutions. The greatest challenge to MUZO's hegemony came from the Muzïkal'nïy Otdel Proletkul'ta (Music Department of the Proletarian Culture organization – Proletkul't), which advocated the development of an exclusively proletarian musical culture. Aleksandr Kastal'sky was one of the Moscow musicians who played an important role in setting up choral studios and workshops for folk instruments under the aegis of Proletkul't. Before the Revolution he had directed the Synodal Choir, and was responsible for transforming it into the Narodnaya Khorovaya Akademiya (People's Choral Academy) in 1918, which became attached to the Moscow Conservatory in 1923. The existence of Proletkul't and other quasi-autonomous artistic organizations came to an end with a Party Resolution in 1920.

Despite the harsh conditions of civil war immediately following the Revolution (unheated buildings, some of which were on the verge of collapse, acute food shortages, transportation problems) musical life in Moscow was

surprisingly rich. To accomplish their goal of bringing music to the masses, MUZO Narkompros organized concerts on an unprecedented scale and in every conceivable venue, with many Moscow musicians organizing musical activities in factories and workers' clubs, for example. So-called concert meetings, which took place in theatres and concert halls, also became widespread. Lenin, Lunacharsky or another political leader would deliver a speech on a topical political question, which was followed by a concert and a lecture. The most important symphony concerts were organized and performed by the orchestra of the Bol'shoy Theatre, conducted by N.S. Golovanov. Kusevitsky's former orchestra, which now came under under the auspices of the government, was also active at this time, and its founder continued as conductor until he emigrated in 1920. The main concert platforms were the large and small halls of the conservatory, the former Blagorodnoye Sobraniye (Assembly of the Nobility), which became known after the Revolution as the Dom Soyuzov (House of Unions), and the hall in the Dom Uchyonïkh (House of Scholars). The Betkhovenskiy Zal (Beethoven Hall), formerly the Tsar's foyer at the Bol'shoy Theatre, became a popular venue for chamber music concerts.

Chamber music, both instrumental and vocal, was used to play an important role in the promotion of classical music in the early years, largely because of the ability of ensembles to perform away from the concert platform. The earliest chamber ensembles established in Moscow after the Revolution were the Lenin Quartet, founded in 1918 by Lev Tseitlin, who had been Kusevitsky's leader and was now professor of violin at the conservatory, and the Moscow Quartet, founded in 1919 by David Kreyn. The latter renamed itself the Stradivarius Quartet in 1921 after the instruments given to them from the government, now in possession of former private collections. Other ensembles included the quartet founded at the Moscow Conservatory in 1923, which became known as the Beethoven Quartet in 1931, the Moscow Conservatory Students' Quartet, founded in 1925, which became the Komitas Quartet in 1932, the Glièr Quartet, founded in 1927, and the Bol'shoy Theatre Quartet, formed in 1931. These ensembles performed not only in established concert halls but also in factories, mills and industrial sites, acquainting the Moscow public with the repertory and stimulating an interest in chamber music. Chamber music was also introduced to the new audiences by means of educational programmes that were designed by MUZO Narkompros.

One of the leading figures in Moscow's concert life in the early 1920s was the conductor Aleksandr Khesin. As director and principal conductor of the concert department of MUZO Narkompros from 1920, he helped to set up the first concert organizations in Moscow. The Gosudarstvennaya Filarmoniya (State PO) was founded in 1920, the Rossiyskaya Filarmoniya (Russian PO), or Rosfil, between 1925 and 1928, the Sovetskaya Filarmoniya (Soviet PO), or Sovfil, between 1928 and 1931 and the Moskovskaya Filarmoniya (Moscow PO) in 1931 which were all part of the total state monopoly. Once the Civil War was over, these organizations were able to invite foreign artists, whose visits considerably enriched Moscow musical life in the 1920s. Among those who toured Moscow during this relatively liberal period were the conductor Oskar Fried, who appeared in 1921 and who was followed by Ernest Ansermet, Bruno Walter, Hermann Abendroth, Otto Klemperer, the violinists Szigeti and Huberman, the pianists Petri and Zecchi and many others. Composers who visited Moscow at this time included Bartók and Milhaud. Foreign visitors were often struck by the idealism they encountered in those early years. As Szigeti (who visited the USSR 12 times between 1924 and 1929) later wrote in his memoirs: 'I cannot forget the sight of those innumerable crowds, moving about, becoming excited, talking and applauding in the intervals between the numbers' (*SovM*, 1958, no.12, p.80). For Walter, playing music in Moscow was 'more than a joy. The orchestra and the public were enthusiastic and full of vital energy and the excellent musicians' devotion to their work at rehearsals and performances was exemplary' (B. Walter: *Theme and Variations*, New York, 1947, pp.256, 277). Chaliapin, Nezhdanova, Igumnov and Gol'denveyzer were some of the many distinguished Russian musicians who performed in Moscow at this time. Lev Oborin, a former piano student from the Moscow Conservatory, became the first Soviet prizewinner at an international competition (the Chopin Piano Competition in Warsaw) in 1927.

Mikhail Ippolitov-Ivanov resigned as director of the Moscow Conservatory in 1922 just as an ambitious programme of reform was initiated by MUZO Narkompros, but he stalwartly defended the new measures in 1928 (*Muzïka i revolyutsiya*, ii, 1928). Modernization of both the curriculum and teaching methods, as well as attempts to attract greater numbers of students from proletarian backgrounds, was inevitably resisted by senior faculty used to long-established pre-revolutionary ways and administrative autonomy, but in December 1925 a 'Statement Concerning the Moscow and Leningrad Conservatories' implemented far-reaching changes. In 1921 Lunacharsky had played a major role in the foundation of the Gosudarstvennïy Institut Muzïkal'noy Nauki (State Institute for Music Research, GIMN), which was the first institute in Moscow to be dedicated to music research. The acoustics specialist and theorist Nikolay Garbuzov became the first head of GIMN, with Mikhail Ivanov-Boretsky, Konstantin Kuznetsov, Boleslav Yavorsky and Leonid Sabaneyev among his staff. In 1923 GIMN was incorporated into the Gosudarstvennaya Akademiya Khudozhestvennïkh Nauk (State Academy of Artistic Sciences, GAKHN) when a separate music division was established there. Following the 1925 MUZO Narkompros statement on music education, conservatories now became responsible for the teaching of musicology, while institutes were to focus exclusively on research. The fruits of this research began to be published in important volumes from 1924 onwards, while articles were also printed in the journal *Iskusstvo* ('Art'), published by GAKHN.

Along with the reorganization of all musical institutions and the revision of repertories, there was also a great deal of experimentation in Moscow during the 1920s. The Ansambl' Krasnoarmeyskoy Pesni (Red Army Song Ensemble), founded by Aleksandr Aleksandrov in 1928, was one important new group based in Moscow, initially consisting of 12 members. It was later renamed the Krasnoznamennïy Ansambl' Pesni i Plyaski Sovetskoy Armii imeni A.V. Aleksandrova (Aleksandrov Order of the Red Banner Soviet Army Song and Dance Ensemble), and combined a male-voice choir, dance group and mixed

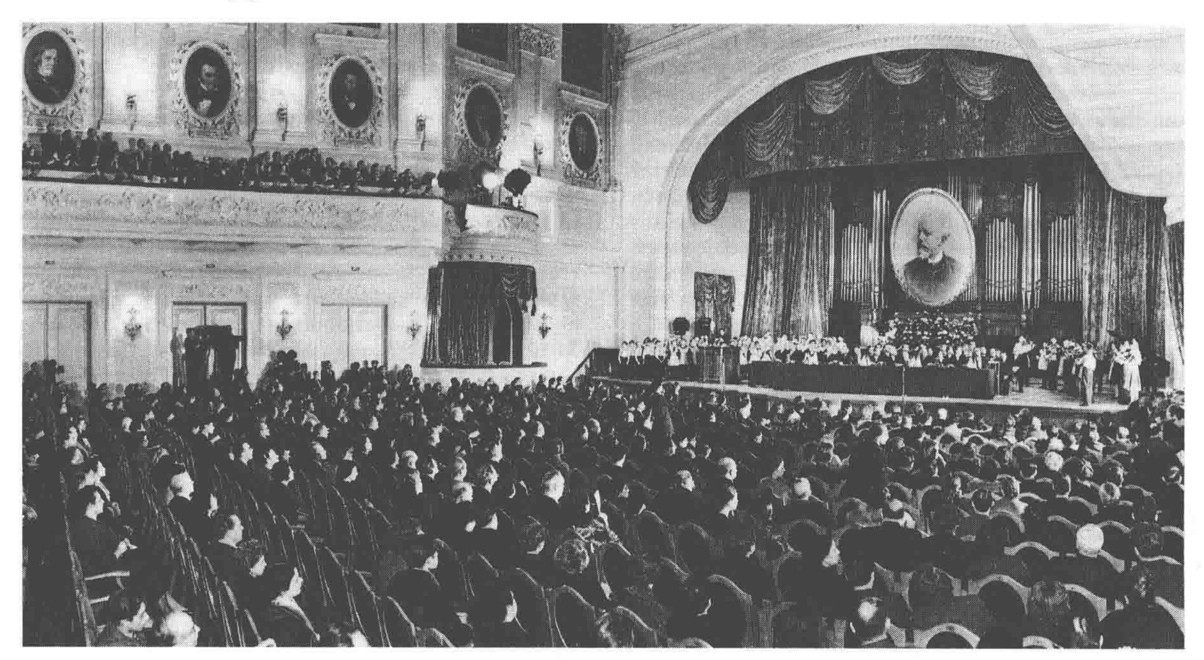
orchestra. The exploration of new ideas about orchestral playing and group performance led most importantly, however, to the organization of Persimfans (Perviy Simfonicheskiy Ansambl' bez Dirizhyora, or the First Conductorless Symphony Ensemble) in 1922. Inspired by the Bolshevik ideal of collective endeavour, and formed on the initiative of Lev Tseytlin, Persimfans was a first-class symphony orchestra, which aimed to revitalize the methods of symphonic performance by relying on the creative initiative of each of its members, employing the rehearsal methods of chamber ensembles, and by resolving questions of interpretation through consensus. Based on the principle of full artistic and material equality for all of its members, its players comprised the finest artists of the Bol'shoy Theatre orchestra, and professors and talented students from the Moscow Conservatory. Persimfans acquired a reputation for expressive, virtuoso playing and brightness of sound, and played an important role in the development of concert life in post-Revolutionary Moscow. It also strongly influenced the formation of other leading Moscow schools of instrumental performance, and helped generally to raise standards of orchestral playing in the USSR. Following the example of Persimfans, conductorless orchestras were organized in Leningrad, Kiev, Voronezh, and also in several cities in other countries (such as Leipzig and New York). The weekly Persimfans subscription concerts held at the Great Hall of the Moscow Conservatory over the ten years of its existence (1922–32) enjoyed a huge success, as did those organized in factories and other unorthodox venues. Programmes were thought through carefully, and were wide-ranging and adventurous. A music journal was also published by Persimfans from 1926 to 1929.

The new liberalism of the early 1920s made possible the publication of journals such as the modernist *K novïm beregam* ('Towards new shores', 1923) and the eclectic conservatory-based *Muzïkal'noye obrazovaniye* ('Musical education', 1925–30), but the pluralist climate did not last. During his visit to the USSR in 1926, Milhaud found that the musical atmosphere in Moscow was more 'formal and intellectual' than in Leningrad, and that its musicians more 'argumentative and hair-splitting' (D. Milhaud: *Notes Without Music*, New York, 1953, p.189). This can partly be attributed to the friction between the Assotsiatsiya Sovremennoy Muzïki (Association for Contemporary Music, ACM) and the militant Rossiyskaya Assotsiatsiya Proletarskikh Muzïkantov (Russian Association of Proletarian Musicians, RAPM), both of which were formed in Moscow in 1923. The Association of Contemporary Music was founded by senior figures such as Myaskovsky, Belyayev, Sabaneyev and Lamm who wished to remain abreast of developments in Western avant-garde music. Its concerts and journal *Sovremennaya muzïka* ('Contemporary music', 1924–9), edited by Sabaneyev, Belyayev and Derzhanovsky, reflected the moderate and cosmopolitan orientation of the group, which was considerably less radical than the Leningrad branch, formed in 1926. That caused its own tensions (as the Moscow association was accused of supporting its own composers more than others), but it was political radicalism which provoked the greatest problems in Moscow musical life at that time. The militant position taken by the organization which had become the Russian Association of Proletarian Musicians by the time of its manifesto in 1924 was inspired by the desire to dismiss all music, past and present, which did not conform to its narrow ideology. Its first journal *Muzïkal'naya nov'* ('New territory in music', 1923–4) was succeeded by *Muzïka i oktyabr'* ('Music and October', 1926), *Proletarskiy muzïkant* ('Proletarian musician', 1929–32) and *Za proletarskuyu muzïku* ('For proletarian music', 1930–32). Consequently, factionalism was rife even within RAPM and dissenting views were expressed in the journal *Muzïka i revolyutsiya* ('Music and revolution', 1926–9) by the Ob"yedinyoniye Revolyutsionnïkh Kompozitorov i Muzïkal'nïkh Deyateley (Association of Revolutionary Composers and Musicians, ORKIMD, 1925–9), which attempted to be more inclusive.

The educational reforms at the Moscow Conservatory had not only introduced postgraduate study for the first time, but also seen the creation of a musicology department, headed initially by Ivanov-Boretsky, who compiled the notes to the important facsimile edition of Beethoven's 'Moscow Sketchbook' (drafts of the string quartets opp.130 and 132), which was published in 1927 in the journal *Muzïkal'noye obrazovaniye*. More problematic was the new department for the training of music teachers at the amateur level, which did not always operate at the highest level, and the adoption of the policies of RAPM by an increasingly aggressive and rebellious student body. The Proizvodstvennïy Kollektiv Studentov-Kompozitorov Moskovskoy Konservatorii (Production Group of Student Composers of the Moscow Conservatory, PROKOLL) was set up in 1925 to steer a course between the 'modernists' and the 'proletarians', while Lunacharsky himself was forced to intervene at one stage. Without his moderating influence, however, following his resignation in 1929, the situation became even more chaotic and antagonistic, until a Party decree of 1932 reinstituted discipline and structure into the organization of conservatory life. It was in 1932 that the Tsentral'naya Muzïkal'naya Shkola affiliated to the Moscow Conservatory opened, on the initiative of senior conservatory faculty members such as Aleksandr Gol'denveyzer (Goldenweiser) and Genrikh Neigauz. Graduates who went on to study at the conservatory include the cellists Mstislav Rostropovich and Nataliya Gutman, the pianists Tat'yana Nikolayeva and Vladimir Ashkenazi, and all four original members of the Borodin Quartet.

The adoption by Stalin of the first Five-Year Plan in 1928 was accompanied by greater Party intervention in the cultural sphere that had initially benefited RAPM. The ideological clamp down was reflected in the closure of both *Sovremennaya muzïka* in 1929 and *Muzïkal'noye obrazovaniye* the following year. In 1931 the Association of Contemporary Music was also forced to cease operation. But the extremism of the 'leftist' policies of RAPM eventually alienated even the government; the 1932 Party Resolution 'O Perestroike Literaturno-khudozhestvennïkh organizatsiy' ('On the Reorganization of Literary and Artistic Organizations') brought its existence to a swift end. The founding in Moscow of the Soyuz Sovetskikh Kompozitorov (Soviet Composers Union) in 1932 was a direct result of the Party Resolution, as was the establishment of its Moscow-based journal *Sovetskaya muzïka* in 1933. Other events in Moscow musical life that year included the opening of an Opernaya Studiya (Opera Studio) at the conservatory and the inauguration of the Vsesoyuznïye Konkursï Muzïkantov-Ispolniteley (All-Union Performers' Competitions), but perhaps the

most important was Prokofiev's return from emigration. A St Petersburg resident before the Revolution, he settled permanently in the capital in the spring of 1936. 1934 saw the foundation in Moscow of the Ansambl' Sovetskoy Operï Vsesoyuznogo Teatral'nogo Obshchestva (Soviet Opera Ensemble of the All-Union Theatrical Society), which promoted opera through concert performance by acting as a sort of intermediary between composer and opera house. Many new works were staged in opera theatres in different towns of the USSR following their initial concert performances in Moscow. Operas first performed by the ensemble included Shaporin's *Dekabristï* ('The Decembrists', 1953), Prokofiev's *Semyon Kotko* (1939) and *Voyna i mir* ('War and Peace', 1944), and Shebalin's *Ukroshcheniye stroptivoy* ('The Taming of the Shrew', 1955). The most important centre of opera in Moscow remained, however, the Bol'shoy Theatre, the national status of which was consolidated by a new production in 1939 of Glinka's *Ivan Susanin*, formerly known as *A Life for the Tsar*, with an appropriate new libretto completed by Sergey Gorodetsky. Suk retired as principal conductor in 1933, having held the position since 1906, and was succeeded by Samosud in 1936 and then a succession of other prominent conductors, including Melik-Pashayev (1953–62) and Rozhdestvensky (1964–70). Yury Fayer's appointment as chief ballet conductor at the Bol'shoy extended from 1923 to 1962.



The atmosphere in Moscow's musical life changed after Stalin attended a performance of Shostakovich's *Lady Macbeth of the Mtsensk District* at the Bol'shoy Theatre in December 1935. Shortly afterwards the infamous unsigned editorial appeared in *Pravda* denouncing the work, which heralded widespread repressions in the arts. On the whole, musicians suffered less than writers during the Purges, but the Moscow-based composer Aleksandr Mosolov was arrested and sent to the camps in 1937, for example, while Nikolay Roslavets was declared an 'enemy of the people'. Numerous musical works, such as Prokofiev's *Cantata for the 20th Anniversary of the October Revolution*, were censored. Despite the wave of arrests and political denunciations of those unwilling to conform beginning in the late 1930s, there were also some positive new developments in Moscow musical life at this time. As the capital of the USSR, it was important that Moscow could boast a national orchestra, a role played by the Gosudarstvennïy Simfonicheskiy Orkestr Soyuza SSR (USSR State SO) after its foundation in 1936. Alongside it functioned the Bol'shoy Simfonicheskiy Orkestr Vsesoyuznogo Radio (Grand SO of All-Union Radio), formed earlier in 1931, and conducted until 1937 by Georges Sébastian. In 1936 the Gosudarstvennïy Orkestr Narodnïkh Instrumentov (State Folk Instrument Orchestra) was also formed. It became known as the Russkiy Narodnïy Orkestr (Russian Folk Orchestra) in 1943. The Russkiy Narodnïy Khor imeni M.Ye. Pyatnitskogo (Pyatnitsky Russian Folk Choir) became a professional group for the first time, attached to the Moscow Philharmonic during this period.

In the 1930s Moscow began to display the cultures of the country's different republics in arts festivals that often involved thousands of participants. The first Vsesoyuznaya Olimpiada Teatrov i Iskusstv (Moscow All-Union Olympiad of Theatres and the Arts), for example, took place in 1930 and included the première of the Armenian opera *Almast* by Aleksandr Spendiaryan. Between 1936 and 1960, 30 Dekadï Natsional'nogo Iskusstva (Festivals of National Art) were also organized in Moscow, featuring in each case artists, composers, folk musicians, opera singers, actors, dancers, choirs and instrumental groups from a specific republic, together with exhibitions of painting and sculpture. In 1940 the Moscow Conservatory was named after Tchaikovsky, in honour of the centenary of the composer's birth. The Kontsertnïy Zal imeni P.I. Chaykovskogo (Tchaikovsky Concert Hall), a new, 1650-seat concert hall which was opened in central Moscow in 1940, was also named after the composer.

During World War II many musical institutions in Moscow were evacuated – the Bol'shoy Theatre to Kuybïshev, for example, the State SO to Frunze and the conservatory to Saratov – but a small corps of musicians remained in the city, and they were to play an important role in preserving morale. Muscovites were able still to attend concerts of the Radio Orchestra, and in 1941 the Stanislavsky Opera Theatre and the Nemirovich-Danchenko Music Theatre joined forces to become the Muzïkal'nïy Teatr imeni K.S. Stanislavskogo i V.I. Nemirovicha-Danchenko (Stanislavsky–Nemirovich-Danchenko Music Theatre), the most important music theatre after the Bol'shoy. Performing musicians in Moscow contributed to the war effort by joining front line brigades and performing for troops, while composers wrote stirring patriotic songs, such as Aleksandr Aleksandrov's *Svyashchennaya voyna* ('A Holy War'), which became the musical emblem of World War II. A conference on music and war was held at the conservatory to mark the 25th anniversary of the Red Army in 1942.

Moscow musical life was now further enriched by the foundation of the Gosudarstvennïy Russkiy Khor Soyuza SSR (USSR State Russian Choir) in 1942, led by Aleksandr Sveshnikov, the Institut Istorii Iskusstv Akademii Nauk SSSR (Institute for the History of the Arts of the USSR Academy of Sciences) in 1943, the Gosudarstvennïy Tsentral'nïy Muzey Muzïkal'noy Kul'turï imeni M.I. Glinka (Glinka State Central Museum of Musical Culture), also in 1943, and the Muzïkal'nopedagogicheskiy Institut imeni Gnesinïkh (Gnesin State Institute for Musical Education) in 1944. The State SO and the conservatory returned to the capital following the victory at Stalingrad in 1943. Despite the difficult wartime conditions, several ensembles from other Soviet republics performed in Moscow in 1943, and a six-day festival commemorating the 50th anniversary of Tchaikovsky's death was held in the city in November of that year. Even the death in 1943 of the former conservatory student Rachmaninoff, an émigré since 1917, was commemorated with a series of concerts. The influential musicologist and critic Boris Asaf'yev was evacuated from Leningrad to Moscow in 1943, where he was to remain for the rest of his life, becoming head of the musicology department at the conservatory. He also became head of the musicology department at the newly-established Institute for the History of the Arts.

Hopes that the Soviet regime would become more liberal after the end of the War were soon dashed, and repercussions were first felt in the Moscow musical world with an attack on 'formalism' in 1948. Vano Muradeli's opera *Velikaya druzhba* ('The Great Friendship') had been earmarked as the musical showpiece to celebrate the 30th Anniversary of the October Revolution in 1947 (the Moscow première took place at the Bol'shoy Theatre on

3. Opening ceremony of the first International Tchaikovsky Competition in the Grand Hall of the Moscow Conservatory, 1958

7 November, the anniversary day itself). In February 1948, however, the Party Resolution 'Ob opere *Velikoy Druzhbe* Vano Muradeli' [About the opera *The Great Friendship* by Vano Muradeli] appeared, penned by the head of culture Andrey Zhdanov, who used the occasion to lambast leading Soviet composers such as Prokofiev and Shostakovich, who had recently moved to the capital. At the Perviy Vsesoyuzniy S″yezd Sovetskikh Kompozitorov (First All-Union Congress of Soviet Composers), held in Moscow a few months later, members of the Orgkomitet Soyuza Kompozitorov SSSR (Organizing Committee of the USSR Union of Composers), which had been set up in 1939, were replaced by Party functionaries, who endorsed hard-line Stalinist policies. Shostakovich, Shebalin and other 'formalists' were dismissed for a time from their posts at the Moscow Conservatory.

The death of Stalin in 1953 (on the day that Prokofiev died) brought an end to the so-called 'Zhdanov era' and heralded the inauguration of a more permissive climate, which made possible the resumption of contacts with the West. Leading Western pianists, conductors and composers now began to visit Moscow, including Glenn Gould, Michelangeli, Stokowski, Bernstein, Szell, Britten, Boulez, Nono, Copland and the former Russian citizen Igor Stravinsky. Among the foreign opera companies that toured Moscow were La Scala, Covent Garden, the Berlin Komische Oper, the Vienna Staatsoper and the Swedish Royal Opera. Orchestras from Prague, Bucharest, New York, Boston, Philadelphia, Cleveland, London and Paris also visited Moscow. Among the special musical events organized in Moscow at this time, a festival of British music in 1963 was a particular success. Benjamin Britten became popular with Russian audiences, and enjoyed well-publicized friendships with Moscow-based musicians such as Rostropovich, Vishnevskaya and Shostakovich. The pianist Mariya Yudina also played an important role in promoting new music in the 1960s in Moscow.

The proliferation of new ensembles which were founded in Moscow during this period also reflects the more optimistic and liberal atmosphere of the Krushchyov years. They include the Simfonicheskiy Orkestr Moskovskoy Filarmonii (Moscow Philharmonic SO, 1953); the Moskovskiy Kamerniy Orkestr (Moscow Chamber Orchestra, 1956), directed by Rudol′f Barshay; the Ansambl′ Skripachey Bol′shogo Teatra (Bol′shoy Theatre Violin Ensemble, 1956), directed by Yu.M. Reyentovich; the Kvartet Aspirantov Moskovskoy Konservatorii (Quartet of Postgraduates of the Moscow Conservatory, 1957), which renamed itself the Prokofiev Quartet in 1962; the Kvartet imeni Glinki (Glinka Quartet, 1968), which had been formerly known as the USSR Composers' Union Quartet; and the Kamerniy Orkestr Studentov Moskovskoy Konservatorii (Moscow Conservatory Students Chamber Orchestra, 1961), which was directed by Mikhail Terian and awarded the first prize at the Karajan International Competition for Young Orchestras in West Berlin in 1972. The Kvartet Moskovskoy Filarmonii (Moscow Philharmonic Quartet), which had formed in 1946, renamed itself the Borodin Quartet in 1955. In 1956 a second music publishing house, Sovetskiy Kompozitor (Soviet Composer), was established in Moscow, but was merged with MUZGIZ in 1964 to form Muzïka. In 1958 the Mezhdunarodniy Konkurs imeni P.I. Chaykovskogo (International Tchaikovsky Competition) was inaugurated at the Moscow Conservatory (fig.3), an event which has since been held every four years. The annual music festivals Moskovskiye Zvyozdï (Moscow Stars) and Russkaya Zima (Russian Winter) first took place in 1964. The avant-garde composer Andrey Volkonsky founded Madrigal, a pioneering early music group in 1964. The Detskiy Muzïkal′nïy Teatr (Children's Music Theatre) was founded in 1965. The 6000-seat Dvorets S″yezdov, built in the grounds of the Kremlin in 1961 for the 22nd Party Congress, later became a second venue for the Bol′shoy Theatre, but the most interesting opera productions in Moscow were those staged at the experimental Kamerniy Operniy Teatr (Chamber Opera Theatre), directed by Boris Pokrovsky, which opened in 1970. Its

production of Shostakovich's *Nos* ('The Nose') in 1972 was the first since 1930. The première of *Katerina Izmaylova*, a revision of Shostakovich's reviled opera *Lady Macbeth of the Mtsensk District*, took place at the Stanislavsky-Nemirovich-Danchenko Music Theatre in 1963.

After Brezhnev became Soviet leader in 1964, artistic policies once again became more repressive. Musical life in Moscow was more than ever dominated by Party bureaucrats at the Ministry of Culture and Goskontsert (State Concert Agency), which controlled and censored concert repertories and tour itineraries. Rather than submit to such interference, sometimes accompanied by persecution by KGB agents, many leading performers chose to emigrate. Moscow-based musicians who left the Soviet Union during the 1970s include Ashkenazi, Rostropovich and Vishnevskaya, Kondrashin, Volkonsky and Dubinsky, leader of the Borodin Quartet. The death of Shostakovich in 1975 also deprived the Moscow musical scene of an important presence. Among more positive events were the opening of spacious new premises for the Gnesin State Institute and the concerts given by the New York PO in 1976. From 1980 chamber concerts of the highest quality were performed by Moscow's leading virtuosos at the exclusive and semi-official Dekabr'skiye Vechera (December Evenings) festival, organized annually at the Pushkin Museum of Fine Arts by the pianist Svyatoslav Rikhter and Irina Antonova.

It was not until Gorbachyov instituted the policies of *perestroika* and *glasnost'* in the late 1980s that musical life in Moscow really opened up. Performers such as Horowitz, Ashkenazi and Rostropovich received a rapturous welcome by Moscow audiences when they returned to the city for the first time, and new festivals and conferences were organized at which previously banned music by modernist composers such as Roslavets, Mosolov and Lourié was performed and discussed. The Violin Concerto of Roslavets, for example, received its first performance in 1989 at the contemporary music festival Moskovskaya Osen' (Moscow Autumn), which had been founded in 1980. The avant garde had organized its own festival Al'ternativa (Alternative) in 1988. The collapse of the Soviet Union brought an end to lavish state subsidies, leaving most musical institutions in Moscow in a precarious financial situation. The formerly monolithic Goskontsert was forced to operate in market conditions in much reduced circumstances, while Melodiya, the state recording company, lost its monopoly. In 1989 the original libretto was restored to Glinka's *A Life for the Tsar* at the Bol'shoy, but new productions had not restored the fortunes of the theatre itself by the end of the 20th century. Over the course of the 20th century, the theatre had employed singers of the calibre of Nadezhda Obukhova, Aleksandr Pirogov, Mark Reyzen, Ivan Kozlovsky, Yevgeny Nesterenko, Irina Arkhipova, Yelena Obraztsova and Galina Vishnevskaya, but did not fare well during the years of 'stagnation' under Brezhnev. Dogged by corruption and management problems for many years, it has been forced to cede its former position of pre-eminence to the more dynamic Kirov Opera and Ballet companies of the Mariinskiy Theatre in St Petersburg.

Despite difficult conditions, and the emigration of many leading perfomers, many new ensembles were formed in Moscow in the 1990s. The Russkiy Natsional'nïy Orkestr (Russian National Orchestra), for example, gave its first concert in 1990. Formed with players from the first ranks of major Soviet orchestras by its first chief conductor Mikhail Pletnev, a former winner of the Tchaikovsky Piano Competition (whose prestige has also been undermined in recent years by corruption), the orchestra was launched independently of the government, with private funding, and with the aim of creating a new model for the performing arts in Russia. In 1991, émigré Misha Rachlevsky also drew on leading Moscow performers to form the Chamber Orchestra Kremlin, while Pia Siirala and Lygia O'Riordan founded the string orchestra Ensemble XII with an international group of young players. Several new chamber opera companies were also formed in the 1990s including the Gelikon (Helikon) and Novaya Opera (New Opera). Two Moscow groups were founded in the 1990s specifically to perform contemporary music: the Moskovskiy Ansambl' Sovremennoy Muzïki (Moscow Contemporary Music Ensemble, 1990) and the Studiya Novoy Muzïki (Studio of New Music, 1993). The Assotsiatsiya Novoy Muzïki (Association for Contemporary Music) was re-formed in Moscow in 1990, with Ėdison Denisov as president. At first an informal organization aimed at representing the interests of avant-garde composers, with a loose affiliation to the skeletal and almost defunct post-Soviet Union of Composers, the association started to lose momentum when many of its founder members moved abroad. The deaths of senior figures such as Denisov (1996) and Shnitke (1998), both of whom had spent most of their working lives in Moscow, were a further blow. The Tsentr Sovremennoy Muzïki (Centre for Contemporary Music), which was founded at the Moscow Conservatory under the direction of composer Vladimir Tarnopol'sky, has organized the annual international contemporary music festival since its inception in 1994 in collaboration with the Studio of New Music.

I.M. YAMPOL'SKY/ROSAMUND BARTLETT (1–3), ROSAMUND BARTLETT (4)

Mosel, Giovanni Felice (*b* Florence, 1754; *d* after 1811). Italian violinist and composer. He studied the violin with his father (who had been a pupil of Tartini) and during his childhood appeared at concerts in Florence, where he completed his studies under Pietro Nardini. He was a player in the grand ducal orchestra and, on his teacher's death in 1793, succeeded him as conductor, a post he held

for several years. In 1812 he was leader of the Pergola theatre orchestra.

WORKS

12 duets, 2 vn: op.1 (Florence and Paris, 1783), op.3 (Venice, 1791); 6 str qts (Paris, 1785); Serenata, fl, 2 va, vc (Venice, n.d.); 13 syms., *CH-N*; Vn Conc. *I-Vnm*
Trios, 2 vn, vc; sonatas, vn, b: all unpubd, mentioned in *FétisB*

SERGIO MARTINOTTI

Mosel, Ignaz Franz von (*b* Vienna, 1 April 1772; *d* Vienna, 8 April 1844). Austrian writer on music, conductor and composer. He conducted the first music festivals of the Gesellschaft der Musikfreunde in the Spanish Riding School in Vienna (1812–16). He was ennobled and made a *Hofrat*. From 1820 to 1829 he was vice-director of the two court theatres, and from 1829 till his death principal *custos* of the Imperial Library. Mosel was one of the three chief mourners at Beethoven's funeral. Although his own compositions were forgotten even in his lifetime, and his arrangements and editions are useless by today's standards, his work at the theatres and in the Imperial Library enabled him to write authoritatively about contemporary musical figures and ideas.

WORKS

3 stage works, all MSS in *A-Wn*: Die Feuerprobe (Spl, J. Sonnleithner), 1811; Salem (lyric tragedy, I.F. Castelli), 1813; Cyrus und Astyages (heroic op, M. von Collin, after P. Metastasio: *Circo riconosciuto*), 1818; incid music for numerous plays, mostly *Wn*
Masses, psalms, cants., songs, inst works, some pubd, others mostly *A-Wgm*, *Wn*
Arrs. for str qt (all pubd Vienna): L. Cherubini: Les deux journées, Medea; J. Haydn: Die Schöpfung (*c*1801); W.A. Mozart: Così fan tutte, Don Giovanni (1806)
Addl instrumentation (all pubd Vienna): G.F. Handel: Israel in Egypt (*c*1815), Samson (*c*1815), Jephtha (*c*1832)

WRITINGS

C.F. POHL/BRUCE CARR

Möseler, Karl Heinrich. German music publisher, owner of the firm of KALLMEYER from 1947 to 1951.

Mosenthal, Salomon Hermann, Ritter von (*b* Kassel, 14 Jan 1821; *d* Vienna, 17 Feb 1877). German librettist and dramatist. In 1842 he broke off his studies in Karlsruhe and moved to Vienna, where he embarked on a career as a writer and dramatist. In 1849 he entered the Austrian civil service, later becoming an official in the Ministry of Culture and Education. In 1868 he became a Knight of the Order of Franz Joseph. He was also appointed to the Gesellschaft der Musikfreunde, where he was instrumental in establishing the drama department.

Mosenthal was the most able and prolific German librettist of his generation, and has with some justice been called 'the German Scribe'. If his plots are usually less complicated than Scribe's, he shared the latter's ability, as Hanslick pointed out, to design effective ensemble scenes and rousing finales and to write verse in which musicality met the composer halfway. After his first great success, the libretto for Nicolai's *Die lustigen Weiber von Windsor* (1849), Mosenthal went on to write for Flotow, Anton Rubinstein, Goldmark and Ignaz Brüll. Other librettists have also drawn on his writings (e.g. John Oxenford on *Der Sonnenwendhof* for Macfarren's *Helvellyn*, 1864; Jaroslav Kvapil on *Debora* for J.B. Foerster's opera, 1893). Indeed, Hanslick aptly remarked that Mosenthal was 'the poetic foster-father of all hard-pressed composers'.

LIBRETTOS

Die lustigen Weiber von Windsor (komische Oper), Nicolai, 1849; *Ein Abenteuer Carls des Zweiten* (komische Oper), J. Hoven [Johann Vesque von Püttlingen], 1850; *Der lustige Rath* (komische Oper), Hoven, 1852; *Lips Tulipan* (komische Oper), Hoven, inc.; *Albin*, Flotow, 1856; *Die Kinder der Heide*, Rubinstein, 1861; *Die erste Falte* (komische Oper), Leschetizky, 1867; *Das Landhaus in Meudon* (komische Oper), M. Kässmayer, 1869
Judith, Doppler, 1870; *Die Folkunger* (grand op), E. Kretschmer, 1875; *Die Königin von Saba*, Goldmark, 1875; *Die Maccabäer*, Rubinstein, 1875; *Das goldene Kreuz* (komische Oper), Brüll, 1875; *Der Landfriede*, Brüll, 1877; *Der Ritterschlag* (komische Oper), H. Riedel, 1881; *Wiener Schule* (Spl), R. Weinwurm, 1881; *Antonius und Cleopatra* (grand op), Friedrich Ernst, Count of Sayn-Wittgenstein-Berleburg, 1883; *Fata Morgana* (lyrisch-choreographisches Drama), J. Hellmesberger, 1886; *Moses* (sacred op), Rubinstein, 1892

ALFRED CLAYTON

Moser. German family of musicians.

(1) **Andreas Moser** (*b* Semlin an der Donau, 29 Nov 1859; *d* Berlin, 7 Oct 1925). Violinist, teacher, writer on music and editor. He first studied engineering and architecture, then turned to music in 1878, becoming a violin pupil of Joachim in Berlin. He was briefly employed as orchestral leader in Mannheim in 1883, but because of an arm ailment he gave up a performing career and became a teacher. From 1884 to 1888 he was a private teacher in Berlin, and from 1888 to 1925 he taught at the Hochschule für Musik there. He was made a professor in 1900, and in 1925 he received an honorary degree from the University of Berlin.

Moser is known chiefly for his writings on the violin, its music and its performers. His biography of Joachim (written in 1898 and expanded to two volumes after his

death) and his edition of Joachim's correspondence are standard reference works. He also edited the Brahms-Joachim correspondence for the Deutsche Brahms Gesellschaft and wrote teaching methods for the violin, and articles on violin playing and violin music; he prepared editions of many standard repertory works for string instruments, including the parts to the complete quartets of Beethoven and Mozart and the 30 'famous' Haydn quartets. His three-volume violin tutor (1905), written in collaboration with Joachim, was widely used in its time.

BIBLIOGRAPHY

H.J. Moser: 'Andreas Moser', *Berliner MusikJb 1926*, 106–10

(2) Hans Joachim Moser (*b* Berlin, 25 May 1889; *d* Berlin, 14 Aug 1967). Musicologist, son of (1) Andreas Moser. From 1907 he studied musicology, German philology and history at the universities of Berlin (with Kretzschmar and Wolf), Marburg (Schiedermair), Leipzig (Riemann and Schering), and Rostock (Thierfelder and Golther), and he took the doctorate at Rostock in 1910 with a dissertation on musical societies in Germany during the Middle Ages. He also studied singing and composition. He completed his *Habilitation* at Halle in 1919 with a study of the history of string playing in the Middle Ages, and was an external lecturer (1919) and reader (1922) at the University of Halle, reader at the University of Heidelberg (1925–7), director of the Staatliche Academie für Kirchen- und Schulmusik in Berlin (1927–33) and honorary professor at the University of Berlin (1927–34). He was named to the senate of the Akademie der Künste in 1927 and received the honorary doctorate at the University of Königsberg in 1931. With the advent of the Nazi regime in 1933, he had to give up his positions in Berlin following plans (never realized) to close the academy and merge it with the Hochschule für Musik. Left with a reduced pension, Moser made his living mainly from freelance writing until 1940, when he was appointed to the Reichsstelle für Musikbearbeitungen in the Propaganda Ministry. Duties included replenishing opera and concert repertory to compensate for the prohibition of certain Jewish and foreign works and revising texts of operettas and sacred repertory to render them more politically acceptable. Following World War II, Moser had difficulty re-establishing his career, owing to his many nationalistic publications and his work for the Nazi government. He taught briefly at the city conservatory in Berlin-Reinickendorf in 1945 and at the University of Jena and the Weimar Musikhochschule in 1946. He returned to Berlin in 1950 and directed the city conservatory until 1960. His papers are housed in the music division of the Staatsbibliothek in Berlin.

Moser was enormously versatile and productive. His numerous writings (over 1500 publications) cover a wide variety of subjects including music sociology, the geography of civilization, music teaching, music aesthetics, acoustics and the history of individual genres and forms. His *Musiklexikon* (1935) was an outstanding achievement and had an extensive readership. He also arranged Handel and Weber operas, worked as a translator, wrote novels, short stories and a comedy, and composed songs and the children's opera *Der Reisekamerad* (1931). As a teacher and administrator, he contributed greatly to reforming music education and regularly contributed his views on music policy, education, amateur activity and the state of music professions to the German press.

Moser's wide-ranging research generally concerns itself with gaining a deeper understanding of the history and nature of German music. His three-volume *Geschichte der deutschen Musik* (written when he was 30) was the first comprehensive scholarly study of German music history and is notable for its arrangement of material, its detailed coverage and its originality. This was followed by significant monographs on Hofhaimer (1929) and Schütz (1936), his important work on Lutheran church music and the polyphonic Gospel settings (1931), and discoveries such as the tablatures of Lübbenau and Vienna, the madrigals of Knüpffer and G.M. Cesari and the accompanied partsong with basso continuo. Moser's intense engagement with German music proved fortunate when he had to work mainly as a freelance writer. He produced vast numbers of articles on German music for scholarly as well as lay audiences, becoming a regular contributor in the late 1930s to such publications as *Germanien* of the SS- 'Ahnenerbe' (an arrangement he was forced to terminate because of pro-Jewish remarks in his *Musiklexikon*). In his position in the Reichsstelle, he prepared an edition of musicological essays that rationalized German territorial gains in World War II with music-historical evidence. Moser's commitment to German music did not cease with the end of the war, and his 1957 book *Die Musik der deutschen Stämme* caused him notoriety for his rather naive persistence in viewing German Jews as a distinct 'tribe'. Despite his loss of prestige and largely insecure existence for most of the Nazi period, Moser thereafter came to symbolize the epitome of a Nazi collaborator, an image promoted both by his contemporaries and by later generations.

(3) Edda (Elisabeth) Moser (*b* Berlin, 27 Oct 1938). Austrian soprano of German birth, daughter of (2) Hans Joachim Moser. She studied at the Berlin Conservatory with Hermann Weissenborn and Gerty König. Her début was at the Deutsche Oper in 1962, in the small role of Kate Pinkerton, after which she sang for a year in the Würzburg Opera chorus; engagements followed at Hagen and Bielefeld. She appeared regularly at Vienna, Salzburg (from 1970) and Hamburg; she made her Metropolitan Opera début in 1968 as Wellgunde (*Das Rheingold*) and subsequently sang Donna Anna, the Queen of Night (both of which she recorded) and Liù. In 1979 she sang the title role of Matthus's *Omphale* at Cologne. She sang Strauss's

Ariadne in 1988 and Marie (*Wozzeck*) in 1989. Her recorded performances also include the title roles in Beethoven's *Leonore* and Lehár's *Giuditta* and *The Merry Widow*. Equally at home in contemporary music, she sang and recorded Henze's *Cantata della fiaba estrema*, *Being Beauteous* and *Das Floss der Medusa* under the composer, the last at its première in Vienna (1970); her repertory also included works by Fortner, Zimmermann, Nono and Stravinsky. Moser's voice was a powerful dramatic coloratura soprano, used with remarkable accuracy and musicianship.

R.J. PASCALL (1), PAMELA M. POTTER (2), HAROLD ROSENTHAL/R (3)

Möser, Karl (*b* Berlin, 24 Jan 1774; *d* Berlin, 27 Jan 1851). German violinist, conductor and composer. He made his début as a violinist in 1784, while studying with Böttcher, then continued his studies under Karl Haack until his appointment to Friedrich Wilhelm II's private quartet (1792–6). He then toured, visiting London and meeting Rode and Viotti, under whose influence he rebuilt his technique before returning in 1797 to Berlin. Haydn and Beethoven praised his performances of their quartets during his appearances in Vienna in 1804. He went to St Petersburg (1807–11), returning to Berlin as Konzertmeister of the reorganized Hofkapelle. His quartet's acclaimed chamber music evenings began in 1813, and were supplemented from 1816 with symphony concerts. He was Musikdirektor from 1825 until his retirement in 1842, and from 1825 to 1851 led the violin class. He championed Beethoven's music, and conducted the Berlin premières of several symphonies, including the Ninth Symphony in 1826. Though he composed violin pieces and vocal works, his real legacy was his lasting influence on musical life and violin playing in Berlin.

JOHN MORAN

Moser, Roland (Olivier) (*b* Berne, 16 April 1943). Swiss composer. He studied composition with Veress at the Berne Conservatory (1962–6), with Fortner at the Freiburg Musikhochschule (1966–9) and at the Studio for Electronic Music at the Cologne Musikhochschule. His teaching appointments have included positions at the Winterthur Conservatory (1969–84) and the Musikhochschule of the Basle Musik-Akademie (from 1984). His other activities have included performing with the Ensemble Neue Horizonte Bern (from 1969), directing the Zürich branch of ISCM (1982–6), sitting on the committee of the Schweizerischer Tonkünstlerverein (1990–95) and serving as a juror for International Composers' Seminars in Boswil. His awards include the Zürich Conrad Meyer Prize (1982) and the Berne music prize (1987).

Moser is an advocate of individual curiosity, and composes, explicitly, what he himself would like to hear. His attitude towards tradition is one of critical respect; he does not exclude a priori any particular materials or pitch organizations (e.g. tonal relationships, perfect consonances, diatonicism), nor does he believe in the concept of 'pure music'. Instead, he consciously works with sounds that are rich with associations from past use and generates music with many strands of meaning, sometimes contradicting or resisting the material on which it draws. This somewhat paradoxical process is evident in his early (and only) electronic work, *Stilleben mit Glas* (1969–70), in which he imitates everyday acoustic phenomena, while simultaneously making audible (by not eliminating the evidence of cuts and sounds such as a tape rewinding) the mechanisms and manipulations inherent in the medium. He is also interested in the systematic investigation of harmonic and temporal phenomena and in the relationship between speech and music.

After an early period of compositional experimentation, *Neigung* (1969–72) marked Moser's breakthrough to an individual style. The 'round' works of his second period create a greater distance than the more directly expressive compositions of his third phase, from *Wortabend* (1979) onwards. *DING* (1973), *WAL* (1980–83), *RAND* (1983) and *Bilderflucht* (1990–91) increasingly fragment the orchestra, breaking it up into smaller 'characteristic' ensembles. *Heinelieder* (1970–), *Lebenslauf* (1980–85), *Nach deutschen Volksliedern* (1984–90) and *Brentanophantasien* (1988–95) make up a cycle of complex vocal works, the titles of which suggest an affinity with early 19th-century Romanticism.

WORKS
(*selective list*)

Vocal: Heinelieder, 1v, acc., 1970– [arr. S, pf, actor, 1985]; Pour ne plus être seuls (P. Eluard, Amer., Ger., Fr. texts), T, 9 insts, 1974–6; Wortabend (B. Schnyder), S, Bar, 13 insts, 1979; Lebenslauf (F. Hölderlin), Bar, 4 va, 4 db, 4 perc, 1980–85; Vor dem Gesetz (F. Kafka), 2 choruses, small orch, 1981; Nach deutschen Volksliedern, S/Mez, fl, cl, str trio, 1984–90; Brentanophantasien (P.O. Runge), Mez/S, Bar, pf, 1988–95; ... über das Gras und Erinnern und Wind ... (G. Meier), female vv, cl, hp, db, 1990–96; Others the Same (W. Whitman, C. Parese), chorus, orch, 1995–7

ANTON HAEFELI

Moser, Thomas (*b* Richmond, VA, 27 May 1945). American tenor. He studied in Richmond, Philadelphia and in California, making his début in 1975 at Graz. In 1979 he sang Mozart's Titus at New York City Opera, and over the following decade performed in many of Europe's leading opera houses in a repertory that included Don Ottavio, Tamino, Idomeneus, Gluck's Pylades and Achilles, the title role of Schubert's *Fierrabras*, Paul (*Die tote Stadt*) and Franz I (Krenek's *Karl V*). At the 1984 Salzburg Festival he created the role of the Tenor in Berio's *Un re in ascotto*. In the 1990s he began to take on heavier roles: Florestan (which he sang at La Scala in 1990), Fritz (*Der ferne Klang*), the Emperor (*Die Frau ohne Schatten*), Max (*Der Freischütz*), Don José and Berlioz's Faust. In 1993 Moser made his Metropolitan début as Bacchus and sang Adolar (*Euryanthe*) at Aix-en-Provence; he sang his first Lohengrin in Geneva in 1994 and his first Peter Grimes at the Théâtre du Châtelet,

Paris, in 1995, and made an impressive Covent Garden début in 1997 as Palestrina. His strong, even-toned voice has retained its flexibility as it has grown weightier, while he sings Classical, Romantic and modern works with equal conviction. His many recordings include operatic roles ranging from Gluck and Mozart to Don José, the Young Sailor (*Tristan und Isolde*) and Fritz, and works such as *The Creation*, *Das Lied von der Erde* and *Gurrelieder*.

ELIZABETH FORBES

Moses(-Tobani), Theodore. *See* TOBANI, THEODORE MOSES.

Mosewius, Johann Theodor (*b* Königsberg [now Kaliningrad], 25 Sept 1788; *d* Schaffhausen, 15 Sept 1858). German conductor. After studying law, he turned to music and became musical director of the Königsberg theatre (1814). In 1816 he moved to Breslau. Following the model of Zelter's Singakademie, Mosewius founded the Breslauer Singakademie in 1825, with 26 members, and six months later it gave a public performance of Handel's *Samson*. A year after Mendelssohn's performance of Bach's *St Matthew Passion* in Berlin in 1829, Mosewius conducted the work in Breslau. One of the earliest 19th-century champions of Bach, both as performer and as scholar, it was largely due to his efforts that Breslau was a centre for the performance of Bach's music in Germany until 1945. After founding the Singakademie he became successively teacher at the university (1827), head of the Akademisches Institut für Kirchenmusik (1831), director of music at the university (1832) and founder of the Musikalischer Cirkel for the practice of secular music (1834). At the institute he introduced Italian works as well as music by Mendelssohn, Loewe, Spohr, Marx and others. He became known in England through two pamphlets first published in the *Allgemeine musikalische Zeitung*: *J.S. Bach in seinen Kirchenkantaten und Choralgesängen* (1845) and *J.S. Bachs Matthäus-Passion* (1852), whose copious music examples helped draw attention to Bach's music in England.

GEORGE GROVE/LOTHAR HOFFMANN-ERBRECHT

Mosko, Stephen (*b* Denver, 7 Dec 1947). American composer and conductor. He studied at Yale University (BA 1969) with Donald Martino and Gustav Meier, and at the California Institute of the Arts [CalArts] (MFA 1972) with Mel Powell, Leonard Stein and Morton Subotnick. He has taught at CalArts (1972–), Harvard University (1988–91) and the University of Chicago (1993–). He was the founding conductor of the CalArts Twentieth Century Players (1973–85), a founding member of Repercussion Unit (1974–), a Los Angeles-based percussion ensemble, and director of the Chicago Chamber Players (1993–). He has also served as music director of the 1984 Olympic Arts Festival, the San Francisco Contemporary Music Players (1988–97) and the Ojai Music Festival (1990), and has guest conducted the San Francisco SO and the Los Angeles PO. Among his awards are two Senior Fulbright/Hayes Fellowships (1972, 1978) to study Icelandic folk music, and commissions from the Fromm Foundation (1974, 1985), the Los Angeles PO (1986) and the Arnold Schoenberg Institute (1988).

Mosko's compositional style encompasses a range of Eastern and Western influences from Sufi ceremonial music to post-Webern European art music. His meticulously constructed works eschew development in favour of a succession of musical gestures. In his most characteristic works, such as *Superluminal Connection I: 'The Atu of Tahuti'* (1985), one surprise follows another as he tests the limits of the performers and their instruments. His intriguing timbral combinations and the seemingly timeless nature of his works challenge Western preconceptions regarding perception and consciousness.

WORKS

Orch: Superluminal Connection I: 'The Atu of Tahuti', 1985; A Garden of Time, 1989; Transliminal Music, 1992

JAMES CHUTE

Moskova, Joseph Napoléon Ney, Prince de la (*b* Paris, 8 May 1803; *d* Saint Germain-en-Laye, 25 July 1857). French statesman, scholar and composer. As a boy he showed great aptitude for music and composed a mass, performed at Lucca, where he lived after his father's death. In 1831 he became a member of the Chambre des Pairs, and in Paris he contributed articles to several publications, especially the *Revue des deux mondes* and *Le constitutionnel*, which excited considerable interest. He founded the Société des Concerts de Musique Religieuse et Classique in 1843, and published much of its repertory in the 11-volume *Recueil des morceaux de musique ancienne*. The society was founded upon the double-pronged idea of bringing the 16th-century repertory of the Cappella Sistina to 1840s Paris and reviving the Franco-Flemish traditions of vocal polyphony. However, the repertory of the *Recueil* ranges more widely, including Italian and English madrigals and excerpts from Bach's *St Matthew Passion*, Handel's operas and oratorios, and Haydn's *Creation*. Two items at least are 19th-century pastiches of Arcadelt and Stradella, by Dietsch and (probably) Niedermeyer respectively. Moskova took a musicological interest in the performance issues raised by the society's repertory; an important article for the *Revue et gazette musicale* in January 1851 focussed upon the implications of *chiavette* in 16th-century vocal music. In 1831 Choron's pupils performed one of his masses, which was highly praised by Fétis. Although naturally inclined to the madrigal style and sacred music, the prince also wrote two one-act operas, *Le cent-suisse* (1840) and *Yvonne* (1855).

GUSTAVE CHOUQUET/KATHARINE ELLIS

Moskva (Russ.). *See* Moscow.

Mos longus, mediocris, lascivus. Three levels of tempo, reflecting stylistic categories of music, formulated by Petrus le Viser during the 1290s.

Mosolov, Aleksandr Vasil'yevich (*b* Kiev, 29 July/11 Aug 1900; *d* Moscow, 12 July 1973). Russian composer. He received some music lessons from his mother, a singer, and studied at a Moscow high school until 1917. From 1918 to 1920 he fought in the civil war. Returning to Moscow, he attended the conservatory (1921–5) as a pupil of Glière, Myaskovsky (composition) and Grigory Prokof'yev and Igumnov (piano); in 1925 he joined the Association for Contemporary Music (ASM). For most of his life Mosolov lived in Moscow. During his early career he occasionally worked as a concert pianist and played his own pieces, but his main activity was composition. At this stage he composed intensively (from 1924 to 1928 he produced about 30 works), his music being marked by drama, a nocturnal urban quality (for example, in the piano sonatas and the symphonic poem *Sumerki*), parody (in the *Chetïre gazetnïkh ob"yavleniya*) and Musorgskyan intensity (in the *Tri detskikh stsenki*). Mosolov also contributed to the modern 'constructivist' movement, somewhat influenced by Honegger – a strain notably expressed in *Zavod* ('The Foundry'), which attracted attention through its use of a metal sheet to create the sound of clashing iron and steel. Many of the early works (among them a symphony and two sonatas, opp.21a and 22) were lost when a case of manuscripts was stolen.

In the period 1927–31 Mosolov's work was severely criticized by the Russian Association of Proletarian Musicians for its modernist leanings. This caused a long interruption of his creative output and resulted in a change of style: his music became melodically and harmonically simpler and he abandoned urban subject matter. In the early 1930s he made many expeditions to the Turkmen and Kyrgyz republics investigating folk music; this interest gave rise to the three orchestral songs of op.33 and the Piano Concerto no.2 on Kirghiz themes. He was arrested in 1938, accused of counter-revolutionary activities, and released a year later. In the 1950s he collected peasant songs in the Kuban and Stavropol' regions, and in the 1960s in northern Russia. During this period he wrote extensively in large-scale genres, employing elements of folk melody, harmony and polyphony. In his last years his compositional activity was linked with the Northern Folk Choir.

WORKS
(*selective list*)

STAGE

Stal' (ballet), ?1927, unstaged, lost

Geroy [The Hero] (chbr op, 1, Mosolov), op.28, 1928; Moscow, Teatr-studiya Kompozitor, 21 Nov 1989

Plotina [The Dam] (op, 5, Y.L. Zadïkhin), op.35, 1929–30, unperf.

Kreshcheniye Rusi [Baptism of Russia] (operetta, 3, H. Aduyev), 1930; unperf., Acts 2 and 3 lost

Signal (op, 1, O. Litovsky), 1941, unperf.

Maskarad [Masquerade] (op, 1, after M.Y. Lermontov), 1944, unperf.

ORCHESTRAL

Sumerki [Twilight], op.9, sym. poem, 1925, lost; Zavod [The Foundry], op.19, orch episode from ballet Stal', 1926–8; Stal', op.19a, ballet suite, perf. 1927, lost; Pf Conc. no.1, op.14, 1927; Sym., op.20, ?1928, lost; Pf Conc. no.2, 1932; Vc Conc. no.1, ?1935, lost; Hp Conc., 1939; Vc Conc. no.2, 1945; Sym. no.2, C, 1946; Torzhestvennaya oda [Ceremonial Ode] (1947); Sym. no.3 (Simfonia-pesnya [Sym.-Song]), B, 1950; Kubanskaya syuita, folk insts (1954); Ėlegicheskaya poėma, vc, orch, 1960; Sym. no.5, e, 1965; Sym. no.6, inc.

VOCAL

Choral: ?, op.8 (V.V. Mayakovsky), 1920s, lost; Sfinks (cant., O. Wilde), T, chorus, orch, ?1925, lost; Goroda-geroy [Town Hero] (orat, A. Zharov), solo vv, chorus, orch (1945); Rodina [Native Land] (cant., A. Prokofiev), solo vv, chorus (1948); Slava Moskve [Hail Moscow] (orat), chorus, orch, 1967; Narodnaya oratoriya [People's Orat], 1970; many other choruses and folksong arrs.

Solo vocal (with pf unless otherwise stated): 3 vokaliza, op.13, perf. 1920s, lost; 4 stikhotvoreniya [4 Poems] (A.S. Pushkin, J.W. von Goethe, V.F. Khodasevich), 1924; 4 pesni, op.7, lost; 10 stikhotvorenii [10 poems], op.10 (A.A. Blok), 1v, pf/ens, 1925; Chetverostishiya [Quatrains], op.16, Mez, pf, perf. 1929, ?lost; 3 detskikh stsenki [3 Children's Scenes], op.18, S/T, pf, perf. 1926; 4 gazetnïkh ob"yavleniya [4 Newspaper Announcements], op.21a, 1926; Sonata, op.22 (textless), lost; Skorpion, op.25 (S.V. Shervinsky), lost; 3 p'yesï, op.33 (N. Samolevska), 1v, orch (1933); Schastlivïy put' [Happy Path] (Zharov) (1941); Chekh i sokol [The Czech and the Falcon] (A. Maykov) (1941); 3 ėlegii (D. Davïdov) (1946); Slava velikomu oktyabryu [Hail Great October] (Zharov), Bar, orch (1947); 5 romansov (Pushkin) (1945); 2 kubanskiye narodniye pesni [2 Cuban Folksongs], 1955

CHAMBER AND SOLO INSTRUMENTAL

Elegiya, op.2, vc, pf, lost; Legenda, op.5, vc, pf, 1924; Ballada, op.17, cl, vc, pf, perf. 1925, ?lost; 3 liricheskyie p'yesï, va, pf, perf. 1925–6, lost; Sonata, op.21a, va, lost; Str Qt no.1, a, op.24, 1926; 4 kadentsii i koda, op.26, str qt, lost; Tantseval'naya syuita, op.27, pf trio, perf. 1929, ?lost; 4 p'yesï, bn, pf (1946); Tantseval'naya syuita, hp (1947); Str Qt no.2 'na patrioticheskie temï 1812', 1963

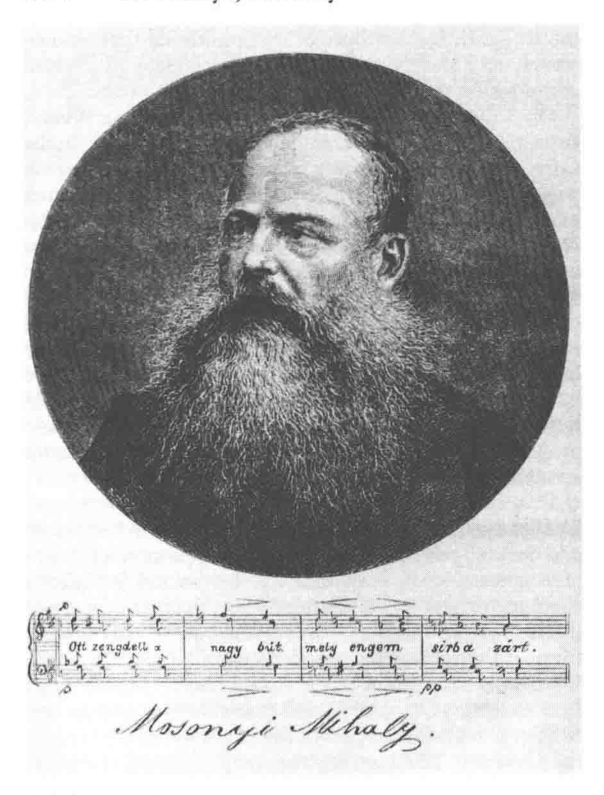
INNA BARSOVA

Mosonyi, Mihály [Brand, Michael] (*b* Boldogasszonyfalva, Hungary [now Frauenkirchen, Austria], 4 Sept 1815; *d* Pest, 31 Oct 1870). Hungarian composer, teacher and writer on music. Like Liszt, he was born in the border region between Hungary and Austria at the meeting-point of several cultures. His name was originally Michael Brand, the same as his father and grandfather, and his first language was German. The fourth of 11 children in a family of furriers, he learnt the usual wind instruments of peasant life. Boldogasszonyfalva was a famous place of pilgrimage, and in its church, built by Prince Pál Esterházy, Mosonyi had the opportunity to practise the organ and, between the ages of 10 and 12, to deputize for the cantor. In 1829 he left home to work as a church officer in Magyaróvár, where he taught himself music by copying Hummel's manual of exercises for the piano. About 1832 he moved to Pozsony (now Bratislava), at that time the capital of the Hungarian kingdom. Its cultural life was dominated by the nearby imperial city of Vienna, and Mosonyi became acquainted with the great works of Viennese masters and resolved to devote himself to music. He earned a living by teaching calligraphy, copying music, and working as a newsboy, later and typesetter for a printing firm, while he studied the piano and music theory with Károly Turányi, who later became Kapellmeister in Aachen. Turányi and another patron, Count Károly Keglevich, obtained for Mosonyi a position as a piano teacher at the residence of Count Péter Pejachevich in the Slavonian village of Rétfalu. There he spent seven years (1835–42), becoming an accomplished pianist and, with the help of Reicha's theoretical works, a composer. The compositions he finished in Rétfalu – the Grand Duo for piano, the first four of his seven string quartets and an overture – reveal a diligent pupil of the Classical style.



In 1842 Mosonyi moved to Pest, where he worked until his death. He never held a public, municipal or ecclesiastical position, nor was he in the service of a theatre, teaching institute or aristocratic household. One of the first independent musicians in Hungary to earn a living by teaching the piano and composition, his most famous pupils were Kornél Ábrányi (the elder), who later edited the weekly music journal *Zenészeti lapok*, Gyula and Sándor Erkel (sons of Ferenc), Sándor Bertha, and the future director of the Budapest Academy of Music, Ödön Mihalovich. He was encouraged to compose by the stimulating intellectual atmosphere in Pest in the decade before the Hungarian War of Independence (1848–9): the Hungarian Theatre (later the National Theatre) had been opened in 1837, followed three years later by the Singing School of the Pestbuda Society of Musicians (later the National Conservatory); in 1844 Ferenc Erkel had written Hungary's national anthem, and in 1840 and 1844 Erkel's first two operas, *Bátori Mária* and *Hunyadi László*, were performed. In April 1843 Mosonyi's Overture was given its first performance under the direction of Louis Schindelmeisser; the following March his First Symphony received its première, and a month later his first mass was heard in Pest. The success of these works led to Mosonyi's being appointed assistant archivist of the Pest-Buda Music Society on 27 September 1844. Both this symphony and the Sextet of 1844 reflect the influence of Beethoven, while the Piano Concerto, also completed in 1844, represents a step towards Romanticism. In this work Mosonyi succeeded in constructing a large one-movement form with the recognizable contours of the traditional three movements, and thus anticipated a development in cyclical composition that has been widely credited to Liszt.

On 3 October 1846 Mosonyi married Paulina Weber, sister of the famous portrait painter Henrik Weber. In the same year he began writing his Second Symphony, which was not performed until ten years later. Mosonyi took part in the War of Independence as a member of the National Guard, his musical contribution to the cause being an arrangement of the *Marseillaise* for baritone solo, mixed choir and orchestra. In 1849 he wrote a mass (his third) in memory of his benefactor and godfather Peter Piller. The early death of his wife (13 July 1851) brought on an emotional crisis, making it impossible for him to compose for two years. The elegiac autumnal lyricism of the German songs (1853–4), which were published by Breitkopf & Härtel, reflect his grief and show him a fully fledged Romantic.

The critics at the première of Mosonyi's First Symphony had been justified in singling out the influence of Beethoven and the composer's distance from any aspirations to write in a national style. In the finale of his Second Symphony (first performed on 30 March 1856), however, he made use of Hungarian idioms; his personal acquaintance with Liszt in the same year was decisive in his development. Liszt, who contributed to the consecration of the Basilica in Esztergom (Gran) with his *Missa solemnis*, then asked Mosonyi to set the Propers of the Mass, the Offertory and the Gradual. (Mosonyi's pieces, unperformed in Esztergom because the *regens chori* Sayler had also made settings of the Offertory and Gradual, were first performed in Pest on 24 August 1856 under the direction of Liszt.) Mosonyi, who took part in the performance of Liszt's Mass as a double bass player, did not recognize the true importance of Liszt as a composer or of his musical reforms until he had attended the rehearsals. From 1856 the two men were on close terms, as friends and colleagues. In honour of Mosonyi, Liszt had the main motif in the Agnus Dei of his Mass appear in a solo for the double bass. In 1860 Mosonyi transcribed Liszt's *Missa solemnis* for piano duet, to the composer's great satisfaction. Liszt invited Mosonyi to Weimar for the first performance of his *Faust-Symphonie* in September 1857, and looked through Mosonyi's German Romantic opera *Kaiser Max auf der Martinswand*, finished in 1857, in the hope of presenting it there.

But these hopes were not fulfilled. Liszt pointed out dramatic errors, which he asked Mosonyi to correct. He worked again on the opera until 1858, then abandoned it in favour of other works. Liszt's criticism and the notices of the Hungarian press encouraged him to turn his attention to raising the status of Hungarian art music. In 1857, on the occasion of the first visit to Hungary by the Empress (later Queen) Elisabeth, Mosonyi composed a piano piece in Hungarian style, *Pusztai élet* ('Puszta Life'). A whole year of compositional activity followed its favourable reception, and from about 1859 he wrote a series of new works in the national style. To give an outward gesture of his stylistic transformation, he took the Hungarian name of Mosonyi in 1859, after his place of birth (the county of Moson).

In creating a national style of art music Mosonyi could proceed from the already existing melody and rhythm of the *verbunkos* and *csárdás* and of Hungarian popular art song. His greatest task was to shape larger forms and a

Mihály Mosonyi

consistent musical language from the elements of the compact, small forms of dance and song. At first he followed Romantic models, composing mood and character-pieces after the example of Schumann's *Kinderszenen* (*Magyar gyermekvilág*, 1859), and studies after Chopin and Liszt (*Tanulmányok zongorára*, 1860). Mosonyi later used parts of these works for piano in his cantatas and operas. His *Hódolat Kazinczy Ferenc szellemének*('Homage to Kazinczy'), originally for piano but later orchestrated, is a stylized Hungarian rhapsody, while *Gyász hangok Széchenyi István halálára* ('Funeral Music for Széchenyi', also originally written for piano) is a symphonic poem built on a 'Hungarian ostinato'. *Hódolat* is the first work in the symphonic literature to use the cimbalom, which had previously been used only in gypsy bands. Mosonyi's Hungarian ostinato on the notes G–B♭–C♯–F♯ was later used by Liszt in his Hungarian historical portraits. The new wave of the idea of national independence in 1859–60 contributed to the popularity of Mosonyi's first Hungarian works. The nationwide festivities celebrating the centenary of the birth of the poet and language reformer Ferenc Kazinczy – which developed into a celebration of the free national spirit – inspired Mosonyi's Kazinczy cantata *A tisztulás ünnepe az Ungnál* ('Festival of Purification at the River Ung', 1859). The text of his cantata, based on the conquests of the Hungarians in the 9th century, gave the composer occasion to put himself forward as a reformer of the Hungarian musical language and a representative of what he called a 'spiritual conquest'. The appearance of the first weekly music journal in Hungary, *Zenészeti lapok* (1860), gave Mosonyi the opportunity to voice his aesthetic principles. His basic programme was 'to create, alongside the German, Italian, and French musical currents, a fourth world-famous style, the Hungarian'. In his articles Mosonyi fought for the cultivation and unity of Hungarian provincial composers, and also for Hungarian performances of the music of Liszt and Wagner, as well as for general musical education of the public. The last-named objective made him a forerunner of Kodály. Wagner, who became acquainted with some of Mosonyi's compositions on the occasion of his first trip to Hungary in 1863, praised the synthesis of the national and popular elements with the international in a piece from the *Tanulmányok zongorára*.

In 1861 and 1862 Mosonyi composed the Hungarian operas *Szép Ilonka* ('Pretty Helen') and *Álmos*. In the first he sought to build a grandiose form exclusively out of elements from Hungarian popular art song. In the second, whose theme was once more the early conquests of the Hungarians, he sought to synthesize certain expressive possibilities in Hungarian *verbunkos* music with those in Wagner's music dramas. *Szép Ilonka* met with no great success (Liszt composed a Fantasia on motifs from it in 1867); *Álmos* was never performed in the composer's lifetime.

In 1865 Mosonyi went to Munich to attend the first performance of *Tristan und Isolde*. In the same year he played the double bass in the first performance in Pest of Liszt's *Legende der heiligen Elisabeth*. In his last years Mosonyi composed noteworthy Hungarian art songs and ballads, and a series of choral works and cantatas of less importance. In 1870, a few months before his death, he was appointed to the programme selection committee of the Pest National Theatre and was also a member of the committee to prepare the Hungarian Beethoven centenary festival. Masonyi died with many ambitious hopes for a Hungarian national music. In 1995 (which was the 180th anniversary of his birth and the 125th of his death) the Ferenc Erkel Society arranged for the reinterment of Mosonyi's remains.

WORKS

OPERAS

Kaiser Max auf der Martinswand (3, E. Pasqué), 1856–7, unperf.
Szép Ilonka [Pretty Helen] (4, M. Fekete, after M. Vörösmarty), Pest, National, 19 Dec 1861, vs (Pest, 1862)
Álmos (3, E. Szigligeti), 1862, Budapest, Royal Hungarian Opera, 6 Dec 1934

VOCAL

Sacred choral: 5 masses, 1840–66; Jubilate Deo, 1843; Grad, 1843; Off, 1844; Grad, 1849; Lauda Sion, 1855; Off and Grad, for Liszt's Missa solemnis, 1856; Das Gebet des Herrn; Halotti ének [Funeral Song], 1865; Ave verum, Tui sunt, Ave Maria, all late 1850s; Libera me, 1870 (Budapest, 1871)
Cants.: A tisztulás ünnepe az Ungnál 886-ik esztendőben [Festival of Purification at the River Ung in 886] (F. Kazinczy), 1859; Dalra magyar! [Sing, Hungarian!] (E. Ábrányi), 1869; Cantate a zenekedvelők dalcsarnokának megnyitási ünnepére [Cantata for the Inauguration of the Concert Hall of the Pest Amateur Music Society] (J. Komócsy), 1870
Other secular choral: Chor zur Feyer des Tondichters Herrn Fr. Erkel, 1844; A dalárda [The Choral Society] (I. Szepessy), 1857; Üdvözlet [Greeting], 1857; Völkerfrühling, 1857; Fel fel e vérző kebelről [Up from the Bleeding Bosom], 1863; Tavaszi dal [Spring Song] (L.F. Takáts), 1863; Keserű pohár [Cup of Bitterness] (M. Vörösmarty), 1863; Bordal [Drinking-Song] (J. Arany), 1864; A nagyszombati dalárda jelvénye [Motto of the Nagyszombat Choral Society], 1864; Kemény-induló [Kemény March] (K. Tóth), 1865; A pacsirta [The Lark], 1865; Ébresztő [Reveille] (Z. Balogh), 1865; Szellemvilág [World of the Spirits], 1865; Dalárok karéneke [A Song of Singers], 1866; Szentelt hantok [Consecrated Graves] (Komócsy), 1868–9; Gróf Batthyány Lajos emlékének [In Memory of Count Batthyány], 1870

Songs: An Jrma, *c*1850; Aus einsamer Zelle (Menner), *c*1850; Wunsch im Frühlinge, *c*1850; Wiegenlied (Stütze), 1850; Du schönes Fischermädchen (H. Heine), 1853; Ob ich dich liebe? (Renniger), *c*1853; 6 Lieder (N. Lenau, R. Burns, E. Geibel), op.5 (Leipzig, 1853); Schilflieder (Lenau), op.6 (Leipzig, 1854); A szerelem, a szerelem [Love, Love] (S. Petőfi) (Pest, 1860); Letészem a lantot [I lay aside my Lyre] (Arany) (Pest, 1863); Hat népdal [6 folksongs] (Tóth) (Pest, 1863); Gara Mária (Tóth) (Pest, 1864); Mátyás anyja [Mátyás's Mother] (Arany) (Pest, 1864); Szentelt hantok [Consecrated Graves] (Komócsy) (Pest, 1869); Boldogság emléke [Souvenir of Happiness] (Komócsy) (Pest, 1870)

INSTRUMENTAL

Orch: Ov., b, 1841–2; 2 syms., D, 1843–4, a, 1846; Pf Conc., e, 1844, ed. (Budapest, 1966); A honvédek (Honvéds), fantasia, 1860; Gyász hangok Széchenyi István halálára [Funeral Music for Széchenyi], 1860; Hódolat Kazinczy Ferenc szellemének [Homage to Kazinczy], 1860; Ünnepi zene [Festival Music], 1860

Chbr: 7 str qts, D, g, a, f, c, b, b, before 1846; Ballade, vn, pf, 1841; Sextet, 2 vn, 2 va, 2 vc, 1844; Grand Nocturne, pf trio, 1845; Pf Trio, op.1 (Vienna, 1851); Romance, vn, pf/str, 1861

Pf (2 hands unless otherwise stated): Grand Duo, 4 hands, 1837–8; 3 Klavierstücke, op.2 (Pest, 1855); 2 Perlen, op.3 (Pest, 1856); Pusztai élet [Puszta Life] (Pest, 1857); Magyar gyermekvilág [Hungarian Children's World], i–iii (Pest, 1859); Hódolat Kazinczy Ferenc szellemének (Pest, 1859), arr. orch; Tanulmányok zongorára, a magyar zene elődásának képzésére [Studies for Development in the Performance of Hungarian Music], i–iv (Pest, 1860); Magyar zeneköltemény [Hungarian Musical Poem] (Pest, 1860); Gyász hangok Széchenyi István halálára (Pest, 1860), arr. orch; A régi Rákóczi nóta [The Old Rákóczi Melody] (1863); Ünnepi zene, 4 hands (Pest, 1864), arr. orch; Variations on a theme of S. Elemy (Pest, 1863); Az égő szerelem hármas szine [Three Colours of Burning Love], 4 hands (Pest, 1864); Bandérium induló [Band March] (Pest, 1867)

Numerous arrs., incl. Beethoven: Syms. 1–9, pf 4 hands (Pest 1866); Liszt: Missa solemnis (Graner Messe), pf 4 hands (Pest, 1865); Rákóczi March, pf (Pest, 1863); Rouget de Lisle: Marseillaise, Bar, vv, orch, 1848; Schubert: Erlkönig, orch, 1853; Beethoven: Terzetto op.116, orch, 1856

FERENC BÓNIS

Moss [Mosse], **John** (*fl* London, 1662–84). English composer, bass viol player and teacher. Moss may have been the man of this name who petitioned unsuccessfully for a place among the vicars-choral of St Paul's Cathedral when the choir was reconstituted in 1660–61. There he states that he was trained in vocal and instrumental music in the choir at Wells Cathedral 'and hath gotten his livelyhood some part of the late troubles by teaching' in the City of London. In 1662 he repeatedly failed to answer a summons to appear before the Westminster Corporation of Music (*GB-Lbl* Harl.1911) and was fined £3 for contempt. In 1669 he was apprehended for teaching music without a licence but must have mended his ways, for in July 1679 he was made an assistant to the corporation. Between 1675 and 1676 he taught at Christ's Hospital but was not eligible to continue because he was married. On the recommendation of Lord Chief Justice North he became a member of the King's Private Musick in 1678, filling the vacancy caused by the death of John Jenkins. He was not reappointed when the court music was reorganized in 1685 by James II. A John Moss held various positions in London in the late 17th and early 18th centuries, in two churches (as organist of St Mary Woolnoth, ?1678–1706, and St Dunstan-in-the-East, 1683–96) and in the Parish Clerk's Company (before 1684–1707). It is not known whether this was the court musician.

According to John Playford, performance on the bass viol 'lyra way' had been 'much improved by the excellent Inventions and Skill' of Moss and others. Moss contributed suites (though this term is not used) in each of the four standard tunings to *Musick's Recreation. Lessons for the Base-Viol*, printed in tablature to be played 'lyra way' with the support of a thoroughbass instrument, comprises 26 suites intended as teaching pieces and arranged, as in many didactic works of the period, so as to take the pupil through 'all [the] Keys usually play'd on in the Scale'. The preface to the *Lessons*, addressed 'to his Present and Quondam Scholars', stresses that the music is not too difficult and observes that 'the commonest Instruments in use, as the *Violin*, and *Gittar* have far more difficult Stops than any that I have here made use of'. Nearly all of Moss's suites, including that for harpsichord in *Melothesia*, consist of four movements: Almain, Corant, Saraband and Jig-almain (a type of jig in slow quadruple time).

WORKS

Bass viol: Prelude, 4 suites, 1669[6]; 26 suites, in Lessons for the Basse-Viol on the Common-Tuning (London, 1671); other pieces in *GB-Lcm* II.F.10, *Ob* Mus. Sch.F.572

Hpd: Jigg, 1663[7]; Suite in F, 1673[6]

Vocal: Songs and catch in Select Ayres and Dialogues (London, 1669), 1673[4], 1678[4], 1679[7]; song, Love, Loves a blind passion (London, *c*1700)

Moss, Lawrence K(enneth) (*b* Los Angeles, 18 Nov 1927). American composer. He graduated from UCLA (BA 1949), the Eastman School (MA 1950) and the University of Southern California (PhD 1957). His composition teachers included Ingolf Dahl and Leon Kirchner. He has

taught at Mills College (1956–9), Yale University (1960–68) as well as the University of Maryland (1969–). Among his awards are Fulbright and Guggenheim fellowships and commissions from the Fromm Foundation, the New Haven and Chicago symphony orchestras, and the Chamber Music Society of Baltimore.

Moss's compositions encompass an evocative spectrum of vocal, instrumental and electronically synthesized sounds. He sees his music as firmly rooted in the Germanic tradition of Beethoven, Brahms and Schoenberg, also citing Debussy, Ives and Stravinsky as influential. During the 1980s his compositional focus shifted away from electronic media towards solo vocal and instrumental works. In his numerous multimedia compositions, he expands the structural dimensions of a work to include visual stimuli (slide projections, lights, colour and dance) as well as sound. His reflective collages often juxtapose the illusory or abstract with the concrete. Some of his later works incorporate electronically manipulated melodies and sonorities recorded on visits to China.

CECELIA H. PORTER

Mossi, Giovanni (*b* ?Rome, *c*1680; *d* Rome, 1742). Italian composer and violinist. In the frontispieces of his first five collections he is referred to as Roman. This is probably true, since three other members of the family are known to have been in Rome between the 1670s and the 1730s: his father, Bartolomeo, and brother Giuseppe (both viola players), and Gaetano Mossi, a tenor at the papal chapel. This suggests that it was Bartolomeo who introduced Giovanni into the musical circles of Rome, where he was active as a violinist from 1694. His career there can be divided into three periods. Until 1715 he appeared regularly as an instrumentalist at the private courts of cardinals and princes, or in ecclesiastical *cappelle*. The second period, 1716–33, is marked by an outburst of compositional activity in instrumental genres; his work as a violinist continued as before, but in a span of 15 years he published in Amsterdam his entire catalogue of works: three sets of sonatas and three of concertos. During the third period, from 1733 until his death, he gave up composition and gradually reduced his professional commitments. His only stable position seems to have been as *virtuoso* at the court of Baldassarre Odescalchi (from 1709 Duke of Bracciano). It has not yet been possible to establish with certainty the duration of the engagement, but it was probably brief: evidence shows that in 1711 he was already in service, but five years later the frontispiece of op.1 made no mention of it. It is not clear what his relations were with Cardinal Wolfgang Hannibal Schrattenbach, Princess Vittoria Altieri Pallavicini and Cardinal Pietro Ottoboni, to whom opp.1, 4 and 6 respectively were dedicated.

Mossi's career as a violinist is reflected in his compositions, which consist of solo sonatas and orchestral concertos. Of the 36 violin sonatas with basso continuo, half are *da chiesa* (op.1 nos.1–6 and op.5) and the others *da camera*. The 26 concertos opp.2, 3 and 4 are nearly all in four or three movements, alternating slow and fast tempos. Mossi remained faithful to the Roman practice of having four violin parts, two of them solo and two 'di concerto grosso'. He tended, all the same, to give a principal role to the first violin. Noteworthy in op.4 no.12 is the enlargement of the orchestra, with four obbligato violins counterbalanced by an accompanying group of the same size.

The tradition of linking Mossi's name with Corelli's began during Mossi's own lifetime. The oft-repeated assertion that he was Corelli's pupil is not supported by documentary evidence, but there is not the slightest doubt that the two knew each other. In fact, despite the manifest originality of Mossi's compositions, the influence of Corelli is clear. Nevertheless, particularly in his concertos, Mossi made independent and contrasting choices, revealing numerous correspondences with the style of his colleague Giuseppe Valentini.

GIOVANNI SGARIA

Mosso (It.: 'agitated'; past participle of *muovere*, to move). A word that appears by itself as a tempo designation but is more often found in such contexts as *più mosso* (faster) and *meno mosso* (slower). *Allegro assai mosso* was normally the fastest tempo mark for Verdi. Tchaikovsky's Sixth Symphony (first movement) includes eloquent examples of *moderato mosso* and *adagio mosso*.

DAVID FALLOWS

Mosto, Giovanni Battista (*b* ?Udine, probably before 1550; *d* Karlsburg [now Alba Iulia], June 1596). Italian instrumentalist and composer. He was a son of the head of the *piffari* at Udine. He studied with Claudio Merulo, to whom he dedicated the madrigal anthology *Il primo fiore della ghirlanda musicale* (RISM 1577[1]), which he edited. Mosto was employed by the Bavarian court at Munich in 1568 as a cornettist and trombonist; he left the following year with his brothers Nicolò and Bernardo. In 1570, following his father's death, he was made one of the *piffari* of Udine, sharing his father's stipend with Nicolò. On 18 May 1573 he was asked to form part of the newly reconstituted company of instrumentalists in Udine. Besides playing during liturgical functions in the cathedral, the members of the group were required to teach an instrument to the cathedral boys. By the end of 1573 Mosto had left Udine; he may have spent a short period in Venice before proceeding on to Munich. On 6 November 1580 he became *maestro di cappella* at Padua Cathedral. Though he was an energetic director he was for some reason not re-elected to his post. On 17 May 1589, he moved to the Venetian church of S Maria Gloriosa dei Frari, and later that year he entered the service of prince Zsigmond Báthory of Transylvania who had set up 'a company of good musicians', most of them Italian, at the court in Gyulafehérvar (now Alba Iulia). In 1594, after the Turkish invasion, he moved with Báthory and the group of instrumentalists to Krakow and, subsequently, to Cologne, where they arrived on 29 May. Here he joined the court of the elector Ernst von Wittelsbach, with whom he visited Bonn, Liège and Brussels. In 1595 he returned to Padua, once again as *maestro di cappella* at the cathedral. After 10 March 1596 he left for Gyulafehérvar to collect his family and possessions, but he died during the return voyage, in June 1596.

Mosto was an excellent composer of madrigals, contributing to many of the major anthologies of the later 16th century as well as publishing four volumes of his own music; his contribution to *De floridi virtuosi d'Italia, il primo libro de madrigali* (2/1586) was reprinted by Thomas Morley in his *Madrigals to 5 Voyces: celected out of the Best Approved Italian Authors* (London, 1598). In style he belonged to the Venetian school and approached Andrea Gabrieli in his manipulation of short, pleasant, singable phrases and in his bright diatonic harmony. In particular, his first book of six-voice madrigals, dedicated to Báthory, has its own individual character: a tendency towards complex voice leading and pseudo-polychoral structure, with frequent three-voice, villanella-like sections. While in Padua, Mosto set the six double-choir psalms contained in two manuscripts (*I-Pc*). In general, these psalms are homorhythmic and declamatory, with maximum attention to text intelligibility.

WORKS

Il primo libro de madrigali, 5vv (Venice, 1578)
Il secondo libro de madrigali, 5vv (Venice, 1584)
Il terzo libro de madrigali, 5vv (Venice, 1588)
Il primo libro de madrigali, 6vv (Venice, 1595)
Motecta liber primus, 5vv (Venice, 1590)

DENIS ARNOLD/TIZIANA MORSANUTO

Mostras, Konstantin (Georgiyevich) (*b* Ardzhenka, 4/16 April 1886; *d* Moscow, 6 Sept 1965). Russian violinist, teacher and composer. He studied at the Moscow Philharmonic School of Music and Drama until 1914, and taught there himself (1914–22). During this period he performed in quartets and other ensembles. From 1922 he taught the violin at the Moscow Conservatory, where he became head of the violin department and in 1931 introduced his own course on violin technique. From 1922 to 1932 he was one of the directors of Persimfans, the conductorless symphony orchestra. But his chief importance was as a teacher who played a significant role in the development of a Soviet violin school; among his pupils were Ivan Galamian and Mikhail Terian. He wrote and edited numerous instructional works and transcriptions for the violin, including an edition of Tchaikovsky's Violin Concerto (in collaboration with David Oistrakh) with a commentary on technique (Moscow, 1947) and studies for solo violin, as well as valuble writings on violin technique.

I.M. YAMPOL'SKY/R

Mosusova, Nadežda (*b* Subotica, 4 Aug 1928). Serbian musicologist. She studied composition with Predrag Milošević at the Belgrade Academy of Music, graduating in 1953, and took the doctorate in 1970 at Ljubljana

University, studying with Dragotin Cvetko. She taught at the Stanković School of Music, Belgrade (1955–9) and became assistant, fellow researcher, senior researcher and scientific adviser at the Musicological Institute of the Serbian Academy of Arts and Sciences (1959). She was associate professor at the Faculty of Music (1977–93), lecturing on Romanticism and 19th-century Slavonic music. Her main areas of study are Serbian and Slavonic music history and theory, and music theatre in the 19th and 20th centuries, especially the theatrical activities of Russian emigration. She is concerned with the theoretical and aesthetic problems of Romanticism, symbolism and modernism.

ROKSANDA PEJOVIĆ

Moszkowski, Moritz (*b* Breslau [now Wrocław], 23 Aug 1854; *d* Paris, 4 March 1925). German pianist, composer and conductor of Polish descent. Born into a wealthy Jewish family, he received his first musical tuition at home, showing exceptional talent from an early age. In 1865 the family moved to Dresden, where Moszkowski was accepted at the conservatory. Moving to Berlin in 1869, he studied at the Stern Conservatory with Eduard Frank (piano) and Friedrich Kiel (composition), and subsequently at Theodore Kullak's Neue Akademie der Tonkunst with Kullak himself (piano) and Richard Wuerst (composition). While still only 17 he accepted Kullak's invitation to join the staff at his academy, where he taught for over 25 years. In 1873 he made his successful début in Berlin as a pianist, and quickly acquired a reputation not only as a brilliant virtuoso but also as a fine interpreter of the Classical and Romantic repertory. He was also a competent violinist, sometimes playing first violin in the academy orchestra. Among his early compositions were several substantial orchestral works, most of which have been lost. These included a piano concerto, first performed in Berlin in 1875 and admired by Liszt, who subsequently arranged a special concert in which he and Moszkowski performed the work on two pianos.

During the 1880s Moszkowski began to suffer from a nervous disorder which resulted in a premature end to his activities as a travelling virtuoso. Thereafter he appeared only occasionally as a pianist and concentrated more on composition. He also gained some recognition as a conductor, and it was in this capacity that he made his first visit to England in 1885, at the invitation of the Philharmonic Society, which later granted him an honorary life membership. He was elected a member of the Berlin Akademie der Künste in 1893. In 1897, while at the height of his fame, he settled permanently in Paris, having married the sister of Cécile Chaminade. By this time he had become considerably wealthy, mainly due to the immense popularity of his piano music. He was also much in demand as a teacher, and his many piano pupils included Josef Hofmann, Wanda Landowska and Joaquin Turina. At the suggestion of Messager, Thomas Beecham went to Moszkowski for coaching in orchestration in 1904.

From about 1910, however, Moszkowski's fortunes went into decline. He began to suffer from ill health, lost both his wife and daughter and saw his popularity fade as musical tastes changed. He became a recluse, and his creative output virtually ceased with his loss of ambition and enthusiasm. He invested his wealth in German, Polish and Russian securities, which became worthless after the outbreak of World War I in 1914. His remaining years were spent in poverty, although in 1921 some of his old friends in the USA arranged a testimonial concert for his benefit at the Carnegie Hall. This spectacular event, during which 14 pianos were played simultaneously by some of the leading pianists of the day, raised some $10,000, although the proceeds did not reach Moszkowski until the year of his death.

Moszkowski had some early success with his orchestral works, but he made his reputation with his piano music, ranging from brilliant virtuoso pieces, well suited to both concert hall and recital room (Concert Studies op.24, *Caprice Espagnol* op.37, *Tarantelle* op.27 no.2, etc.), to lighter salon music (*Serenata* op.15 no.1, *Valse Mignonne*, *Guitarre* op.45 no.2 etc.) and music for piano duet (particularly the three sets of Spanish Dances op.12, op.21 and op.65), then very much in demand for domestic music-making. Early influences include Chopin, Mendelssohn and, especially, Schumann, but he soon developed his own distinct style, which, if not highly original, confirms his intimate knowledge of the piano and how to write effectively for it, prompting Paderewski to declare that 'after Chopin, Moszkowski best understands how to write for the piano'. His music, although limited in emotional range, is characterized by its glittering brilliance, innocent charm and immediate melodic appeal. For many years Moszkowski's music was largely forgotten. Renewed interest in his work, however, has seen the revival of the Piano Concerto op.59 and recorded surveys of his output for piano solo and duet.

WORKS
(*selective list*)

Stage: Boabdil, der letzte Maurenkönig (op, 3, C. Wittkowsky), op.49, Berlin, 21 April 1892; Laurin (ballet, 3, E. Taubert and E. Graeb), op.53, Berlin, 1896; Don Juan und Faust (incid music, C.D. Grabbe), incl. 6 Airs de ballet, op.56 (1896)
Vocal: 2 Lieder (W. Sachs), op.9; 3 Lieder (N. Lenau, H. Heine and J. Wolff), op.13; Thränen, 5 Lieder (A. von Chamisso), op.22; 3 Lieder (C. Wittowsky), op.26; Der Schäfer putzte sich zum Tanz, scene from Goethe's *Faust*, solo vv, chorus, orch, op.44

MARTIN EASTICK

Moszumańska-Nazar, Krystyna (*b* Lwów [now L'viv, Ukraine], 5 Sept 1924). Polish composer. She studied the piano with Jan Hoffman and composition with Wiechowicz at the Kraków State Higher School of Music (1950–55), where she subsequently taught and from 1987 to 1993 served as rector. Among her awards is a gold medal for *Muzyka na smyczki* from the International Competition for Women Composers (Buenos Aires, 1962).

Her musical idiom moved from the neo-classicism of the mid-1950s to post-serial pitch organization at the turn of the decade, acknowledging the prevailing Polish interest in texture, aleatorism and new instrumental techniques only in *Muzyka na smyczki*. She developed a personal amalgam of conservative and radical elements, gradually shedding aspects of her earlier style. There is a lyrical intensity in the slow music, and her exploration of instrumental colour, on both large and small scale, is vividly dramatic in *Pour orchestre* (1969). Moszumańska-Nazar's acute ear for chamber sonorities is particularly apparent in the string quartets, in her extensive writing for percussion and in works such as *Interpretacje* and *Bel canto* for mixed ensemble. Her music after 1980 is more traditionally expressive in its harmony, sentiment and gesture, as in the three orchestral frescoes, *Rapsod II* and *Dwa dialogi* ('Two Dialogues').

ADRIAN THOMAS

Mota, José Viana da. *See* VIANNA DA MOTTA, JOSÉ.

Motellus (Lat.). *See* MOTET. *See also* MOTETUS.

Moten, Bennie [Benjamin] (*b* Kansas City, MO, 13 Nov 1894; *d* Kansas City, 2 April 1935). American jazz pianist and bandleader. He studied the piano with two of Scott Joplin's pupils and by 1918 was working professionally as the leader of the ragtime trio B.B. & D. By 1922 his group had expanded to six members, and in the next year they issued their first recordings, playing mostly blues with a heavy, stomping beat. Within ten years Moten's ensemble included among its members such outstanding performers as Walter Page, Hot Lips Page, Eddie Durham, Ben Webster, Buster Smith, Count Basie and Jimmy Rushing, and had largely established the Kansas City or Southwest style of orchestral jazz. This style was based on a four-beat rhythmic pattern that emphasized horizontal 'flow', on a flexible and texturally well-integrated rhythm section and on frequent use of instrumental riffs and blues chord sequences. The arrangements (by Durham and Eddie Barefield) were the most advanced of their time, except for Ellington's, offering highly virtuosic performances, often at breakneck tempos, which effectively blended solo and ensemble passages into organic compositions. These characteristics are well represented in a series of ten performances from the group's final recording session in 1932 for Victor, among them *Toby* and *Moten Swing*. On Moten's death his group was led briefly by Buster Moten (a brother or perhaps a nephew of Moten's). But in 1936 Basie formed a band which included several former members of Moten's orchestra,

that new Basie group turning eventually into an important force in big-band swing, and a formative influence on bop and other styles of modern jazz.

GUNTHER SCHULLER

Motet. One of the most important forms of polyphonic music from about 1220 to 1750. No single set of characteristics serves to define it generally, except in particular historical or regional contexts. It originated as a liturgical trope but soon developed into the pre-eminent form of secular art music during the late Middle Ages. The medieval motet was a polyphonic composition in which the fundamental voice (tenor) was usually arranged in a pattern of reiterated rhythmic configurations, while the upper voice or voices (up to three), nearly always with different Latin or French texts, generally moved at a faster rate. In the first half of the 15th century the motet's liturgical ties were restored, and it continued to evolve by adapting a number of forms and styles borrowed in part from the chanson, tenor mass and, later, the madrigal. In the 16th century the motet achieved its classical synthesis in the context of the Franco-Flemish style of Josquin and his successors. Important vernacular subspecies developed later, particularly in England (*see* ANTHEM, §I) and Germany, but the motet has since been defined as a sacred polyphonic composition with Latin text, which may or may not have *colla voce* or independent instrumental accompaniment.

I. Middle Ages. II. Renaissance. III. Baroque. IV. After 1750.

I. Middle Ages

1. France, Ars Antiqua. 2. England, 13th and early 14th centuries. 3. France, Ars Nova. 4. The later English motet. 5. Italy.

1. FRANCE, ARS ANTIQUA. The history of the medieval motet is rooted in the organa of Leoninus's *Magnus liber*, specifically, in their discant sections, in their modernizations by Perotinus, and in the clausulas, which originated as detached discant sections and thereafter developed into a distinct genre of self-contained and independently shaped pieces of music based on Gregorian melismas (*see* DISCANT, §I, 2 and CLAUSULA). Consistent with the traditions of *prosa* and prosula, as well as the general medieval concept of the consanguinity of music and poetry, Parisian composers of the early 13th century experimented with the addition of newly written texts to the most progressive melismatic polyphony, including the caudas of conductus and the melismas of organum. The motet, ultimately the most successful of such experiments, came into being with the application of a poetic text to the duplum of a clausula. Perotinus and his textual collaborator, Philip the Chancellor, emerge as central figures in this development. (Figs.1–2 show the clausula *Johanne* and the motet derived from it by addition of the text 'Clamans in deserto' to the upper voice.) The resulting pieces, essentially 'troped discant passages' or 'troped clausulas', were called motelli (from Fr. *mot*: 'word'), a

1. I-Fl Plut.29.1, f.164v: clausula 'Johanne' (from 'Alleluia, Inter natos'; Flotzinger no.Cl.2148)

term that soon gave way to 'moteti'; the newly texted line could be called motetus as an alternative to duplum. Evidently the clausulas were a pivotal phenomenon; their use as substitutes for old-fashioned passages in pre-existing organa points to the past, but their adaptation as motets explains in large part their continued cultivation. A good many are not known as motets and were probably not equipped with a text; for several decades the genre had its own intrinsic interest for composers. Yet, on the whole, clausulas with patterned tenors doubtless came to be viewed as potential sources for motets.

Apart from the conductus motets (see below), almost all the motets in the earliest sources (*I-Fl* Plut.29.1, *D-W* Helmst.1099 (Heinemann catalogue 1206) [W$_2$], *Mbs* Mus.ms.4775, *E-Mn* 20486; *see* SOURCES, MS, §V, 1) are for tenor and duplum only, as are most clausulas. Motet composers initially had to abandon three- or four-voice writing as they came to grips with the problems posed by the genre. To make a motet out of a three-part clausula with overlapping phrases in duplum and triplum was at first simply inconceivable, and in such cases the triplum was therefore dropped.

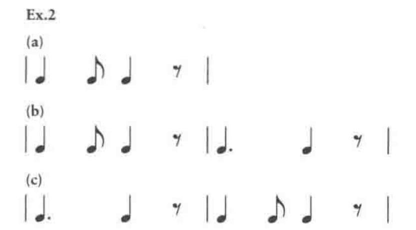
For several decades the 13th century possessed no system of individual notational symbols with which to express rhythms in music *cum littera*, such as in the upper voice of a motet. The graphic fixation of durational values had originated in melismatic discant, and the conception of rhythm in polyphony was configurational (ligatures). Under these circumstances it seems difficult to imagine the composition or rehearsal of an early motet without

2. I-Fl Plut.29.1, f.409v: two-voice motet 'Clamans in deserto/ Johanne'

the aid of a melismatic model. The marginal indications of the beginnings of motetus texts for the clausulas in the St Victor manuscript (*F-Pn* lat.15139) may be cited in this connection. Moreover, the only time Johannes de Garlandia cited both words and music of a certain motetus part, he wrote the example in ligature notation *sine littera*. Thus the early motet repertory was paralleled by that of the clausula for practical (rhythmic and notational) reasons; it is likely that some of the later 'source' clausulas never had an independent prior existence, but represent new compositions in the motet genre that are being stored in a rhythmically intelligible manner. Given the processes of writing and rewriting that are the hallmark of the early motet, many clausulas in the vast Florence collection (*I-Fl* Plut.29.1) may stand there already as modified on account of their careers as pre-existent sources for motets.

Irregularity of verse structure is a standard feature of the 13th-century motet in France. Since text is being added to music, the primary measuring tool was the preconceived music with its varied rhythms and phrase layout, and the musical phraseology of most clausulas and motets in the Notre Dame tradition, while carefully planned, exhibits no regularity. The structure of ex.1, made up of phrases of four, eight and 12 beats (longs), could be summarized as follows: upper voices (8 + 12L) + 2(12 + 8L) + 3(4L), tenor 9(4 + 4L), if L stands for a long or its equivalent. Since the versification of the poetry added here has to accord with the musical phrases and rhythmic figures of the preconceived clausula (or discant section), it cannot be regular. Instances of patterned phrase lengths and declamatory rhythms that could support versification – even strophic poetry – are very few.

Poetry also affected the music. A decisive result of the adaptation of text to clausulas concerns the weight and articulation of the notes. Comparison of any motet with



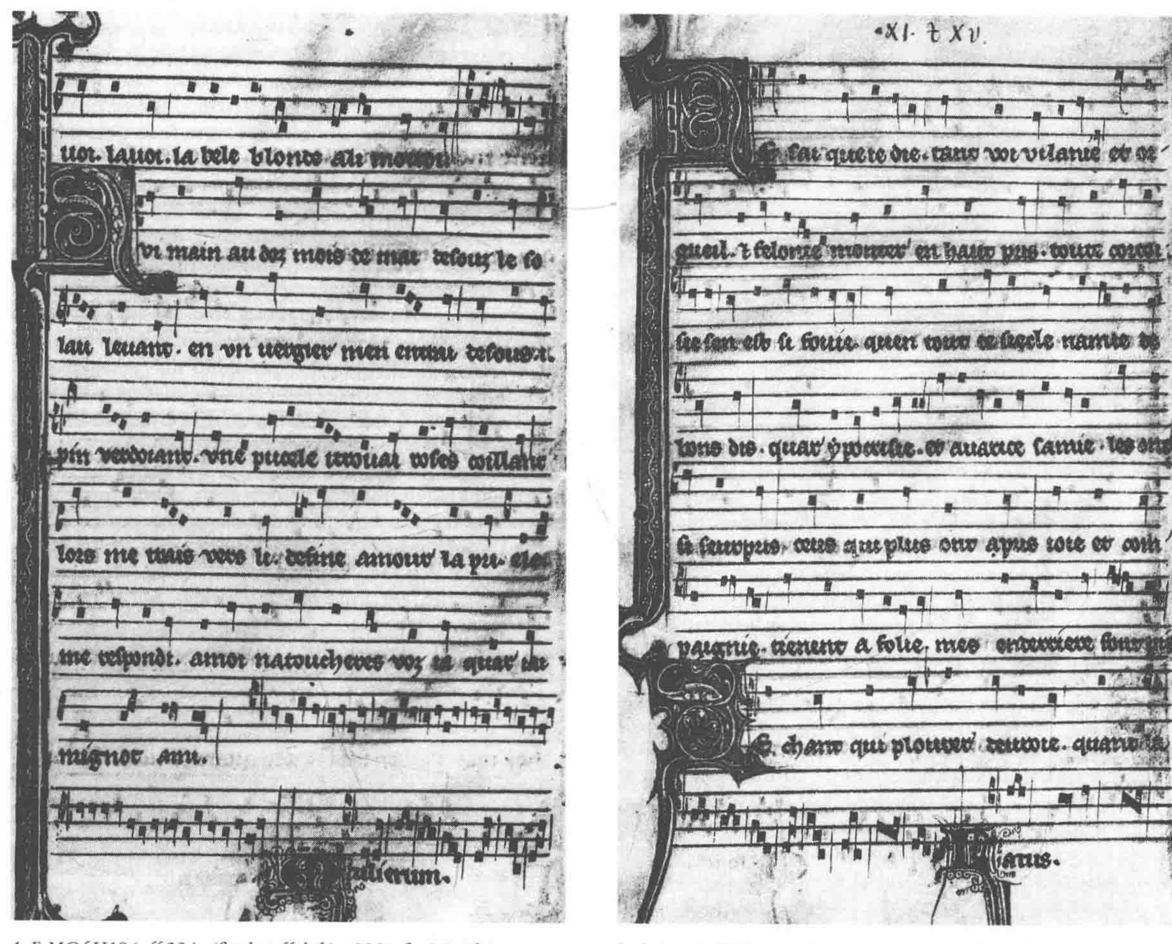
the ligature notation of the melismatic original shows how the propulsive flow of the melismatic phrases is profoundly affected by the declamatory individualization of each note. The words often convert the iambic (upbeat–downbeat) implications of the binary ligatures into truly trochaic rhythms (strong beat–weak beat).

Ex.1 demonstrates another, perhaps Perotinian, innovation. Rather than being sung only once, the Gregorian melisma is repeated (see I and II in ex.1), causing a rhythmic redistribution of its pitch content in the second statement. The purpose of this device is obviously a more expansively shaped superstructure. Tenor repetition, often involving more than two statements as well as rhythmic redistributions, soon developed into a favourite compositional procedure. Another device that began to appear is the application of two different tenor patterns to two successive statements of one plainchant melisma. Melodic facture, and the sound and syntax of text, may be responsive to these changes in tenor structure.

The major exception to the rule that the Ars Antiqua motet was a two-voice genre in the first half of the century is shown in ex.1. With the added trope-like text for the upper voices, this three-voice passage, separated from the Perotinian organum triplum *Alleluia, Pascha nostrum*, is a motet; without it, it would be a clausula. Here the duplum and triplum have parallel phrasing and can therefore deliver the single added text simultaneously, like two voices of a polyphonic conductus. Such monotextual motets (for three voices) are therefore commonly referred to as conductus motets in modern commentaries. In a good number of two-voice clausulas, composers had begun to free the duplum phrases from their dependence on the tenor; some of them overlap the tenor patterns. Extending this potential complexity of phrase structure into clausulas for more than two voices was an adventurous challenge. But the device of staggered phrases also wreaks havoc with the procedure of turning three-voice clausulas into conductus motets. Since any attempt at such a conversion would necessarily entail more or less extensive adjustments in the music, it is understandable that only very few such pieces were made into conductus motets. More usually, a triplum was added to a clausula; indeed, in the case of many a conductus motet appearing in more than one source, the various versions of the tenor and duplum agree, since they are generally based on a two-part clausula, while those of the subsequently added triplum usually vary.

Conductus motets show up the fundamental cleavage between conductus and motet. In the former, the regularly versified, strophic text governs the tenor and all superimposed voices, binding the parts together. A polyphonic conductus is a setting of poetry, in which the chief function of music is rather comparable to manuscript illumination; the upper voices decorate the tune, which jointly with them decorates the text. The Ars Antiqua motet lacks the unifying bond of one text for all voices; it is not pre-existing poetry set to music. Both textually and musically tenor and duplum are two distinct entities. From the beginning of its existence the motet aimed for individualization of its voices, and the conductus motet therefore remained a transitional phenomenon.

The three most important developments affecting the motet in the first two decades of the 13th century were the loosening of tenor rhythms, the formulation of the system of rhythmic modes and the introduction of the vernacular. The earliest tenor patterns containing breves seem like diminutions of their predecessors (ex.2). But



soon composers took to writing clausulas and motets with lively and increasingly varied tenor patterns, including the new rhythms codified in the system of rhythmic modes. While these rhythmic innovations might still be ascribed to Perotinus, the introduction of the vernacular into motet polyphony was a step he evidently did not cultivate. Just as polyphonic *musica mensurata* had for the first time furnished a reliable musical yardstick with which to measure Latin poetry, the musical setting of French poems was now also drawn into its orbit. The intrusion of French poetry into cantus firmus polyphony must have occurred very soon after the development of the modal system. The appearance of the French language and of the rhythms of the 2nd mode seem to have been corollary phenomena, for the 'iambic' mode is more commonly associated with French than with Latin texts. (Figs.3–4 show the motet of fig.2 with substitution of the vernacular text 'Ne sai que ie die' in the upper voice.)

French motets rapidly became more prominent than those with Latin poetry, and few of the French texts maintained an obvious trope-like relationship with the cantus firmus. But even a good many poems in the Latin motets either retain only a topical connection with the text of the cantus firmus, while giving up the assonances characteristic of troped organa and troped clausulas, or else depart altogether from the tenor's words and their connotations. Other motets, Latin as well as French, continued to cultivate assonance with the tenor label, but

3. D-W Helmst.1099 (Heinemann catalogue 1206) [W$_2$], f.219v: French contrafactum, 'Ne sai que ie die/Johanne', of fig.2

rather than reflecting liturgical necessity the device now betokened poetic ingenuity and delight in punning (e.g. *Maniere esgarder/Manere*). Latin motets predominantly concern the Virgin Mary. Less common topics that crop up more and more rarely deal with liturgical occasions in the Temporale or Sanctorale or with moral exhortation. Most French motet poems deal with love – courtly, urban or pastoral. A few other texts reflect the convivial life in the city (i.e. Paris); the rest are either Marian or hortatory.

The earliest motets, such as *Nostrum* (ex.1), were still closely related to the genre of troped organa and may have been used within their appropriate organa, but there is no question that, on gaining musical independence, clausula and motet (Latin as well as French) soon shed their umbilical connection with church and liturgy. Liturgical ordering of motets, still observed in the first of the two motet fascicles in *I-Fl* Plut.29.1 and in *D-Mbs* Mus.ms.4775, is given up in the second motet fascicle of *I-Fl* Plut.29.1 and is replaced by alphabetical arrangement in *D-W* Helmst.1099 (Heinemann catalogue 1206) [W_2]. Evidently, motets became mostly pieces of clerical and aristocratic chamber music, whose patterned Gregorian tenors are likely to have been performed instrumentally.

The enormous vogue for French motets for two voices – often, like many later French double motets, incorporating refrains from song literature (see below) – seems to have been in full swing by about 1230 and continued for most of the century. They bespeak the far-reaching secularization of the genre. Their tenors do not favour the traditional slow, steady patterns, but tend to approximate to the rhythmic quality of the motetus. No other type of motet shows a comparable decline in the old-fashioned tenors without breves; in fact, it seems as though for much of the century the French motet was frequently on the point of transforming itself into another genre, the polyphonic song (ex.3*a–b*).

Since a motet could be viewed as a song accompanied by a tenor (often exhibiting patterns of a liveliness commensurate with the motetus), it was only one step further to treat the motetus as an unaccompanied song. There are numerous cases of motets appearing in certain sources without tenors or with tenors notated in so corrupt and useless a manner as to indicate complete lack of comprehension and sympathy on the part of the scribe. Presumably the motetus parts in these sources were then performed freely, like trouvère songs. These developments often caused a corrosion of the integrity of the cantus firmus in the process of composition; changes in structure and pitch content in deference to the upper voice are by no means uncommon. Particularly striking are motetus parts that quote chanson refrains, including the *motets entés*, in which new text and music are added or 'grafted' between parts of one refrain (a principal source is *F-Pn* fr.845) and motets with upper voices shaped like rondeaux (principal sources are the Artesian chansonniers *F-Pn* fr.12615 and fr.844); the tenors are necessarily often

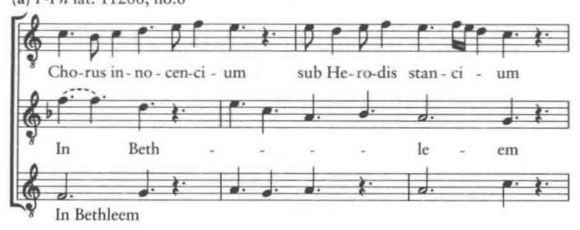
unpatterned or irregularly shaped, and in the cases of rondeau motets they are bent to fit the form of the motetus with its reiterations and recurrences of phrases.

In the second half of the 13th century the pre-eminent innovations in the Ars Antiqua motet were the attention paid to three-voice writing and to what might be described as the joining of diverse entities – whether texts or musical-textual refrains – in the upper parts. The triplum receives definition as soon as it is animated by a text of its own with independent rhyme scheme and versification. The 'double motet' that results, that is, a motet with two different texts for duplum and triplum, is a rigorously logical concept of marvellous daring. (Not until the operatic ensemble of Mozart's time did polytextuality again appear as a compositional principle.) In this textual polyphony, composers seized the opportunity for phonetic and semantic interplay between voices, an intertextual dialogue that might even draw in the tenor, and that could also involve, in the French double motet, a wide range of complex processes of refrain invention and citation including the reconciliation of pre-existing refrain melodies to a cantus firmus structure.

Although the Latin double motet was cultivated on the Continent in the second half of the century (and will be addressed below), by far the predominant type of motet numerically, and the type that occasioned a break with the tradition and repertory of the Notre Dame tradition, was the French double motet. Its main sources, all from Paris or its environs, are *F-Pn* n.a.fr.13521 ('La Clayette'), *F-MOf* H196, and *D-BAs* Lit.115. (Fig.5 shows a French double motet which derives from that of figs.3–4 by addition of a triplum with the text 'Quant vient en mai'.) French double motets here outnumber Latin double motets by a ratio of about four to one. Two distinctive yet marginal developments in Parisian sources are considerably fewer in number than either of the foregoing. One, the bilingual ('macaronic') double motet, demonstrates the occasional practice of combining a French triplum (contrafactum or original) with a Latin motetus, thereby adding another element to the individualization of the upper voices (principal sources: *F-MOf*, fasc.3, and La Clayette). Another development destined to remain largely unsuccessful was the attempt to revive four-part writing by combining three separately texted voices over a tenor. In most of these 'triple motets' the quadruplum was added to a pre-existing double motet, generally with dubious contrapuntal success and sometimes, as in the case of some double motets, without any regard for topical correlation of the poems.

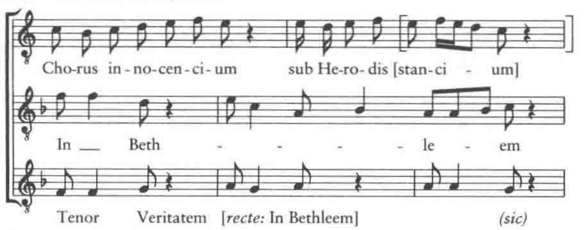
It is in the French double motet that the next phases in the evolution of the genre occurred. First and foremost, the very rhythm that had engendered the modal system proved to be its undoing, since it was the long in the 2nd mode that had a marked tendency towards subdivision. Moreover, 6th-mode tripla, some of which halved several of the breves not only melismatically but even syllabically, became quite common. The increasing subdivision of the brevis and the consequent lengthening of long and brevis caused some motets originally composed in relatively slow modes (e.g. 3rd and 5th; ex.4*a*) to be converted to faster rhythms (e.g. 6th and 2nd; ex.4*b*). But in effect the frequent association of a 2nd-mode motetus, with more than half its longs dissolved into ornaments, and a 6th-mode triplum reduced modality to little more than a

5. D-BAs Lit.115, f.44v: double motet 'Quant vient en mai/Ne sai que ie die/Johanne' (but with tenor, of which only the opening is shown, erroneously designated 'Amoris') in Aristotelian notation (left-hand column staves 5–9, and right-hand column)



residual code that hardly reflected the musical actuality (ex.5). In fact, this deceleration of long and brevis helped to condition musical hearing to such an extent as to affect the performance of organa, since both Franco of Cologne and Anonymus 4 recommended that in organal passages the tenor adjust itself to dissonances by resting or subtly detouring to a more consonant note.

The dissolution of the modal system, which was a result of the proliferation of shorter note values and of the increasing, at times nearly prose-like, prolixity of the French texts of the tripla, produced the notational reforms codified by Franco of Cologne. The notational individualization of rhythmic values further undermined modal rhythm. Mingling of rhythms appropriate to the 'inconsistent' 1st and 2nd modes, which formerly occurred only in some cases of refrain citation, now became possible. Franco's codifications preserved the ternary organization of rhythm, however; though not unknown, motets with duple rhythm (i.e. binary subdivision of the long) were still exceedingly rare.



It was at this time (the second half of the 13th century) that the Notre Dame tradition ceased to be both model and leader in music. With the advent of the new notational system, clausulas were no longer necessary and ceased to be written, except for the textless clausula hockets that appear in small numbers in motet sources (*see* HOCKET). Chants other than the traditional Gregorian melismas began to appear as motet tenors. Fewer and fewer concordances of contrafacta of Notre Dame compositions are found. The enormous international dissemination of Notre Dame motets (Spain, England, Italy, Germany) and their endless adaptations (new texts, new tripla, etc.) not only betokens their popularity in educated circles but also reveals them as a kind of ready-made proving-ground for the study and practice of motet techniques. Figs.1–5 show the development of a two-voice clausula into a two-voice Latin motet, a two-voice French motet in earlier and later notational forms, and a French double motet. Towards the end of the 13th century this communal aspect of art music gave way to a situation where individual compositions were no longer subject to remodelling; each composition was a finished product.

In the Franconian motet style – a generic stylistic term, since Franco's authorship is not established for any specific composition – the natural, more or less foursquare and dance-like swing of the modal phrases gave way to a more complicated phrase structure, whose relatively complex rhythms (in patterns of up to nine syllabic semibreves per ternary long) are defined by the underlying inescapable regularity of the neutral beats of the breves. A modal phrase in a composition of the Notre Dame tradition is generally a rhythmically homogeneous, indivisible whole, but a phrase in a Franconian motet contains a chain of any number of perfections, the number being determined by the composer. A new way of measuring time by mechanical units impinged on organic time as experienced. Significantly, the appearance of this new style coincided with the invention of the mechanical clock, which from the later 13th century gradually displaced the older clock types (operating with water or sand) and the sundial.

One of the trends that developed in late 13th-century double motets was the so-called Petronian motet style – motets by or exhibiting the characteristic compositional technique of Petrus de Cruce (sources: *F-MOf* H196 and *I-Tr* Vari 42). Here a lengthy French text for the triplum is declaimed in rapid values including as many as four to seven syllabic semibreves per brevis, while a lower and slower motetus presents its considerably shorter text in long–brevis rhythms and the tenor moves in simple modal patterns or unpatterned longs. A second type shares with the Petronian motet its cultivation of French poetry and, as is already prominently represented among the motets for two voices, its tendency towards accompanied-song texture. In contrast to the Petronian style, however, the tenor of this type is lively, at times to the point where its patterns are no longer modal but approximate to the rhythms of the upper voices. Some cantus firmi are so closely adapted to the design of the motetus as to include semibreves or hocket passages (e.g. *F-MOf* H196, no.294). Furthermore, the dissolution of the modal system enabled composers to introduce secular cantus firmi (refrain songs, dance-tunes, street cries), invariably retaining their original rhythms and shapes.

As a more or less distinct type the Latin double motet evidently branched off from the Perotinian conductus motet at about the same time as the French double motet

emerged, but its tradition is relatively separate. Of the 69 Latin motets in *I-Fl* Plut.29.1, the earliest major source to transmit such compositions, only three are double motets. It is all the more astonishing that one of these (875), in combining three voices whose differentiation extends not only to the texts but also to the music, already fully realizes the potential of the genre (ex.6). The poem of the duplum praises the deeds of dedicated clerics, while the triplum castigates 'hypocritical pseudo-bishops, the vile slayers of the church'. The tenor, which in this rhythmic guise originated in a two-part clausula, proceeds in longs and double longs, the duplum in longs and breves, and the newly added triplum almost exclusively in breves. Moreover, the voices, like those of most other medieval double motets, are differentiated in their phrase structure. Almost all the phrases of the duplum are four or six beats long, while the phrase structure of the lively triplum is more varied; its first half is ordered as follows: 2(4L) + 5L + 2(4L) + 1L + 2(2L) + 6L + 4L + 3L + 6L + 5(5L). It is possible to view this arrangement as consisting of three sections (22, 23 and 25 beats), with the phrases proceeding mainly in fours, sixes and fives respectively.

Generally, motets of this type exhibit a continuing affinity with the conductus. Their texts retain a traditional trope relationship to the cantus firmus and are therefore topically affiliated to each other. In fact, several examples betray an attitude that bypasses the clausula and recalls the troped organum, since they elaborate Gregorian melodies which usually do not belong to the specialized clausula repertory. A further frequent characteristic is perspicuity of form, often delineated by partial isomelic or, more rarely, isorhythmic correspondences and, in a number of cases, by melismatic caudas. The simpler compositions exhibit uncomplicated phrase designs, with the upper voices either declaiming their related texts homorhythmically or mutually alternating syllabic and melismatic passages. Many exhibit a fine concern for elegant phrase structure, often supported by unusual cantus firmi that were evidently selected for their conciseness or their patently repetitive design. For example, *F-MOf* H196, no.49, imaginatively articulates its overall length of 60 longs as follows: triplum 5(8L) + 4L + 2(8L), motetus 6(7L) + 2(9L), tenor 10(2 + 4L).

It is the epoch-making achievement of Perotinus and his generation to have added to the traditional numerical order of music, as embodied in the consonant intervals, the numerically founded arrangement of durational values, as embodied in rhythm and the coordination of phrases. A well-made 13th-century motet, then, is a concise tonal, temporal and poetic form, whose superstructure, erected on the staked-out notes of the cantus firmus, is designed proportionately to unfold, demonstrate and articulate the fundamental numerical theme given by the tenor. The motet is a polyphony of notes, of texts and of interrelated numbers governing rhythms and phrase structure. Such structures are not accompanied songs or duets that 'express' their texts. The role of poetry in a medieval motet is best defined by analogy with the stained-glass windows in a Gothic church. The poetic images in the upper voices relate to the music in the same way as do the historiated windows to the structure of which they are components. The music does not accompany, elucidate or intensify; rather, the poetry illuminates and coordinately reflects the structure of the music, while unfolding its own system of meaning.

In the consonant flow of its voices, regulated by good melodic design and proper counterpoint, and in the measured disposition of its elements and structural members, the 13th-century motet is an aural manifestation of numerical 'musical' proportions. Just as architecture was regarded in the Middle Ages as a visual demonstration of musical proportions, music (i.e. measured discant) was

by the end of the 13th century described (by Johannes de Grocheio) in architectural terms: 'The tenor, however, is that part upon which all others are founded, just as the parts of a house or building are erected upon its fundament. It is their yardstick and gives them quantity'.

Visual evidence of this view of the motet may be seen in the way its voice parts were written in manuscripts after the mid-13th century: triplum either on the left half of a page or on the verso of a folio; duplum on the right half of a page or on the recto facing the triplum; tenor under both voices on the bottom of the page, with the appropriate Gregorian word or words placed like a label below its initial notes. In the earliest manuscripts the voices are notated successively, often continuing from the recto of a folio to its verso. Thus, motets at first could not be performed from the book. Evidently the advances of the Franconian era account for the new arrangement, since the rhythmically unambiguous Franconian notation of music *cum littera* (chiefly the motet) made sight-reading possible. The growth of this skill, for which some evidence begins to crop up in the early 14th century, may therefore be said to be due to the development of the motet in the preceding decades.

2. England, 13th and early 14th centuries. The geographic region witnessing the most rapid evolution of polyphonic *musica mensurata* in 13th-century Europe encompassed not only northern France but also England. During this epoch, the English differentiation from French practice in regard to rhythm, melody, harmony, counterpoint, texture, notation and genre can begin to be clearly documented. There is no surviving integral *liber motetorum* from England to compare with the monumental French sources of the era (preserving most of a corpus that numbers about 500 continental works), but a large number of manuscript fragments allow a corpus of English material to be assembled. Music is extant for over 100 motets, most of which are significantly incomplete (the principal edition is PMFC, xiv). Surviving foliations and paginations (and, in *GB-Lbl* Harl.978, an index or table of contents to a now lost book that itemizes 81 motets by textual incipit and musical style) indicate that some English sources were books originally comparable in size to the largest extant continental codices.

Out of the creative ferment of early 13th-century experimentation with the textual troping of melismatic polyphony in clausula, organum and conductus, English composers pursued a different mix of possibilities from those of their French counterparts. Central to the insular motet tradition were the Latin motet, the monotextual Latin conductus motet and the Latin double motet, about half built over a plainchant tenor and half built over a *pes* (*see* Pes (i)), as described below. All were sacred; there was no intrusion by secular, vernacular lyrics as on the Continent. Concerning organum, the English did not actively cultivate written composition in sustained-note style and were not attracted to the texting of its melismatic voices. They favoured instead the polyphonic enrichment of whole chants in a note-against-note (discant) style; these works were usually notated in score. Such chant settings were then subject to textual troping of the upper voice(s), creating the amply represented genre of troped chant settings; these works, with their more individualized added voices, were notated in parts like motets. Troped chant settings are in practice often virtually indistinguishable from the Latin motet and circulated among them.

Another development can be tied to the conductus, a genre for which there is also a distinctive English tradition. Here one finds vigorous cultivation of the constructivist techniques of Rondellus and Voice-exchange, originally in melismatic conductus caudas but also with simultaneous texting of all voices (conductus-fashion), or – most strikingly – with a single text sung by the leading melodic voice, a role tossed back and forth among the parts. Texted rondellus and voice-exchange sections became a hallmark of the large-scale troped chant settings of alleluias written in parts. Further, texted compositions based on rondellus and voice-exchange exist independently, and in this fashion some later examples are written in parts like a motet rather than in score like a conductus. Blurring the generic boundaries between conductus and motet are works such as the rondellus *Fulget celestis curie* (PMFC, xiv, no.42), written in parts, which has the simultaneous declamation of two different texts, and the works *Patris superni/Pia pacis* and *Orbis pium/O bipertum* (PMFC, xiv, nos.38 and 39), written in parts, which combine melismatic caudas and sections functioning like conductus motets (two voices declaiming the same text, usually in homorhythm, over an independently texted, apparently freely composed tenor) with passages of voice-exchange and rondellus, respectively. Generic boundaries are fully crossed in the insular conversion of a motet into a conductus written in score; the process can be demonstrated in two motets with continental concordances, *Mellis stilla* and *Ave gloriosa* (PMFC, xiv, nos.App.22 and 23*a*), and in an example with a fully insular history, *Virgo decora* (PMFC, xvii, no.15*a*/*b*).

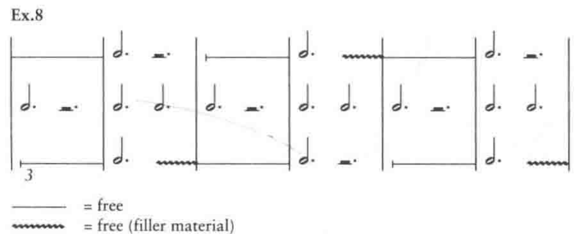
Latin motets in England do not themselves constitute a homogeneous genre in respect to compositional procedure; only about half the extant 13th-century examples are based on a cantus firmus, while the rest are based on a *pes*, a voice of tenor function – either freely composed or drawing on melodies from the popular sphere – that often employs ostinatos. (Sometimes such a *pes* was a well-known tune, such as a snatch of a popular song, a refrain or a dance phrase; see ex.7.) Shared features of

Ex.7 Pes of *GB-Ob* no.10

both types include a propensity for four-voice writing (more often adding a second supporting voice sharing tenor function than a texted quadruplum), isomelic repetition and variation in the upper voices upon repetition of tenor material, and a regularity of phrase length coupled to rhythmically patterned declamation that makes possible the creation of regularly versified texts (in some instances, supporting the composition of motets as settings of pre-existing Latin poems). A significant number of both types are bipartite, and several exploit the principle of sectional acceleration. For instance, the fragmentary *pes* motet with duplum *O regina glorie* (*GB-Ob* 20, no.36), an astonishingly sophisticated specimen probably dating from the late 13th century, consists of two sections, whose respective phrase ingredients relate as 4:3. The tenor's irregular rhythms in the second section (color II) prove that the proportionality of the composition is governed by the upper voices. One striking fragment of a cantus firmus motet of similar age, *Spirans odor/Kyrie* (*GB-Lwa* 33327, no.1), is tripartite with sectional lengths in the ratio 17:9:6.

The English tenor motet repertory has some continental concordances and, in turn, it also circulated to at least a limited degree abroad, while being further tied to the tradition of the continental Latin double motet of the second half of the century by sacred subject matter, and shared texts and tenors. That continental motet techniques did not rise to a more dominant position in England seems due in some measure to the English partiality to tonally unified compositions. In France the matter of tonal unity was relatively unimportant, as is attested by the practice of writing clausulas and motets; many of the chant melismas on which they are based are not tonal units. Even many of the freely composed continental pieces of the 13th and 14th centuries lack an unequivocal tonal centre. Moreover, the English motet explores homogeneity of textural and rhythmic activity, paralleled by an equivalence of texts conjoined in length, versification and subject matter, while the continental motet characteristically forges unity out of antinomic components. And although there are a few examples of French double motets imported into England, their texts rewritten in Anglo-Norman, English composers and audiences seem to have been generally indifferent or hostile to secular subjects and the use of the vernacular.

Pes motets are of two basic kinds. In some the *pes* consists of a chain of melodic elements repeated in pairs (usually three to six), whose double-versicle structure supports voice-exchange; these are the freely composed voice-exchange motets mentioned above whose genesis is ultimately traceable to the conductus. The exchange structure allows for a variety of textings: in two upper parts a single text may be sung alternately, two texts may unfold alternately, or two texts may be sung simultaneously. In the other kind of *pes* motet, the *pes* consists of only one melodic element, stated more than twice and thus producing a melodic ostinato or ground (there are instances of nine, 11 or even 13 statements), over which from one to three upper voices unfold without systematic voice-exchange. The *pes* itself may consist of one or two lower voices. In one extraordinary instance, *Campanis cum cymbalis/Honoremus dominam* (PMFC, xiv, no.59), a two-voice *pes* repetitively imitates the tolling of bells. Many ostinato *pes* motets exhibit sophisticated phrase structures of admirable elegance, for example *Te domine laudat/Te dominum clamat* (PMFC, xiv, no.47; for facsimile *see* WORCESTER POLYPHONY), whose *pes* consists of five statements, the last incomplete: triplum [2(8L) + 2(10 + 8L) + 8L] + [10L + 2(8 + 10L) + 14L] + 10L + 8L, duplum [(2 + 8L) + 2(10 + 8L) + 14L] + [2(8L) + 2(10 + 8L) + 8L] + 8L + 10L, *pes* 4[(6L)] + 3(6L). Each upper voice therefore consists of 16 phrases (one double phrase (14L) and 14 single phrases, where the ten-beat phrases are actually eight-beat phrases extended by short melismas), which accommodate the 16 lines (eight couplets) of their respective poems. Generic boundaries between *pes* motet andROTA are blurred by the well-known Summer Canon (*see*SUMMER IS ICUMEN IN), in which a round canon at the unison unfolds, motet-like, over a two-voice *pes*.



From the first few decades after 1300 a later corpus of English motets can be identified that is roughly contemporaneous with continental motets of the very late Ars Antiqua and early Ars Nova. (Again there are about 100 pieces extant, mainly Latin double motets and mostly fragmentary; the principal edition is PMFC, xv.) This repertory is defined by the contents of some major sources (*see* SOURCES, MS, §VI); by turning from 13th-century English mensural notations to Franconian, Petronian and new insular notational practices; by a general increase in length; by the expansion of the typical contrapuntal two-voice framework beyond one octave (with corresponding increases in overall range and the frequency of four-voice writing, and changes in the grammar of harmony); by the increasing use of secular songs in French and English as cantus firmi for tenor motets; and by new formal possibilities. These motets extend the developments of their insular antecedents into a much richer variety of formal archetypes than is found on the Continent. The profusion of approaches to design can be ordered into two not entirely exclusive categories: isomelic motets and periodic motets.

In isomelic motets, musical repetitions in the tenor engender musical repetition in the upper voices; the category includes such types as motets with strict and varied voice-exchange, motets with strophic repetition and variation, and motets with polyphonic refrains. Isomelic motets are markedly sectional, with clearly articulated boundaries and prominent strophic features. Such motets exploit the principle of sectional variation in so consistent a manner as to suggest the designation 'variation motets'. They are successors to the ostinato and double-versicle *pes* motets, but while some pieces continue to be freely composed, a major innovation is the adaptation of cantus firmi (both plainchant and secular melodies) to support their designs. In some cases the cantus firmus is readily adaptable, while in others it is rather abstractly divided and alternated with free counterpoint in order to fulfil a structural goal; in the latter case voice-exchange gives the impression of a traditional device that has become extrinsic. A further result of the association of voice-exchange in the upper voices with a cantus firmus is that the quality of regular harmonic alternation, especially of a varied harmonic ostinato (*pes* harmony), so characteristic of the 13th-century compositions, is absent from many of these later works. Most isomelic motets set regularly versified (frequently strophic) Latin poetry, either a single text or two that are equivalent in length and versification.

Illustrative of one well-defined isomelic type are the surviving materials for the five-section voice-exchange motet with coda and related works: six are extant (three cantus firmus and three free), to which may be added two works that are closely related but in four and six sections; one motet exhibiting varied rather than strict voice-exchange whose five sections are enclosed by a prelude and coda, and articulated by hocket interludes; and one refrain motet in which a varied ostinato *pes* supports five melodic periods, each closed by a repeated strain. The largest five-section exchange motet, *Rota versatilis*, is a fragment complete in length (it has no coda) but lacking full counterpoint (see Bent, 1981). In this extraordinarily expansive and complex motet, the sections are carefully constructed as a particular embodiment of the fundamental numerical proportions 12:8:4:9:6. Notational and general palaeographic evidence indicates that the work cannot have been composed any later than the second decade of the 14th century; a 15th-century index lists a now lost treatise on its composition, *Modus componendi rotam versatilem*.

Periodic motets are all cantus firmus motets. In them there is a through-composed, indivisible structure between voices of interlocking phrases whose periods (i.e. lengths) are rationally controlled. These motets may be designated as mixed when overlapping phrases differ in their recurring length and isoperiodic when the periods of voices are the same; motets of mixed periodicity are generally older and shorter than those which are isoperiodic. As a rule, recurrent patterns of declamation, coupled to regular phrase lengths, support regularly versified poetry – two Latin texts parallel in length, versification and subject. Two principal types of isoperiodic motet emerge, one with declamation on long and brevis, the other with declamation on brevis and semibrevis. A paradigmatic example of the former is *Petrum cephas-/Petrus Pastor/Petre amas me* (PMFC, xv, no.18), in which three of the four voices are arranged as follows: triplum 12(9L), duplum 7L + 10(9L) + 11L, tenor 10L + 10(9L) + 8L. (The *quartus cantus* is free.) Those with faster declamation are mainly of a type that can be described as 'duet motet with *medius cantus*'. These are all three-voice works in which the chant is a middle voice by range around which the two outer parts form a duet; whenever the tenor rests, the duetting voices engage in an isorhythmically patterned rapid parlando, often in parallel 6ths. One such motet is *Zelo tui langueo/Reor nescia* (PMFC, xv, no.14; see also Page, 1997). Its tenor has phrases of three longs and one long rest, while the surrounding two voices are made up of eight-long phrases offset from each other by four longs, arranged so as to produce a regular catenary arrangement of rests. Each phrase consists of two parts with the consequent linked to its antecedent by filler material after a rhythmic caesura (ex.8). The diagram in ex.8 clearly shows that isorhythm

Ex.8

began as a clarification of the cadential points of phrase structures.

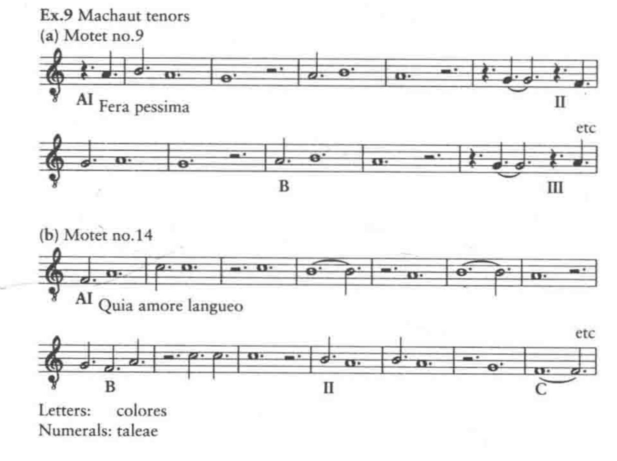
3. France, Ars Nova. The reduction of the several motet types flourishing in France at the turn of the 13th century to one definitive type capable of accommodating endless variety is the new 'maniere des motets' (*Les règles de la seconde rhétorique*) invented by Philippe de Vitry. Immediate precedents are to be found not so much in the French double motet of Petrus de Cruce as in the Latin double motet, especially those more progressive of the newer motets in the 1316 edition of the *Roman de Fauvel* by Chaillou de Pesstain that have been attributed to a still anonymous 'Master of the Royal Motets' (Leech-Wilkinson, 1994). These tend to have fairly equal upper voices, broadly patterned tenors and regularly versified texts, but in the details of construction they are not rigorously schematic. Vitry's most profound innovation is the creation of motets strictly realizing a numerical scheme, an elaborate isoperiodic design in which the modular number coordinating the phrase structure is itself often regularly subdivided. Rooted in the pitches of the cantus firmus, the musical fabric of motetus and triplum is pre-eminently concerned with the harmonious unfolding of numerical gestalts. The melodic design of the upper voices clearly shows that each phrase is a separate component which requires no linking to its predecessors by such means as motivic relationships, sequences or contrast.

The essential features of the Ars Nova motet are already present in Vitry's *Garrit gallus/In nova fert/Neuma* (1314). Here two independent upper voices very nearly equal in range and rhythmic activity move above a much slower, rigidly patterned tenor. The periodic module governing structure is 25 (counted in binary breves), subdivided in the tenor as (12 + 13B) and in both upper voices as (17 + 8B), with a total length for the motet of 6(25B) = 150B; given its single module, this design can be called unipartite. Coordinated with the six statements of the tenor's notational and rhythmic pattern (talea) are two statements of a melodic cantus firmus (color).

Within the same decade, in a motet like *Tuba sacre Fidei/In arboris/Virgo sum*, Vitry was exploring bipartite structures consisting of two conjoined periodic schemes, the second diminished with respect to the first; here a total length of 120B = 5(24B) = 10(12B) is articulated as an introitus of 12B followed by (72 + 36B) = 3(24B) + 3(12B), with one color statement for the undiminished taleae and one for the halved values. In neither of these motets are upper voice rhythms strictly repeated over each tenor talea, although in *Tuba sacre* isorhythmic hocketing marks the end of each talea (*see* Isorhythm).

The primacy of the poetic impulse (but not of the poetic composition) is a feature the motet shares with the accompanied song. Since the composition is not the product of free melodic invention, however, a motet sounds stiffer and more formal than a chanson, not only because of its massive fundament now consisting often of tenor and contratenor (a voice of similar range and facture), but because the melodic design of the upper voices is more restricted; even rhythmically it is more conservative. The triplum poems are always longer than those of the motetus and therefore, in contrast to most motetus poems, are strophic in structure. Since the rhythmic character of both voices, which have lost all modal constraints, is often nearly the same, the declamation, whose concern with prosody is anything but vital, is rapid in the triplum, but slower, and, in contrast to the 13th-century tradition, fairly melismatic in the motetus, though short melismas occur in most tripla. Although a number of motets composed in the first half of the 14th century still reveal the composer's rather cavalier attitude towards fitting the poetry to the music, others show great care in the structural coordination of music and poetry. The most intricate motets continue to incorporate a sophisticated counterpoint of textual sound and sense, in some cases extending the dialogue between triplum and motetus into a dialogue between different motets.

Latin predominates as the language of the Ars Nova motet, whose subject matter may not only be sacred but also ceremonial, laudatory, political or polemical; the fewer French-texted works continue to play with the themes of courtly love. Selection of a tenor is no longer the first consideration of the composer; rather, this choice is governed by the need for its text to correspond like a motto to the poetic conceit of the upper voices. This procedure was first reported by Egidius de Murino



(*CoussemakerS*, iii, 124*a*). The practice, which originated in the later 13th century, might be called reverse textual troping, since the relevance of the texts is motivated not liturgically but poetically. The presence of a cantus firmus, which has always caused the motet tenor to be regarded as the 'dignior pars' (Anonymus 7), in no case automatically implies a liturgical function. The original trope-like nature of the motet was a fleeting phenomenon, whose inevitability was eliminated when clausula and motet were recognized as entities divorced from the chant that furnished the tenor notes. Undoubtedly a remark by Guillaume Durand (*d* 1334) that properly 'the impious and irregular music of motets and similar compositions should not be performed in church' indicates not his desire for the elimination of the motet as a species but for its relegation to its appropriate sphere. Certainly motets with suitable texts must have been performed in church, but the primary raison d'être of the motet was surely more than ever to function as the most sublime product of *ars musica*, which addressed itself to the 'learned and those who prize artistic subtlety' (Grocheio). Though originating as clerical chamber music, it was produced in the 14th century by and for 'accomplished musicians and lay connoisseurs' (Jacobus of Liège). Its prestige, at least since the mid-13th century, is attested by the many 13th-century musical manuscripts devoted more or less exclusively to it; 14th-century musical sources, most of which mix the genres, as a rule place the motets at the beginning.

The apprehension of 14th-century continental motets may at first seem a forbidding task, since they are of much broader dimensions than those of the Ars Antiqua. But far from being arcane intellectual constructs that resist aural perception, 14th-century Ars Nova motets are strophic variations, and the listener's sense of recurrence, though differently activated, is hardly less keen than in such early 17th-century strophic variations as the prologue or Orpheus's Act 3 aria in Monteverdi's *Orfeo*. Perception of the proportioned relationships within a motet is not essentially more problematic than perception of the proportioned relationships of the structural members in Gothic architecture. Isorhythmic passages are recurring rhythmic ornaments that emphasize structure. Polytextuality may impede the immediate grasp of both lyrics simultaneously, but, as in a Mozartian opera ensemble, the strands may be followed separately, and texts were available in the score or independently copied apart from the notes for more leisurely reading and study.

Although Gace de La Buigne wrote (*Roman des deduis*, *c*1370): 'Phelippe de Vitry ot nom, Qui mieulx fist motets que nulz hom', the surviving number of motets that can be unquestionably attributed to Vitry is small. Nonetheless, a densely interconnected network of relationships and cross-references between motets in matters of compositional detail (e.g. modular numbers, total length, rhythmic patterning of the talea, choice of color, number of notes in color, number of statements of color, text subject matter and vocabulary, verse schemes, rhymes, numbers of lines, syllable counts, etc.) demonstrates his personal influence to have been profound and, moreover, that the Ars Nova motet was likely to have been cultivated at first by a relatively small circle of composers who knew each other's work and wrote for the same patrons. Machaut himself was evidently a pupil of Vitry, or at least a student of the older composer's motets, although only a minority of his compositions in this genre intersect with the Vitrian school. Indeed, although his is the largest number of surviving Ars Nova motets by a single composer, only a handful circulated outside the monumental codices devoted to his works whose copying he oversaw. The major features distinguishing Machaut's motets from Vitry's are his preference for French texts (except in his late motets); his use of secular tenors in three compositions; the strophic isorhythmic structure (*see* ISORHYTHM) in all the others and the relatively larger number of his motets in which color and talea overlap (ex.9; both devices were still rarely employed by Vitry); and his preference for structures based on fewer but longer tenor taleae.

Looking back from a vantage point late in the 14th century, the anonymous author of the *Tractatus figurarum* (ed. P. Schreuer, Lincoln, NE, 1989, pp.66–9) speaks of a first stage in the composition of the Ars Nova motet that was followed by a second stage, an 'ars magis subtiliter ordinata', in which the masters of the early motet themselves went on to explore a more refined approach, which he associates with the motet *Apta caro/Flos virginum/Alma redemptoris* (PMFC, v, no.4). In this second stage, to which can be assigned some later Vitry and Machaut motets as well as numerous others, and whose inception may be roughly dated to the 1330s and 40s, we particularly find longer taleae and smaller rhythmic values in the tenor, coupled with an increase in isorhythmic recurrences in duplum and triplum (Leech-Wilkinson, 1982–83; Kügle, 1997). Panisorhythm (fully isorhythmic upper parts), a schematic procedure not practised by Vitry and still rare in Machaut's motets and those contained in the Ivrea manuscript (*I-IVc* 115), increased in importance around the middle of the century. The development towards panisorhythm goes hand in hand with a tendency to forgo the traditional structure of the upper voices that divides the talea into proportioned component phrases. Increasingly, motets appear in which one or both of the upper voices are not subdivided at all (e.g. Machaut's *Christe qui lux es/Veni Creator/Tribulatio proxima est* and several Ivrea motets). Such motets are panisorhythmic or nearly so.

The formal changes experienced by the motet in the second half of the century, yet a third stage in the evolution of this singular type, resulted from the monumentalism that began to affect it. In the panisorhythmic motets of the late 14th century periodicity of phrase was no longer a formal component; the level of articulation passed from the component phrases of the taleae to the monolithic

taleae themselves. Usually both the structure of the poetry and its declamation are closely moulded to the strophic design of the music. Isorhythm in the upper voices no longer functions as carefully spaced, ornamental emphasis of the articulation of phrase structure but becomes of central importance, and with the elimination of the structural subdivisions of the taleae the elements of form become vast.

Numerical significance was restored to the motet on a larger plane than before through the extended use of diminution, a device that had been optional (in the bipartite motet) since Vitry's day. Both proportional diminution and other changes of mensuration were applied to motet tenors (and contratenors) of the late 14th century for the sake of numerically proportioned sectional design. One of the earliest specimens of the 'mensuration motet' is the quadripartite *Ida capillorum/ Portio nature/Ante tronum* (PMFC, v, no.5), whose concordance in the Ivrea manuscript makes it the most progressive motet in that source; it may have been composed in the late 1360s. Its eight taleae are divided into four pairs, each of which apportions a different mensuration to the two lower voices. Necessarily, the isorhythmic shaping of the upper voices applies only to the two halves of each pair, so the piece actually constitutes a double strophic variation form; the upper voices form strophic subdivisions of the strophic sections established by the lower voices. The lengths of these four sections yield the proportion 6:4:3:2. Each section is based on one color of the tenor (and contratenor); the overlapping of color and talea structure that occurs in about a quarter of Machaut's motets is given up for the sake of clearer definition of the expanding form. In most compositions of this type the structure of the poetry, with its growing tendency towards arcane references and recondite imagery, is carefully integrated with the musical design.

Many large-scale mensuration motets of increasing complexity can be found in the English and French sources of the late 14th and early 15th centuries. Its ultimate degree was achieved by French composers of the early 15th century (e.g. Billart, Brassart, Grenon). For instance, the rhythm of the four tenor sections of Grenon's *Ave virtus/Prophetarum fulti suffragio/Infelix* is governed successively by *modus maior*, *modus minor*, *tempus* and *prolatio* (*see* NOTATION, §III, 3). The arrangement of the subordinate 'prolations' yields for the length of the four colores the proportion 8:6:2:1. But since each of the last two sections contains two colores (and two taleae), the four sections together represent the Pythagorean proportions 4:3:2:1.

Since in all such motets the main emphasis is no longer on strophic isorhythm but on a variety of sectional mensuration, a logical conclusion of this development is the appearance of mensuration motets without isorhythm. Three compositions by Du Fay are outstanding representatives of this final structural type of the medieval motet, which is related to the Burgundian cantus firmus mass. The sections of his 'isorhythmic' motets *Rite maiorem*, *Ecclesie militantis* and *Balsamus et munda cera* (CMM, i, nos.11, 12 and 13) present the following proportions respectively: 6:4:2:3, 12:4:2:3, 6:3:4:2:6:3; isorhythmic repetition no longer subdivides the sections.

As in the early 20th-century symphony, the huge proportions to which the isorhythmic motet by English, Burgundian and Franco-Flemish composers of the early 15th century had grown indicated its imminent demise; in the later 14th century, music manuscripts were generally giving increasing prominence to polyphonic chansons. Both in size and in sound the motet tended to become unwieldy. Its enormous structural members were based on large areas of unvarying sonority established by the long durational values of the tenor (and contratenor). The motets of the Chantilly repertory particularly are bedecked with richly ornamental upper parts of manneristic rhythmic intricacy.

Moreover, the French motet assimilated two features that had been essentially foreign to it since its birth – isomelism and imitation. The latter had been known to motet composers of the Ars Antiqua, who often correlated identical text phrases occurring successively in the two upper voices by associating them with the same pitches (e.g. *F-MOf* H196, nos.95, 308). But this is not so much a matter of imitation as of musico-textual identity, reflecting the same melos principle that made a triplum into a distinct entity, once it had been separated from the duplum by its own text. True imitation was so uncommon as to be negligible. In the 14th century, too, imitation in the upper voices is of no significance. Generally it occurs only in the introitus with which Vitry and other composers prefaced some of their motets; in such introductions the tenor rests or is freely composed. The main reason for the absence of imitation from the body of the motet is surely less the contrapuntal difficulties presented by the cantus prius factus than the fact that devices of melodic integration are essentially foreign to structures based, ever since the appearance of the clausula, on the disposition of temporal units (rhythm and phrases).

These circumstances also explain the relative rarity of isomelism in the motets of Vitry's and Machaut's time. Since there were certainly more contrapuntal opportunities for strophic isomelic correspondences than 14th-century motet composers cared to exploit, isomelism, like imitation, must be recognized as essentially extrinsic to the medieval motet.

The increasing importance of both devices around 1400 is symptomatic of a profound shift from the shaping of a composition by means of numerical coordination of heterogeneous, hierarchically ordered durational components, in which melodic considerations are of no structural importance, to the creation of a musically and textually homogeneous contrapuntal fabric from one congenial set of melodic cells. The many significant changes in style and technique occurring in motets composed at this time have been demonstrated as pre-eminently due to Italian influences, absorbed and transformed by such northern composers resident in Italy as Du Fay.

4. THE LATER ENGLISH MOTET. The second century of the cultivation of the motet in England spans the epoch from the influx of Ars Nova into England in the 1320s and 30s to the generation of Dunstaple, Forest and Benet. Not from any lack of interest, but rather owing to the vagaries of manuscript preservation, fewer than half as many English motets survive from this second 100 years as from the first, some of the later pieces only in continental sources. About 70 are extant, half from before and half from after about 1400; many are highly fragmentary. Ars Nova notation only gradually supplanted indigenous varieties, and some English notational idiosyncrasies are still apparent in sources with concordances to the Old Hall Manuscript (*GB-Lbl* Add.57950). French notation

was adopted for some insular motet types, such as the voice-exchange motet in five sections with coda *Cuius de manibus* (PMFC, xvi, no.103) and the motet exhibiting strophic repetition with variation *Deus creator/Rex genitor/Doucement* (PMFC, xv, no.23), but apparently not for types such as the duet motet or refrain motet. Other motets and mass movements preserve unique examples of the fertile hybridization of English and continental designs (see Lefferts, B1986).

The Ars Nova motet itself, which eventually comes to predominate, is represented in insular sources by imported examples, some with contrafacted Latin sacred texts, and by local products – not only sacred motets but also settings of the Credo and Gloria – following the same progression in design. That English composers became active participants in the culture of an 'Anglo-French' Ars Nova motet is attested by their cultivation of the 'musician motet', and by the subtle and advanced designs of such motets as *Sub Arturo plebs/Fons citharizancium/In omnem terram* (PMFC, v, no.31) by Johannes Alanus, written no later than 1373, and *O amicus/Precursoris* by one Johannes, perhaps the same composer, which is its neighbour in an insular source (Bent and Howlett, 1990). The tripartite *Sub Arturo* provides another striking example of the mensuration motet; its motetus states that the tenor 'is repeated twice, each time reduced by the hemiola proportion' (i.e. 9:6:4). An English propensity for syllabic declamation on semibrevis and minima is one of a number of stylistic fingerprints that may help to identify further candidates for English authorship among motets of the later 14th century with continental – or continental and English – concordances. *Degentis vita/Cum vix/Vera pudicitia* (PMFC, v, no.23) is one such candidate. In the first half of the 15th century, particularly in a body of a dozen motets by Dunstaple, the motet stabilizes into a classic tripartite structure of three colores, each of two or three taleae, reducing in the proportions 3:2:1 or 6:4:3, and with regular isorhythm in the upper voices. Although its role may now be more occasional, even ceremonial, the English motet retains its sacred character through texts on Mary and the saints.

5. ITALY. Before the mid-14th century, motet production in medieval Italy had been negligible; the extant pieces number fewer than half a dozen and demonstrate no consistency of approach. In the later 14th and early 15th centuries, however, a single distinctive motet type is cultivated (principally in the Veneto, judging by subjects and manuscript sources) that follows a strongly normative pattern (see Bent, 1984). The repertory, of some two dozen works, is about the same size as that of the caccia, and its compositional techniques are rooted in those of caccia and madrigal. Texts are in Latin and the subject matter is ceremonial; often the name of the dedicatee (or the composer) is embedded in the text, sometimes overtly and other times in an acrostic. The Venetian-Paduan orbit of the genre is indicated by motets honouring a succession of Venetian doges over the greater part of a century, mainly on the occasion of their election, and by motets celebrating the city of Padua, St Anthony of Padua, and three successive early 15th-century bishops of Padua. The composer best represented in this corpus is Ciconia, with eight securely attributed works; other contributors include earlier figures such as Marchetto da Padova, Jacopo da Bologna, Franciscus (possibly Landini) and perhaps Gratiosus de Padua, along with contemporaries of Ciconia including Matteo da Perugia, and later figures, including both Italians and northerners adopting the style (e.g. Antonius de Civitate Austrie, Antonius Romanus, Christopherus de Monte, Hymbert de Salinis, Hugo de Lantins), who contributed to an evolving tradition that culminated in the epochal motets of Du Fay.

The Italian motet is characteristically for three voices, although there may be an inessential contratenor, often apparently a later addition. Two upper voices equal in range and rhythmic-melodic activity sing either the same text or two different texts that are themselves equal in length, versification and subject matter. These duetting voices are further assimilated to each other by melodic cross-references including melismatic and texted hockets, echo imitation and sequence, and rapid passages of homodeclamation. The tenor is a freely composed accompaniment with bass-like support quality rather than being drawn from Gregorian cantus firmi; its typical motion is in breves and semibreves, with occasional more active interludes. There is marked tonal stability, and tonal unification is common, especially on F and D tonalities; the prevailing form of the final cadence is a move from 10/6 to 12/8 sonorities as the tenor descends by step. The melodic style has a flexibility relating these works to the other sphere of polyphony (song) that was not structurally governed by the tenor. Clear sectional articulation is produced by various means, such as the contrast of single- and double-texted passages, structurally placed melismas (especially before the final cadence), simultaneous long-held notes in the upper voices, and strongly marked internal caesuras where the cadential arrest of motion is preceded by climactic acceleration. A significant proportion of these motets are bipartite, with mechanical duplication of the rhythms of the first half in the second half without melodic repetition in the tenor or French-style rhythmic diminution.

All these progressive features can be found in a number of Du Fay's 14 isorhythmic and mensuration motets. In these works, composed 100 years after Vitry and some 200 years after Perotinus, Du Fay achieved a last magnificent synthesis of the traditions of numerically constructed cantus firmus polyphony with the new forces that hastened its decline. Like the motets by Dunstaple and his English contemporaries, composed as elaborations of the liturgy and legitimized by pertinent cantus firmi, most motets by continental composers of the early 15th century are sacred *pièces de circonstance*, hallowed by relevant liturgical fundaments that the Middle Ages knew as divinely inspired, sacrosanct and eternally valid.

II. Renaissance

1. DU FAY AND HIS CONTEMPORARIES. The first half of the 15th century was a period of transition and transformation in the history of the motet due partly to the wide travels of composers and exchange of music brought about by the frequent convening of church councils, at Pisa (1409), Konstanz (1414–18), Basle (1431–49) and Ferrara-Florence (1438–9). The Council of Konstanz in particular drew bishops and their musicians from as far away as England, and helped to introduce English music to the Continent. By the 1420s isorhythmic and mensural structures – cultivated during the 14th century to the

Ex.10 Power: *Ave regina celorum*

virtual exclusion of all others – had reached a degree of complexity that was to be less and less in harmony with developing stylistic tendencies. However, because isorhythm had come to be linked with compositions written to celebrate festal and ceremonial occasions, the strength of that tradition maintained its use in the motet until the mid-15th century. This is demonstrated by late examples such as Du Fay's *Nuper rosarum*, intended for the dedication in 1436 of Florence Cathedral, crowned by Brunelleschi's newly completed dome, or Brassart's *O rex Fridrice/In tuo adventu*, written in 1440 for the accession of his imperial patron King Frederick III. Only after the principles of isorhythmic composition began to be freely adapted for cyclic settings of the mass Ordinary shortly before the middle of the century was their rigorous application to the motet relinquished completely.

In contrast to the strict mensural procedures performed on the cantus firmus in isorhythmic motets from France, a rather freer style of motet – referred to as equal discantus – arose in Italy in the 14th century and was taken up by Ciconia when he moved from Liège to Padua in the first decade of the 15th century. Here the upper two voices bear equal melodic weight, often entering in close imitation or singing in dialogue with short motifs. The tenor departs from French procedures in two ways: it moves in faster rhythms and it is usually newly composed rather than based on chant. Given the absence of a borrowed cantus firmus, this type of motet is not only shaped by frequent internal cadences but also framed by an opening duet, often canonic, for the upper voices and a full closing section characterized by faster rhythms in conjunction with melodic and rhythmic imitation or sequence. Further, this type of motet is often divided into two halves, with the rhythms for all the voices in the first half (talea 1) repeated exactly in the second (talea 2). Ciconia's *Ut te per omnes* follows such a plan, and the young Du Fay adopted the style in 1420 for *Vasilissa ergo gaude*, a wedding motet for his Italian patrons, the Malatesta of Rimini. Du Fay, however, used a pre-existing chant for his tenor, but without subjecting it to the proportional treatment of the isorhythmic motet. Other Franco-Flemish composers who worked in northern Italy adopted the equal-discantus style, including Arnold de Lantins (*Tota pulchra es*), Brassart (*Summus secretarius*) and Johannes de Lymburgia (*Surge, propera amica mea*).

With the abandonment of strict isorhythm, a shift in the primary function of the motet occurred. In the first half of the 15th century composers had already begun to return to the liturgical and devotional contexts in which the genre had originated, thus diminishing the relative significance of its role as a festal piece or a vehicle for social comment. The impetus for this development may have come from England; to judge from isorhythmic English works like Dunstaple's *Veni Sancte Spiritus*, in the standard four-voice scoring, the original liturgical associations of the motet seem never to have been forgotten there. However, favoured texts were no longer linked topically to a cantus firmus drawn from a responsorial chant such as the gradual of the Mass, but were rather related primarily to the cult of the Virgin. They were both liturgical and devotional, in prose and in verse, and none was more frequently set than the Marian antiphons, especially *Salve regina*, *Alma Redemptoris mater* and *Ave regina celorum*. In England these were generally composed with the traditional plainchant as an inner or – more rarely – an upper or migrating voice, usually in a discant style consonant almost throughout and not far removed from the improvised counterpoint of faburden that was to have such an impact on developments on the Continent. The motets of Leonel Power and his immediate English contemporaries include a substantial number of this type. Power's three-voice *Ave regina celorum* features the Sarum version of the chant in the middle voice (marked by asterisks in ex.10), with consonant parts added above and below. The Old Hall Manuscript presents the motet in score format, with the voices laid out one above the other, and text is supplied only under the lowest voice; the homophonic style, however, clearly indicates that all three parts should sing the text together.

English composers such as Power and Dunstaple also produced a substantial number of settings of Marian antiphons in 'chanson format'; here the cantus and tenor form a self-sufficient duet of consonant intervals with no vertical 4ths, supplemented by a contratenor that fills in the mostly triadic harmony. Most English compositions

of this type make no use of chant, rather all three voices are newly composed as in a secular chanson. In motets that do employ a liturgical text, the plainchant to which it was sung was frequently retained in the polyphony. It was most often placed at the top of the contrapuntal structure as the text-bearing line, with its contour reshaped and ornamented in accordance with the melodic ideal of the chanson, but still recognizable to the informed listener, as in Power's *Salve regina* (i). Here Power combined two Marian antiphons by placing the ornamented chant for *Alma Redemptoris* in the top voice, while supplying the text for *Salve regina*.

Texture and mensuration play an important role in shaping works in chanson format. The free unfolding of melodic prose in the trio of voices often gives way to duets that articulate the musical flow, and larger sections are highlighted by shifts from triple to duple mensuration. Later in the century, variety of texture and sections in contrasting mensurations became essential structuring devices in motets by Josquin and his contemporaries.

Composers on the Continent experimented with a variety of established structural principles and contrapuntal techniques. The diversity of the solutions tried in the first half of the 15th century is well illustrated by a substantial repertory of motets included in the major sources of the period. English and Franco-Flemish composers are best represented, but almost all the English and French sources have been lost, and the manuscripts are primarily from northern Italy and the Tyrol (*I-Bc* Q15; *Bu* 2216; *AO* A1 D19; *GB-Ob* Can.misc.213; the earlier layers of the Trent manuscripts). Simple homophonic compositions, of which Binchois's *Beata nobis gaudia* is fairly typical, clearly show the influence of improvised discant and the consonant sonorities associated with it. Even when no liturgical melody is present, nor direct evidence of borrowed contrapuntal techniques such as fauxbourdon, compositions of this kind may still have been modelled on the English pieces with which they are frequently found in the sources. They are very similar in conception to Dunstaple's *Quam pulcra es* and a number of Power's early works with no known cantus firmus.

The treble-dominated style of soloistic secular song was also adopted for Latin words. Binchois's motet for the Holy Cross *Domitor Hectoris* is a relatively early work of a non-liturgical nature written essentially in that manner. This solution was in keeping with contemporary French style, and it led to the establishment of the devotional song motet for three voices as a distinct type. Indeed several of Binchois's French chansons were fitted with sacred Latin texts (*Dueil angoisseus* became *Rerum conditor*, for example), and these contrafacta can be found alongside his authentic motets in the sources. Such works were typically based on non-liturgical texts although some drew on the liturgy as well. Most are addressed to the Virgin, and among these works are many texts from the Old Testament *Song of Solomon*, including Dunstaple's widely distributed *Quam pulcra es*, Johannes de Lymburgia's *Descendi in ortum meum*, and Arnold de Lantins' *Tota pulchra es*; a few texts honour popular saints instead. As befits their modest sonorities, the scope of these song motets was usually restricted, conceivably because of the quasi-private use for which they were intended. Inevitably, the treble-dominated style came to be tempered considerably in the 16th century by an equal-voice conception and the increasing prevalence of systematic imitation, but a three-voice texture and a modest, songlike setting continued for several generations to be used for well-loved Marian and hagiographic texts. Evidence of a lasting affection for motets of this type is provided by 16th-century collections devoted wholly to works for three voices such as *Trium vocum cantiones centum* (Nuremberg, 1541), *Motetta trium vocum ab pluribus authoribus composita* (Venice, 1543), *Elettione de motetti a tre voci libro primo* (Venice, 1549) and *Libro secondo de li motetti a tre voci* (Venice, 1549).

To the various stylistic possibilities available to composers in the 1420s and 30s – simple homophony in English discant style, chanson format, equal discantus and full isorhythm – one other possibility was forged by Du Fay in his motet *Flos florum*. The cantus part, above a slower-moving tenor and contratenor, frequently breaks into melismatic flourishes in *semiminime* (semiquavers in the edition in CMM, i/1) in a florid style apparently derived from an Italian tradition of highly ornamented cantus parts in discant mass settings. Other Franco-Flemish composers active in northern Italy emulated the florid style of *Flos florum*; examples are Feragut's *Francorum nobilitati* and Brassart's *O flos fragrans*.

Du Fay adopted for three-part song motets a treble-dominated texture derived from the chanson, even before he had abandoned isorhythmic structures. Sometimes he introduced passages of chordal homophony suggestive of improvised discant. He turned consistently to the style of solo song, with little modification, for his settings of the antiphons for the *Magnificat* and for two presumably early versions of the processional antiphons for Compline: *Ave regina celorum* and *Alma Redemptoris mater*. In each the chant provides the melodic substance of the cantus part, as in *Ave regina celorum* (ii) (ex.11), where it is transposed up a 5th from its normal position on *c′*. A few of Du Fay's polyphonic antiphons recall English discant style, as in his *Ave regina celorum* (i), which is homophonic, syllabic and fully texted but shows no trace of a borrowed plainchant.

The variety of styles for the early 15th-century motet is fully displayed in a manuscript copied in Ferrara in the late 1440s (*I-MOe* α.x.1.11). Here Du Fay's isorhythmic motets are found alongside works in florid style, as well as equal-discantus and song motets. English composers are very well represented, including Power and Dunstaple; indeed, the bulk of the latter's isorhythmic motets – eight of the 11 – survive only in this north Italian source.

By mid-century the motet faced a crisis as the diverse manners of composition began to grow moribund, but the second half of the century witnessed the clarification and consequent reduction of stylistic possibilities. Experimentation began to give way little by little to a redefinition of the motet as a genre. New compositional traditions were thus established, many of which were adhered to until the rise of monody at the end of the 16th century brought about a stylistic transformation of the motet. With the liturgical repertory of Du Fay and, to a lesser degree, his immediate contemporaries, one can already see the beginnings of characteristic procedures for hymn and *Magnificat* settings that were to be observed for more than a century. In both, successive verses of the text alternate between plainchant and polyphony, and the chant melody also usually figures prominently in the part-writing. As a rule the borrowed line is carried by the cantus, where it contributes to a modest impression of

Ex.11 Du Fay: *Ave regina celorum* (ii)

treble-domination in the customary texture of three parts (*see* HYMN, §III, 1, and MAGNIFICAT, §2).

A decisive impetus for the development of the motet in this period came indirectly from the traditional cantus-firmus structures of the 14th century, through their transformation in the polyphonic mass cycles of the 1440s and 50s. There the mathematical severity of isorhythmic and mensural patterns was either substantially tempered, if only by their extension over a large cyclic form, or virtually dissolved. At the same time the medieval hierarchy of voices had begun to break down, despite the adherence to the tenor cantus firmus as a structural armature for the composition, in deference to an increasingly lyric conception of part-writing and a concomitant trend towards melodic and rhythmic equalization of the parts. In addition, the sonorous possibilities were enriched by an ever more regular use of the *contratenor bassus* – not infrequently an optional part in the 14th-century motet even when present. The four voices of such a polyphonic texture were also spread more evenly over the ranges now considered standard for the human voice.

Thus the tenor cantus firmus was newly transformed and reintegrated into motet composition, and in the process a compositional tradition was forged that was to prove particularly tenacious. This development is exemplified by Du Fay's *Ave regina celorum* (iii), written just a decade before his death in 1474. It was perhaps not the first work of its kind, but it reveals clearly its relationship both to the cantus firmus masses of Du Fay's maturity and to the earlier isorhythmic motet structures from which they were derived. The extended introductory duos (where the plainchant functions as a melodic element), the use of the antiphon melody as a tenor cantus firmus set off at its entry by prolonged note values, the addition of a low contratenor, the division of the piece into two sections under contrasting mensurations, and the bitextuality created by the troping of Du Fay's personal supplications ('Miserere tui labentis Du Fay': 'Have mercy on thy dying Du Fay') in every part except the tenor – all these features reflect compositional procedures characteristic of the 14th-century isorhythmic motet (ex.12). At the same time the work owes to the cyclic masses of the immediately preceding decades the vocal character of its part-writing and the supple handling of its borrowed chant so that now all the voices in turn paraphrase the borrowed melody; the tenor becomes increasingly indistinguishable from the surrounding voices, both rhythmically and melodically, as it proceeds from its initial entry to the concluding cadence of each section. That Du Fay drew consciously for this motet on the compositional procedures that he had developed in his cantus firmus masses is suggested by the extensive three-voice passage common to it and to the second Agnus Dei of the cyclic mass based on the same liturgical chant.

2. LATER 15TH CENTURY. With the next generation of composers, the motet built on a tenor cantus firmus became once again an important stylistic type. Of the eight motets that can be attributed to Johannes Regis, Du Fay's 'clerc' (and possibly his pupil), all but one are of this kind. Regis increased the potential sonority of his works by weaving four additional voices around the tenor, but he usually engaged all five parts simultaneously only at the culmination of a section. More often he intensively exploited the possibilities for contrasts in range, timbre and density by alternating duos, trios and the full ensemble. The texts he set were almost exclusively festal or occasional in intent, and he selected his cantus firmus in each case from a liturgical chant, providing both a suggestive symbolic association with the words declaimed by the other voices and – since the borrowed melodies retained their traditional texts – an appropriate commentary on them. The resulting bitextuality revived the 'reverse textual troping' of the early 14th century.

It is probably because of this symbolic and associative significance that cantus firmi, borrowed or contrived, continued to be used for festal and ceremonial motets throughout the 16th century. In time the device itself acquired the venerability of tradition, contributing thereby to the desired effect. Moreover, later composers tended to give it even greater prominence by reverting to the extended note values of an earlier period. They also greatly increased its weight on occasion, by presenting it in strict imitation in two or more voices and by sustaining it with the full sonorities of five, six or even more parts.

Despite the apparent homogeneity of Regis's known motets, his immediate contemporaries continued to experiment with the compositional solutions that had been

Ex.12 Du Fay: *Ave regina celorum* (iii)

evolved for the genre. Other composers of the generation after Du Fay, such as Ockeghem and Busnoys, produced a mere handful of motets. Like Du Fay, Ockeghem turned to cantus firmus techniques in setting the Marian antiphons. However, with the exception of the two large works of doubtful authenticity for five voices, *Celeste beneficium* and *Gaude Maria, virgo*, both cast in essentially the same structural mould as Du Fay's *Ave regina* (iii), his treatment of borrowed material is characteristically unconventional. In *Alma Redemptoris mater* the liturgical melody is paraphrased in the altus, and its function is clearly more melodic than structural; a triplum-like voice is laid over the altus in an unusually high register. In *Salve regina* (i) the chant is consigned solely to the bassus.

At the same time Ockeghem continued to experiment with further solutions for compositions of this sort, providing settings of both liturgical and devotional texts without reference to a chant melody. The angelic salutation of the Annunciation, *Ave Maria, gratia plena*, though used as an antiphon in several contexts, he treated melismatically in a freely composed contrapuntal style for four voices of equal rhythmic activity and melodic interest. For the prayer to the Virgin *Intemerata Dei mater*, which has no place in the liturgy, Ockeghem produced an imposing work for five voices. Dividing it into three sections with different mensurations, he contrasted full sonorities with duos and trios in different registers, and juxtaposed the independent, contrapuntal part-writing and melismatic text-setting of the initial and final sections with the syllabic, declamatory style of the intervening passages. Like Du Fay in his *Ave regina celorum* (iii), Ockeghem may have designed *Intemerata Dei mater*, with its text of humble supplication to the Virgin, as a personal work for his own use.

Busnoys also relied on the cantus firmus principle for compositions based on liturgical chants, but, like Ockeghem, he used it somewhat freely. In a setting of the Easter sequence *Victimae paschali laudes*, he set the first versicle as a pair of non-imitative duets, each of which quotes the chant in the manner of Du Fay's *Ave regina celorum* (iii). Thereafter he confined the embellished chant to the altus. For the Marian antiphon *Regina coeli* (i) he gave the traditional melody to the bassus, with some migration to the other voices, while for *Regina coeli* (ii) he doubled it canonically at the 4th between the two lower voices.

Two other motets, *Anthoni usque limina* and *In hydraulis*, have a distinctly personal stamp: Busnoys apparently wrote the texts himself, the first in honour of his patron saint and the second in homage to Ockeghem, and he constructed the cantus firmi according to rigidly schematic designs. The only analogous composition by Ockeghem is the enigmatic *Ut heremita solus*, for which the tenor has to be extrapolated from an elaborate combination of notational and verbal canons; the resulting puzzle presumably sorely taxed the imagination even of those familiar with such devices, since Petrucci deemed it necessary to publish a resolution together with the instructions. The Ockeghem work is exceptional in this respect, for while complex canonic manipulation of the tenor cantus firmus was fairly common in masses of the period, it was not often used in the motet (if indeed this is a motet and not a purely instrumental work).

With another unusual work, the motet-chanson *Mort tu as navré* written for the death of Binchois in 1460, Ockeghem may have been responsible for establishing a

new compositional genre. The use of a vernacular text in ballade form for the top voice has usually caused such works to be considered with chansons, but serious compositions can also be regarded as a subspecies of the motet, since they derive from it their most salient traits: the simultaneous setting of two different texts and the adoption of a pre-existing melody as the tenor cantus firmus.

Du Fay's *Je ne puis plus/Unde veniet* was evidently earlier than Ockeghem's motet-chanson, since it was included in *GB-Ob* Can.misc.213, but its intention seems humorous and its tradition more distinctly secular than the epitaphs by Ockeghem and composers of the following generation. Although they display a superficial structural resemblance to bitextual chansons where both the borrowed tenor and its text stem from a popular repertory of French song, epitaphs on the passing of a personage of note, such as those included in the collection prepared for Margaret of Austria (*B-Br* 228; ed. M. Picker, *The Chanson Albums of Marguerite of Austria*, Berkeley, 1965), are more serious in intent and, as a result, in style. The thoroughly motet-like facture of *Nymphes des bois*, Josquin's *déploration* on the death of Ockeghem, is a case in point. When it is compared with the popular character of the combinatorial chansons added to the final layer of the Dijon chansonnier, for example, the distinctions are clearly illustrated.

The structural and stylistic affinities between the motet and the tenor mass, due to their common origins and to cross-currents of influence in the second half of the 15th century, gave rise to the mass-motet cycle. In the 1450s Franco-Burgundian composers began to pair a mass with a motet by basing both on the same cantus firmus, which was drawn from the tenor of a secular song. Guillaume Rouge's three-voice *Missa 'Soyez aprantiz'* employs the tenor of Walter Frye's ballade *So ys emprentid*, as does the four-voice motet *Stella celi extirpavit* (*I-TRmp* 88, no.204).

Six such mass-motet cycles have been identified, most of them anonymous. Characteristic features of motets from these cycles are an introductory duo for the upper voices, and division into two parts, often with double-cursus layout of the tenor, so that the cantus firmus is stated in triple time and then repeated in duple time in the second half of the work. Double cursus figures prominently in the *Missa Caput*, a highly influential work from the 1440s by an anonymous English composer, and motets from the second half of the century apparently borrowed the procedure from the mass. An anonymous *Salve regina* (ed. in DTÖ, liii, p.52) illustrates the technique: the tenor of Du Fay's rondeau *Le serviteur* provides the cantus firmus, which is laid out in double cursus.

From the 1470s and 80s come other prominent motets with a cantus firmus taken from a French chanson and presented in double cursus, including Compère's *Omnium bonorum plena*, composed about 1472. The text, a singers' prayer to the Virgin that names performers from Cambrai Cathedral, pays special homage to Du Fay; the cantus firmus is based on Hayne van Ghizeghem's rondeau *De tous biens plaine*. The anonymous *Humilium decus* (*I-Rvat* C.S.15, fol.187*v*), a tour de force that bears striking resemblance to the style of Obrecht, is scored for six voices and features two cantus firmi: tenor 1 is from the chant *Sancta Maria succurre miseris*, while contratenor 1 features the tenor of Caron's rondeau *Cent mille escus*; only the latter is in double cursus.

An important source for the motet in the late 15th century is *I-Rvat* C.S.15, a manuscript choirbook copied in the 1490s that begins with liturgical music for Vespers – a cycle of hymns and 14 *Magnificat* settings – and concludes with 41 motets. The composers are Pullois, Busnoys, Regis, Compère, Weerbeke, Martini, Josquin and Issac, and the choirbook includes multiple settings of the standard Marian antiphons (including five different motets on *Salve regina*, four on *Regina celi* and four on *Ave regina celorum*), as well as motets in honour of the Holy Cross and particular saints. Weerbeke's *Dulcis amica Dei* (ed. Noble, 1997), probably composed in 1486 for the dedication of the church of S Maria della Pace in Rome, is a five-voice tenor motet with a cantus firmus on *Da pacem* laid out in double cursus. Also included is Josquin's five-voice tenor motet *Illibata Dei virgo nutrix*, with a newly composed text that not only addresses the Virgin but also forms an acrostic on his own name. The presence of several five-voice tenor motets in sources from the Cappella Sistina perhaps indicates special cultivation of this form as a Roman style, although equal attention may have been devoted to it in other Italian centres; the unfortunate loss of sources makes it impossible to do more than speculate on the subject.

In contrast to the rather old-fashioned style of the five-voice tenor motet, with its cantus firmus and melismatic lines, the *motetti missales* are scored for four voices, with no cantus firmus and a predominantly syllabic style. Their beginnings appear to be attributable to northern composers working at the Sforza court in Milan. Both Compère and Weerbeke wrote, probably in the 1470s, motet cycles to be performed during the celebration of the Mass, and were shortly followed by Josquin in his *Vultum tuum* cycle, and by Gaffurius and other, unidentified composers. The individual pieces were intended to be sung in place of certain mass chants – introit, Gloria, Credo, offertory, Sanctus, Agnus Dei and 'Deo gratias' – and at the Elevation. The texts were taken from the liturgy itself (antiphons, hymns and responsories) and from devotional sources (*prosae*, rhymed prayers, rhymed offices, etc.) and were sometimes composite, consisting of a series of appropriate related statements drawn from a variety of sources. The third choirbook of Milan Cathedral (*I-Md* Librone 3, dim 2267) contains Compère's *Missa galeazescha*, whose title refers to Duke Galeazzo Maria Sforza (*d* 1476). The texts are centonizations stitched together from various Marian sequences; some of the motets paraphrase the appropriate sequence melody for brief stretches, but such melodic quotation is rare in other cycles of *motetti missales*.

There are several traits by which the *motetti missales* reveal their relationship to the cyclic mass: a common final, identical or at least similar clefs, a recurring sequence of alternating mensurations, and parallel formal structures or shared musical material. In addition, the texts of a given cycle (except the Elevation motet, which always refers to the Eucharist) all share a common theme, usually concerned with either the cult of the Virgin or feasts of the Lord. As a result they impart to the cycle a Proper character in the same sense that a tenor cantus firmus can provide a Proper reference for a setting of the mass Ordinary.

It is possible to see in these compositions, particularly those of Weerbeke, the gradual crystallization of the musical style that was to characterize the motet throughout the 16th century, beginning with the mature works of Josquin. Weerbeke's setting of *Ave regina* (*in loco* Sanctus) for the cycle *Ave mundi domina* makes systematic use of paired imitation; two-voice textures in a variety of combinations alternate with the full complement of four, and the contrapuntal character of the initial section is juxtaposed with the chordal declamation of *O salutaris hostia*, which was sung during the Elevation of the bread and wine, the most solemn point in the Mass. Similar Elevation motets by Compère, Josquin and others typically have chordal textures in long notes, often with a fermata over each chord (ex.13).

The word-generated figures that begin the imitative phrases, the clear cadential articulation that ends them and the syllabic, homorhythmic style of the closing section are generally regarded as reflecting Italian tastes and influence. However, the style of the concluding segment, with each note carrying a corona as here, appears in the works of northern composers as early as Johannes de Lymburgia and the young Du Fay. A type of homophonic

Ex.13 Weerbeke: *Ave regina caelorum*

declamation deriving from the natural rhythm of the Latin is also found, for example in the *secunda pars* of the late five-voice *Intemerata Dei mater* by Ockeghem, who apparently never visited Italy. Since the supposed Italian models have yet to be identified, definitive conclusions are difficult to draw.

Textual centonizations were used not only for the *motetti missales* but, more importantly, as a basis for motet composition generally for several decades before and after 1500. While the standard Marian antiphons such as the *Salve regina* and *Ave regina celorum* were traditionally performed by a small choir in a side chapel at the end of the evening Office (Compline), other motets, some of them based on centonized texts, functioned in various contexts, often as paraliturgical additions to the Mass. According to the diaries of the Cappella Sistina, motets were confined to three points during the celebration of Mass: the offertory, the Elevation and the end of Mass. The surviving diaries provide only late evidence, since they date from the 16th century, but they probably refer to a tradition that extends back to the previous century. Motets could also be heard in secular settings, as in the account of a performance in 1520 of Josquin's *Salve regina* (possibly the setting for five voices) in the chambers of Pope Leo X, while he was at dinner.

3. Josquin Des Prez. The key figure in the development of the motet in the late 15th and early 16th centuries was undoubtedly Josquin. All the compositional solutions that had become traditional for the genre found a place in his works. There is a reference to the melodic use of liturgical chant in his simultaneous setting of the two Marian antiphons *Alma Redemptoris mater* and *Ave regina caelorum*. Moreover, from his literal quotation of the opening of Ockeghem's elaboration of the first of those chants one can assume a conscious allusion to the usage of the previous generation. The use of a tenor cantus firmus, selected for its symbolic significance, is exemplified in his five-voice setting of the sequence *Stabat mater*, where the tenor of Binchois's chanson *Comme femme desconfortée* is laid out in long note values, and provides a direct commentary on the Latin text.

Canonic doubling of the tenor was also used by Josquin to give greater prominence and weight to the borrowed chant, as in his splendid setting of the Marian sequence *Benedicta es, caelorum regina* which features the free use of canon. The canonic structure expands the customary fabric of four voices to six. Another Marian sequence, *Inviolata, integra et casta es, Maria*, features strict canon on the chant melody in two inner voices, preceded by entries in the other three voices, all of them paraphrasing the chant melody in pre-imitation (i.e. imitative entries that are heard before the commencement of the two canonic voices). In this way Josquin expands the chant beyond the hidden inner voices and makes it completely audible, thus developing a trend begun by Du Fay in his *Ave regina caelorum* (iii) (see ex.12 above). Josquin even contrived his own cantus firmi, as in the five-voice *Illibata Dei virgo*, where the tenor consists solely of the hexachord syllables *la, mi, la*, whose vowels conceivably refer to the Virgin, *Ma-ri-a*.

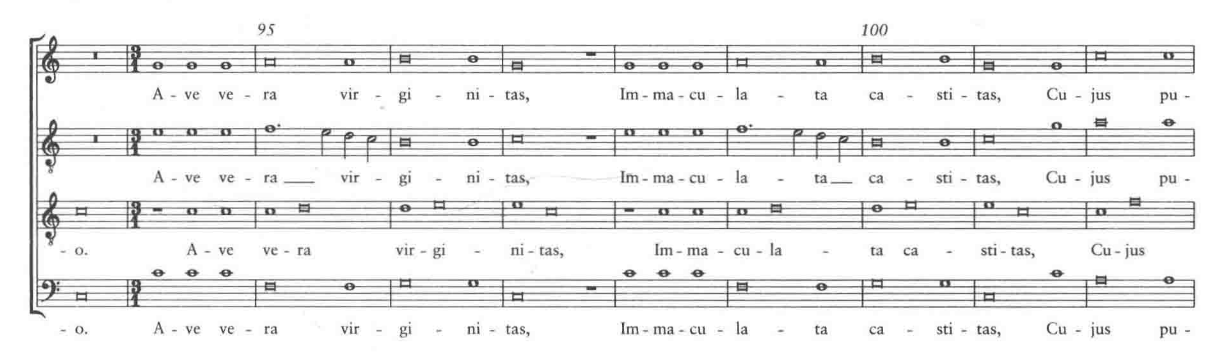
As syntactic imitation became increasingly important, Josquin applied the technique to the handling of pre-existing as well as original melodic material. The voices were then assimilated to each other both melodically and rhythmically, and the cantus firmus permeated the entire

contrapuntal fabric, as in his four-voice setting of the antiphon *Virgo prudentissima* and the sequence *Mittit ad Virginem*. This development was virtually inevitable for Josquin, who consistently retained with any liturgical text the melody traditionally associated with it. Thus in his four-voice *Ave Maria ... virgo serena*, an early work copied into the choirbook *D-Mbs* Mus.ms.3154 by 1484, he derived the melodic material for the opening salutation of the angel Gabriel from the related chant, providing a fourfold statement of it as a series of regular points of imitation. The rest of the text is composed of five regular strophes of four lines each, which he set as successive units, articulated not only cadentially but also by means of contrasts in texture. The result is a compendium of the contrapuntal techniques in use in motet composition by the turn of the century: successive points of imitation, homophonic declamation, free contrapuntal writing, contrasting textures and timbres resulting from the alternation of duos and trios in different registers with the full choir, and rhythmic variety achieved by a proportional shift from the prevailing binary metre to a ternary one (ex.14).

This arsenal of compositional procedures undoubtedly facilitated the innovations with which Josquin is generally credited. However important his contributions to the codification of style for traditional categories of the genre – the polyphonic settings of antiphons, sequences and devotional Marian texts – they were significantly complemented, if not completely matched, by those of his immediate contemporaries such as Alexander Agricola, Compère, Isaac and Obrecht. Unlike Du Fay's isorhythmic motets, which often name a patron or particular occasion, Josquin's motets make no such references and are thus difficult to date precisely. Yet associations with individual patrons are suggested by a few unique texts with no liturgical associations, such as *O bone et dulcissime Jesu*, a prayer found in a small number of books of hours, and *Misericordias Domini*, a compilation of psalm verses. Josquin probably composed both works at the request of noble patrons who were nearing the end of their lives, the first for René of Anjou (*d* 1480), at whose Provençal court Josquin worked in 1477–8, and the second for King Louis XI of France (*d* 1483). Josquin's most important motets historically are perhaps those based on texts for which no conventions existed, the lyrical and subjective poetry of the Old Testament and in particular that of the psalms, such as *Memor esto verbi tui* (Psalm cxviii.49–64) and *Qui habitat* (Psalm xc). He appears to have been one of the first to draw on the psalms for several works. In these the venerable techniques of cantus firmus and canon gave way to an increasing reliance on syntactic imitation as a basic compositional procedure. At the same time the melodic figures with which successive phrases begin are more closely tied to the natural rhythms and inflections of the Latin words. Homophonic declamation continued to function as an articulating device and as an element of stylistic variety, but its rhetorical possibilities, which had always been important, received even greater stress; the dramatic change in texture produced by its introduction served at once to draw the listener's attention to a new phrase of text and to make it clearly audible.

Presumably in response to a burgeoning interest among humanist men of letters in the relationship between a musical text-setting and its affective impact upon the listener, Josquin also began to explore more fully in motets of this type a dimension only occasionally entered by earlier masters such as Busnoys and Ockeghem: the illustration and symbolization of verbal conceits by musical gestures. Examples of his attempts in this regard are numerous, but none is more striking than his setting of Psalm l, *Miserere mei, Deus*. The opening pairs of imitative duos immediately capture the abject mood, as the singers intone the words on a monotone relieved only by the rise and fall of a semitone (ex.15*a*). After each phrase of the psalm, a fifth voice joins the others on the words 'miserere mei, Deus', producing a refrain-like structure that rhetorically emphasizes the plea for mercy. The third part of the work features descending scale passages in overlapping entries that vividly evoke the supplicant as he bows low before the Lord (ex.15*b*). Josquin composed this setting about 1503, at the request of another patron nearing the end of his life, Duke Ercole I d'Este of Ferrara. The composer may have been inspired by Fra Girolamo Savonarola's famous meditation on Psalm l, written in 1498 just before his execution for heresy; Ercole d'Este had maintained a close correspondence with the friar, who advocated religious and social reforms in Florence. In subsequent decades the opening words of Savonarola's meditation, *Infelix ego*, were set to music by other composers active in Ferrara, including Willaert, Rore and Vicentino, each of whom employed the opening musical subject from Josquin's *Miserere mei, Deus* as a reiterating cantus firmus. Savonarola's words offered solace to those suffering the upheavals of the Reformation, and they were also set by transalpine composers, including Clemens non Papa (at the end of *Tristitia obsedit me*), Lassus and Byrd.

4. JOSQUIN'S CONTEMPORARIES AND SUCCESSORS. By the time of Josquin's death in 1521, the motet as a genre appears to have been largely defined, and the musical language associated with it until at least the end of the 16th century was fully formed in all its essentials. The tendency, clearly discernible in Josquin's mature works, towards an ever fuller submission of compositional procedures to the meaning and requirements of the text was to have highly significant ramifications, not only for the motet but also for secular music. However, it is evident from the delineation of regional and personal styles that seems to have begun at about the same time, that Josquin's attention to musical rhetoric was not shared to an equal degree by all his immediate and younger contemporaries.



(i) France. Antoine de Févin and Jean Mouton, with whom Josquin is reported to have been associated at the French court, made only occasional attempts at musical symbolism. Mouton in particular was evidently more concerned with the finely chiselled and balanced melodic lines that Glarean so admired and with clear, coherent formal structures. This can be seen in his settings of plainchant sequences such as the placidly beautiful *Ave Maria ... virgo serena* for five voices, which he treated much more consistently than Josquin as a sort of variation chain based on paired repetitions of the pre-existing melody. He also followed the repetition schemes characteristic of the liturgical chant in his settings of invitatory antiphons and great responsories, categories of chant to which Josquin gave scant attention.

Mouton's choice of such texts was motivated partly at least by the formal possibilities inherent in them. This is strongly suggested by other compositions such as the

Ex.14 Josquin: *Ave Maria, gratia plena*

Ex.14 (continuation)

ceremonial motet *Non nobis, Domine*, written to celebrate a French royal birth in 1510, on which similar repetition patterns have been imposed. The acclamation 'Ergo clamemus ... vivat rex!' functions as a refrain; it is heard twice in each of the two *partes*, first at about the midpoint, in the binary rhythms characteristic of the composition, and again at the end, with a shift to ternary metre. Not only are the corresponding passages the same in the two *partes* but the binary and ternary passages are also closely related to each other through the use of common musical material. Thus they serve both to articulate formally the individual *pars* and to create a clear overall design.

This stylistic trend was in no way inimical to the style of Josquin's mature works. Indeed the basic compositional procedures were the same: syntactic imitation and homophonic declamation in alternation with reduced or changing numbers of voices as an added element of variety. But the emphasis was much more on rational ordering of the musical structure than on rhetorical gesture derived from verbal meaning. Of the composers of the next generation a considerable number – most of whom had connections of some sort with the French royal chapel – elected to follow Mouton in that respect and to cultivate what was becoming a traditional French style. Since some (such as Verdelot, Jacquet de Berchem, Lhéritier and Willaert) crossed the Alps to the south seeking lucrative positions, they also contributed to the dissemination of the style in Italy. In France, where it had originated, it was carried to its greatest degree of refinement – one bordering on facility – by Sermisy, Certon and, to a lesser degree, other composers associated with the musical institutions of the court and the capital.

That French music – Mouton's motets in particular – was highly prized in early 16th-century Italy is attested by its predominance in manuscripts associated with Ferrara (*I-Bc* Q19), Florence (*I-Fn* II.I.232) and the papal court in Rome (the Medici Codex, *I-Fl* acq. e doni 666). Additionally, the early printed volumes of Petrucci in Venice included large numbers of motets, first by Josquin, Weerbeke, Compère and Obrecht in *Motetti A* (1502), *Motetti ... B* (1503), *Motetti C* (1504), *Motetti IV* (1505) and *Motetti a cinque* (1508), and later by composers from the French royal court, especially Mouton and Févin (as well as Josquin, who had retired to Condé-sur-l'Escaut in 1504), in *Motetti de la corona*, book 1 (1514) and books 2–4 (all 1519). More than a decade later, Attaingnant published 13 volumes of motets from the repertory of the French court (*Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535*, ed. A. Smijers and A.T. Merritt, Paris, 1934–63). The large number of motets and the paucity of mass ordinaries produced by Mouton and Sermisy can perhaps be explained by the preference of François I for attending a daily low Mass where motets were performed, recalling the tradition of *motetti missales* in Milan. François was no doubt familiar with the Milanese practice, since the duchy was under French control almost continuously from 1499 to 1525.

(ii) Netherlands. In the regions of Franco-Flemish culture the distinctive stylistic proclivities of a number of Josquin's younger contemporaries also spawned a somewhat different tradition. Gombert, for example, followed French models in some important respects. Although reportedly a 'disciple' of Josquin, he generally restricted his use of liturgical melodies to the two contexts in which they had become traditional for Mouton and his emulators, the setting of Marian antiphons and tenor cantus firmus compositions. In the latter case the borrowed chant was usually given to a fifth or sixth voice and used with its original text for its symbolic or associative significance. Gombert also adopted for a number of his motets the

Ex.15 Josquin: *Miserere mei, Deus*

repetition pattern and, like Mouton, the bipartite division of the responsory.

But at the same time Gombert showed the influence of the earlier Netherlandish tradition, as represented in the works of Agricola, La Rue and Obrecht, in his preference for full contrapuntal textures. His reliance on homophony was generally rather slight. Although he turned from freer contrapuntal part-writing to a systematic use of syntactic imitation, he maintained thick sonorities by avoiding the paired imitative duets characteristic of both Josquin and, to some degree, his French colleagues, and by adopting regular, closely spaced entries for individual voices. His use of five or even six voices (instead of the normal four) in nearly two-thirds of his motets contributes to the same effect. Along with denser textures came greater dissonance, especially at cadences, where cross-relations often occurred. For example, in *Media vita* (CMM, vi/9, p.52) the mulitple imitative entries on 'qui pro peccatis nostris' (ex.16) lead to a cadential formation at bar 46 where *f*, in the second voice from the bottom, sounds harshly dissonant against the suspended *g′* and subsequent *f*♯′ leading note in the altus. A humanistic concern for verbal meaning and intelligibility had tempered the abstract, even arbitrary relationship between word and note often

Ex.16 Gombert: *Media vita*

found in the writing of Gombert's immediate predecessors, but it is reflected in his compositions mainly in a more regular declamation of the text and a curtailment of cadential melismas. The Netherlandish style, as he helped to define and exemplify it, was confirmed and established by Crecquillon, his somewhat younger successor at the imperial court, and by Clemens non Papa, Crecquillon's immediate contemporary. Individual distinctions can be made, but the essential characteristics of style are common to all three.

(iii) Italy. From the early 15th century Italy became a veritable province of Franco-Flemish musical culture. A steady stream of singers and composers came south across the Alps to staff the chapels established at the leading courts and churches of such important centres as Milan, Venice, Florence, Ferrara, Naples and Rome. Virtually every important figure of the late 15th and early 16th centuries was at some time in his career on Italian soil; Agricola, Isaac, Compère, Weerbeke, Obrecht, Josquin and Mouton were only a few of them. The influence of the northerners was felt not only in their contributions to the motet repertory that came to be disseminated there but also in their teaching activities.

After the accession of Leo X to the papal throne in 1513, the decisive influence appears, however, to have been French. This may have been due largely to the decidedly francophile tastes of both Leo X and his successor but one, Clement VII (also a Medici), and to the considerable prestige of the papal chapel in which those predilections were mirrored. The motet publications of Antico and Petrucci give special status to the works of Févin and Mouton and show that composers in the orbit of the French royal chapel were in the ascendancy. The flow of compositions, and of musicians, was undoubtedly encouraged by the meeting between Leo X and François I at Bologna in 1515. The French presence in the duchy of Milan, following the victory at Marignano in that year, must also have contributed to the trend. Events such as these reinforced the French orientation of the important musical establishment maintained by the dukes of Este in Ferrara and facilitated the circulation of music by masters of the French royal chapel that had begun through that channel about the turn of the century. As a result, not only the papal chapel but also a good deal of Italian musical life was dominated by the French style well into the second half of the 16th century. Even the few native composers known to have been active during this period emulated their northern neighbours. The most noteworthy is Costanzo Festa, who set the lament on the death of Queen Anne of Brittany, *Quis dabit oculis*, a text previously treated by Mouton, whose setting he clearly followed. Nevertheless, it was undoubtedly the Italians who first developed, from the antiphonal elements in the polyphonic style of northern composers, the practice of writing motets for divided choirs (CORI SPEZZATI) that came to be a hallmark of ceremonial music at the Basilica di S Marco, Venice. Francesco Santa Croce, whose origins and career have both been traced to the Venetian states, set the compline psalms for divided choir, and these were included in a manuscript now in Verona (*I-VEaf* 218) that was probably copied in the late 1530s. The liturgical practice of singing alternate verses of the psalms from opposite sides of the choir presumably gave rise to polyphonic settings intended for similar performance. But the paired bicinia that figure so prominently in the motets of the Josquin generation, and the contrasting combinations of two and more voices that came into play even earlier, both lent themselves admirably to a spatial division between groups of singers that were treated antiphonally. When the vesper psalms composed in this manner by Willaert and Berchem were published in 1550 (*I salmi appertinenti ali vesperi per tutte le feste dell'anno … parte spezzadi accomodati da cantare a uno et a duoi chori*) the polychoral style was provided with a prestigious example that was widely circulated and presumably regularly heard at S Marco, which was ideally suited to an effective deployment of divided choirs. The stage was thus set not only for the dissemination of this style into every leading musical centre of western Europe but also for the extraordinary development of festal music in Venice by Andrea and Giovanni Gabrieli.

5. PERIPHERAL TRADITIONS.

(i) Spain. The cultivation of the motet seems to have come to Spain relatively late. Not until Aragon and Castile were united in 1474 under Ferdinand and Isabella is there evidence of an important musical establishment where motets would have been composed and sung regularly. In fact the beginnings of a significant Spanish tradition may date from the visits to Spain in 1502 and again in 1506 of Philip the Fair and Joanna of Castile. They were attended on both occasions by the distinguished chapel maintained by them in the best tradition of the ducal house of Burgundy. Among the composers then in Spain were Pierre de La Rue and Alexander Agricola as well as lesser men such as Orto, Braconnier and Divitis.

The leading composers at the Spanish court under Ferdinand and Isabella, Juan de Anchieta and Francisco de Peñalosa, wrote motets in a style not far removed from that of the Netherlanders they presumably emulated. Liturgical melodies were used both as tenor cantus firmi and as the melodic substance of the superius, as was traditional for Marian antiphons. The polyphonic complexity of the northern style seems not to have been entirely compatible with Spanish temperament, however, and Anchieta in particular was inclined to adapt to his motets the syllabic homophony of his secular pieces.

The Spanish presence in the Low Countries under the Habsburgs made possible a continuing Netherlandish influence on Spanish composers through most of the 16th century. But equally important for Spanish composers of that period was their association with Franco-Flemish musicians at the papal court. Peñalosa was there in 1517, and Morales, a seminal figure for the Spanish tradition, spent a decade there from 1535. The musical style that was to have the most decided effect on Morales is revealed in his choice of motets as mass models; for example, there are two by Mouton and one each by Gombert, Richafort and Verdelot. His own motets show the systematic use of syntactic imitation characteristic of his generation, the adoption of a cantus firmus with its original text for symbolic reasons – both are exemplified in his celebrated five-voice *Emendemus in melius* – and an affinity for the balanced symmetry of the respond form. A move towards fuller sonorities and a more homophonic texture – even when the compositional procedure is essentially contrapuntal in nature – is discernible; these traits became increasingly marked on the Continent after the middle of the century.

At the same time, the motet tradition continued to be cultivated vigorously in Spain even by those composers

who never left their native country. This is amply demonstrated by Guerrero and a number of composers of secondary importance who continued to build on the same stylistic foundation.

(ii) Germanic territories. Just as Franco-Flemish musicians took the newly defined style of the Latin motet to Spain, so also did they take it to the regions of Germanic culture. One of the key figures was undoubtedly Isaac, who was associated with the imperial chapel of Maximilian I from 1496 for the rest of his life. His influence is most directly evident in the works of his pupil Senfl, who served with him in Maximilian's chapel and then in the 1540s moved to the ducal court of Bavaria in Munich. No less important for the development of the motet in Germanic territories was Josquin himself. Although he may never have been east of the Rhine, his works were much admired there (especially by Luther) and widely disseminated by publishers such as Forster, Hans Ott, and Berg & Neuber.

The development of the Latin motet was inhibited in some areas by the Reformation, which emphasized congregational participation and the use of the vernacular. But, as in France, the compositional procedures developed for setting Latin texts were also adopted to the vernacular. Just as Goudimel had set the French Psalter both in the familiar style for singers of limited skill and in a more polyphonic vein for the better-trained, Johann Walter (i) provided polyphony for the chorales in both styles, treating the traditional melodies as they were generally treated in the Tenorlied.

In the second half of the 16th century, however, polyphonic settings of Latin texts – many by Catholic composers – gradually regained ascendancy over music sung in the vernacular during Lutheran services. This was undoubtedly due in part to the activity of the Protestant printer Georg Rhau, who published a series of collections (1538–45) devoted to polyphonic settings of the Roman liturgy for both the Mass and Vespers. Particularly significant are the psalm motets (following Josquin's models) and settings of the Gospel readings, both because of their large number and the frequency with which they could have been used in the liturgy. Indeed, Berg & Neuber printed (1554–5) a five-volume repertory of Gospel motets for the main feasts of the entire liturgical year, and there is evidence that these were sung not only in conjunction with but also in lieu of the prescribed readings for the Mass well into the 17th century.

(iii) England. The history of the motet in England after the generation of Power and Dunstaple shows a gap that can be only partly filled by the repertory of the Eton Choirbook. These works demonstrate that in the second half of the 15th century English composers had lost none of their fondness for plainchant settings of the Marian antiphons, particularly the *Salve regina*, or for devotional texts in honour of the Virgin. However, the settings they provided have a monumental character only occasionally adumbrated in the mass compositions of the Old Hall Manuscript. They are mainly for five or six voices and are divided into half a dozen or more separate sections. The juxtaposition of choirs with varying numbers of voices and different ranges, together with a melismatic, freely contrapuntal style, suggests that motets such as those written by Regis, Busnoys and Ockeghem were taken as models. It may have been the latter's motet for 36 voices, *Deo Gratias*, that prompted compositions such as Robert Carvor's 19-voice *O bone Jesu* and Tallis's *Spem in alium* for 40 voices.

There is little if any syntactic imitation in the works of the earlier generation of composers, which included Banaster, Cornysh and Fayrfax. After the accession of Henry VIII in 1509, however, contacts with musicians on the Continent began to increase markedly; it was presumably from continental models that Taverner, for example, adopted a tenor cantus firmus treatment in even semibreves and breves for his settings of *Dum transisset*. Perhaps more significant for the developing English tradition was the gradual assimilation of a more syllabic approach to text setting and the concomitant organization of contrapuntal writing into points of imitation. An early example is (?Richard) Sampson's *Quam pulcra es* (*GB-Lbl* Roy.11.e.xi), which dates from about 1516. The discant style that was such a distinctive trait of English music in the first half of the 15th century continued, nonetheless, to be used effectively, as can be seen from Taverner's *Christe Jesu*.

Henry VIII's break with Rome in 1534 and his subsequent dissolution of the monasteries, with their musical institutions, imposed a restraint on the development of the Latin motet much more stringent than that caused by the Reformation in Germany. It may also help to account for the unusual emphasis on polyphonic psalm settings by somewhat later figures such as Tye and Robert White; presumably these were intended to replace plainchant, which was no longer in use. But as in other Protestant areas compositional skills associated with the motet were transferred to the setting of texts in the vernacular. Thus the anthem was born of the earlier genre.

6. LATER 16TH CENTURY. The 16th-century motet saw a final synthesis in the works of Palestrina and Lassus, each of whom represented a separate stylistic tradition. The more conservative was certainly Palestrina, which may be explained in part by the atmosphere engendered by the Counter-Reformation. However, it is also clear that his stylistic antecedents lie primarily with the French composers of the generation after Mouton. This is indicated first of all by his selection of motets as models for mass composition; these include four by Jacquet of Mantua, two each by Lhéritier and De Silva, and one each by Richafort, Moulu and Carpentras. Nowhere will one find in Palestrina's music, however, the dissonant cadential formations common in motets by such composers as Lhéritrier (exemplified also in Gombert's *Media vita*; see ex.16). In his *Missa 'Nigra sum'*, based on Lhéritier's motet, Palestrina carefully purged the counterpoint of such clashes as are found in Lhéritier's bar 14. Palestrina's choice of texts and their treatment also reveal French influence; in his settings of sequences and traditional Marian antiphons he retained the chant as an important melodic element in the polyphony, something he rarely did with other liturgical genres.

Palestrina showed his concern for formal order and clarity by mirroring the paired repetitions of the sequence in a variation chain, and by adhering to the liturgical design of the responsories that constitute roughly half of his motet repertory. Most of his motets are for five or six voices, but even in those works he was inclined to handle the parts in contrasting pairs, as he did systematically in his four-voice compositions. Everywhere the alternation between imitative polyphony and an occasional passage

in homophony provides the basic substance of his part-writing. Only in a general preference for fuller textures and sonorities and in a handful of psalm compositions for divided eight-part choir can one detect the general direction of contemporary stylistic change.

Palestrina's compositional style also provided the matrix for the artistic culmination of the Spanish tradition as embodied in the motets of Victoria. Like Morales, Victoria spent a significant length of time in Rome, which was all the more critical for him in that it began when he was only 17 and lasted more than 20 years. Although his total repertory is much smaller than Palestrina's, he set many of the same texts and handled them in much the same way. But his motets are distinguished by a more generally homophonic texture and by a livelier interest in harmonic colour, which he pursued by means of signed accidentals usually suggested by the meaning of the words.

An overriding concern for a vivid musical depiction of the text is primarily responsible for the essential stylistic differences between Palestrina and Lassus. In contrast to Palestrina's carefully balanced lines and smooth rhythms, those of Lassus respond to certain textual conceits with wide leaps and relatively sharp rhythmic contrasts. Whereas Palestrina made only occasional, discreet use of pictorial devices (as in his setting of Psalm cxix, *Ad Dominum cum tribularer*, with its affective harmonies and dramatic shifts of texture), Lassus drew on a wide repertory of rhetorical gestures borrowed from the contemporary madrigal. His reliance on the musical vocabulary of Italian secular music is undoubtedly a result of his service as a young man at the court of Ferdinando Gonzaga, as opposed to the ecclesiastical context within which Palestrina spent his entire life. In addition, Lassus cultivated a declamatory chordal style in which the harmonic rhythm is surprisingly static for the period, and the vertical sonorities are thus strongly perceived. Even imitative passages are so treated that the impression of homophony is only moderately disturbed.

From the ducal court of Bavaria in Munich, where Lassus served from 1556 until his death, his motet style was disseminated through areas of Germanic culture by a number of talented pupils and associates, including Reiner, Lechner, Eccard, Aichinger and – indirectly through Giovanni Gabrieli – H.L. Hassler. Essentially the same manner of motet composition flourished also at the imperial court of Vienna, when Vaet served as Kapellmeister from 1554 to 1567, followed by Monte from 1568 to 1603. Jacob Handl also represents this tradition: even though he is not known to have had any direct connection with Lassus, his skilful and expressive use of rhetorical gestures points to Lassus's influence.

It may have been Monte who took to England the dramatic chordal style characteristic of Lassus. During his visit in 1554–5 he became acquainted with Thomas Byrd, whose son, William, achieved the final synthesis of the Latin motet in the British Isles. The majority of Byrd's motets were published in three volumes, in 1575, 1589 and 1591; in the latter two books he frequently addressed the plight of his fellow Catholics in Protestant England through pointed references in the non-liturgical biblical texts. There are some typically conservative traits in Byrd's output of motets, such as the eight-voice crab canon in his *Diliges Dominum* of 1575. But he revealed his interest in Monte's style in his eight-voice *Quomodo cantabimus* of 1584, an answer to the latter's setting (also for eight voices) of the initial verses of the same psalm, *Super flumina Babylonis*. Perhaps in response partly to Monte's example and partly to the growing interest in the Italian madrigal in England from the 1580s, Byrd also made considerable use of pictorial devices in some of his motets; his *Vigilate* of 1589 is a well-known example.

Early in the 16th century it had been Italian composers who first developed the polychoral style. Similarly, at the end of the century it was once again an Italian, Giovanni Gabrieli, who perceived in the performance traditions of *cori spezzati* the seeds of a new manner. From the relatively rapid interchange of short homophonic phrases between choirs of voices, or voices and instruments, was born the concertato principle. It can be heard in, for instance, Gabrieli's *In ecclesiis* (see §III, 2(i) below), a work that clearly presages the transformation of the motet in the 17th century.

III. Baroque

1. General. 2. Italy: (i) To 1650 (ii) After 1650. 3. Germany: (i) The generation of Schütz (ii) The generation of Bach. 4. France: (i) The early 17th century (ii) The mid-17th century (iii) The late 17th century (iv) The 18th century.

1. General. After 1600 the motet lost its traditional position as a central musical genre. With the assimilation and integration of *seconda pratica* elements, it abandoned some of its classical characteristics; but at the same time it became during the 17th century an important point of departure for a range of new forms of sacred vocal composition, such as the cantata, and in this development its earlier, leading role was at least partly restored.

The motet's development into a peripheral genre is demonstrated in a growing terminological imprecision, whereby in the 17th and 18th centuries the term 'motet' came to denote any kind of vocal music with liturgical affiliations. Indeed, the functional definition of the motet as a piece belonging to the liturgy remained the decisive factor, regardless of its musical nature. Texts were mainly biblical, drawn from psalms, lessons, antiphons, canticles and so on, but they also included free poetry with liturgical *de tempore* designations (e.g. Marian sequences for the Catholic Church, or chorales for the Protestant). Catholic motets were invariably in Latin; however, following the Reformation, Protestant motets were predominantly in the vernacular.

Independently of its historical development as a genre, the term 'motet' was itself introduced in the mid-17th century as a stylistic concept, and, as in the systematizations of Marco Scacchi, Athanasius Kircher and others, the 'stylus motecticus' became a subdivision of the 'stylus ecclesiasticus'. It was thus categorized as a style of composition, derived from the traditional polyphonic language of the 16th-century *ars perfecta*. 'Stylus motecticus' represents a retrospective musical language, especially that of Palestrina and his tradition, and was applied to other genres, such as the mass. The term 'motet' thus signified both a genre and a style. Motet and motet style, though originally congruent, were not necessarily in any way identical after 1600.

In the 17th and 18th centuries motets were often summarily described as 'concerted', and the term 'motetto concertato' appears with some frequency after the middle of the 17th century. Praetorius (*Syntagma musicum*, iii, 1618, p.6) stated that the names 'concerti, motetti, concentus etc.' were analogous and interchangeable. The

concerto principle appeared in various ways as a universal element of the *seconda pratica* in motet composition, even in the retrospective *stile antico* motet; yet the term 'concerted motet' obscured distinctions between the different types of post-1600 motet. The common structural element was the technique of stringing together passages of contrasting themes and motifs to match the individual lines of text. This fragmented, varied construction was expressly referred to in Walther's definition (1732) of motet style.

The history of motet composition after 1600 divides into two independent lines of development, which were manifested nationally, regionally and denominationally in several different ways: the choral motet proper continued the 16th-century tradition in various directions; and the vocal concerto, which arose from the motet of the *cori spezzati* type, assimilated the principles of monody and gradually integrated instrumental elements.

The essential structure of the older motet style was retained in the true choral motet, especially in the Palestrinian motet predominant in the Catholic south (Italy, Austria and south Germany) and used to the exclusion of other styles in the Iberian peninsula, where Counter-Reformation orthodoxy prevailed. This *stile antico* was particularly preserved and promoted in the mass, as laid down by papal decree (Urban VIII, 1623) and as practised in the Cappella Sistina, which provided a decisive lead until the 19th century. The tradition of following Palestrina's style necessarily resulted in apathy and conformity in the mass as well as the motet, which came to be characterized by studious craftsmanship, with schematic sequences of motif and monotonous harmony. On the other hand there was a trend towards contrapuntal techniques, such as canons and inversions, a trend reflected in the theoretical treatises of the time (Fux, Martini, Paolucci). In the late 17th century there was a tendency towards a functionally harmonic conception of counterpoint, with an increasingly periodic style of vocal melody and even da capo form (Caldara, Lotti). The *a cappella* ideal appeared by the 17th century in so modified a form that instrumental doubling – often with cornetts and trombones, to create an archaic effect – with continuo accompaniment in *basso seguente* style was normal.

Implicit in the sacred vocal concerto, on the other hand, is a complex range of combinations of voices and instruments which, in conjunction with episodic structure, resulted by the late 17th century in the splitting-up of the motet into isolated units. The concerted motet thus began to comprise a number of separate movements, incorporating elements such as aria and recitative formerly considered foreign to the form. This was the origin of the Italian orchestral motet (e.g. Scarlatti, Durante, Leo and Pergolesi) and of the *grand motet* in France (e.g. Charpentier, Lully, Lalande, Campra and Rameau). The development of the English verse anthem and of the cantata in its various forms also derives from this new motet style.

2. ITALY.

(i) To 1650. The era of the Baroque concertato motet begins with the publication in 1602 of Viadana's *Cento concerti ecclesiastici*, for one to four voices with, for the first time, organ continuo. Although this has long been considered the epoch-making publication, it came two years after Gabriele Fattorini's *I sacri concerti a due voci* (Venice, 1600). Both volumes were reprinted in Italy and Germany. The idea that prompted these prints was not so much any hankering after change or supposed imitation of classical culture as the increasingly inadequate performance of unaccompanied church music by too few voices heard by Viadana in Rome. Even solo motets were conceived in the most conservative style rather than along the lines of early operatic experiments. Viadana's collection proved the feasibility of a small-scale medium, using a handful of modest voices, and broke the dominance of the *stile antico* in sacred music. At the same time the use of the organ in a continuo role opened up new possibilities with conventional four- to six-part scorings. Contrasts of texture and sonority could be exploited, and counterpoint became more harmonically based, since it was heard against a background of simple chord progressions. Both Venetian and Roman printers produced a flood of publications of small-scale, practical church music which formed the staple fare for most religious institutions. The composers were often quite talented, though few towering names emerge. Most small-scale music consisted of motets to be sung at Mass or at the Offices on principal feasts and saints' days. In the context of the new style the word 'concerto' was frequently used as a synonym for motet. The motets in Monteverdi's Vespers collection of 1610 do not fit so easily into this picture: they are virtuoso pieces of unusual complexity conceived for court singers familiar with *L'Orfeo*.

In the hands of composers like Alessandro Grandi (i) and Ignazio Donati in the north and G.F. Anerio, Agazzari and Cifra in Rome, the concertato motet quickly reached a high artistic level in the early decades of the century. Many composers including Grandi found an outlet for their melodic gifts in this new genre, where polyphonic lines often assumed a new tuneful freshness. Motet texts were often drawn from the psalms, and two other categories came to prominence: *Song of Solomon* texts for female saints and spiritual recreation, and Jesus-directed verse, rich in sentiment, linked with the rise in eucharistic devotion. Donati, to name but one, excelled in works for four or more voices with organ, where he could play off different combinations of singers and build up telling climaxes by exploiting the presence of continuo. The text would typically be divided into sections, each with a characteristic motif that could be developed contrapuntally, but a refrain form with solos and duets offset by a repeated tutti is also found, as well as motets in the form of a dialogue in which one or more voices would represent different scriptural characters (*see* DIALOGUE, §5).

The refrain form was specially appropriate to the massive, elaborate Venetian motets that Giovanni Gabrieli wrote during his last years, often involving polychoral techniques. In these the word 'Alleluia' was frequently set to a dance-like triple-time passage, which through its recurrence could bind a large work together. Gabrieli also pioneered the 'mixed concertato' style in the large motet, assigning particular sections to solo voices, instruments and a full choir and orchestra called 'cappella': *In ecclesiis* is a deservedly famous work employing all these innovatory techniques. Subsequently, this grandiose approach was used most frequently for vesper psalms, although in Rome at least music for many choirs was found to fit new architectural trends and flourished accordingly.

Venice in the 1620s created a vogue for small motets for one or two voices with obbligato violins and continuo,

the sacred parallel of the early secular cantata. Grandi proved a pioneer here: he introduced delightful, idiomatically written sinfonias for the violins which acted as refrains, and tried out variation and strophic-bass techniques borrowed from secular music. Sometimes the violins not only provided a refrain but joined in dialogue with the voice. This medium and the simpler monodic solo motet (without violins) were the types that most clearly pointed the way for the Baroque motet. The monodic type, too, became established only in the 1620s: a fine anthology is the Venetian *Ghirlanda sacra* (1625), which contains four of Monteverdi's few contributions to the genre. Compared with the sacred duet, therefore, the solo motet had taken root slowly: in most cases it remained distant from the developments of the Florentine monodists. Nevertheless, the type did call for more virtuosity in the way of vocal ornamentation, an indispensable part of the art of monody.

In Rome some composers (Crivelli, Soriano) perpetuated the ideal of Palestrinian polyphony in the *stile antico* mainly for the major churches, but most took their cue from Viadana and became increasingly free in the ornamentation of their melodic lines. Occasionally, solo motets, for example those by Kapsberger, could all too easily be dogged by mere ornamental note-spinning at the expense of real melody, although the first Roman publication (Ottavio Durante's *Arie devote*, 1608) is clear evidence that the south was not left behind. After a rather lean 1630s Roman church music achieved a new lease of life in the decade that followed, as can be seen from the anthologies of motets published towards 1650. Refrain forms with instrumental sinfonias, a flowing style of melodic writing and a wider range of keys are all found here; and in Carissimi, Rome had a really talented composer who could infuse spiritual fervour into motets as well as into oratorios. With Foggia, Graziani and Virgilio Mazzocchi in Rome, and Rovetta and Rigatti in the north, the new medium had reached maturity and was able to abandon its dependence on *stile antico* models.

(ii) After 1650. From 1650 the pattern changes, and the once vast publishing activity in this field declined throughout Italy. Other avenues were open to promising composers too: opera became an attractive source of income to composers who held church posts, and motets tended to be concentrated in places with opera houses and by composers (Cavalli, Legrenzi, P.A. Ziani) who were as well known for their operas as for their sacred music. The mellifluous vocal writing in some of Legrenzi's motets is obviously derived from opera, although in others he used dialogue effects which are not necessarily operatic but hark back to the dialogue motets of the early part of the century. Instrumental music was becoming an increasingly important part of the church service, with the development of the violin family, and sonatas and concertos were displacing occasional motets at Mass. Motets themselves often involved a pair of violins as well as voices. The concertato motet for four to six voices and organ had waned by 1650, leaving chamber-like combinations of solo, duet and trio, with or without violins, as the preferred textures for the Italian motet – a clear parallel with the taste for stage music. With a smaller demand for occasional motets to be sung at Mass, the texts set commonly were the four Marian antiphons for Vespers and Compline.

Important composers of motets in the mid-Baroque period include the prolific Cazzati, best known for his instrumental music written for S Petronio, Bologna: he was one of the few north Italians to write motets in both the archaic *stile antico* and the up-to-date manner. A later Bolognese was G.P. Colonna, some of whose motets include violins (to be expected, in view of the excellence of the Bologna church orchestra). Other notable composers in north Italian cities were Bassani at Ferrara and Petrobelli at Padua, both of whom included instrumental parts in their motets, and Brevi at Milan, who published solo motets of the monodic type. It is interesting that all this published music was modest in its requirements; the large-scale motets were not disseminated through publication, but this is not to say that they were not composed. Intended for special celebrations in individual places, such as that of a church's patron saint, their usefulness was limited and they survive only in manuscript.

The co-existence of old and new ways continued to be a marked feature in Rome: liturgical publications were still distinguished by Latin title-pages. The *stile antico* continued at the principal basilicas, while at the same time, between 1650 and 1680, Foggia and Graziani published many volumes of solo and few-voice motets. The tension between the two styles resulted in a modification of the pure Palestrina idiom by such composers as Benevoli giving a more foursquare phrase structure and introducing major–minor tonality. Some of this type of writing later in the century has been considered almost as pastiche. In some of the motets of Lotti, a prominent Venetian opera and oratorio composer, the updating of the old style is complete: even if the linear treatment of dissonance conformed to 16th-century conventions, chords such as the diminished 7th were introduced.

In the hands of such Neapolitan opera composers as Alessandro Scarlatti, Francesco Durante and Leo, the orchestral motet – in effect a more lavishly scored version of the solo motet with violins – came nearest to the current operatic forms of the day. For example, Scarlatti's *Audi filia*, a festive motet for St Cecilia's Day, has oboes as well as strings in the orchestra and consists largely of elaborate solo sections with a chorus entering only at the end; as in the operatic aria, vocal and instrumental material was closely integrated within a taut ritornello structure. Other motets by Scarlatti make use of distinct recitative and da capo aria schemes, again imported from opera. It was in this flamboyant tradition that Handel participated while in Rome, culminating in his Carmelite music of 1707.

3. GERMANY.

(i) The generation of Schütz. The Catholic regions of Germany showed a clear dependence on Italy in nearly every aspect of sacred music, and the most original development after 1600 in the choral motet was in Lutheran Germany. In contrast to the Calvinist regions of Switzerland and the Netherlands, where psalm settings were the only polyphonic genre (exemplified by Sweelinck's psalm motets), and even England, where the anthem had in effect replaced the motet, by the second half of the 16th century the Lutheran areas had a broadly based motet tradition capable of further development. Three main types had evolved: the motet in free, lightly imitative style ('Liedmotette') with occasional cantus firmus elements (used by Eccard, Hassler and Lechner); the chorale motet in a markedly contrapuntal cantus

firmus style (*see* CHORALE SETTINGS, §I, 2); and the text-motet ('Spruchmotette'), presenting settings of key verses mainly from the Gospels, the Psalter or the *Song of Solomon*. This last type in particular soon gained increasingly in importance since there was a great liturgical demand for music illustrating pithy biblical texts (or 'Kernsprüche', which became a popular title for such collections). This soon led to the publication of sets of Gospel texts covering the church year (for example by Melchior Vulpius, Andreas Raselius, Christoph Demantius and Melchior Franck), and this was echoed in the 18th century by the seasonal cantatas which also chiefly derived their texts from the Gospels. The expressive style of Lassus and his followers (such as Jacob Handl) exerted a greater influence in northern and central Germany than the textually less committed manner of the Palestrina school. This repertory was handed down in printed collections (especially Bodenschatz's *Florilegium Portense*, 1618) and performed well into the 18th century, and the musical-rhetorical principles of the Latin motet (as codified in the numerous treatises on *musica poetica*) was transferred directly to the German text-motet. An important stylistic advance was the inclusion of madrigal elements in early 17th-century music, as shown particularly in motets called 'sacred madrigals', for example J.H. Schein's *Fontana d'Israel/Israelis Brünlein* (1623) and Schütz's *Cantiones sacrae* (1625), but also apparent as early as 1606 in Lechner's *Deutsche Sprüche von Leben und Tod* (MS). One remarkably informative collection, including the most varied kinds of motet-style treatment of a text, is *Angst der Hellen und Friede der Seelen*, published by Burkhard Grossmann in 1623 and consisting of commissioned settings of Psalm cxvi by the most esteemed motet composers of the time: Franck, Nicolaus Erich, Michael Praetorius, Schütz, Schein and Demantius among others. This remarkable volume demonstrates the flexible application of various techniques, ranging from chordal homophony and *falsobordone* to regular points of imitation and more refined contrapuntal intricacies; at the same time it represents a selection of the most characteristic approaches, from the plain concerto manner of Praetorius to the highly individual musical language of the young Schütz. The climax of powerful and vivid musical illustration of text combined with elaborate counterpoint came in Schütz's later works, especially his *Geistliche Chor-Music* (1648), *Zwölff geistliche Gesänge* (1657) and *Deutsches Magnificat* (1671). The *Geistliche Chor-Music* represents the programmatic counterpart to his *Symphoniae sacrae* (see below) in that it is based exclusively on the 'stylus ... without Bassum Continuum' (to quote Schütz's foreword) and incorporates as 'necessary Requisita ... Dispositiones modorum; Fugae simplices, mixtae, inversae; Contrapunctum duplex; Differentia Styli in arte Musica diversi; Modulatio vocum; Connexio subjectorum, etc.'. In the *Geistliche Chor-Music* Schütz forged a motet style that renounces the overemphasis on madrigalisms (which still prevailed in the *Cantiones sacrae*) and aims at a perfect balance between contrapuntal organization and the musical interpretation of the text. His appreciation and treatment of German in terms of a natural prosody is both exemplary and unprecedented. The *Deutsches Magnificat*, one of his very last works, forms the logical conclusion of his late motet style in that it abandons the emphatic accentuation of single words or phrases by rhetorical or other expressive devices in favour of a more detached, harmonically orientated style.

Although the true choral motet figures prominently in Schütz's output, it is outnumbered and dominated by the vocal concerto, which had developed about 1600 as a new branch of the motet in Italy. Giovanni Gabrieli's *Sacrae symphoniae* (1597) and Viadana's *Cento concerti ecclesiastici* (1602) served as starting-points and models for German composers of the vocal concerto. The sacred vocal concerto (*geistliches Konzert*, *Psalmkonzert* etc.) is based on the same repertory of liturgical texts as the traditional motet and follows the same formal (i.e. sectional) organization. The Venetian type of polychoral motet, in which contrasting choirs functioned as heterogeneous elements, with instruments taking a supplementary or complementary role, reached a climax in Germany at the beginning of the 17th century in Praetorius's *Musae Sioniae* (1605–7), Schütz's *Psalmen Davids* (1619) and Samuel Scheidt's many motets for two or more choirs. Because of the great expenditure involved, performance of these monumental works was necessarily restricted to centres with large musical establishments and to special occasions. During the Thirty Years War (1618–48) the use of several choirs became exceptional and then disappeared entirely; it enjoyed only a modest revival in the motets for double choir written in central Germany around 1700 (members of the Bach family composed several such works).

This situation demanded the swift development and dissemination of the concertato solo motet, which was far less demanding and more practical to perform. Originally these *geistliche Konzerte* were written for solo voices and continuo (e.g. Schein's *Opella nova*, 1618–26, or Schütz's *Kleine geistliche Concerte*, 1636–9), representing in effect a reduced form of the polychoral motet. Obbligato instruments were soon added, and a fully independent instrumental ensemble resulted. This development is most clearly seen in the three parts of Schütz's *Symphoniae sacrae* (1629, 1647, 1650), in which various kinds of concerto for both large and small forces were published, and Scheidt's *Concertus sacri* (1622). Implicit in the sacred concerto is a complex range of possible combinations of vocal and instrumental parts in conjunction with the sectional structure of the motet. In the second half of the 17th century this resulted in its being split up into separate units, which in turn led to its developing into independent sections or movements using elements foreign to the motet such as aria, chorale and finally recitative. The cantata derives from this development of the concerted motet. In line with this tradition, J.S. Bach referred both to his early cantata on a purely biblical text, *Gott ist mein König* BWV71 (1708), and to his late parody of Pergolesi's *Stabat mater* as 'motetto'.

(ii) The generation of Bach. No particular Schütz tradition was established in central Germany in the late 17th century. Hammerschmidt, Christoph Bernhard and J.R. Ahle appear in a limited way as followers of Schütz in their motets but could not command his breadth or depth. Within the repertory of concerted liturgical *de tempore* music the small- and large-scale types of *geistliches Konzert* gradually merged into, and were finally absorbed by, the emerging cantata (*see* CANTATA, §II, 5–6). But composition of the choral motet proper continued within the framework of the flourishing Kantorei tradition, especially in Thuringia and Saxony,

where a cantabile and *galant* motet style emerges in the late 17th century in the music of J.C. and J.M. Bach and Pachelbel, influenced by Peranda and other Italian musicians working in central Germany. As the cantata came to the fore the motet was increasingly confined to weddings, funerals and similar special services. Stylistically there was a clear movement towards homophonic textures, above all in the chordally based works for double chorus from the circle round the Bach family. There was a marked preference for a combination of biblical quotation and chorale, also a characteristic of J.S. Bach's work. In the motets of the older Bachs, Georg Böhm, P.H. Erlebach, Sebastian Knüpfer, Johann Schelle and their contemporaries, modern structural elements such as ritornello form and fugal technique appeared. The fact that the ideal of a single musical structure with contrasting, thematically unified sections or parts conflicted with the traditional motet form (whose irregular, sectionalized structure depended entirely on the phrases of the text) clearly hastened the gradual decline of the motet genre.

J.S. Bach's motets represent the culminating point of the genre in the 18th century, though they amount to an insignificant proportion of his total output (seven works: five for double chorus, one each for four- and five-part chorus). They fall entirely within the tradition of the central German motet; this is especially clear in *Ich lasse dich nicht*, which deliberately adopts the middle-German cantabile style. *Fürchte dich nicht*, where there is a chordal opening section with alternating choirs and a fugue with cantus firmus (a simultaneous combination of two different texts and compositional elements), is modelled on a work by Johann Christoph Bach. Peculiarities of Bach's motet composition include an ingenious stratification of the text for reciprocal interpretations (for instance in *Der Geist hilft*, where the first chorus sings 'denn wir wissen nicht, was wir beten sollen' and the second 'der Geist hilft'); contrast of texture; large-scale formal organization (as in *Jesu, meine Freude*, in 11 symmetrical corresponding parts); the 'instrumentalizing' of vocal parts by virtuoso declamation in figurative instrumental style; and the application of contemporary Italian instrumental concerto form (fast–slow–fast, e.g. in *Singet dem Herrn*, which is divided into three such sections). Above all, his works are marked by their close affinity between musical expression and textual meaning. In the motets, unlike the choral cantatas (which are more unified in motif and on a larger scale), textual relevance of the musical material corresponds more openly to the smaller scale of the sectional principle. Nevertheless, the musical underlining of single words or groups of words is clearly integrated in a coherent and unified thematic–motivic context. The interpretation of the meaning and expressive qualities of larger text units rather than single words relates to the ideals of the doctrine of the Affections; it is here that the chief conceptual difference between the motet of Schütz's generation and that of Bach's principally lies.

Most of Bach's motets belong to his first decade in Leipzig, and that accounts for the singular stylistic position occupied by *O Jesu Christ, meins Lebens Licht* BWV118, called 'motet' in Bach's autograph scores, in which the presence of obbligato instruments, not typical of the chorale motet proper, forms a bridge to the chorale concerto and chorale cantata – another example of the interrelation of genres. This is further demonstrated in the fact that motet-like principles predominate in the chorale cantatas (and in others, for example no.106).

Like Bach's, Telemann's small number of motets (some of them of the strict *stile antico* type) are peripheral works: when the rise of 18th-century rationalism led to the decline of liturgical musical traditions, Protestant motet writing died away. But from Bach's successors (Harrer, Doles, Homilius, Kirnberger and J.A. Hiller) some notable compositions appeared, distinguished by their contrapuntal purity and cantabile quality. These stylistic trends were no doubt concessions to prevailing taste, but at the same time they show the influence of a new retrospective orientation (Harrer studied Palestrina; Kirnberger edited works by Hassler): this represents one of the earliest instances of the musical historicism that characterized the 19th- and 20th-century motet.

4. France.

(i) The early 17th century. A conservative style rooted in Franco-Flemish polyphony dominated the French motet in the early 17th century. French composers were reluctant to introduce elements from the *stile concertato* and slow to adopt the continuo in religious music. For Mersenne, the 'impressive harmony and rich counterpoint' of Du Caurroy's motets was such that 'all the composers of France take him for their master'. The motets of Du Caurroy's *Preces ecclesiasticae* (1609) and those of Jean de Bournonville, André Péchon and Charles d'Ambleville exemplified this late Renaissance style, which was not seriously challenged in the first quarter of the century.

By the 1630s the most original motet composer was Guillaume Bouzignac, whose music was not widely disseminated. He wrote over 100 motets. He absorbed Italian and Catalan influences and created a dialogue motet of great dramatic intensity by, for example, juxtaposing solo voice and tutti and by using speech rhythms and textual repetition.

Jean Veillot, Thomas Gobert and Nicolas Formé were concerned in the evolution of the double-chorus concertato motet. Veillot was one of the first to compose independent *symphonies* and to use instruments to double the chorus (*Alleluia, o filii et filiae* and *Sacris solemniis*, for example); all three used the *grand* and *petit choeurs* that became the hallmark of the later Versailles motet. As early as 1646, Gobert noted that the '*grand choeur*, in five parts, is always sung by many voices. The *petit choeur* is composed only of solo voices' (letter of 17 October to Constantijn Huygens). Few double-chorus motets by Formé and Veillot and none by Gobert survive, largely because little original sacred music of the early 17th century was published; for the same reason, the double-chorus motets of Valérien Gonet, Solon and Antoine de Penne, the motets of Cambert and Eustache Picot and the late motets of Moulinié are lost or exist only in fragmentary form.

In the preface to his *Meslanges de sujets chrestiens* of 1658, Etienne Moulinié commented on 'certain passages ... which are rather bold and which may pass for licence in the opinion of those who prefer the austerity of the old style to the *agréments* of the new'. He was presumably referring to those passages for solo voices (*récits*) and chorus that borrow the short phrases, the dance rhythms and even certain roulades from contemporary *airs de cour*. Also new in France in the late 1640s was the use of the continuo in religious music, as in Moulinié's *Meslanges*

and in Constantijn Huygens's *Pathodia sacra et profana* (1647). In 1652 Ballard brought out Henry Du Mont's *Cantica sacra*, with continuo parts printed separately for the first time in France.

(ii) The mid-17th century. Du Mont, a Walloon who arrived in France in 1638, assumed a position in French religious music 'somewhat comparable to that of Haydn in the symphony and the string quartet' (Garros, p.1598). He introduced to France the *petit motet* of one, two or three voices and continuo in collections issued between 1652 and 1671. Here motets with italianate chains of suspensions, light polyphony, 'affective' melodic and harmonic intervals, echo effects, dialogue techniques and word-painting co-exist with motets exhibiting such French characteristics as more syllabic rendering of the text, use of melodies of restricted range and shorter phrases, basic diatonicism and rhythmic organization corresponding to popular French dances.

Du Mont's *grands motets* open the history of the Versailles motet. The repertory of the royal chapel included 31 of his *grands motets* by 1666. 20 were printed posthumously in 1686 'by express order of His Majesty', like the 24 *grands motets* of Pierre Robert (1684) and the 12 of Lully (1684). These formed an impressive repertory for the king's chapel at the time of his move to Versailles. Louis XIV preferred Low Mass. Perrin wrote: 'there are ordinarily three [motets], one *grand*, one *petit* for the Elevation and a *Domine salvum fac regem*' (a motet setting of Psalm xix.10 that served as a salutation to the king and closed both Low and High Mass) (*Cantica pro capella regis*, 1665/*R*).

Structurally the Versailles *grand motet* of this period is an extension of earlier models by Formé and Veillot. It is typically a psalm setting in which the versicles are musically arranged as a series of episodes, incomplete in themselves, for solo voice, ensemble and chorus. The five-part chorus is divided into a *grand* and a *petit choeur*, and the five-part orchestra provides independent *symphonies*, marks important structural divisions, generally doubles the chorus and contributes solo obbligato parts for some of the *récits*. The *grands motets* of the Versailles composers differ only in details. All are very long (Lully's *Te Deum*, for example, has over 1200 bars), all have weighty homophonic choruses with unceasing speech rhythms, often of hypnotic power, and all use melodic formulae and scoring practices found in contemporary stage music and *airs de cour* (for instance, the bass 'doubled continuo' *air*). In effect, the *grand motet* from this period to the Revolution is a secularized 'concert spirituel' without liturgical function.

(iii) The late 17th century. The two composers who best represent the motet in quality and quantity at the turn of the century are Charpentier and Lalande. Charpentier composed *grands motets* for the dauphin's chapel (after 1679), for the Jesuit church of St Louis (1684–98) and for the Ste Chapelle (1698–1704); he wrote *petits motets* for his patroness, Mlle de Guise (after 1673 to 1687), and for various convents. He obviously regarded his oratorios as motets, since he used that title for many of them. Lalande wrote mostly *grands motets*, to be heard by the few attending the king's Mass at the royal chapel and, from 1725, by the crowds at the Concert Spirituel (where one of his motets was usually featured in each programme).

Although profiting from his exposure to music by Carissimi, Francesco Beretta and other Roman composers when he was in Italy, Charpentier's only departure from the French motet tradition seems to be his predilection for four-part rather than five-part textures. His harmonic language is richer than that of his predecessors. He used augmented chords and dissonances, such as the mediant 9-7-♯5 chord, with telling effect. In general, his harmonic vocabulary is conservative; his melodic style derives from the French *air de cour* and from the organic use of such ornaments as *ports de voix* and *coulés*; French dance is an important source for his rhythmic organization; and his textures, though more contrapuntally orientated than Lully's, remain basically homophonic. His *petits motets* are the most important examples of the genre before François Couperin. Many are *élévations* or Marian antiphons; 30 are *leçons de ténèbres*. He preferred either *haute-contre*, tenor and bass or three women's voices for his numerous *petits motets* in trio texture.

Lalande's *grands motets* (about 70 in all) represent the highpoint of the Versailles motet. In many of his later motets (or second or third versions of earlier ones) he expanded the solo and ensemble episodes into autonomous sections, which were often preceded by *ritournelles*; in this respect the *grand motet* came to resemble the German church cantata at the time of Bach. Dubbed a 'Latin Lully' by his pupil Collin de Blamont, Lalande 'humanized' the *grand motet* without compromising its kingly role: that is, he was particularly sensitive to the meaning of the Latin psalm texts and interpreted the words through expressive harmonies and appropriate melodic figures. He converted the stiff, formal solo *récits* of (for example) Lully and Robert into graceful, even *galant*, *airs*, often providing them with a delicate counterpoint through obbligato instruments, for instance using the typical pre-Rameau opera scoring of soprano and flute accompanied by a violin. Lalande made use of massive blocks of sound in the grandiose five-part, homophonic choruses, but also composed fugal choruses of great breadth in which polyphonic tension is strongly maintained, as in the 'Requiem aeternam' in *De profundis*. He used the orchestra more imaginatively than his predecessors, and at times (following the tentative lead of Du Mont) allowed it a degree of independence, freeing it from merely doubling the vocal lines: see, for example, the second version of the chorus 'Vitam petiit' from *Domine, in virtute tua*. These traits, considered 'ingenious disparities' in their day ('Avertissement' to *Motets de feu M. Delalande*, 1729), were no doubt responsible for the great popularity of his motets as concert pieces throughout the 18th century.

During the last two decades of the 17th century many *petits motets* were composed for convents. Those by Nivers and Clérambault for Saint-Cyr are typical: they are scored for two or three voices, and their simple diatonic melodies are laden with French vocal *agréments*. Brossard composed 32 *petits motets*, of which 16 were published in two volumes (1695–8). They were composed for the choir schools at Strasbourg and Meaux; though harmonically conservative, they include original touches, and they have detachable 'Alleluia' or 'Amen' finales should they 'appear to be a little long' ('Avertissement' from *Elévations et motets*, 1695). Brossard also composed three *grands motets* between 1687 and 1698 when he was *maître de chapelle* at Strasbourg Cathedral.

(iv) The 18th century. The Lalande *grand motet* served as both inspiration and obstacle to change for later 18th-century composers. From Campra and Bernier to Michel Mathieu and Giroust, the *sous-maîtres* of the royal chapel were reluctant to alter the basic form of the Versailles motet. Within this tradition, some of the 45 motets by C.-H. Gervais, the three surviving by Collasse, the two surviving by François Pétonille, the six of Minoret, the 11 surviving by Bernier, the *Te Deum* by Collin de Blamont and most of the 26 *grands motets* by Henri Madin ('one of the best motet composers of this century', according to Titon du Tillet) deserve attention. On the other hand, the patina of italianisms brings little life to most of the motets by Lallouette, Courbois, Guignard, Gomay and Gaveau, which remain exercises in the 'old style'.

In Campra's *grands motets* for the royal chapel, composed between 1723 and 1741, there are solemn homophonic choruses, well-planned double fugues and effective ostinato basses as well as virtuoso 'arias', often accompanied with brilliant instrumental obbligatos. Campra and Rameau made a descriptive agent of the motet orchestra in the manner of the large choral-orchestral complexes of their *tragédies lyriques*. In Campra's *Lauda Jerusalem* (1727) and Rameau's *Deus noster refugium* (*c*1714), for example, the violins constantly penetrate the chorus in rapid, concerto-like passages to create exciting 'storm' scenes. Further operatic inroads are found in the opening countertenor *récit* of Rameau's masterpiece, *In convertendo* (1751 version), which resembles an elegiac monologue from *Hippolyte et Aricie* or *Castor et Pollux* and introduces the fluctuating metres of French recitative. Although he held posts as a church musician for 26 years (usually as organist), Rameau composed very little church music. Three of his four *grands motets* were written as concert pieces for the Concert Spirituel and the Lyons Concert.

Boismortier and Blanchard further expanded the role of the orchestra in the *grand motet*, especially with respect to woodwind and brass instruments. Boismortier's *Exaudiat te Dominus* (1730), for example, has parts for piccolo, two oboes, trumpet and timpani; and Blanchard's *Benedicam Dominum* (1757) is scored for flute, two oboes, two clarinets, two bassoons and horn. Elaborate *symphonies* and da capo *airs* assured these works a place in the repertory of the Concert Spirituel along with the nine surviving *grands motets* of Mondonville and 70 *grands motets* by Giroust.

The important *grand motet* composers from the early and middle years of the 18th century continued to dominate the music heard at the royal chapel up to the Revolution. This is verified by a Ballard publication (*Livre de motets pour la chapelle du roy*) of the years 1787–92. The 1792 volume gives a list of titles and texts of motets, presumably those performed at the royal chapel between January and June that year: it includes 14 by Lalande, 13 by Campra, four by Bernier, five by Gervais, 25 by Madin and a few by Devins, Gilles, Joseph Michel and the Abbé Vignot.

The *grands motets* of most Parisian and provincial composers follow the uniform style emanating from Versailles. The early *grands motets* of Henry Desmarets were ghost-written for the mediocre composer Goupillet, a *sous-maître* at the royal chapel. The four late motets stem from Desmarets' years in exile at the court of the Duke of Lorraine. They were composed in an effort to obtain a pardon from Louis XIV and were intended for the royal chapel. These psalm settings (now in *F-Pn*) are long even by the standards of the genre, averaging more than 100 pages each; they include passages of polyphonic concentration rare in French music of the time (for example 'Laboravi in gemitu meo' from *Domine ne in furore*). Gilles composed 12 *grands motets*, some of which remained in the repertory of the Concert Spirituel up to the end of the 18th century. Although they are more intimate in style, and although their solo *récits* and some of their homophonic choruses reflect the asymmetrical phrase groupings of Provençal melody, these works conform in large measure to the Versailles motet. On the other hand, the Tenebrae lessons by Gilles are unique in that they introduce a chorus and instrumental ensemble into a genre that traditionally used only one or two solo voices and continuo.

Composition of *grands motets*, already in decline by mid-century, was sustained (especially for concert performances) by Blanchard, Mondonville and Giroust. Late in the century Marmontel, writing in the 1776 supplement to Diderot's *Encyclopédie* (article 'Concert spirituel'), suggested extracting certain versets from the *grands motets* for separate performance. He realized, however, that even at this late date, the pre-eminence of the *grand motet* at the Concert Spirituel was so great that no deletions would be permitted: 'The difficulty in performing separate movements is the necessity of conquering tradition and perhaps changing public opinion'.

Less governed by tradition than the *grand motet*, the *petit motet* absorbed more and more elements from both French and Italian opera and cantata around 1700. The numerous motets of Daniel Danielis, with their frequent modulations, vocalises and text repetitions, persuaded Le Cerf de la Viéville that the composer was indeed Italian. In the 'Avertissement' to the first book of J.-F. Lochon's motets (1701), the printer Ballard claimed that Lochon 'by his genius has found the secret of uniting Italian design and expression with French delicacy and gentleness'. Campra made a similar claim, apropos his cantatas, seven years later; all four books of his *petits motets* were printed before the cantatas and may be thought of as preliminary studies in the *goûts-réunis*. His third book (1703) includes a motet (*Quis ego Domine*) 'à la manière italienne'; in his fourth, the many da capo *airs*, sequential vocal melismas, triadic melodies and mechanical rhythmic pulsations clearly reveal a debt to the Italian sonata and concerto.

The *petits motets* in two books (1704–9) by Morin and the 12 *Motets à I. II et III voix* by Foliot also combine French and Italian features and, like those of Brossard, may be abridged, 'in order not to prolong the Divine Office' ('Avertissement' to Foliot's collection). The *petits motets* of François Couperin are on a more elevated musical plane, and there is little parroting of Italian devices. For Couperin the *goûts-réunis* consisted of a natural synthesis of French melodic shapes and dance rhythms with Italian vocalises, abrupt changes of tonality and discreet chromaticism. In his three collections of psalm verses (1703, 1704, 1705), Couperin wisely set only the verses best suited to his particularly lyrical, intimate musical style. His masterpieces are surely the three *Leçons de tenèbres* composed between 1713 and 1717 for the convent at Longchamp: nowhere else, except possibly in some of his keyboard pieces, did Couperin

make more effective use of French vocal *agréments* as an organic and expressive part of the musical line.

Like many cantatas and *cantatilles*, some *petits motets* were fashioned for performances by well-known opera singers at the Concert Spirituel and other concerts. Mouret's *petits motets* (published posthumously in 1742) were ideal for this environment (*O sacrum convivium* includes a vocal cadenza); the composer was director of the Concert Spirituel from 1728 to 1734.

Dufourcq (p.109) suggested that the performance of motets at the Concert Spirituel 'might have killed religious music' in France. The French motet had never had a liturgical function, so it was never bound to stay in the sanctuary; but whether or not the lack of a specific function or the new spirit of rationality diminished religious music is immaterial to the fact that the latter half of the 18th century lacked motet composers of the calibre of Charpentier and Lalande.

IV. After 1750

It is impossible to trace any continuous line of development in the history of the motet after 1750. The form never regained the central position it had occupied in the music of the Middle Ages or the Renaissance; nor did it claim the attention of leading composers to the extent it had in the Baroque period. In addition the weight of ecclesiastical tradition kept church music so far removed from stylistic developments in secular music that very few important 19th-century composers were able to write motets in a style that was not to some extent assumed. For this reason the motets of Liszt, Brahms and Verdi, among others, rarely show them at their best or most characteristic. The main concern of the student of post-Baroque motets is to distinguish the form from other sacred pieces closely resembling it, to observe the influences (ecclesiastical as well as musical) that have determined its character and to isolate those composers and those works that have contributed most to the form.

1. LATIN TO 1830. Salzburg and Vienna were the most important centres for the Latin motet during the late 18th century. J.E. Eberlin, who composed over 300 motets, was Kapellmeister at Salzburg from 1749 until his death in 1762, and in Vienna the orchestral motet of the Neapolitan school – represented at its fullest flowering by such prolific and successful motet composers as Hasse and Jommelli – had, even before 1750, been cultivated with notable success by Fux, Caldara and others. The motet figures hardly at all among the extant works of Joseph Haydn, but his younger brother Michael is important both for his own compositions in this form and for the influence that his church music as a whole exercised on Mozart. Like those of Michael Haydn, Mozart's motets are mostly brightly coloured, extrovert works, expressing a resplendent dogma rather than a strongly personal faith. Some use deliberately archaic, Baroque-style, Fuxian counterpoint; most use the harmonic and instrumental textures of the new symphony and call for four-part chorus (SATB) with an orchestra of symphonic proportions. Examples can be found which do not fit this description, but they were mostly written for performance outside Vienna and Salzburg. For example, the antiphon *Quaerite primum regnum Dei* K86/73*v*, written at Bologna in 1770 as part of the required examination for admission to the Accademia Filarmonica, calls only for organ accompaniment from a figured bass. The brilliant motet for solo soprano and orchestra, *Exsultate, jubilate* K165/158*a*, was written for the famous castrato Venanzio Rauzzini and performed by him in Milan in 1773. And the very last motet, *Ave verum corpus* K618, written for the feast of Corpus Christi at Baden in 1791, is exceptional in its intimate, expressive homophony, discreetly accompanied by strings and continuo only. Beethoven's settings of the Roman liturgy are confined to the two great masses, but Schubert's interest in church music extended to the composition of several splendid motets, scored, like Mozart's, for chorus and orchestra and sometimes including parts for solo voices.

2. LATIN, 19TH CENTURY. From about 1830 onwards the influential Cecilian movement sought actively to replace the worldly, symphonic church music of the Viennese school with a 'purer' style, based on the *a cappella* masses and motets of the late Renaissance. In Germany the reforms of Caspar Ett, Eduard Grell (a prolific composer of motets), Carl Proske and others resulted in the formation in 1868 of the Allgemeiner Deutscher Cäcilienverein, presided over by F.X. Witt. Closely bound up with this and similar movements in other countries (notably France) was a renewed interest in the music of Palestrina. Giuseppe Baini's critical biography appeared in 1828, and in 1863 there was initiated the collected edition of Palestrina's works under the editorship of F.X. Haberl, president of the Cäcilienverein from 1899. This had been preceded by a number of important publications of Renaissance music, including *Musica divina* (edited by Proske and Joseph Schrems, 1853–69) and *Trésor musical* (edited by R.J. van Maldeghem, 1865–93). In France, Alexandre Choron's Institution Royale de Musique Classique et Religieuse was founded in 1818 for the performance of Renaissance music and resuscitated in 1854 as the Ecole Niedermeyer. The study of Gregorian chant and 16th-century polyphony was of primary importance in its curriculum. The Société pour la Musique Vocale Religieuse et Classique (founded in 1843) and the Schola Cantorum (1896) likewise encouraged a conservative attitude towards church music.

The effects of these reforms – one of them the composition of a vast quantity of third-rate church music – were felt in all Catholic countries, but it was in France especially that the motet enjoyed an unbroken tradition. Gounod's main contributions to the form are contained in the *Motets solennels* of 1856–66 and the three volumes of *Chants sacrés* (1878), but he also wrote several psalms, hymns and graduals. Franck's *Trois motets* (*O salutaris*, *Ave Maria* and *Tantum ergo*) of 1865 are for solo soprano and baritone, chorus and organ, and he wrote about a dozen similar pieces that could properly be classed as motets. Berlioz's *Tantum ergo* and *Veni creator* and the 20 motets of Saint-Saëns are also noteworthy. Chausson wrote three sets of motets (opp.6, 12 and 16) between 1883 and 1891, and Fauré's religious compositions include a number of motets that reflect the traditions of the Ecole Niedermeyer, where he studied for 11 years.

The ideals of the Cecilian movement also found expression in Liszt's church compositions, most of which contrast sharply with the flamboyant virtuoso piano works by which he is best known. Many of the shorter ones require only chorus and organ; they include an *Ave*

verum corpus, two settings of *O salutaris hostia* (the first dedicated to Haberl) and a *Tantum ergo*, dedicated to Witt. Bruckner also lent at least nominal support to the Cecilian movement, although his own church music was founded on a sincere and direct faith and a reverence for the whole musical tradition that supported it. He revived the style of the Viennese school in his large orchestral masses and *Te Deum* and reached back towards the Venetians of the 16th and 17th centuries in some of his motets. Their archaism leads even to the occasional use of modal harmony (e.g. the Aeolian *Asperges me*, the Phrygian *Pange lingua* and the Lydian *Os justi*), though Bruckner's language in these works is not pastiche. He wrote about 40 motets in all, the majority being either unaccompanied or with only organ in support. They represent a peak in the Catholic motet of the late 19th century attained by no other composer except Verdi, some of whose late motets (*Quattro pezzi sacri*) have much in common with the devout spirit of Bruckner's.

3. PROTESTANT GERMANY. Pursuing a development largely independent of Catholic traditions, the motet of the German Protestant Church was almost as backward-looking in style. Schütz and Bach were to the Lutheran composer what Palestrina and Lassus were to the Catholic. The Protestant motet, with a vernacular text often selected from the Bible, was usually distinguished from the cantata (as it had been by Bach) by its more contrapuntal style and its lack of independent accompaniment. Chorale melodies were often used as a kind of cantus firmus (as in Bach's *Jesu, meine Freude*), and many motets were composed for double chorus (like Bach's *Singet dem Herrn* and some motets by Schütz). The modest achievements of the second half of the 18th century are seen in the motets of Bach's sons Carl Philipp Emanuel and Johann Christoph Friedrich and more particularly in those of his pupils G.A. Homilius (most of whose 60 or more motets date from after 1755) and J.F. Doles (whose motets include 15 for double chorus). Other composers include J.H. Rolle, who wrote more than 60 motets, and J.A. Hiller, whose funeral motet *Alles Fleisch ist wie Gras* was particularly admired.

It was not until well into the 19th century that the Protestant motet again attracted the greatest composers, and even then it rarely inspired their finest works. Mendelssohn wrote both Latin and German motets, but more important are the seven German motets, some to biblical texts, by Brahms (opp.29, 74 and 110) and his three *Fest- und Gedenksprüche* op.109, also to biblical words. These were published in the same year (1890) as the three motets op.110 and, like the first and last of that set, are scored for eight-part chorus, divided into two equal parts. The two earlier sets are deliberately archaic in their use of late Baroque chorale harmony, chorale prelude technique and Bachian counterpoint, and the effect is sometimes rather impersonal. The retrospective elements in the two later sets (e.g. the scoring for double chorus, their indebtedness to the German lied tradition, and the occasional modal harmonies) are more successfully absorbed into the composer's personal style. Composed near the end of the 19th century, they occupy a position in the history of the German motet analogous to that of Verdi's late examples in the much longer history of the Latin motet.

4. 20TH CENTURY. The motet was accorded a place of even less importance in the 20th century than in the 19th, at least by major composers. The *Motu proprio* of Pope Pius X (1903), as well as extolling Gregorian chant and the style of Palestrina as 'the supreme model of all sacred music', specifically laid down that

> the antiphons of the Vespers must be as a rule rendered with the Gregorian melody proper to each. Should they, however, in some special case be sung in figured music, they must never have either the form of a concert melody or the fullness of a motet or a cantata.

The *Motu proprio* was directed mainly against the 'theatrical style, which was in the greatest vogue, especially in Italy, during the last century'. The motets of G.F. Ghedini and Ettore Desderi in Italy and those of Florent Schmitt, d'Indy, Poulenc and Messiaen in France show in varying degrees the effects of Pius X's reforms. Among later composers of Latin motets in Germany were J.N. David, Hermann Schroeder and Joseph Ahrens. The German Protestant motet is best represented by Reger, Arnold Mendelssohn, Heinrich Kaminski, Ernst Pepping and Hugo Distler.

In England the Renaissance conception of the motet as a short *a cappella* composition to a Latin text persisted into the 20th century; very few works, therefore, complement the orchestral motets of the Viennese school or the German Protestant motets of the 19th century. During the 18th and 19th centuries the Latin church music of Tallis and Byrd (like that of Palestrina and Lassus) had not only been cherished by antiquarians but also sung regularly (in translation) in Anglican churches and cathedrals and often reprinted. The Motett Society met regularly in London between 1841 and 1857 to rehearse works by early composers, and they published as 'anthems' with English words motets by Tallis, Byrd, Gibbons, Palestrina, Lassus and Victoria.

In the 20th century Latin motets began to be sung to their original words in Anglican services, but as far as original church music was concerned the motet naturally took second place to the anthem. Stanford's three Latin motets op.38 (1905) – *Justorum animae*, *Coelos ascendit* and *Beati quorum via* – have established themselves in the repertory of most English cathedrals, and Edmund Rubbra (a Roman Catholic) successfully recaptured the flavour of Tudor (and earlier) styles in several of his motet compositions. Bernard Naylor's nine motets of 1952 (to English texts), arranged as a cycle for the nine major feast days of the church year, are a landmark in the development of the motet in England.

Motet-chanson. A French chanson, characteristically in three voices, with a lower voice that carries a Latin text and is usually based on chant. The term is used mainly for the substantial and very successful repertory of such works from the years 1475–1500, particularly by Compère, Agricola and Josquin. Quite often, as in the case of Josquin's *Que vous ma dame/In pace*, the majority of sources carry only the Latin text, so it is likely that this repertory was larger than we now know: several pieces in the early 16th-century manuscript *GB-Lbl* 35087, for example, have the style of the motet-chanson but only Latin text; Obrecht's *Parce Domine* is a notable case.

The term was introduced by Wolfgang Stephan (1937), who distinguished *Motetten-Chanson* from *Liedmotette* ('song-motet'), which he defined as a brief motet with the style and scope of a vernacular chanson (the classic example being Walter Frye's *Ave regina celorum*). But his usage was not consistent; the central and comprehensive statements on the genre are those of Ludwig Finscher, who also notes that there are many similarly designed songs of the 14th and early 15th centuries.

DAVID FALLOWS

Motetus. Medieval term (13th, 14th and early 15th centuries) for the voice immediately above the tenor in motets; it was also used to designate the entire composition, whether it consisted of two or of more voices.

Notre Dame motets developed from some of the discant sections of Notre Dame organa and many of the clausulas. When French poetry began to be applied to their upper voice(s), the voice part above the tenor ceased to be called 'duplum'. All pre-Franconian writers (Johannes de Garlandia, Anonymus 7, Lambertus, Sowa Anonymus, Amerus, Anonymus 4) used the term *motellus*, a Latin diminutive of the French word *mot*, which in the 12th century often denoted a stanza or strophe of French poetry. Probably the invention of short French poems tailored to fit duplum parts of melismatic discant polyphony, as well as the frequent insertion of chanson refrains, caused the change in terminology that eventually gave the genre its name.

In the earliest stages of the motet (e.g. *I-Fl* Plut.29.1), when only Latin texts appear, the compositions were sometimes called 'tropi' or 'prose', and Garlandia and Anonymus 4 used both *discantus* and *motellus* to designate the voice above the tenor in motets. The term *motellus* was soon evidently applied to all such polyphonic compositions, whether the texts were French or Latin. The form *motetus*, which appeared first in Franco's authoritative treatise *Ars cantus mensurabilis* and thenceforth replaced the earlier term, may well have been coined in analogy to *hoquetus*.

ERNEST H. SANDERS

Motif [motive]. A short musical idea, melodic, harmonic, rhythmic, or any combination of these three. A motif may be of any size, and is most commonly regarded as the shortest subdivision of a theme or phrase that still maintains its identity as an idea. It is most often thought of in melodic terms, and it is this aspect of motif that is connoted by the term 'figure'. Thus, for example, in the opening theme of Beethoven's Sonata in E op.109 a case could be argued for either half a bar or one bar constituting a motif, though the latter interpretation would probably be favoured by most listeners, since the two pairs of notes together form an identifiable contour; the two-note members might then be called 'cells' (ex.1).

The rhythmic motif may be defined by analogy with the melodic type: a short, characteristic sequence of

accented and unaccented or short and long articulations, sometimes including rests. Rhythmic motifs may be bound up with a class of melodic ideas (probably the most famous being that in the first movement of Beethoven's Fifth Symphony), or they may exist as rhythmic ideas in themselves, with little or no melodic interest, for instance the Nibelungs' motif from Wagner's *Das Rheingold*, scene iii (ex.2), which is capable of recognizable performance

on unpitched percussion. A repeated harmonic pattern is seldom perceived independently of rhythmic and melodic contours and may hardly therefore be designated 'motif'; however, the harmonic element may contribute potently to a composite motif, as often in the LEITMOTIF of 19th-century opera.

In Riemann's theory of rhythm, motif can take on a purely metric connotation. The principle of *Vierhebigkeit*, or four-bar regularity in phrase structure, enables one to divide the phrase into two 'half-phrases', and to divide each of these into two motifs, each a bar long (Ger. *Taktmotiv*). This kind of subdivision is discussed further in RHYTHM.

Taken in its totality – a combination of melodic, rhythmic and harmonic elements – the motif is the building-block of polyphonic structures, the first and most important of which is THEME. Theme and motif have usually been contrasted, theme being viewed as a self-contained idea, as opposed to the elemental, incomplete nature of the motif. In fact the relationship between motif and theme is analogous to that between theme and an entire movement or composition: in each case the smaller unit is incomplete, yet it has a special identity with important consequences for the shape and structure of the larger.

WILLIAM DRABKIN

Motion from an inner voice (Ger. *Untergreifen*). In Schenkerian analysis (*see* ANALYSIS, §II, 4), a method of PROLONGATION whereby the movement in the upper voice is expanded by the insertion of an ascending line from an inner voice. The simplest function this line can perform is to delay the motion of the upper voice in the opposite direction, i.e. descending, as shown in the first eight bars of Mozart's String Quartet in A K464 (ex.1). Elsewhere it may serve to reinforce a neighbour note that embellishes the URLINIE, as illustrated by Schenker's analyses of Chopin's Etude in A minor op.10 no.2 and the 'St Anthony Chorale' (*Der freie Satz*, 1935, figs.42/1–2). The latter reading is disputed by A. Forte and S. Gilbert in their *Introduction to Schenkerian Analysis* (New York, 1982, p.160); indeed, the concept comes up so infrequently that the generally accepted English equivalent of *Untergreifen*, i.e. 'motion from an inner voice', features more prominently in translations of Schenker's work than it does in more recent analytical writings.

Although a work cannot begin with motion from an inner voice (since before any structurally important note in the *Urlinie* has been established, one cannot identify an inner voice below it), one often encounters a line which ascends by step to the first note of the *Urlinie*; Schenker called such a line an *Anstieg* (*see* INITIAL ASCENT).

WILLIAM DRABKIN

Motive. *See* MOTIF.

Motley, Richard (*fl* London, ?1675–1706). English composer and dancing-master. He was best known for 'Mr. Motley's Maggot', a dance-tune that was popular in the 1690s, which was sometimes called 'The Emperor of the Moon', suggesting that it was used in Thomas D'Urfey's play of the same name (1687, Dorset Garden Theatre). In an advertisement for his *Collection of Ayres* he is described as 'Dancing-Master'. He dedicated its lively, functional dance music 'To the Honourable and Worthy Gentlemen of Shropshire, and All Adjacent Counties', so he presumably came from that area. He was perhaps the 'Mr. Motley' who danced in the court masque *Calisto* (1675).

WORKS

PETER HOLMAN

Moto (It.: 'movement', 'motion'). A word found within the tempo designation *con moto* (with movement) but particularly common as a qualification of another tempo mark: *allegro con moto*, for example, was often used by Haydn and Beethoven; *andante con moto* is less clear in its intention. MOTO PERPETUO (perpetual motion) is found more often as a description or title of a piece comprising an uninterrupted succession of quick notes than as an instruction of any kind. *Moto* is also applied in Italian writings to contrapuntal contexts: *moto contrario* is 'contrary motion'; *moto obliquo* is 'oblique motion'; and *moto retto* is 'similar motion'.

See also TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Moto perpetuo (It.: 'perpetual motion'; Lat. *perpetuum mobile*). A title sometimes given to a piece in which rapid figuration is persistently maintained. Familiar examples include the finale from Weber's First Piano Sonata,

Mendelssohn's op.119 and Paganini's *Allegro d concert* op.11 for violin and orchestra. There are many others for which the exhibition of a performer's digital agility seems the sole justification.

The quality of perpetual (not necessarily rapid) movement has, however, always been a resource capable of yielding valuable results. The continuous forward momentum of many Baroque movements is due to the relentless persistence of a *Gehende-bass* ('walking bass'). Continuous movement is implied in the character of dances like the tarantella, and may justifiably be employed to achieve brilliance in forms like the toccata (e.g. Schumann's op.7) or in the finale of a larger work (e.g. Haydn's String Quartet op.64 no.5). It is used in Chopin's B♭ minor Piano Sonata op.35 to achieve a close of feverish brilliance; Chopin often used effects of perpetual motion in his studies. In song accompaniments, far from being a purely mechanical device, it may appropriately reflect the mood of the verse. The desperation in Schubert's *Erstarrung* (*Winterreise*, no.4) is achieved partly through such means; the momentary cessations of movement in his settings of *Erlkönig* and *Gretchen am Spinnrade*, and in the finales of Beethoven's piano sonatas op.26, op.31 no.3 and op.54, sensitively articulate the design of movements all of which rely heavily on the device of *moto perpetuo*. Johann Strauss the younger wrote his well-known *Perpetuum mobile* op.257 as a 'musikalischer Scherz' ('musical joke').

MICHAEL TILMOUTH

Motown. American record company specializing in black soul music; the name is the registered trademark of the company but has also come to be used as a descriptive term for the associated musical style. The company was founded by BERRY GORDY in Detroit ('motor town': hence the name) in 1959 as Tamla Records, the Motown imprint following in 1961. Subsequent subsidiary labels to Motown included Gordy (1962), Soul (1964), VIP (1964), Rare Earth (1969) and Black Forum (1970). Gordy himself trained all the early songwriters and producers in an attempt to reach both black and white audiences, and quickly achieved hits with the Miracles, the Marvelettes, Mary Wells and Martha and the Vandellas. By 1963 Motown's sales of singles in the USA were exceeded only by RCA and CBS, and soon such artists as Marvin Gaye, the Supremes, Stevie Wonder, the Temptations, the Four Tops and Junior Walker and the All-Stars had been built into superstars.

Motown's distinctive sound developed from a policy of using the same teams of songwriters and producers, the same musicians and the same studio for virtually every recording. Although there was a fair degree of latitude in the realization of this sound from artist to artist, there were a number of important general characteristics. While the basic pulse was always articulated by a variety of instruments (sometimes aided by handclaps and foot stamping rooted in gospel music) and featured prominently in the mix, the backbeat was often minimized. The lead instrument was commonly a non-rock or rhythm and blues instrument such as a bassoon, english horn or vibraphone. The production tended to emphasize the lead singer in the mix with the instrumental accompaniment, blended in a fashion clearly influenced by the dense 'wall of sound' productions of Phil Spector. The high end of the sound register was often favoured as were composite timbres frequently produced by combining up to four sound sources. James Jamerson's bass lines were more tonally developed (involving a high level of chromaticism and passing notes) than many of the time. Lyrics tended to be rich in internal rhyme, alliteration, metaphor and other poetic devices, and songs tended to have multiple hooks.

In 1971 Motown moved to Los Angeles in order to expand into films and enjoyed continued success with Gaye and Wonder, as well as the Commodores, the Jackson 5, Rick James and Lionel Ritchie. However the relocation contributed to the company's losing its focus and consequently, as performers recorded in whatever style was popular at the time, its characteristic sound. In 1988 Gordy sold Motown to MCA records.

ROB BOWMAN

Motsev, Alexander (*b* Lom, 16 Oct 1900; *d* between Lom and Sofia, 24 Dec 1964). Bulgarian music folklorist. He studied music theory with Dobri Khristov and music history, education and aesthetics with Stoyan Brashovanov at the State Music Academy in Sofia, where he graduated in 1925. From 1925 to 1938 he taught music at the gymnasium in Lom; he also produced a dozen operettas and operas (including Gluck's *Orfeo* and Flotow's *Martha*) with an amateur company and formed an amateur choir which gave concerts in Romania and Yugoslavia. In 1938 he moved to Sofia, where he taught as a school music teacher, and from 1942 until 1945 he studied musicology with Erich Schenk in Vienna. On his return he taught in the same Sofia Gymnasium and, for a short time, music history and solfège at the Sofia Music School. Until 1956 he worked as adviser for the Central House of Folk Art in Sofia. He died in a car accident.

LADA BRASHOVANOVA

Motta, José Vianna da. *See* VIANNA DA MOTTA, JOSÉ.

Motte, Diether de la (*b* Bonn, 30 March 1928). German composer and teacher. He studied at the Nordwestdeutsche Musikakademie, Detmold, where his teachers included Wilhelm Maler (composition), Conrad Hansen (piano) and Kurt Thomas (choral conducting), and attended classes given by Leibowitz, Krenek, Fortner and Messiaen at the Darmstadt summer courses. In 1950 he was appointed lecturer at the Evangelische Landeskirchenmusikschule in Düsseldorf, where from 1955 he was also active as a music critic. He was then a reader for the publishing house of Schott (1959–62) before his appointment as lecturer (1962) and later as professor of composition and theory (1964) at the Hamburg Musikhochschule. In 1972 he was elected vice-president of the Freie Akademie der Künste, Hamburg. He has also taught at the Hannover (1982–8) and Vienna (1988–96) Musikhochschulen. Never attached to a particular group or school of composition, he has been decisively influenced by 'singing' music – Gregorian chant, works by Schubert and Berg and music for gamelan. Numerous 'visible music' compositions led him to a new conception of opera in *So oder so*, in which pantomime plays an important role. He is married to Helga de la Motte-Haber.

MONIKA LICHTENFELD

Motte-Haber, Helga de la (*b* Ludwigshafen, 2 Oct 1938). German musicologist. She studied psychology at Vienna University and at Mainz University with Wellek (1957–61); she then studied musicology with Dadelsen and Reinecke at Hamburg University, where she took the doctorate in 1967 with a dissertation on experimental psychological investigations into the classification of musical rhythms. She worked at the Staatliche Institut für Musikforschung in Berlin (1965–72), and in 1971 completed the *Habilitation* in systematic musicology at the Technical University of Berlin. In 1972 she became a research fellow and professor at the Pädagogische Hochschule in Cologne and she was appointed professor at the Technical University in 1978; she is also editor of the *Jahrbuch Musikpsychologie* (together with Günter Kleinen and K.K. Behne) and the series Schriften zur Musikpsychologie und Musikästhetik.

Motte-Haber is known chiefly for her pioneering work in music psychology and for publications on Varèse, the aesthetics of modern music and the impact of the technical reproduction on music reception. A prolific author and well-known editor, Motte-Haber's outstanding reputation as a scholar has aided the acceptance of the discipline of music psychology within the academic community.

HANS HEINRICH EGGEBRECHT/R

Motteux, Peter Anthony [Pierre Antoine] (*b* Rouen, 25 Feb 1663; *d* London, 18 Feb 1718). English writer and playwright of French birth. A Huguenot refugee, he came to London in 1685 and was naturalized a year later. His literary career began with the publication of the *Gentleman's Journal* (1692–4), a monthly magazine catering for a wide range of tastes, which included both comments on music and a music supplement, and which he edited and partly wrote (with unacknowledged borrowings from the *Mercure de France*). In this periodical Motteux offered the classic *apologia* for semi-opera: 'Other Nations bestow the name of Opera only on such Plays whereof every word is sung. But experience hath taught us that our English genius will not rellish that perpetual Singing'. His dramatic works include a number of masques and musical interludes: possibly *The Rape of Europa* (performed with an adaptation of Fletcher's *Valentinian*, 1694), certainly *The Taking of Namur* (1695), *The Loves of Mars and Venus* (with Edward Ravenscroft's *The Anatomist*, 1696), *Hercules* (with his own *The Novelty*, 1697), *Europe's Revels for the Peace* (1697) and *Acis and Galatea* (with *The Mad Lover*, *c*1700) – set mainly by John Eccles (with assistance from Gottfried Finger in *The Loves of Mars and Venus*) – *Britain's Happiness* (1704), set by both Richard Leveridge and John Weldon, and *The Mountebank* (with his own *Farewell Folly*, 1707), set by Leveridge. He also turned John Fletcher's *The Island Princess* (1699) into a very successful semi-opera, set by Daniel Purcell, Jeremiah Clarke and Leveridge.

Motteux was also involved in the first productions of all-sung opera in London. He probably made the English translation of Tommaso Stanzani's *Arsinoe* for Thomas Clayton (1705) and he certainly provided the English texts for Giuseppe Fedeli's *The Temple of Love* (1706), the pasticcio *Thomyris* (1707) and Pietro Ottoboni's *Love's Triumph* (1708). The early London pasticcios are not musically distinguished, but Motteux's skill in concocting plausible plots from parodied texts was considerable, notwithstanding the occasional mismatch of words and music. Once Italian operas came to be performed in their original language, Motteux retired from the theatre and became a merchant. He died in a brothel after 'trying a very odd Experiment'.

MARGARET LAURIE (with CURTIS PRICE)

Mottl, Felix (Josef) (*b* Unter-St Veit, nr Vienna, 24 Aug 1856; *d* Munich, 2 July 1911). Austrian conductor, arranger and composer. He entered the Löwenburg Seminary in Vienna as a boy soprano in 1866, and from 1870 studied theory with Bruckner and conducting with the elder Joseph Hellmesberger at the Vienna Conservatory, composing symphonies, overtures and several operas. Fuelled by Bruckner's enthusiasm for Wagner, he attended many Wagner performances and became choral director of the Akademischer Wagnerverein. In 1876 Mottl was invited by Hans Richter to join the élite 'Nibelungen-kanzlei' who, along with Seidl, Zumpe, Lallas and Fischer, assisted in the first season at Bayreuth. His experiences of Wagner's conducting and interpretations led him to become one of Bayreuth's most dedicated interpreters in the immediate post-Wagner period. He conducted the Bayreuth premières of *Tristan und Isolde* (1886), *Tannhäuser* (1891), *Lohengrin* (1894) and *Der fliegende Holländer* (1901) as well as performances of *Parsifal*, *Die Meistersinger von Nürnberg* and the *Ring*.

For a short time in 1878 he was music director of the Ring-Theater in Vienna, and in 1880 worked with Arthur Nikisch at the Leipzig Opera; in the same year his own opera *Agnes Bernauer* was performed with Liszt's support at Weimar. Mottl's first major appointment, as music director of the court opera in Karlsruhe between 1881 and 1903, earned Karlsruhe the title 'kleine Bayreuth', owing to his exceptional conducting of Wagner's dramatic works from *Rienzi* onwards, especially the *Ring* and *Tristan und Isolde*. He also championed contemporary works and introduced many French composers to German audiences. Berlioz's *Béatrice et Bénédict*, performed in 1888 with his own recitatives, was followed by the first-ever complete production of *Les Troyens* (6 and 7 December 1890). German premières included his friend Chabrier's *Gwendoline* (1889) and *Le roi malgré lui* (1890), Grétry's *Raoul Barbe-bleue* (1890), Cherubini's *L'hôtellerie portugaise* (1893) as well as Handel's *Acis and Galatea*, while his reorchestrated première of Peter Cornelius's *Der Barbier von Bagdad* in 1884 established the previously unsuccessful work as a masterpiece of German comic opera. Mottl also gave the first performances of Schubert's stage works, *Alfonso und Estrella* (1881), *Fierrabras* (1897) and *Die Zauberharfe* (1898). In 1892 he married the opera singer Henriette Standhartner and composed the *Wolfgang Idyll* for the birth of their son Wolfgang in 1894, possibly inspired by Wagner's example.

Mottl enjoyed a high reputation abroad; of his London Wagner concert on 25 April 1894 George Bernard Shaw wrote that 'Mottl is a conductor of the very first rank with immense physical energy and personal influence'. He conducted the *Ring* at Covent Garden in 1898 and 1900, and during 1903–4 was guest conductor at the Metropolitan Opera in New York, where he advised the conductor Alfred Hertz in the successful American première of *Parsifal* (1903) but could not conduct himself owing to copyright disputes with Bayreuth.

In 1903 Mottl assumed his second main appointment, as Generalmusikdirektor of the Munich Opera, and director of the Akademie der Tonkunst. Here he again

raised standards to new heights of excellence, with a repertory that included his own versions of Italian operas by Bellini and Donizetti, and many new works, notably Debussy's *Pélleas et Mélisande*, Strauss's *Elektra*, and premières of Wolf-Ferrari's *I quatro rusteghi*(1906) and *Il segreto di Susanna* (1909), and Pfitzner's *Das Christ-Elflein* (1906). After his first wife Henriette died, he married Zdenka Fassbender who sang Isolde in the fateful 100th performance of *Tristan und Isolde* (his 'musikalische Jugendliebe') during which he collapsed, dying a few days later. Alongside Mottl's outstanding legacy as a conductor, his prolific output of orchestrations, which includes richly scored Romantic lieder as well as many Baroque works, represents a significant source for a study of performing practice at the outset of the modernist era.

WORKS

MALCOLM MILLER

Motto. A term used for a brief phrase or motif that recurs at various points in a work. It may be applied to masses of the 15th and 16th centuries unified by the appearance of the same brief phrase at the beginning of each movement, as in parody masses such as Morales's *Missa 'Mille regretz'* (*see* HEAD-MOTIF). In the 17th and 18th centuries, it is commonly applied to a figure at the beginning of an aria (*see* DEVISENARIE) where the 'motto' is stated by the voice and followed by the opening ritornello, as in 'Lo farò, dirò spietato' in Act 1 of Handel's *Rodelinda* (1725). In music of the 19th century, it may apply to a phrase that dominates a composition or recurs within it, generally appearing at the opening and at decisive moments in the course of the movement or the work: examples are Beethoven's 'Lebewohl' Piano Sonata op.81*a*, Berlioz's *Symphonie fantastique* (where the *idée fixe* may be called a motto) and Tchaikovsky's Symphonies nos.4 and 5.

□

Motz, Georg (*b* Augsburg, 24 Dec 1653; *d* Tilsit [now Sovetsk], 25 Sept 1733). German composer, musician and writer on music. According to an autobiographical statement printed in Mattheson, he studied music at Augsburg under the guidance of Georg Schmezer and completed his schooling at Worms. A journey to Vienna and Baden brought him to the notice of Prince Johann Seyfried of Eggenberg, who employed him at his residence near Graz, and at Ljubljana when his court moved there in the winter. In 1679 Motz made a four-month journey to Venice, Padua, Ferrara, Bologna, Florence, Siena and Rome. On returning to Eggenberg in August he fell seriously ill and decided in 1680 that for health reasons he must leave Styria. He moved to the court of his former employer's brother, Duke Johann Christian, at Krumau (now Český Krumlóv), Bohemia, where he became organist. Because of his Protestant faith, however, he became badly estranged from religious circles there, and he left within a year. He then travelled north, stopping at Hamburg, Lübeck, Danzig and Königsberg, until finally he went to Tilsit, where on 8 May 1682 he was appointed Kantor of the Provincial School. He remained at Tilsit until his death.

Mattheson praised Motz as 'one of the best Kantors in Germany, who may with honour be called a *musicus eruditus*'. None of Motz's music survives, and he is known now exclusively as an effective and outspoken writer opposing critics of church music. His treatise *Die vertheidigte Kirchen-Music* convincingly challenges the denunciation of the use of music in the Protestant church in Christian Gerber's *Unerkandte Sünden der Welt* by showing that both the Bible and Luther strongly supported music in the church. Writing with perception and humour, he made Gerber look ignorant of the very sources he quoted and showed up his pseudo-moralizing about the sins of church music as foolish. His treatise and its continuation of 1708 are important for an understanding of the musico-sociological conflicts arising at the time in the German Protestant church as the impact of secular musical styles became ever more central to concepts of sacred music.

WRITINGS

Die vertheidigte Kirchen-Music oder klar und deutlicher Beweis welcher gestalten Herr M. Christian Gerber ... in seinem Buch, welches er Unerkandte Sünden der Welt nennet ... da er von dem Missbrauch der Kirchen-Music geschrieben zu Verwerfung der musicalischen Harmonie und Bestraffung der Kirchen-Music zu weit gegangen (n.p., 1703)

Abgenötigte Fortsetzung der vertheidigten Kirchen-Music (n.p., 1708)

Grosse unbegreifliche Weisheit Gottes, in dem Gnadengeschencke der geistlichen Sing- und Klingkunst, lost, MS once owned by Mattheson

GEORGE J. BUELOW

Moucqué, Antoine. *See* MOUQUÉ, ANTOINE.

Moud, Henry [Harry]. *See* MUDD, (1).

Moulaert, Raymond (Auguste Marie) (*b* Brussels, 4 Feb 1875; *d* Uccle, Brussels, 18 Jan 1962). Belgian composer, pianist and teacher. He studied the piano and theory at the Brussels Conservatory, but was self-taught in composition. Returning to teach at the conservatory, he remained there for 43 years, most notably as professor of counterpoint (1927–40); he was also professor of harmony and counterpoint at the Chapelle Musicale Reine Elisabeth. He was elected a member of the Belgian Royal Academy in 1955, and in 1958 he received the Prix Quinquennial of the Belgian government. As a composer, he excelled in songwriting, and his best work in the genre (the five cycles of *Poèmes de la vieille France*) recalls Fauré. He wrote for the orchestra in a Bartókian manner, often using variation techniques within strict forms, as in the *Symphonie de fugues*. He edited Lully's *Alceste* (Paris, 1932) for Prunières' complete edition.

Raymond Moulaert's son Pierre (*b* St Gilles, Brussels, 24 Sept 1907; *d* Uccle, Brussels, 13 Nov 1967) studied violin and theory at the Brussels Conservatory, where he was successively professor of solfège (1937) and harmony (from 1964). Coming to composition through practical work for the theatre and the cinema, he remained close to convention in his small production of orchestral (*Séquences*, 1964) and chamber music.

WORKS
(*selective list*)

Orch: Fanfares, 1930; Symphonie de valses, 1936; Tpt Concertino, 1937; Pf Conc., 1938: Rhapsodie écossaise, cl, orch, 1940; Symphonie de fugues, 1942–4; Etudes symphoniques, 1943; Variations symphoniques, 1952

Choral: Poèmes de la vieille France (J. de Meung, B. de Ventadour, C. de Pisane, C. d'Orléans, G. de Machaut, anon.), mixed chorus, 1917, 1920 [arrs. from cycles under Songs]; La lanterne magique (M. Carême), mixed chorus, 1947; Mass, mixed chorus, 1949; Petites légendes: 1 (Carême), 3 female vv unacc., 1950; Petites légendes II (Carême), 3 male vv unacc., 1950

HENRI VANHULST

Moule-Evans, David (*b* Ashford, Kent, 21 Nov 1905; *d* Dorking, Surrey, 18 May 1988). English composer. He gained an open scholarship in 1924 to the RCM, where he studied with Sargent and Howells. He won the Mendelssohn Scholarship in 1929 and obtained a DMus at Oxford in the following year. His Concerto for String Orchestra won a Carnegie Publication Award in 1928, and his Symphony in G (1944) won first prize in the Australian Jubilee Competition in 1952. He wrote a number of substantial orchestral pieces, of which the overture *Spirit of London* (1942), the *Vienna Rhapsody* (1943) and the orchestral poem *September Dusk* (1945) are perhaps the most notable and popular. *The Haunted Place* (1944), for string orchestra, was also well received. Among his chamber works the Violin Sonata in F♯ minor (1956) and the Piano Sonata (1966) are outstanding, and they represent a move away from the straightforward traditional style that had served his more popular orchestral works. He also wrote songs, partsongs and music for many documentary films. In 1945 he joined the teaching staff of the RCM as professor of composition and theory. Serious illness in 1968 brought his composing career to an end, although he continued to teach. His principal publishers are Joseph Williams and Stainer & Bell.

MICHAEL HURD

Moulinghem [Moulinghen, Moulingzen], **Jean-Baptiste** (*b* Haarlem; *d* Paris, 1812). Dutch composer. It is not known whether he or his brother Louis-Charles Moulinghem wrote the symphonies performed at the Concert Spirituel in 1768 and 1769, but judging by the advertisements for their publication which appeared in 1770 it is likely that they were by the elder brother, Jean-Baptiste, 'of the company of the Comédie-Italienne'. Jean-Baptiste was indeed a cellist in the orchestra of the Comédie-Italienne in 1759 and 1760, and was then among the first violins from 1766 until his retirement in 1809; he also played in the orchestra of the Concert Spirituel until 1790. He composed no operas as such, but arranged the vaudevilles of several *opéras comiques* performed during the 1770s. The first three of these had been produced earlier in the Théâtres de la Foire: *Acajou* in 1744, *La servante justifiée* in 1740 and *Les nymphes de Diane* in 1747. The success of such 'vaudeville operas' indicates the persistence of a taste for this genre long after the establishment of 'pièces à ariettes'. The score of *Acajou* is a valuable illustration of the way in which vaudevilles were performed by the Comédie-Italienne.

WORKS

Acajou (oc en prose mêlée de vaudevilles, 3, C.-S. Favart, after Duclos), Paris, Comédie-Italienne (Bourgogne), 19 July 1773 (Paris, 1774)

La servante justifiée (oc, 1, Favart and B.-C. Fagan, after J. de La Fontaine), Fontainebleau, 9 Oct 1773

Les nymphes de Diane (oc, Favart, C.-F. Panard and C.-F. Boizard de Pontau, after La Fontaine: *Les lunettes*), Paris, Comédie-Italienne (Bourgogne), 11 Aug 1774

La bonne femme, ou Le phénix (parodie mêlée de vaudevilles, 2, P.-Y. Barré, J.-B.-D. Desprès, P.-A.-A. de Piis and L.-P.-P. Resnier), Paris, Comédie-Italienne (Bourgogne), 7 July 1776 [parody of C. W. Gluck: Alceste]

MICHEL NOIRAY

Moulinghem [Moulinghen, Moulingzen], **Louis-Charles** (*b* Haarlem; *fl* 1768–85). Dutch composer, younger brother of Jean-Baptiste Moulinghem. Only two biographical facts are known about Louis-Charles: he published a *Sinfonia périodique* in Paris in 1768 and he had settled in Paris by 1785, the publication date of the *Tablettes de renommée des musiciens*. According to Fétis he learnt the violin in Amsterdam and then entered the service of Prince Charles de Lorraine in Brussels as *maître de chapelle*. The titles of his operas come from *Les spectacles de Paris* of 1790.

WORKS

Stage: Horisphesme, ou Les bergers (comédie pastorale mêlée d'ariettes et ornée de danses, 2, Montignac), ?Nantes, ?1771; Les amants rivaux (Montignac), Roubaix, 1772; Les talents à la mode, 1772; Le vieillard amoureux (op, 1), 1772; Clarisse, ou Les ruses de l'amour (intermède, 1, Montignac), Bordeaux, 1773; Le mari sylphe, Nantes, 1773; Le mariage malheureux, 1777; Les deux contrats; Sylvain, collab. Legrand and Davesne

Inst: Sinfonia périodique, E♭ (Paris, 1768)

MICHEL NOIRAY

Moulinié [Moulinier, Moulinière, Molinié], **Etienne** (*b* Languedoc, *c*1600; *d* Languedoc, after 1669). French composer. As a child he sang in the choir of Narbonne Cathedral. In 1624 he came to Paris, where his elder brother Antoine (*d* Paris, 8 Aug 1655) was a singer in the king's chamber. Antoine recognized Etienne's talent and used his influence as a valet and officer in the royal service to assist his career. In 1628 Etienne became director of music to Gaston of Orléans, the king's younger brother, and remained in this post until Gaston's death on 2 February 1660; Gaston was fond of music and particularly of *ballets de cour*. Moulinié wrote both sacred and secular music, for one or more voices unaccompanied or accompanied by either lute or continuo, and also composed music for ballets and dance pieces for other occasions. From 1634 to 1649 he served as music master to Gaston's daughter, Mlle de Montpensier, for whose *Ballet des quatres monarchies chrétiennes* (1635) he composed the solo *airs*. After Gaston's death he received a small payment from his estate, but it was necessary for him at a relatively advanced age to seek new employment. In 1661 he became director of music to the estates of Languedoc and remained so until his death.

Moulinié's many *airs de cour* are typical of the genre in that they are simple, strophic and basically syllabic, but they are unusual in being freer rhythmically. The appearance in print of many *airs* within a single year in three versions – for four voices, solo voice with lute, and unaccompanied solo voice – attests their popularity. In one instance, *Enfin la beauté*, the lute adds a ritornello that is absent in the purely vocal versions, and in another, *D'où sort cette grande clarté*, the vocal part in the version with lute is transposed. Moulinié's skill as a composer is evident in *Quoy faut-il donc vous dire adieu*, where the initial phrase is developed to a degree rare in 17th-century *airs de cour*. The *airs* were so admired that they were used for sacred songs with new texts in *Despouille d'Egypte* (Paris, 1629) and *La philomele seraphique* (Tournai, 1632). Heinrich Albert included *Est-ce l'ordonnance des cieux* in his *Arien*, vii (Königsberg, 1648) with a new German text, *So ist es denn des Himmels Will*, by Andreas Adersbach. Unlike Antoine Boësset, who refused to write *airs à boire*, Moulinié composed about 20 of them in keeping with the pleasure-loving atmosphere at the court of the Duke of Orléans (most are in the third volume of *Airs avec la tablature de luth*, 1629). They include many political allusions and interpolations from the colourful characters who surrounded the duke and were present at his banquets. Their compositional skill, progressive harmonies and free rhythms (close to those of the dance) show that Moulinié endowed his *airs à boire* with an artistic quality equal to that of his *airs de cour*, though this was denied by his contemporaries. Perhaps some of the unusual qualities of Moulinié's *airs* come from his awareness of non-French vocal music, particularly that of Spain and Italy. Spanish song and dance were popular in Paris, but only Moulinié among French composers actually published *airs* in Italian and Spanish. The Spanish songs do not display any features of the *tonada humana*, but one of them, *Repicavan las campanillas*, was copied and adapted by Dutch composers many times and even appeared in greatly revised German versions. The Italian influence on Moulinié eventually proved stronger: all his later compositions, most of which are sacred, include a figured bass, and the polyphonic choral works include some antiphony.

WORKS

Edition: *Airs de cour pour voix et luth (1603–1643)*, ed. A. Verchaly (Paris, 1961) [contains 7 of Moulinié's airs]

Airs avec la tablature de luth, 5 vols. [vol.ii lost] (Paris, 1624–35/*R*)

Airs de cour à 4 et 5 parties, 5 vols. (Paris, 1625–39)

Missa pro defunctis, 5vv (1636); ed. D. Launay (Paris, 1952)

Meslanges de sujets chrestiens, cantiques, litanies et motets, 2–5vv, bc (Paris, 1658); ed. D. Launay and J. Duron (Versailles, 1996)

Airs à 4 parties, bc (Paris, 1668)

Motets offerts à la province de Languedoc (1668), lost

21 airs, 1624[10] (from Airs avec la tablature, i, ii); 10 airs, 6 Sp. songs, 1626[11] (some from Airs avec la tablature, ii); 5 airs, 1 in 1628[10], 1 in Chansons pour dancer et pour boire, iv (Paris, 1630), 1 in 1631[4], 2 in 1633[3]

10 airs, *F-Pn* Rés.Vm[7] 510, Rés.Vma 571

10 sacred contrafacta, 5 in 1629[7], 4 in 1632[3], 1 in H. Albert, Arien, vii (Königsberg, 1648)

Texts of works for which the music is lost survive in P. Perrin: *Les oeuvres de poésie* (Paris, 1661)

Moulton, Dorothy. English soprano, married to ROBERT MAYER.

Moulu [Moullu, Molu], **Pierre** (*b* ?1484; *d c*1550). French composer. He was associated with Meaux Cathedral and the French Royal court. It seems likely from the style and

texts of some of his compositions that he was connected with the French royal court during the first quarter of the 16th century. His five-voice chanson-motet, *Fiere attropos* (a *rondeau*, with the Good Friday antiphon *Anxiatus est in me spiritus meus* as cantus firmus) laments the death of France's sovereign lady, doubtless Anne of Brittany (*d* 1514). Another of Moulu's motets, the four-voice *Mater floreat florescat*, pays tribute to celebrated musicians of the 15th and 16th centuries: the first part of the piece lists composers from Du Fay to La Rue, and ends 'may the incomparable Josquin win the prize'. The second half names younger composers, many of them known to have sung in the French royal chapel, including Longueval, Lourdault [Jean Braconnier], Prioris, the brothers Févin and Mouton. The composition may have been written and first performed for the triumphal entry into Paris on 12 May 1517 of the newly crowned wife of François I, Queen Claude. Six of Moulu's nine surviving chansons are arrangements of monophonic *timbres* that circulated at the French court. In spite of this circumstantial evidence, Moulu is not mentioned in any archival documents of the French royal court or its allied chapels. Richard Sherr has uncovered several references to a 'Petrus Moulu' among the registers of supplication to papal authorities submitted by French monarchs on behalf of certain of their officials. This Moulu, whose profession is not clear from the register, apparently held a clerical post at the cathedral of Meaux between 1505 and 1513, a range of dates that complements the composer's political motets for the French monarchy.

In his dedication to the *Livre des meslanges* (Paris, 1560) Pierre de Ronsard mentioned Moulu as a student of Josquin Des Prez. Whether Ronsard's remark ought to be taken literally or not, Moulu's music does in fact show the influence of Josquin in some important respects. His *Fiere attropos* closely resembles Josquin's *déploration* for Ockeghem in many ways, while his *Missa 'Missus est Gabriel'* reworks Josquin's motet in the manner of a parody mass. In other respects, too, Moulu's music bears dual allegiance to older cantus firmus techniques and comparatively more modern approaches to imitative writing and musical form. His best-known mass, the *Missa 'Alma Redemptoris mater'* (paraphrasing the Marian antiphon) is composed so that it can be performed either as it stands or by omitting all of the rests longer than a minim. His multi-voiced chansons, printed in the self-consciously archaic *Livre des meslanges*, favour double canons and other contrapuntal complexities. His three-voice chansons, by contrast, represent a transitional phase of compositional practice. Those pieces found in Antico's *Couronne et fleur* of 1536, for instance, reveal a conservative approach to borrowed melodies (which appear in the tenor part, surrounded by often melismatic parts) joined to a decidedly more modern formal vocabulary, which in its sectional divisions and attention to poetic design and syntax looks to Claudin de Sermisy's music for its inspiration.

WORKS

Editions: *Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535*, ed. A. Smijers and A.T. Merritt (Monaco and Paris, 1934–64) [SM]

HOWARD MAYER BROWN/RICHARD FREEDMAN

Mounsey, Ann (Sheppard) [Mrs Mounsey Bartholomew] (*b* London, 17 April 1811; *d* London, 24 June 1891). English composer, organist and teacher. At the age of six she became the pupil of Johann Bernhard Logier. In 1820 she attracted the interest of Spohr, who published her harmonization of a melody in his autobiographical account of a visit to Logier's academy. She later studied with Samuel Wesley and Thomas Attwood. In 1828 she was appointed organist at Clapton and four years later

Ann Mounsey: lithograph by Isaac Wane Slater after Joseph Slater jr from 'The Musical Keepsake' (1834)

became an associate of the Philharmonic Society. Her earliest known work was the ballad *Mary meet me there* (1832). In 1843 she gave the first of six series of Classical Concerts, at Crosby Hall, London. She became a friend of Mendelssohn and on 8 January 1845 gave the première of his anthem *Hear my prayer*, composed for her Classical Concerts. In 1853 she married William Bartholomew, a translator and adapter of librettos for Mendelssohn, and in the same year composed the oratorio *The Nativity* op.29, which was performed on 17 January 1855 under the direction of John Hullah at St Martin's Hall. Mounsey was well known in London as a teacher and organist; she published a sacred cantata, *Supplication and Thanksgiving* (1864), more than 100 songs, 40 partsongs, several hymns, and many works for the piano and for the organ. Her lieder settings include Goethe's *Erlkönig* and *Kennst du das Land*.

Her sister, Elizabeth Mounsey (*b* London, 8 Oct 1819; *d* London, 3 Oct 1905), was also an organist and composer. They collaborated in the publication of *Sacred Harmony* (London, ?1860) and *Hymns of Prayer and Praise* (London, 1868). Elizabeth also composed works for the organ, the piano and the guitar.

JANE A. BERNSTEIN

Mountain dulcimer. *See* APPALACHIAN DULCIMER.

Mount Edgcumbe, Richard, 2nd Earl [Edgcumbe, Richard] (*b* Plymouth, 13 Sept 1764; *d* Richmond, Surrey, 26 Sept 1839). English opera enthusiast and amateur composer. On his father's death in 1795 he was elevated to the peerage and became Lord Lieutenant of Cornwall. He attended the King's Theatre, London, from the age of nine, and acquired sufficient musical skill to compose an opera, *Zenobia*, to a text by Metastasio, which the prima donna Brigida Giorgi Banti performed at her benefit performance at the King's Theatre on 22 May 1800. His later claim that he withdrew the work after this sole performance because it was intended for Banti's exclusive use suggests limited success.

Mount Edgcumbe recorded his experiences in *Musical Reminiscences of an Old Amateur Chiefly Respecting the Italian Opera in England for Fifty Years, from 1773 to 1823* (London, 1824). Subsequent editions (1827, 1828, 1834/*R*) extended the period under discussion, the last including a section on the Handel Festival held in Westminster Abbey in 1834. Frequently his own eyewitness account, the *Reminiscences* are a valuable complement to contemporary British writings such as those of Charles Burney and William Parke. Mount Edgcumbe's tastes were formed during the late 1770s and early 1780s and were reinforced during his European tour of 1783–5, when he visited Vienna and various Italian cities (he again travelled abroad in 1802). His vivid descriptions of the leading singers of the age, several of whom he knew personally, shed light on matters such as the allocation of roles. No performers met his criteria of tone, technique, variety of expression, and tasteful use of ornamentation more than Banti and the castrato Gasparo Pacchierotti, in works by Bertoni, Bianchi, Gluck, Nasolini, Paisiello, Sacchini and others. Weak singers recieved withering criticism. During the 19th century Mount Edgcumbe perceived social changes in the audiences at the King's Theatre and he considered raised prices, caused by increases in singers' fees, responsible. He blamed Rossini's works for undermining the golden age of opera, lamenting the popularity of *pezzi concertati*, the neglect of Metastasian conventions, and changes in vocal styles. The appearance of Velluti, the last great castrato, in 1825 receives particular note. By now Mount Edgcumbe was an infrequent visitor to the theatre, relying on William Ayrton for information. Among the last operas he saw was Beethoven's *Fidelio*, which he admired, performed by a German company including Wilhelmine Schröder-Devrient, in 1832. Nostalgic for a bygone age and conscious that his views would be deemed old-fashioned, he found little other than John Braham's singing to praise in the Handel Festival of 1834.

GEORGE BIDDLECOMBE

Mouqué [Moucqué, Mocke, Mocqué], **Antoine** (*b* Ostend, 1 Aug 1659; *d* Ostend, 23 Aug 1723). Flemish composer, organist and singer. He began as a choirboy at the principal church of Ostend, St Petrus-en-Paulus, and in 1677 became a salaried singer there. He had meanwhile completed his studies in the humanities with the Oratorian fathers at Ostend. On 9 August 1680 at Leuven he became a novice in their order, but he soon left to go to Bruges as a vicar and substitute organist at St Donaas. In 1689 he was again mentioned as a salaried musician at St Petrus-en-Paulus, and on 27 April 1691 was appointed *phonascus* there. He remained in this post until his sudden death, though there was in theory a break in his service from 16 July 1706 to 6 August 1709. On 20 September 1692 he was ordained a priest at Bruges. In 1711 he was asked to go to Antwerp to try out the new carillon for Ostend and in 1722 to go to Bruges to test the new clock for the market tower. No music by him has survived, though he

appears to have been a prolific composer. The Ostend town accounts show that between 1690 and 1719 he was paid nine times for church compositions, including three masses and a collection of carols, which he dedicated to the magistrate. Works by him are also listed in four 18th-century inventories of music belonging to the principal churches of Oudenaarde (1734 and 1752), Ostend (1747) and Ghent (1754). These include an 'Opus Soloon', a Passion with Lamentations, an antiphon with *Magnificat*, a *Salve regina* and a *Regina coeli*. In 1706 Etienne Roger of Amsterdam advertised a printed collection of motets by him for one to five voices and instruments. His name also appears with those of Corelli, G.B. Vitali and others in a privilege dated 1695 awarded to the Bruges printer François van Heurck. Swert called him 'a famous musician very well versed in every sort of instrumental music'.

GODELIEVE SPIESSENS

Mouret, Jean-Joseph (*b* Avignon, 11 April 1682; *d* Charenton, 20 Dec 1738). French composer. He was the son of an Avignon silk merchant, Jean-Bertrand Mouret, and his wife, Madeleine Menotte. Durey de Noinville related that the father, an amateur violinist, saw to it that Mouret 'perfected himself in the art of music'; it is reasonable to assume that he was trained at the choir school of Avignon's Notre Dame des Doms, where the young Rameau was appointed temporary organist in January 1702.

The Parfaict brothers indicate that he was employed in Paris as *maître de musique* by the Marshall of Noailles from 1704, but most later sources follow Titon du Tillet, who believed that Mouret established himself in Paris in 1707. Titon du Tillet called attention to Mouret's personal charm and excellent singing voice – assets that enabled him to move with ease in 'the best society'. At the time of his marriage to Marie Prompt in 1711, Mouret was *ordinaire de la musique* for the Duke of Maine, Louis XIV's son by the Marquise de Montespan, at Sceaux. Mouret later became *surintendant de la musique* there. Along with Nicolas Bernier, Marchand, Thomas-Louis Bourgeois, Colin de Blamont and Courbois, he composed the music for the Duchess of Maine's celebrated 'Grandes Nuits' (1714–15).

Mouret's first opera, *Les fêtes, ou Le triomphe de Thalie*, was given at the Paris Opéra on 19 August 1714 and, according to Titon du Tillet, had a 'prodigious success'. That same year he was appointed director of the orchestra of the Opéra, a post he held until 1718. By 1716 he was composing divertissements for Dancourt's comedies at the Comédie-Française. The following year he was appointed composer-director of the Comédie-Italienne (Nouveau Théâtre Italien), where he was to compose approximately 140 divertissements over the next 20 years. Mouret was living then with his wife and daughter 'beside the Café de la Régence' on the Place du Palais Royal, where they stayed until 1734. In 1718 he obtained a royal privilege to publish his own music. This was renewed the year he died. On 20 February 1720 he became an *ordinaire du Roy* as a singer of the king's chamber. Many of his motets, cantatas and *cantatilles* were composed for performance at the Concert Spirituel, which he headed as artistic director from 1728 to 1733. If frequent mention in the influential *Mercure de France* is to be taken as measure, Mouret was the most popular composer of the Regency (1715–24).

It is thus surprising to realize that his popularity was ephemeral, and to find that he was quickly stripped of income and prestige. The difficulties of his last years were partly actuated by the interminable financial and legal problems attendant on his directorship of the Concert Spirituel. When in December 1734 the Académie Royale de Musique took over administration of the Concert Spirituel, Mouret lost his position to Jean-Féry Rebel. After the death of the Duke of Maine in 1736, Mouret was no longer retained at Sceaux, and in 1737 he lost his post at the Comédie-Italienne. In four years he was left essentially without employment and dependent on the kindness of such friends as the Prince of Carignan who gave him a pension of 1000 livres. The first signs of Mouret's insanity were noted in 1737, and on 14 April 1738 he was sent to the Fathers of Charity at Charenton, where he died eight months later.

Mouret shared in the innovating spirit that characterized the best in French stage music between Lully and Rameau. His *Le mariage de Ragonde* is a true lyric comedy composed more than 30 years before Rameau's *Platée*. In his *opéra-ballet*, *Les fêtes ou Le triomphe de Thalie*, the humiliating defeat of Melpomene (muse of tragedy) by Thalia (muse of comedy) in the prologue, which the librettist La Font boldly set on the stage of the Paris Opéra, resulted in a *succès de scandale*. Pressure obliged the authors to remove the heretical 'Triomphe de Thalie' from the title and to add a new entrée ('La critique des fêtes de Thalie') in which La Font 'assigned all the merit of its success to the music and dance' (preface). Although Loewenberg was wrong to claim that *Les fêtes de Thalie* was the first work to introduce comedy into the sphere of French opera (see for example Campra's *Les fêtes vénitiennes*, 1710) it does eschew mythology and allegory, dealing instead with flesh and blood characters – soubrettes and coquettish widows – who were dressed, for the first time according to the libretto, 'à la françoise'. 'La Provençale', a new entrée added in 1722, even makes use of popular meridional tunes sung in Provençal dialect and local instruments from the Midi.

Mouret's melodic gifts earned him the posthumous title of 'musicien des grâces'. They may be seen to better advantage in the music of *Les fêtes de Thalie*, *Les amours de Ragonde* and the divertissements of the Comédie-Italienne than in his more pretentious (and less successful) *tragédies lyriques* and *ballets-héroïques*. There is simplicity and naturalness in the former music that avoids triteness through asymmetrical phrase-groupings and rhythmic contrasts. There is also keen observation of the entire spectrum of French stage music resulting in a highly developed sense of musical gesture; in *Le procès des théâtres* (1718), for example, Mouret's music characterizes the quarrelsome protagonists in the battle for supremacy in the theatrical world.

Mouret's motets, cantatas and *cantatilles*, designed for specific vocalists and solo instrumentalists at the Concert Spirituel, have a superficial elegance which is exemplified in the extended vocalises of the Alleluia finales to many of the motets (*O sacrum* even has a soprano cadenza). Only in the *Cantemus Domino* and in the poignant 'Ora pro nobis' of the *Regina coeli* does the music illuminate the text. In the cantatas vocal display is modified on occasion by rustic simplicity ('Mes moutons ne sont plus l'élite' from *L'absence*) and moments of true operatic intensity (the sea monster scene from *Andromède et Persée*).

The *Suites de symphonies* by Mouret and similar works by Jacques Aubert and Etienne Mangeant moved the small ensemble in France closer to an orchestral concept through their use of specific instrumentation. Dating from 1729, Mouret's *Suites* gave unusual attention to combinations of timbres. The first suite is scored for trumpet in D, first and second violins, oboes, bassoon, double bass and timpani; the second suite, a 'joyeuse musique de table', contains nine binary dances; the instrumentation, clearly indicated, exploits colour contrasts between horns and strings.

WORKS

printed works published in Paris unless otherwise stated

STAGE

first performances in Paris unless otherwise stated

Les fêtes ou Le triomphe de Thalie (opéra-ballet, prol, 3 entrées, J. de La Font), Opéra, 19 Aug 1714 (reduced score, 1714; 2/1720 as Les fêtes de Thalie); new entrées: 9 Oct 1714 (1714); 12 March 1715 (1715); 17 Sept 1722 (1722); *F-Pn*, *Po*

Le mariage de Ragonde et de Colin, ou La veillée de village (comédie lyrique, 3, P. Nericault–Destouches), Sceaux, Dec 1714 (1738); rev. as Les amours de Ragonde ou La soirée de village, Opéra, 30 Jan 1742 (reduced score, 1742); vocal and inst pts, *Po*

Ariane (tragédie lyrique, prol, 5, P.-C. Roy and F.-J. Lagrange-Chancel), Opéra, 6 April 1717 (1717)

Pirithous (tragédie lyrique, prol, 5, J.-L.-I. de La Serre), Opéra, 26 Jan 1723 (1723)

Les amours des dieux (ballet-héroïque, prol, 4 entrées, L. Fuzelier), Opéra, 16 Sept 1727 (reduced score, 1727)

Le prince de Noisy (divertissement for a comedy by d'Aigueberre), Théâtre Français, 1730 (*c*1730)

Le triomphe des sens (ballet-héroïque, prol, 5 entrées, P.-C. Roy), Opéra, 29 May 1732 (1732); new entrées: 8 July 1732; 14 Aug 1732

Les grâces (ballet-héroïque, prol, 3 entrées, Roy), Opéra, 5 May 1735 (reduced score, 1735)

Le temple de Gnide ou Le prix de la beauté (divertissement, 1, Bellis, Roy); Opéra, 31 Nov 1741 (reduced score, 1742)

Recueil des divertissements du Nouveau Théâtre Italien, augmenté de toutes les symphonies, accompagnements, airs de violons et de flûtes, de hautbois, de musettes, airs italiens et de plusieurs divertissements qui n'ont jamais paru (*c*1737) [divertissements for 140 plays; contents in Viollier 1950/*R*]

Divertissements for 9 comédies françaises, *Pcf*

VOCAL

Motets, 1–2vv, insts (1742): Usquequo Domine, Regina coeli, Quemadmodum, Nunc dimittis, Cantate Domino, O sacrum, Benedictus, Laudate nomen Domini, Cantemus Domino, Venite exultemus Domino

Cantates françoises, 1v, insts, livre premier (*c*1718/*R* in The Eighteenth-Century French Cantata, v (New York, 1990)): Andromède et Persée, ed. R. Blanchard (Paris, 1973); L'absence; La naissance du bal, L'heureux hazard

Cantatilles françoises, 1v, insts (n.d.) [also pubd separately]: Eglé; Hymne à l'Amour; Echo; Léda; L'Amour vainqueur; Thétis; Le raccomodement; Epitalame [also pubd as L'amour et l'hymen]: all repr. in The Eighteenth-Century French Cantata, v (New York, 1990)

L'été, cantatille, *F-Pn*

Amour, tout l'univers soumis à ton empire, cantatille, *Pc*

[19] Airs sérieux et à boire, 1–2vv, acc. (1719)

Second recueil d'[19]airs sérieux et à boire, 1–2vv, acc. (1719)

IIIme livre d'(20]airs sérieux et à boire, et de plusieurs parodies bachiques, 1–2vv, acc. (1727)

3 airs, S, B, bc, *A* 1171

Airs, cantatas, cantatilles and sacred contrafacta in over 50 18th-century anthologies, incl. Recueil des divertissements pour le Nouveau Théâtre Italien (Paris, 1713–37); Meslanges de musique latine, françoise et italienne (1725, 1729), 1 air, ed. in Le pupitre, vi (Paris, 1968); Nouveau recueil de chansons choisies (The Hague, 1723–43); Nouveau Théâtre de la Foire (1758); Nouvelles poésies morales (1737); Nouvelles poésies spirituelles et morales (1730–37); Recueil complet de vaudevilles et airs (1755); Ballard's Recueil d'airs sérieux et à boire (1711–18); Recueil de chansons nouvelles et vaudevilles (1737); Le Théâtre de la Foire ou L'Opéra Comique (1721–34); Le Théâtre de M. Favart ou Recueil des comédies, parodies et opéras comiques (1763–72); for others see *RISM*

INSTRUMENTAL

Fanfares, tpts, timbales, vns, obs, avec une suitte de simphonies mêlées de cors de chasse ... livre second (*c*1729); ed. R. Viollier (Paris, *c*1937) and M. Sanvoisin (Paris, 1970)

Concert de chambre à deux et trois parties, vns, recs, obs, suivi d'une suite d'airs à danser ... premier livre (1734)

Concert de chambre à deux et trois parties ... second livre (1738)

[6] sonates à deux flutes traversières ... premier livre (1725); ed. R. Viollier (Wilhelmshaven, 1975)

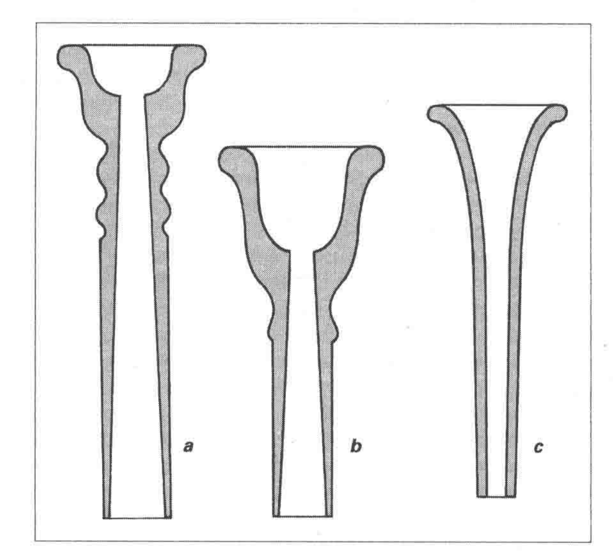
Mouth organ. A free-reed aerophone typically consisting of a wind-chest penetrated by one or more tubes, each fitted with a FREE REED of metal or bamboo. Because of the widespread use of Western free-reed mouth organs, called variously harmonica (*see* HARMONICA (i)), French harp and mouth harp, such instruments are known worldwide, but they probably originated in mainland South-east Asia or southern China during prehistoric

times. In addition, they are related to other Western free-reed instruments, including the REED ORGAN (harmonium) and all types of accordions.



Within Asia five kinds of free-reed mouth organs are distributed from Japan to Thailand and from Bangladesh to Borneo. The two best-known types are the Chinese SHENG (Japanese SHŌ; Korean SAENGHWANG), with a bowl-shaped wind-chest of wood or metal and 17 or more graduated pipes arranged in a circle, and the Lao/north-east Thai KHÆN (khene), with 6, 12, 14, 16 or 18 bamboo pipes arranged in raft form with a carved wooden wind-chest. The Hmong in Laos, northern Thailand, and southern China use a mouth organ with six tubes (*gǣng* or *geej*), five with a single free reed, one with three (*lu sheng*). Both Tibeto-Burmese and Mon-Khmer upland groups in the mainland and certain peoples in Borneo use similar instruments with gourd wind-chests (e.g. *sompotan*, *dding*, *engkerurai komboat*, *naw*). Individual free-reed pipes, with or without a gourd wind-chest, are also widespread, the latter found chiefly in Myanmar, the former in northern Thailand, among the Hmong, Phuthai and Khmer. Related to mouth organs, buffalo horns with a metal free reed on the concave side are found chiefly among the Karen of Myanmar, but they are also known to the Lao and Khmer. For further information see T. Miller: 'Free-Reed Instruments in Asia: a Preliminary Classification', *Music East and West: Essays in Honor of Walter Kaufmann*, ed. T. Noblitt (New York, 1981), 63–99.

For illustration *see* REED INSTRUMENTS.

TERRY E. MILLER

Mouthpiece (Fr. *embouchure* [of clarinets and saxophones, *bec*]; Ger. *Mundstück*). That part of a wind instrument which is placed in or against a player's mouth, and which, together with the lips or a cane REED, forms the sound generator.

In brass instruments (including side hole types) it is roughly bell-shaped but is often much modified by external ornament. Internally it has three important elements: the cup (Fr. *bassin*); the throat (Fr. *grain*) (or orifice at the base of the cup); and the backbore (Fr. *queue*) (or expansion) which leads to the main tubing. All three have much influence on the characteristic tone and behaviour of the instrument (*see* ACOUSTICS, §IV). The cup varies from shallow hemispherical to deeply conical. The throat may be relatively large, small, sharp-edged, rounded off, or, in such as the horn, virtually non-existent. (This applies also to the backbore.) The rim applied to the lips varies according to individual convenience.

Mouthpieces of (a) a trumpet, (b) a trombone, (c) a horn

In clarinets and the like the mouthpiece is roughly conical externally for some two-thirds of its length, after which it is obliquely chamfered off to a chisel-shaped tip (*see* CLARINET, fig.3). Opposite the chamfer is a flat table tangential to the surface, and against this the flat reed is placed. The table is slightly curved towards the tip and this 'lay' allows the reed to vibrate under the influence of the breath and control of the lips. In the upper part of the table is a rectangular or keystone-shaped slot through to the interior. The internal 'tone chamber' may be a simple extension of the main bore of the instrument or it may be enlarged or contracted in various ways which have much influence on the tuning and tone quality of the instrument. Such mouthpieces are today made of wood, plastic, metal or glass.

PHILIP BATE/MURRAY CAMPBELL

Mouton, Charles (*b* Paris 1617; *d* before 1699). French lutenist and composer. His mother's family included musicians, one of whom had a career at court. By the mid-1640s Mouton was being lionized by Parisian literary society, to which he may have been introduced by the Gaultiers. Around 1664 he was still in Paris, teaching a number of well-placed pupils. In 1673 he directed the lutes and theorbos in an entertainment at the court of Savoy in Turin. From at least 1680 he was back in Paris, where he published his two surviving books of *Pièces de luth sur différents modes* (Paris, before 1679, *c*1680; ed. in Corpus des luthistes français, Paris, 1992), and where his pupils included Milleran and Le Sage de Richée. The famous portrait by François de Troy (in the Louvre) was painted in 1690. Mouton represents, with Jacques Gallot, the final flowering of the French lute school. His first book contains an important *Avertissement* on the performance of his pieces.

DAVID LEDBETTER

Mouton [de Holluigue], **Jean** (*b* ?Samer, before 1459; *d* St Quentin, 30 Oct 1522). French composer, one of the most important writers of motets of the early 16th century.

1. LIFE. His epitaph, now lost but formerly in the collegiate church of St Quentin where he was buried, is said to have given his full name as 'Maistre Jehan de Hollingue, dit Mouton'. Other spellings of his surname, together with contemporary references to him as 'Samaracensis', suggest that his family originally came from the hamlet Holluigue [now Haut-Wignes] near Samer. In 1507 he was identified as the eldest son of Jehenne le

Maire (by the then wife of Anthoine Larde) in a document concerning their sale of a house located next to the marketplace in Samer. Nothing is known of his education or other activities prior to his appointment as a singer and teacher of religious subjects (*écolâtre-chantre*) in the collegiate church of Notre Dame in Nesle (near Péronne) in 1477. By 1483 he had become *maître de chapelle* in Nesle and had also been ordained a priest; thus he was probably at least 25 years old. How long he stayed in Nesle is not clear. Recent archival researches by Andrew Kirkman have revealed that Mouton was paid for copying music and as a singer at the cathedral of St Omer in 1494–5. By 1500 he was in charge of training the choirboys at Amiens Cathedral, where a document from early that year lists him as *maistre des enffans* and one of the organizers of a performance of a mystery play.

In September 1501 he took charge of music in the collegiate church of St André in Grenoble, where his duties included teaching choirboys plainchant and polyphony. He did not stay there long; by the middle of 1502 he had left without the permission of the chapter. Possibly it was at this time that he joined the chapel of Queen Anne of Brittany, as she and her husband, Louis XII, visited Grenoble in June 1502 and may have taken Mouton with them when they departed. Records from Anne's chapel do not survive, but other evidence proves that Mouton entered her service during the first decade of the 16th century. In 1509, when the queen interceded personally on Mouton's behalf to obtain for him a position as canon at St André in Grenoble, he was identified as a singer in her chapel. By holding this canonicate *in absentia* he was enabled to draw income from a benefice conferred on him the following year, at which time he was described as her *magister capellae* (facs. in *MGG1*).

Mouton remained attached to the French court for the rest of his life. After Anne's death in 1514 he was transferred to the king's musical establishment, where he served first Louis XII and then his successor François I. Although never appointed head of the *chapelle royale* (a position held from 1515 until about 1522 by Antoine de Longueval), Mouton seems to have functioned as the official court composer during much of this time, writing music to celebrate important events both public and private. For example, his motet *Non nobis, Domine* marked the birth in 1510 of Renée, second daughter of Anne and Louis XII, and his moving *Quis dabit oculis* laments the queen's death, setting texts used in her funeral sermon. Mouton's position is further revealed by a letter written in 1518 by the Duke of Ferrara's representative at the French court, reporting that he was temporarily unable to send the duke any new compositions by Mouton, since the composer had shortly before returned to Paris from Amboise in order to compose new music in honour of the birth of the Dauphin (this music apparently has not survived). And one of Mouton's motets for St John the Baptist (*Inter natos mulierum* or *Regem confessorum*) may have been ordered by Anne to commemorate the saint in 1506, after she had been cured of an illness, ostensibly by application of one of his relics.

The text of *O Christe redemptor*, with its closing salutation, 'fit regi felicitas, reginae fecunditas', strongly implies that it was written as the result of a royal commission, perhaps in 1513. Lowinsky proposed that *Missus est Gabriel angelus/A une dame* was written for the entry of Louis XII's second wife, Mary Tudor, into Paris on 6 November 1514, but more recently Braas has argued that this work was written neither by Mouton nor by Josquin, to whom it is also ascribed. After Louis XII died on 1 January 1515, records show that Mouton took part in his funeral service, but no special music composed by him for the event has yet been identified. Mouton's motet *Domine, salvum fac regem*, on the other hand, is likely to have been composed for the coronation of François I in Reims Cathedral on 25 January 1515.

During his first year as king, François won a notable victory at the battle of Marignano, an event celebrated in Mouton's *Exalta regina Galliae*. Several months later, in December 1515, François and Pope Leo X met in Bologna to discuss peace. The meeting was enlivened by many musical performances by both the papal and the royal chapels, almost certainly including Mouton's *Exsultet conjubilando Deo*. The pope was very favourably impressed by the musicians in the king's service, and he rewarded some of them, including Mouton, whom he named an apostolic notary. A number of 16th-century sources stress that Mouton was one of Leo's favourite composers: Glarean, for example, who studied in Paris between 1517 and 1522 and knew the composer, stated that Leo was fond of Mouton's masses. The pope's acquaintance with Mouton's music may well have antedated their meeting in 1515, if the motet *Christus vincit* was indeed written in honour of Leo's election as pope in 1513; the choirbooks of the papal chapel already contained a number of his works. Lockwood has shown not only that Mouton travelled to Italy in late 1515 as part of François's retinue, but also that music by him and many other northern musicians enjoyed extensive distribution there at about this time, whether or not a particular composer actually made a trip southward. Recent research has revealed, for example, that the Medici Codex (*I-Fl* acq. e doni 666), prepared in 1518 as a wedding gift for Lorenzo de' Medici, duke of Urbino, and Madeleine de la Tour d'Auvergne, was copied in Rome by scribes regularly associated with the papal chapel, and not at the French court under Mouton's supervision, as Lowinsky had originally proposed. Although no proof exists it seems likely that Mouton accompanied François to his meeting with Henry VIII of England at the Field of the Cloth of Gold in 1520. Various commentators reporting on the event noted that the performances by the two rival chapel choirs were as elaborate then as they had been five years before in Bologna.

In Mouton's last years he was granted a benefice at St Quentin. Although no church records survive from those years, Mouton may have been elected a canon on the death of Compère in 1518. Like Compère, Mouton was buried in St Quentin. His epitaph described him as 'en son vivant chantre du roy, chanoine de Thérouanne et de cette église' and gave the exact date of his death. His connection with Thérouanne is also mentioned in two supplications of 1509, as well as in the document appointing him apostolic notary.

Quite apart from his stature as a composer and his position as one of the leading musicians at the French court, Mouton deserves a place in history as the teacher of Adrian Willaert, himself one of the greatest teachers of the 16th century, and hence a direct link in the tradition of Franco-Flemish composers who most influenced the direction of Italian music during the high Renaissance.

On a more personal level, one contemporary described him thus: 'Besides being gifted he is the most humble man that one can find, and a good servant of God'.

2. WORKS. Approximately 100 motets by Mouton survive, together with 9 Magnificat settings, 15 masses and 25 chansons. More than a third of these were published during his lifetime, and his compositions continued to appear in print for 50 years after his death. Petrucci devoted an entire volume to his masses (1515), and the Parisian firm of Le Roy & Ballard brought out a posthumous collection of his motets (1555). In addition, his works are preserved in numerous manuscripts and printed anthologies in libraries throughout Europe. Fully a quarter of the total, including works in all genres, are known today only as unica (several in fragmentary form, lacking one or more voices), while a few others achieved wide dissemination in 15 or more sources. The problem of conflicting attributions is unusually acute for Mouton's motets, nearly one fourth of which also appear under other composers' names, while a similar number of motets appear in 16th-century sources wrongly ascribed to him as well as to their true authors.

Pierre de Ronsard, in the dedication to *Livre des meslanges* (Paris, 1560), cited Mouton as a pupil of Josquin des Prez, and Teofilo Folengo in some verses from his *Opus ... macaronicorum* (1521) prophesied that Mouton was a composer whose music would be mistaken for Josquin's. Nevertheless it seems unlikely that Mouton actually studied with the older composer, although they may have known each other at the French court. Both Kast and Lowinsky pointed out that various other early 16th-century composers imitated Josquin's mannerisms more closely than Mouton did. Even though both composers employed many of the same techniques – paired imitation, canonic cantus firmi and so on – Mouton displayed a personality totally unlike that of Josquin. Although his music at times produces brilliant effects, by and large Mouton wrote placid, smoothly flowing polyphony, with great technical finish and superb contrapuntal command, but without Josquin's flashes of fire. As Lowinsky has pointed out: 'The evenness of his temperament, the steadiness of his character, the solidity of his craftmanship equipped him for a position of highest official importance'. That judgment corresponds well with the opinion of Glarean, who praised Mouton for his smoothly flowing melody ('facili fluentem filo cantum') and for his industry and application ('studio ac industria').

The smooth flow of Mouton's melody stems in large part from the stately regular pace at which much of his music moves. Short notes are used mostly to break up this slow, regular motion rather than to offer genuine rhythmic contrast. The melodic contours themselves tend to be rather short-spanned; Mouton's penchant for clear, sharply profiled motifs perhaps reflects the rational and precise spirit of his specifically French rather than Flemish heritage. Mouton was often indifferent to good text declamation: his music is filled with incorrect accentuations and other infelicities in the way he combines words and notes, a trait indicating that he was more interested in purely musical design than in expression. On the other hand, he sometimes took care to match the text carefully to his melodic lines, particularly in his occasional motets where the words are particularly important. In both the motet for François' coronation, *Domine, salvum fac regem*, and that celebrating the Battle of Marignano, *Exalta regina Galliae*, for example, the words can be clearly understood and the textual and musical accents usually coincide. Mouton was fond of full sonorities; all voices are consistently brought in soon after the initial point of imitation (although the entrance of a cantus firmus is often long delayed) and he normally kept all voices active most of the time. In spite of this, the texture is usually clear and transparent, owing partly to his care in keeping the various voice ranges separate.

On the other hand, the uniformity of his music should not be exaggerated, for it does reflect a diversity of approaches, as Kast has emphasized in his edition of five of the composer's motets (Cw, lxxvi). Kast may well be premature in his attempt to distinguish four distinct style periods in Mouton's work, since few of the motets can be precisely dated and stylistic criteria are unreliable in the absence of a complete edition, but he presents a convincing outline of the composer's development from a young man, fascinated by purely musical design and constructive elements, to a mature artist, judiciously mixing homophony or near-homophony with imitative sections and adopting a more humanistic attitude towards the texts he set. Dammann emphasized the change of style that took place about the turn of the century, in motets such as *Sancti Dei omnes*, *O Maria, Virgo pia* and *O quam fulges*, when Mouton's music became more chordally orientated, perhaps as a result of his confrontation with Italian music and particularly *laude*.

Along with secular motets, composed for political or other official events, Mouton set some texts appropriate for specific liturgical occasions, including sequences (*Ave Maria ... Virgo serena* and *Benedicta es, caelorum regina*), responsories (*Antequam comedam*) and antiphons (*Beata Dei genitrix*); some verses honouring various saints and presumably meant to be sung at services commemorating their subjects (e.g., *Amicus Dei Nicolaus* for St Nicholas, *Christum regem regum* for St Andrew and *Gaude Barbara beata* for St Barbara); and some biblical texts of a sort that had seldom been set polyphonically before the late 15th century, for example psalms (*De profundis*, surviving only in a lute arrangement, and *In exitu Israel*) and *evangelia*, that is, settings of the epistle or gospel of the Mass (those motets beginning *In diebus illis* or *In illo tempore*). In addition there are a number of Marian texts, several hymns (*O Maria piissima* and *O Maria, Virgo pia*) and various sacred verses not yet identified as belonging to a specific liturgical or para-liturgical occasion. Many of these are pieced together from several liturgical or biblical sources.

Mouton's dazzling contrapuntal skill is shown in those compositions in which all of the voices are canonic: *Nesciens mater Virgo virum*, for example, a quadruple canon partly based on a plainchant. At times he constructed his motets around a central canon, either derived from a Gregorian cantus prius factus (*Salva nos, Domine* and *Per lignum salvi facti sumus*), or based on apparently free material (*Peccata mea, Domine*). Those motets that do not make use of some scaffolding technique sometimes paraphrase a chant (as in *Noli flere, Maria* and *Regem confessorum Dominum*), but usually quite freely; the composer assimilated the chant so well into his own melodic style that the original is sometimes difficult to disentangle. In those motets that seem to be based entirely on free material, Mouton sometimes repeated sections in a formally significant way, either by ending each of the

two *partes* with the same music (Dammann, 1952, claimed that *Non nobis, Domine* (1510) is the earliest datable responsory motet in *aBcB* form) or by introducing a phrase which returns in the manner of a ritornello (*Sancti Dei omnes*), or at the very least by reworking previous motivic material in a later section using a free variation technique (*Quderamus cum pastoribus*). Also some motets (for example the brief, *lauda*-like *In omni tribulatione*) are entirely free of borrowed material, scaffolding techniques or repetition schemes; they depend for their effect on successive points of imitation, on melodic coherence or simply on the regular and steady rhythmic flow and the interplay between harmony and counterpoint.

Mouton's masses span the transition from cantus-firmus technique to the new procedures of paraphrase and parody. Most of them seem to date from his mature years, particularly the decade between 1505 and 1515. Mouton either took his cantus firmi from chant (*Alma redemptoris mater*) or used one voice from a polyphonic composition (for example, the tenor of Févin's motet *Benedictus Dominus Deus*). More often than not the cantus firmus is not sharply differentiated rhythmically from the other voices, but rather smoothly incorporated into the texture. Some of the masses paraphrase monophonic material, and several, including that based on Richafort's motet *Quem dicunt homines*, are fully-fledged parody masses, among the earliest to use that compositional process. Perhaps parody technique was first extensively applied to cyclic masses in the circles associated with the French court in the early years of the 16th century. Indeed, Mouton may have composed his *Missa 'Quem dicunt homines'* in competition with Divitis, and both masses may have been intended for performance at the meeting between François I and Leo X in Bologna in 1515.

Like his motets, Mouton's chansons display a variety of styles. Some are canonic, for example *En venant de Lyon* and the lament on the death of Févin, *Qui ne regrettoit*. Some are three-part popular arrangements, apparently paraphrasing now lost popular monophonic tunes. Some, like *Jamais, jamais* in the *Odhecaton*, and *Resjouysses vous bourgeoyses*, are wittily imitative pieces, influenced in their strongly metrical melodic style by popular tunes. Some of those for five and six voices resemble motets in their contrapuntal complexity. And at least one chanson, *De tous regretz*, is not unlike a later Parisian chanson in the manner of Claudin de Sermisy.

WORKS

Missarum ... liber primus, 4vv (Fossombrone, 1515)

Selecti aliquot moduli, 4–8vv (Paris, 1555) [1555]

Editions: *Joannis Mouton Opera omnia*, ed. A.C. Minor and T.G. MacCracken, CMM, xliii (1967–) [M]
Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535, ed. A. Smijers and A.T. Merritt (Monaco, 1934–64) [SM]
J.M. Shine, *The Motets of Jean Mouton* (diss., New York U., 1953) [S; listed only where there is no published edn]
Georg Rhau: Musikdrucke aus den Jahren 1538 bis 1545, ed. H. Albrecht and others (Kassel and Concordia, MO, 1955–) [R]
The Medici Codex of 1518, ed. E.E. Lowinsky, MRM, iv (1968) [L]
Jean Mouton: Motets à 4 et 5 voix, ed. H. Expert and others, MAMF, v (1975) [E]
The Motet Books of Andrea Antico, ed. M. Picker, MRM, viii (1987) [P]

For masses, Magnificat settings and chansons, only sources additional to those given in M i–v are listed; all bear ascriptions to Mouton unless otherwise noted. Intabulations have been disregarded except when they provide a unique source or ascription.

HOWARD MAYER BROWN/THOMAS G. MacCRACKEN

Move, the. English rock group. It was formed in 1966 by the singer and guitarist Roy [Ulysses Adrian] Wood (*b* Birmingham, 8 Nov 1946) with Bev Bevan (*b* Birmingham, 25 Nov 1945; drums), Christopher 'Ace' Kefford (*b* Birmingham, 10 Dec 1944; bass), Trevor Burton (*b* Birmingham, 9 March 1944; guitar) and Carl Wayne (*b* Birmingham, 18 Aug 1944; vocals), other musicians drawn from Birmingham's leading beat groups. Jeff Lynne (*b* Birmingham, 30 Dec 1947; guitar), formerly of the Idle Race, joined in 1970. During the late 1960s the versatile songwriting skills of Wood and Lynne made the Move one of the most successful beat groups in Britain. Wood in particular was a master of many genres, confecting pastiches of psychedelic rock and 1950s rock and roll. The group's best-known songs included *Flowers in the Rain* (which borrowed its melody from Tchaikovsky's festival overture *1812*), *Fire Brigade*, *I can hear the grass grow*, *Blackberry Way* (a nod towards the Beatles' *Strawberry Fields Forever*) and *Brontosaurus*. By 1971 the group had split up, with Wood and Lynne setting up the Electric Light Orchestra (ELO) to play rock with string arrangements. Wood subsequently formed the group Wizzard whose most enduring work is the seasonal song *I wish it could be Christmas everyday* (1973).

DAVE LAING

Movement (Fr. *mouvement*; Ger. *Satz*; It. *movimento*). A term for a section, usually self-contained and separated by silence from other sections, within a larger musical work. It originates in the idea of work consisting of sections defined by their difference in tempo or 'movement'; hence the use of *mouvement* in French and *movimento* in Italian to denote tempo and of the Italian term *tempo* for a movement. The term came into use in English during the 18th century; the *Encyclopedia Britannica* (1770 edition) uses it in the sense of motion in music, and Burney (*General History*, 1776) wrote of the 'first

movement' of a larger work. A multi-movement work is sometimes described as CYCLIC FORM.

The idea of a work made up of several sections in different tempos originates in instrumental music of the late 16th and early 17th centuries; such sections were generally performed without a break. The standard keyboard suite of the middle and late Baroque might have any number of separate movements, mostly in dance style, from four to six or more; the typical instrumental sonata commonly had four movements, although no regular pattern prevailed (especially in the dance sonata) until the 18th century. The Venetian concerto of the late 17th and early 18th centuries established the three-movement form that became the standard for the concerto (Brahms's Piano Concerto no.2, in four movements, is an exception). The Classical string quartet or string quintet is normally in four movements, although in most chamber-music genres of the Classical period three is the norm. Boccherini's quartets however, are usually in four or two; the two-movement type (often called *notturno*) was favoured by several composers of the 1770–90 period. The early symphony, in Italy, was normally in three movements, but in most countries a fourth (a minuet, or later a scherzo, normally placed third) came to be added regularly during the late 18th century, and from the 1780s a slow introduction was often provided to the fast opening movement. In a multi-movement serenade (there are examples in six, seven and eight movements), the finale might also have a slow introduction, a tradition that continued as far as Schubert's Octet D803 (1824) and is also found in Brahms's Symphony no.1.

In some works, in particular Italian opera overtures or symphonies of the 18th century, the movements are played without a break, a manner adopted occasionally by other composers (including Mozart, for example in Symphony no.26 K184/161a) and later applied to dramatic ends (as in Beethoven's Symphony no.6). In several examples, material from one movement recurs within another, as in Haydn's no.46 and Beethoven's no.5, in each of which music from the third movement recurs within the fourth (last) movement, while in Mozart's Symphony no.32 K318 the Allegro first movement breaks off for a complete slow movement and then resumes. Works in which movements are interleaved, or in which material from an earlier one recurs in a later, were particularly favoured by Boccherini and later by Berwald. The relationships – aesthetic, and sometimes thematic, harmonic or of some other analysable kind – between the movements of a larger work are generally regarded as significant, so that the work's identity and integrity are linked to them, although in the 18th century many composers (notably J.C. Bach, in his symphonies) re-used movements from one work within another of the same key. In suites and other works of the 17th century all movements of a work are normally in the same key (indeed to some extent works were defined as the grouping together of movements in a particular key); later, slow movements (commonly placed second in the Classical and Romantic periods) are often in the subdominant, less often the dominant or a relative key, of the work's principal key, and from the end of the 18th century onwards key patterns became increasingly irregular.

The idea of tempo as the sole determinant of the extent of a movement was already eroded by the late 18th century, with the use of the slow introduction as part of the first movement; changes in tempo within a movement, or movements that comprehend sub-sections at different tempos, became increasingly common in the 19th century (sometimes sub-sections are marked 'Tempo I', and occasionally 'Tempo II', at their recurrence). Sibelius's Symphony no.7 is considered a symphony in one movement (the published score is marked 'In einem Satze') although it has seven main subdivisions at different tempos with many nuances of tempo in between; Beethoven's op.131 string quartet, however, is regarded as being in seven movements although they are played without a break.

The term, though sometimes applied to the sections of a mass setting, is rarely used for individual numbers in a vocal work such as an opera or a song cycle, although it is normal for vocal movements in an instrumental context, for example the symphonies of Mahler.

STANLEY SADIE

Movie music. *See* FILM MUSIC.

Movius, Caspar (*b* ?Lenzen, Brandenburg; *fl* 1633–59). German composer. He is described on the title-pages of some of his works as 'Leontinus Marchicus', which probably denotes that he was born at Lenzen. In 1634 he was a student of theology at Rostock, where all his known publications appeared. In 1636 he was deputy rector of the school at Stralsund. He belonged to, and enjoyed a high reputation among, the active group of north German composers who were primarily engaged in producing music – particularly psalm settings and chorale arrangements – for the Lutheran church. His first two publications are devoted to small-scale pieces with continuo, which, however, really belong to the tradition of bicinia and tricinia, since the continuo part is texted and may therefore be sung if desired. *Triumphus musicus* is a collection of ten German pieces based on chorale texts and melodies, the majority for double choir; they thus belong with the many chorale compositions produced in north Germany at this time by Heinrich Scheidemann, Matthias Weckmann, Tunder and others. Movius did not generally exploit colourful virtuoso effects to the same extent as many of his contemporaries, but the final piece in this collection, marked 'Concert', is an exception: its two upper parts contain florid and dramatic writing, while the other four act as a contrasting tutti. The double-choir pieces, with their high and low voice groupings, show the influence of Venetian polychoral music.

A. LINDSEY KIRWAN/LOTHAR HOFFMANN-ERBRECHT

Mowere [Mawere], **Richard** (*fl c*1450-70). English composer. He may be the Richard Mawere who was ordained on 30 May 1450 at Exeter Cathedral. Two three-voice settings, *Beata dei genitrix* and *Regina celi letare*, are ascribed to him in the Ritson manuscript (*GB-Lbl* Add.5665), which was apparently copied for an ecclesiastical foundation in Devon and which contains works by a number of composers associated with Exeter Cathedral. In both of Mowere's works, florid triplex and contratenor parts decorate a monorhythmic plainsong tenor.

ANDREW WATHEY

Mo Wuping (*b* Hengyang, Hunan, 5 Sept 1958; *d* Beijing, 2 June 1993). Chinese composer. He studied privately with Luo Zhongrong and at the Central Conservatory in Beijing (1983–88), later continuing his studies with Taira and Malec in Paris. Mo's limited output shows a great sophistication and power of expression. When he died of liver cancer at the age of 34, the younger generation of Chinese composers lost one of its most promising voices. Mo's music combines elements of Chinese folksong with a contemporary idiom sometimes reminiscent of Ligeti yet strongly personal and imaginative. He was an accomplished performer of his own vocal works and a brilliant pianist. His string quartet *Sacrificial Rite in Village* (1987) won a prize at the World Music Days in Hong Kong in 1988. *Fan I*, for male voice and ensemble (1991), with the composer as vocal soloist, was given an award at the Asian Festival of the Arts 1991 and was later widely performed in Europe and Asia, with several of Mo's colleagues (Tan Dun, Qu Xiaosong) as vocal soloists in turn. *Fan II*, for ensemble (1992) was commissioned and first performed by the Nieuw Ensemble in Amsterdam, a group which had a close working relationship with the composer. After his initial successes in China, Japan and Europe, Mo planned various works on a more ambitious scale, including an opera, but his fatal illness intervened. A full account of his life is given in Luo Zhongrong, ed.: *Mo Wuping, zuoqujia* [Composer Mo] (Beijing, 1994).

FRANK KOUWENHOVEN

Moxica (*fl* late 15th century). Spanish composer. Two songs by him (*Dama, mi gran querer* and *No queriendo sois querido*) were included in the Cancionero Musical de Palacio (*E-Mp* 1335; ed. in MME, v, 1947). Nothing is known of his life, but since *Dama, mi gran querer* sets a poem by Pedro González de Mendoza it has been suggested that Moxica may have been attached to his household. Mendoza, who from 1473 was cardinal of Spain and from 1485 Archbishop of Toledo, maintained a sizable chapel; on his death in 1495 five of his singers transferred to the Castilian royal chapel. Indeed, close relations between the chapels of the Catholic Monarchs and that of the Archbishop would account for the inclusion of songs by one of his singers among works by court composers in the Cancionero de Palacio.

Both songs set poems of courtly love in the canción form; stylistically they belong to the earlier generation of composers represented in the manuscript, most of whom were active in the 1470s and 80s.

TESS KNIGHTON

Moy, Louys de (*fl* 1631–2). Flemish composer. His surname suggests Antwerp connections. His *Le petit boucquet de Frise orientale* (n.p., 1631/*R*) reveals that he had been in the service of Count Ulrich of East Friesland as *musicien ordinaire* 'for several years'. This book, published at de Moy's expense, celebrates the count's marriage to Princess Juliana of Hessen, and the French texts of the 20 chansons for two voices (soprano and bass, doubled by viols) and lute reflect this. Some, such as *Tant que vivray*, are clearly adapted for the purpose. The collection also contains a single four-part chanson in Dutch, 11 pavanes for lute and *violons communs* (treble and bass) with descriptive titles naming places in Friesland, and 56 dances for solo lute, including works by French lutenists such as Robert Ballard (ii) as well as by de Moy. The chansons and ensemble pieces are printed in table-book format. His *Airs de cour à trois parties* (Emden, 1632) also demonstrates familiarity with French musical fashion, and includes airs by Pierre Guédron arranged, like de Moy's own songs, for two voices and instrumental bass, reflecting a similar move towards continuo practice in French prints of the 1630s.

JONATHAN LE COCQ

Moyne, Jean-Baptiste. *See* LEMOYNE, JEAN-BAPTISTE.

Moyse, Marcel (Joseph) (*b* Saint Amour, Jura, 17 May 1889; *d* Brattleboro, VT, 1 Nov 1984). French flautist. He studied at the Paris Conservatoire with Paul Taffanel, winning a *premier prix* in 1906. He played principal flute in various Paris orchestras, notably the Opéra-Comique from 1913 to 1938, appeared widely as a soloist and made many recordings. These display his innate musicianship and distinctive intensity of tone, much influenced by contemporary singers. Ibert's Flute Concerto was dedicated to Moyse, and he gave the work's première in 1934. That same year he founded the Moyse Trio with his son Louis (piano) and daughter-in-law Blanche Honegger (violin). He became professor of flute at the Conservatoire in 1932 and remained there, apart from a gap during the war years, until he emigrated to Argentina in 1949; he later moved to North America. His masterclasses became legendary and were attended by flute players from all over the world. Always a trenchant and controversial figure, Moyse had a decisive influence on the evolution of flute playing. He wrote many books of exercises and studies,

combining a scientific approach to technique with a romantic quest for musical expression. His life and influence are documented by Trevor Wye in *Marcel Moyse: an Extraordinary Man* (Iowa, 1993).

EDWARD BLAKEMAN

Moyzes, Alexander (*b* Kláštor pod Znievom, nr Martin, 4 Sept 1906; *d* Bratislava, 20 Nov 1984). Slovak composer and teacher, son of MIKULÁŠ MOYZES. In 1925 he entered the Prague Conservatory, where he studied composition with Šín and Karel, conducting with Ostrčil and the organ with Wiedermann; between 1928 and 1930 he attended Vítezslav Novák's masterclass. From 1929 Moyzes taught theory and composition at the Academy of Music and Drama (the Conservatory from 1941) in Bratislava, and between 1949 and 1978 served as professor of composition at the Academy of Music and Dramatic Art (VŠMU). He was head of the music department at Bratislava radio (1937–48), president of the Slovak section of the Czechoslovak Composers' Union (1948–51) and rector of VŠMU (1965–71). He was the recipient of many awards and prizes, and in 1966 was created National Artist.

Together with Suchoň and Cikker, Moyzes was the founder of a modern Slovak musical expression. As a student he was influenced by the Czech late Romanticism and Impressionism of Novák. In the 1920s and 30s, in the wake of Les Six and Stravinsky, Moyzes experimented with small forms and anti-Romantic, utilitarian principles (e.g. *Vest-pocket suita*, 1928), while in *Fox Etude* and *Impromptu* and the *Divertimento* he employed elements of jazz. However, during this period he also composed large-scale works (such as the first and second symphonies), which use traditional forms and a chromatic vocabulary, enhanced (following the example set by Novák) by references to Slovak folk music. The distinguishing feature of Moyzes' style include masterly thematic development which becomes the basis for long teleological strands, including themes that are carried over into subsequent movements. As with Shostakovich, his musical expression emphasizes epic breadth with a range of gradations, and deep, poignant meditation on human existence (e.g. the Largo of the Seventh Symphony, dedicated to the memory of the composer's daughter). In the final stage of his career Moyzes tended towards archaic elements combined with Classical purity and formal clarity; a good example of this is the *Partita na poctu Majstra Pavla z Levoče* ('Partita in Honour of Master Pavol from Levoča', 1970). His folk-inspired works – including arrangements, the orchestral suites and pieces written for large ensembles formed after World War II – focus on Slovak hay-making songs and tales of brigandry [version of Svätopluk].

WORKS
(*selective list*)

Op: Svätopluk (radio op, 8 scenes, Ľ. Zúbek and Moyzes, after J. Hollý), op.25, 1935, Bratislava Radio, 1935; rev. for stage as Udatný kráľ [The Deposed King] (6 scenes, 2 intermezzi, Moyzes, after Hollý), op.60, 1965–6, Bratislava, Slovak National, 4 Nov 1967

Orch: Sym. no.1, D, op.4, 1929, rev. 1936; Sym. Ov., op.10, 1929; Sym. no.2, a, S/T, orch, op.16, 1932, rev. for orch 1941; Concertino, 1933; Jánošíkovi chlapci [Jánošík's Boys], ov., op.21, 1934, rev. 1941 as Jánošíkovi chlapci [Jánošík's Boys]; Nikola Šuhaj, ov., op.22, 1934; Váh, suite, (op.26, 1935, rev. 1945 as Dolu Váhom [Down the Váh]; Pf Conc., 1941 [arr. of Concertino, 1933; completed 1995 by Hrušovský]; Sym. no.3 'Malá symfónia' [The Little], B♭, op.18, 1942 [arr. of Wind Qnt, 1933]; Sym. no.4, E♭, op.38, 1947, rev. 1957; Tance z Pohronia [Dances from Pohronie], op.43, 1950; Sym. no.5, F, op.39, 1948 [from M. Moyzes: Malá vrchovská symfónia, 'Little Highland Sym.']; Sym. no.6, G, op.45, 1951; Februárová [The February Ov.], op.48, 1952; Sym. no.7, op.50, 1955; Tance z Gemera, op.51, 1955; Vn Conc., op.53, 1958; Sonatina giocosa, op.57, str, 1962; Fl Conc., op.61, 1967; Partita na poctu Majstra Pavla z Levoče [Partita in Honour of Master Pavol from Levoča], op.67, 1969; Sym. no.8, op.64, 1969; Sym. no.9, op.69, 1971; Vatry na horách [Fires on the mountains], suite, op.71, 1971; Musica istropolitana, op.72, str, 1974; Povesť o Jánošíkovi [The Tale of Jánošík], suite, op.76, 1976; Sym. no.10, op.77, 1978; Sym. no.11, op.79, 1978; Sym. no.12, op.83, 1983

Vocal: Farby na palete [Colours on a Palette] (L. Novomeský), song cycle, op.5, 1v, pf, 1928; Dvanásť ľudových piesní, zo Šariša [12 Folksongs from Šariš], op.9, 1v, pf, 1929; Demontáž [The Dismantling] (cant., J. Rob-Poničan), op.12, T, chorus, orch, 1930, rev. as Balladic Cant., op.55, T, chorus, orch, 1959; Na horách spievajú [In the Mountains they Sing], op.15, chorus, orch, 1933; Cesta [The Way] (song cycle, Novomeský), op.19, S/T, orch, 1943, rev. 1966 [Version of 2nd movt of Sym. no.2]; Spievajú, hrajú, tancujú [They Sing, Play and Dance] (cycle of folksong arrs.), op.33, S, T, B, orch, 1938; Či organy hrajú [Do the Organs play?] (cycle of folksong arrs.), op.37, chorus, 1947; Znejú piesne na chotári [Songs Resound in the Country] (suite), op.40, S, T, chorus, orch, 1948; V jeseni [In Autumn] (song cycle, J. Kostra), op.56, Mez, orch/pf, 1960 arr. Mez, pf, *c*1965; music for SĽUK [Slovak Folk Art Ensemble]

Chbr and solo inst: Vest-pocket suita, op.7, vn, pf, 1928; Str Qt no.1, E♭, op.8, 1929, rev., 1942; Divertimento, op.11, pf/orch, 1930; Jazz Sonata, op.14/2, 2 pf, 1932; Wind Qnt, B, op.17, 1933; Fox etuda a Impromptu [Fox Etude and Impromptu], opp.14/1 and 14/3, pf, 1935; Poetická suita, op.35, vn, pf, 1940; Sonata, e, pf, 1942; Zbojnícka rapsódia [Brigand Rhapsody], op.52, pf, 1957; Malá sonáta [Small Sonata], op.63, vn, pf, 1968; Str Qt no.2, D, op.66, 1969; Sonatina, op.75, fl, gui, 1975; Str Qt no.3, op.83, 1981; Str Qt no.4, op.84, 1983

VLADIMÍR ZVARA

Moyzes, Mikuláš (*b* Zvolenská Slatina, 6 Dec 1872; *d* Prešov, 2 April 1944). Slovak composer and teacher, father of ALEXANDER MOYZES. He received his musical education at the teachers' institute in Kláštor pod Znievom (from which he graduated in 1893) and then worked as a music teacher and organist in Eger, Nagyvárad (now Oradea) and Csurgó. In 1904 he returned to Slovakia, where he taught at the institute in Kláštor (until 1908) and then at a similar institute in Prešov (until 1932).

The stylistic basis for his composition was music of the Romantic age and his perceptive study of the works of Bach. Before World War I he was one of the most distinguished composers of music for the Hungarian Catholic Church; he was also an active participant in the Cecilian movement and an author of textbooks and articles on music theory. In addition to sacred music he composed choruses and songs to Hungarian and German texts during this period, and sought ways of nurturing a Slovak national style. On his return to Slovakia he embarked on arrangements and a study of authentic rural folksongs (unlike other contemporary Slovak composers whow drew inspiration from versions performed in towns). After the establishment of independent Czechoslovakia, his compositional activities intensified as he absorbed new ideas passed to him by his son Alexander, who was studying composition in Prague. Of his original

works, many of which contain folklike melodies, *Ctibor* (1920) and the melodramas (1921–40) are notable for their intensification of the poetic tone of Slovak folk ballads. The works from this later period betray influences of Dvořák (e.g. the fourth quartet and *Malá vrchovská symfónia* ('Little Highland Symphony')).

WORKS
(selective list)

Sacred vocal: Agnus Dei, chorus, 1895; Da mihi Jesu, chorus, 1901; Inveni David, chorus, orch, org, 1901; Missa solemnis, C, 1906; Mass, d, 1929

Secular vocal: Boldog voltam [I Was Happy] (K. Tóth), 1v, pf, 1899 (pubd as Bol som šťastný); Ha csókollak ... [When I Kiss You] (F. Szalay), 1v, pf, 1901; Út az égbe [Way to the Heaven] (F. Szalay), male chorus, 1909 (pubd as Cesta do neba); Abendlied (M. Uhlarik), female chorus, pf, 1911; Ctibor (J. Botto), ballad, 1v, pf, 1920 [lost], arr. A. Moyzes, T. orch, 1944; Canossa (E.B. Lukáč), male chorus, 1927

Melodramas: Siroty [Orphans] (I. Žiak-Somolický), 1v, pf/orch, 1921; Lesná panna [Maid of the Woods] (Ľ. Podjavorinská), 1v, orch, 1922; Čertova rieka [The Devil's River] (A. Prídavok), 1v, pf/orch, 1940

Orch: 2 suites, orch, 1931, 1932; Malá vrchovská symfónia [Little Highland Sym.], orch, 1936 [rev. A. Moyzes, 1948 as A. Moyzes: Sym. no.5]

VLADIMÍR ZVARA

Mozambique (Port. República de Moçambique). Country in south-east Africa. It has an area of 799,380 km^2 and a population of 19·56 million (UN est. 2000, before severe floods of Feb 2000). After about four centuries of Arab influence and settlement on coastal islands such as Moçambique and Ibo, the first Portuguese, Pero da Covilhã, reached Moçambique Island and Sofala in 1489. Rapid settlement followed, and within a century most of the coastline had been colonized. In 1752 the General Government of Mozambique was created. The main areas of development were Moçambique Island, the lower Zambezi and Manica highlands, and the coastal area from Inhambane southwards. Except for the Tete area in the Zambezi valley, however, Portuguese rule was finally established in the interior only in the early 20th century (the final campaign was in 1912). Lourenço Marques (now Maputo) became the capital in 1897. Mozambique became independent in June 1975.

1. Ethnic groups and historical background. 2. Main music areas. 3. Instruments and instrumental music: (i) Idiophones (ii) Membranophones (iii) Aerophones (iv) Chordophones. 4. Vocal music. 5. Popular music and other modern developments.

1. Ethnic groups and historical background. The Zambezi valley divides the primarily matrilineal peoples of the north from the patrilineal peoples of the south; it also marks the approximate southern limit of Swahili or Arab influence, which was manifested in trade and the introduction of slavery and Islam. The north is inhabited by the Swahili, whose territory extends along the coast into Tanzania; the Makonde, who are also divided between Tanzania and Mozambique and who are noted for their rich sculptural tradition, their masked dances, and other cultural features more typical of Central than East African peoples (*see* Tanzania, §2(v)); the Makua (Makhuwa) group, the largest; and the Maravi group (which includes the Cewa or Chewa, Mang'anja or Nyanja, Ngoni and Yao) (fig.1).

The Zambezi valley and delta have been an access route for at least three groups of invaders: the Indonesians, who also settled in other large African river valleys, and are presumed to have come in about 500 CE; the Portuguese, who established military posts and engaged in extensive trade and agriculture from the 16th century; and the Nguni invaders who, originally escaping from warfare in Natal at the beginning of the 19th century, marauded throughout central Mozambique until the end of the century, finally settling among the Maravi people. The

1. Map of Mozambique showing the distribution of the principal ethnic groups

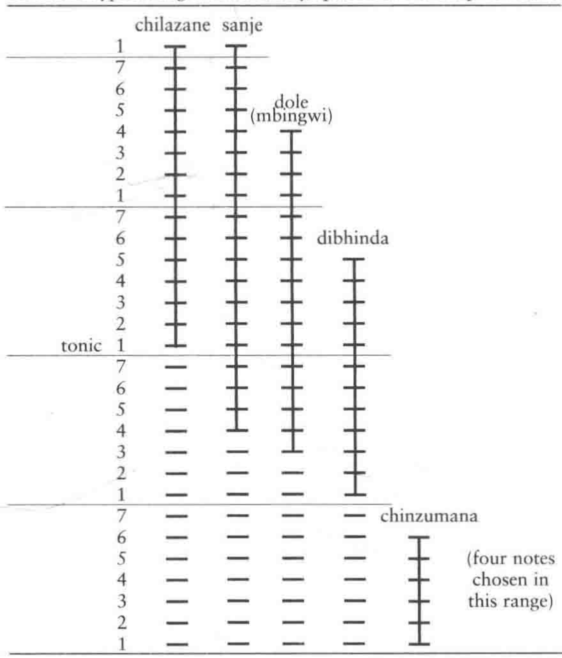
heterogeneous population of this area includes the Chikunda (or Kunda), the Nyungwe (including the Sena-Tonga and the Tavara), the Sena and the Cuabo (or Chwabo). Many of the Shona peoples (who include the Manyika, Barwe, Utee and Ndau subgroups) consider themselves closely linked with the culture of the Shona of Zimbabwe and were adherents of the Monomotapa empire in the 16th to 18th centuries.

The Thonga group, consisting of Tswa, Tsonga, Ronga and Shangana (Changana), predominate in the south. In the 19th century the Shangana were conscripted into the armies of the Nguni, who controlled southern and parts of central Mozambique, Zimbabwe and Malawi throughout the century.

The Chopi are a small isolated group (*c*760,000) related culturally to the Shona of Zimbabwe and famous for their xylophone orchestras. Their land is fertile, and abundant crops allow them much leisure for music-making. Twenty years of civil war beginning in 1975 along with the deposition of the chiefs, once the patrons of the orchestras, led to the virtual disappearance of this magnificent music; an entire generation has grown up without it. International efforts are being made to institute a school of Chopi music, to be taught by Venancio Mbande, the only surviving Chopi master musician. Numerous recordings of the traditional music of Mozambique are held at and published by the International Library of African Music, Rhodes University, Grahamstown, South Africa.

2. Main music areas. The music of Mozambique may be considered in relation to three main areas. In northern Mozambique the music is generally hexa- or heptatonic: there are many kinds of drums and drumming styles but only simple xylophones and lamellophones. Some singing in parallel 3rds occurs among the Makua, Makonde and Ndonde (Vadonde); otherwise singing is monophonic or with movement in parallel 4ths and 5ths. Various elements indicate Arab influence: ornamented monophonic singing, timbre and intonation, the use of drone, the characteristic lowering of the voice by a whole tone at the end of a long held note, and the use of one-string spike fiddles and *daira* (tambourines). Much of the population is Muslim, particularly along the coast. The central area (as also among the Chopi and Tswa further south) has many complex types of xylophone and lamellophone and many string and wind instruments; drums are less common. The music is generally heptatonic and polyphonic, mostly using 4ths and 5ths in oblique rather than parallel part movement. In the south, among the Thonga (and also the Ngoni further north), musical bows, lamellophones and guitars are common. The use of drums is relatively limited. Melodies are penta- and hexatonic, and vocal harmonies consist mostly of 4ths and 5ths in parallel movement.

3. Instruments and instrumental music.



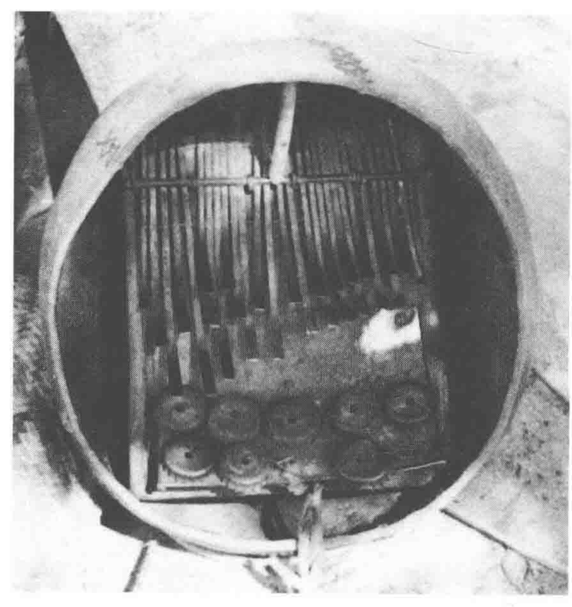
(i) Idiophones. These are among the most important instruments and include the xylophone and lamellophone, many varieties of rattle (made of gourd, tin, basket, reed-raft, fruit shell, seed-pod, moth cocoon, palm leaf etc.) and percussion beams, clappers, iron sheets, pipes etc. Slit-drums and bells, characteristic of Central and West African music, are not used in Mozambique.

There are four distinct xylophone traditions. The best known is that of the Chopi xylophone orchestras (Port. *marimbeiros de Zavala*; fig.2*a*) associated with the dance known as *mgodo*, the 'classical' music of the Chopi. The *mgodo* performers are male xylophone players, rattle players and dancers who also sing. There may be between five and 30 xylophones (*mbila*, pl. *timbila*), usually about 12, carefully constructed in five sizes and tuned to cover a range of four octaves (Table 1). The four higher-pitched instruments are played seated; the four-note *chinzumana* is played standing and provides a deep rhythmic drone. The slats are made of highly resonant sneezewood (*Ptaeroxylon obliquum*) and require tempering by fire before they will ring. Each slat has its own resonator, made from the shell of a wild orange, tuned in sympathy with it. A single central member forms the frame, with holes for the attachment of the resonators. As with many African xylophones, a buzzing membrane is attached over a small hole in the side of each resonator. A peculiarity of the Chopi instrument is the use of a small cylindrical piece of gourd, one end of which is fixed to the resonator surrounding the membrane to make the tone rounder. In all, about 15 different natural products are used.

The tuning system is equiheptatonic (i.e. with seven intervals to the octave, each about 170 cents). This has been used as evidence by Jones and others to associate the xylophones of Africa with those of Indonesia. The absolute pitch of the tonic, which is variously called *dikokoma dawumbila* ('the slat which gives the quality of the *mbila*'), *chilanzane* ('the first note of the highest instrument') or *hombe* ('the great note'), does not vary from village to village by more than about 100 cents. Many Chopi musicians have a sense of absolute pitch. Hugh Tracey (1948) described in detail the physical arrangement of the orchestra and dancers, the structure of the movements (usually 10 or 11) and the high degree of control exercised by the leaders of the orchestra and dance group through rehearsal and by aural and visual cues.

The musical texture is complex and dense owing to the variety of ways in which each of the many players may present his version of the tune. The two hands of the

TABLE 1: Typical ranges of the five xylophones of the Chopi orchestra



2. *Xylophones: (a) mbila orchestra of the Chopi people, Zandamela; note the double-bass xylophones at the back, and rattle players in front; (b) valimba with keys resting on bundles of grass over a pit, Sena migrant workers, Rotanda; (c) valimba with individual gourd resonators, Sena migrant workers, Macossa*

xylophonist move in rhythmic counterpoint, which experienced players vary continuously throughout a performance. Rhythmic patterns of two against three and three against four are always present. Some types of tunes appear to be harmonically based; the preferred intervals are 4ths, 5ths and octaves, as in most southern African music, although 3rds, 6ths and to a lesser extent 7ths and 9ths occur; chord movement is rarely parallel. In other pieces the music is dependent on the words, and sometimes moves in parallel 4ths and 5ths. In many tunes there is a harmonic alternation between chords based on the tonic and chords based on the note immediately above. The tunes are based on cyclical patterns which vary from four rattle beats to 32 (frequently 8, 12, 16, 20, 24 or 26 beats) in length. The *mgodo* serves as recreation and as a means of social control at the village level; at the national level it is a source of pride and provides a sense of identity both for the Chopi and for Mozambique.

The Tswa people are immediate neighbours of the Chopi. Their *muhambi* xylophone resembles that of the Chopi (i.e. an equiheptatonic fixed-key instrument with individual gourd resonators) but has lighter keys and beaters, giving a different tone quality. It is played by adults, mostly in groups of three, accompanied by dancers, singers and three drums, in a suite of three or four contrasting movements, which often include elements of drama or mime. The style is related to that of the Chopi but is freer in form and includes more improvisation and use of parallel octave part movement. This simpler type of performance may well be the original from which the Chopi developed their complex orchestral style. Xylophones made by the Tswa are bought and played by neighbouring peoples, the Shangana and the Ndau-Shanga (Changa), who adapt their own musical styles to it.

The third xylophone tradition is that of the Mang'anja, Podzo, Cuabo, Yao, Sena, Barwe and Ndau peoples in the lower Zambezi area. Their heptatonic instruments include the free-key type (with rough slats or logs laid across two long bundles of grass; fig.2*b*) and the trough-resonated type (with all the keys sharing a common resonator box), as well as those with individual gourd resonators (fig.2*c*). While they are generally played singly, there is always more than one player to an instrument. The players sit either together on one side or on opposite sides, and beat the keys in the centre with soft-tipped sticks. The compass varies from about ten notes in the simpler types to four octaves in the gourd-resonated types. The parts interlock rhythmically; some of the music is related to that of the lamellophone traditions and has a strong harmonic framework. The xylophone is usually called *valimba*, and less commonly *varimba*, *ulimba*, *madudu*, *bachi*, *mambira*, *marimba* or *ngambi*. It is normally played for young people's dances at night, accompanied by singing, rattles and sometimes a drum.

The fourth xylophone tradition is that of the Makua and Makonde peoples. Their hexatonic free-key log xylophones (with six to eight keys resting on two banana trunks, or on a pair of logs padded with grass) are always sounded by two players sitting opposite each other. In contrast to the lower Zambezi xylophone tradition, the keys are struck not at the centre but at the ends, with plain wooden sticks. As in other African log xylophone traditions (in Uganda, former Zaïre, Cameroon etc.) the playing technique requires the interlocking of the two parts at high speed. The Makua call this instrument *mangwilo*, the Makonde *dimbila*.

3. Mbira ja vaNdau (lamellophone) of the Ndau people, with bottle-top buzzers and calabash resonator

There are three main lamellophone performing traditions, found in the north, the Zambezi basin and in the south. In the north, among the Makonde and Makua, the lamellophone is known as *shitata*, *chityatya* etc. and is a small instrument with calabash resonator and seven or eight keys (similar to the *malimba* of southern Tanzania). The instrument is played solo with the thumbs and one forefinger.

The Zambezi basin tradition is the richest of the three and extends into most of Zimbabwe and parts of Zambia, Malawi and northern South Africa. There are at least nine types of lamellophone, most with slightly wedge-shaped bodies, calabash-resonated, and from 8 to over 30 keys, played with the thumbs and forefingers. The tuning of these instruments is heptatonic (with a tendency to equal spacing), and harmony is important, the style being based on chord sequences of 4ths and 5ths. Normally played solo with singing, two or more may be played together, producing complex polyphony. The nine main types are *kalimba* (Nsenga, Ngoni, Cewa, Nyungwe and Chikunda peoples); *ndimba* (Nsenga); *karimba* (Nyungwe, Chikunda, Sena-Tonga and Tavara); *njari* (Nyungwe, Sena-Tonga, Manyika and Utee); *njari huru* (Chikunda); *hera* or *matepe* (Tonga, Nyungwe, Sena); *mbira huru* (Manyika); and *nyonganyonga* (Barwe, Gorongozi and Sena). *Mbira*, *marimba* and *nsansi* are broad generic names also used in this area. Some of the instruments in this family (e.g. *njari*, *hera* and *mbira huru*) are played in ancestral spirit ceremonies; the others are usually played for entertainment.

The southern instrument, called *mbira ja vaNdau* by the Ndau and *timbila* by the Tsonga, is related to the above group, and is widely played in Mozambique south of Beira (fig.3). It has hexatonic tuning with widely differing intervals, and three manuals of keys. It is played by young men for entertainment and courting and also by a class of older minstrels known as *varombe* who entertain professionally, sometimes achieving a wide reputation.

Several Mozambique radio stations broadcast traditional music; players such as António Gande (a Ndau musician from Chingune Island) and Lázaro Vinho (a blind Nyungwe *njari* player from Tete) were well known as broadcasters in the 1970s and 80s (for further discussion of lamellophones in Mozambique *see* LAMELLOPHONE, §§2 and 3).

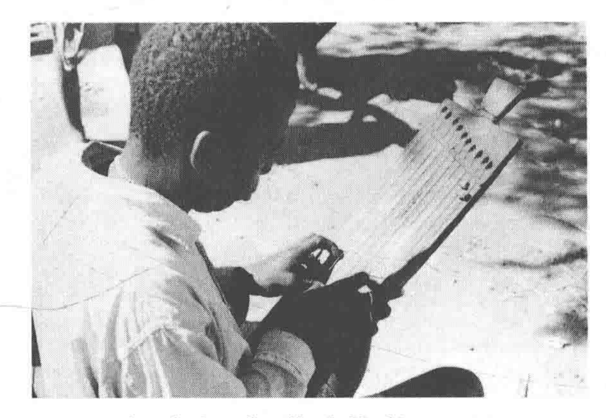
(ii) Membranophones. Drums are played by all the peoples of Mozambique, but the number of types and the frequency with which they are played decrease towards the southern end of the country. Most drums are single-headed with pegged skins and cylindrical or conical bodies, open at the lower end. They are tuned by heating, or sometimes by using tuning-paste. Double-headed drums were formerly rare but are now more common throughout the country, particularly in towns, because they can easily be constructed from metal cans with the two opposite heads laced together. The friction drum is played by the Swazi to accompany dancing and by the Makonde during puberty ceremonies. Tambourine-type frame drums called *daira* are played near the island of Moçambique and in other areas influenced by Islam in the north, and also in the south by the Thonga during their spirit-possession ceremonies. Closed bowl-shaped drums are used by the Chopi, Ndau and Sena-Tonga for the same purpose.

Throughout the country drums are played together in ensemble, usually a minimum of three (fig.4). The highest-pitched drum usually plays a fixed time-keeping part, the lowest is the leader. There are several musical styles in which drums are prominent. The *likhuba* (of the Mang'anja and Sena peoples) is a drum-chime consisting of up to ten drums tuned to a pentatonic scale; the leader plays five or six of these with his hands, accompanied by three or four other drummers, rattles, singing and solo exhibition dancing. The Ndau *muchongoyo* ensemble consists of three double-headed drums beaten by one or two players with sticks, with singing and hand-clapping providing a virtuoso polyrhythmic accompaniment to a unison-dance team performing acrobatic and humorous movements. The formerly moribund sacred *mafuwe* circle dance of the Nyungwe, Sena and Tonga, with its four drums and polyphonic yodel-singing, was revived in the refugee camps of Zimbabwe and Malawi during the civil war and can once again be heard in Mozambique. The Nyungwe *kangoma kabodzi* is a more modern dance form, accompanied by virtuoso drumming on one tall, cylindrical drum. The most characteristic of a remarkable variety of Makonde drums are the slender *neya* drum and the small closed *singanga* drum, whose foot is extended into a narrow spike one metre in length. Ten or more *singanga* may be used simultaneously as part of a drum ensemble.

(iii) Aerophones. Horn, bone and wood whistles, and end- and side-blown bamboo flutes, although now rare, are played in some parts of Mozambique, mostly by herdsmen for private enjoyment. The Chopi, Tsonga and Ndau of the south play globular flutes or ocarinas of gourd or clay. Ensembles of single-note stopped pipes, common in other parts of southern Africa, are found only among the Chopi, where boys perform the *chimveka* circle-dance in the fields at night, playing in hocket fashion. The magnificent *nyanga* (panpipe) dance of the Nyungwe is a circle-dance performed by 20 to 30 men, each with two-, three- or four-note panpipe making in all a heptatonic compass of three and a half octaves (fig.5). The men dance irregularly phrased steps as they play, interspersing sung notes with blown notes, and each

4. Sena drummers from Mutarara district accompanying the likhuba dance in Bulawayo, Zimbabwe

5. Part of a nyanga (panpipe) ensemble of the Nyungwe people at Nsava, near Tete



interlocking his part with that of the others so that there is a continuous sound of both blown and sung notes, to which the voices of women singers are added. (*See* STOPPED FLUTE ENSEMBLE.)

Antelope horns, particularly of the kudu and sable, with a lateral mouth-hole near the tip, are blown as signal or ceremonial instruments in many districts. Kazoos called *malipenga* are used in ensembles with drums by the Cewa near Lake Malawi. The instruments are made in various sizes from the straight or curved neck of a gourd, closed at the smaller end with a nasalizing membrane, and with a lateral mouth-hole for singing into near the same end. *Malipenga* dances are said to have originated in military drill music in Tanzania and Malawi during the early 20th century.

(iv) Chordophones. Many types of MUSICAL BOW are still played in the south. They include the popular braced *chitende* with a gourd resonator, used widely by men for topical and humorous songs, the mouth-resonated *kadimbwa* (of the Nyungwe and Sena-Tonga), and *chizambi* (of the Tsonga, Chopi and Ndau), whose palm-leaf string is sounded by rubbing the notched body of the bow with a small rattle stick.

In the northern half of Mozambique two string instruments are popular. The board zither, known variously as *bangwe*, *pango*, *bango* etc., is played mainly by the Cewa and Yao peoples near Malawi and Lake Malawi, but is also found among the Makua and Makonde. Its single wire or fibre string is stretched seven times from end to end through holes near each end. The player usually strums all the strings with the right index finger, while damping those notes that are not required with the left fingers. The far end of the instrument is sometimes put in a calabash or metal tin for resonance. Among the Mang'anja and Sena of the central Zambezi the instrument has nine to 12 strings which the player plucks (fig.6). The other northern instrument is the long-necked, one-string spike fiddle (Swahili *rabeka*, Lomwe *takare*, Meto or Medo *chikwesa*, Cewa *mugole*, Mang'anja *siribo*). It is played by wandering troubadours, some of them blind or crippled, who sing ballads, epic poems or humorous and satirical songs to its accompaniment. The body of the fiddle is like a small drum and is made of calabash, wood or coconut shell covered with an antelope or lizard skin. The use of a tuning-loop, which passes around the neck and the wire or sisal string, is distinctive.

4. VOCAL MUSIC. Whereas instruments are nearly always played by men, most singing is by groups of women, who provide an essential accompaniment to many dances and communal performances. The tone of their voices is typically shrill and piercing, designed, like numerous

6. Bangwe (board zither) played by the blind Sena musician Francisco Singirira, at Mutarara

instrumental timbres, to cut through a welter of polyphonic sound. Yodelling by both men and women is important in central Mozambique (e.g. in men's lamellophone songs and women's polyphonic pounding-songs) and also to a lesser extent among the Makua in the north. On Moçambique and Ibo islands in the north large, well-rehearsed choirs of women, beautifully and uniformly dressed in bright costumes and with faces whitened, sing dramatic and romantic songs to the accompaniment of several *daira* and hand-clapping. Thonga men in the south form vocal dance groups called *makwaya* (from 'choir'), which sing topical and satirical songs in a vigorous style that was first developed in the mining compounds of South Africa.

In addition to the two traditional harmonic styles using either 4ths and 5ths or 3rds (see §2), there is a third style that uses the triadic harmonies of Euro-American popular and church music. Apart from being used in towns and mission centres, this style has had considerably less influence in Mozambique than in most other African countries.

5. Popular music and other modern developments. Popular music has been influenced by Portuguese music and by the urban musics of neighbouring African states. The guitar, introduced in the 16th or 17th century, is popular in the south where the guitar-based music of Maputo is known as *marrabenta*. The musical influence of other settler groups such as Indians and Chinese has been minimal. The slow rate of urbanization and development in the country has meant that many traditional cultures have been left relatively undisturbed. This, coupled with Portuguese tolerance of folk arts, has favoured one of the strongest and most varied musical cultures in Africa. However, the damage inflicted on traditional culture by the civil war cannot be underestimated. The abolition of chiefs, the change to a money-based economy with high unemployment and the destruction wrought on the population and on the environment all combine to break the essential continuity of long-established art forms.

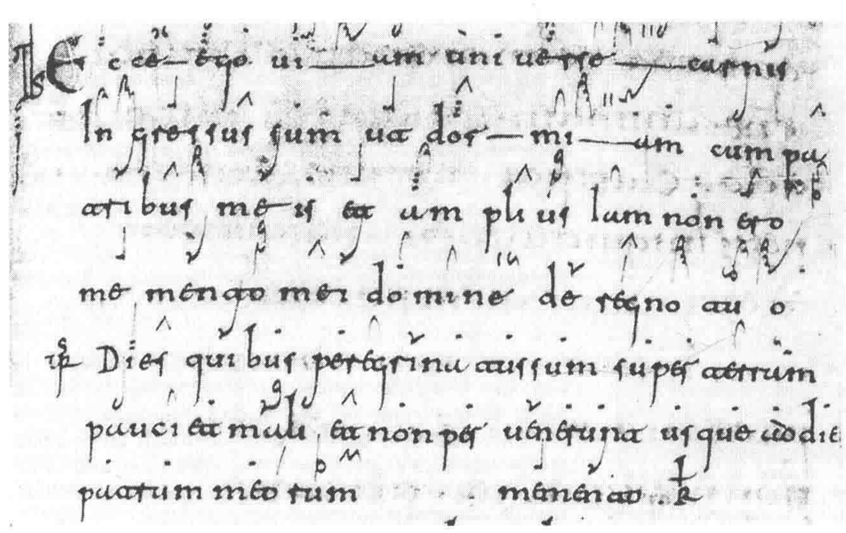
ANDREW TRACEY

Mozarabic chant. One of the principal branches of Christian liturgical chant in the West during the Middle Ages. It was sung on the Iberian peninsula, but its influence extended beyond Spain to touch other chant repertories such as the Gregorian, Ambrosian and Gallican. The relationship between the Mozarabic and Gallican rites is now of particular interest to scholars.

1. History. 2. Sources and notation. 3. Musical forms in the Office. 4. Musical forms in the Mass.

1. HISTORY. The repertory of Mozarabic chant belongs to the rite observed by Spanish Christians until its suppression in favour of the Roman rite in 1085. The term 'Mozarabic' refers to Christians living under Muslim domination. It is generally applied to the rite because its principal surviving documents date from the period after the Muslim invasion of the Iberian peninsula in 711. The term, however, is not strictly appropriate in some respects, for the formation of the rite clearly antedates the Muslim invasion. And many of the surviving manuscripts, though copied in the Mozarabic period, were copied in lands already reconquered from the Muslims by Christian rulers. Alternatives such as 'Visigothic' and 'Hispanic' are, however, equally inappropriate in some respects. Scholars have come to favour the term 'Old Hispanic' for this repertory.

The earliest evidence for the existence of a rite essentially like that preserved in later manuscripts is found in the writings of ISIDORE OF SEVILLE (*d* 636). His *Etymologiae* and *De ecclesiasticis officiis* contain descriptions of the Mass that closely parallel the later liturgical and musical documents themselves. Furthermore, the process of unification within the Iberian peninsula and parts of southern France was evidently already well advanced by 633, for in that year the Fourth Council of Toledo met under Isidore's leadership to decree the observance of 'one order of prayer and singing in all Spain and Gaul'. Only about 70 years later was the oldest surviving liturgical document for this rite copied. This is the *Orationale* of Verona, which, although it does not contain musical notation, does contain prayers and text incipits for antiphons and responsories. Comparison of this manuscript with the musical manuscripts of the 10th and 11th centuries makes it clear that the musical repertory too must have been set largely before 711.



The Mozarabic rite began to give way to the Roman rite as the reconquest of the peninsula gradually proceeded. The Roman rite entered Catalonia as early as the 8th century, but it was not until 1071 that it was adopted in Aragon. In 1076 it was adopted in parts of Castile and León, although surviving manuscripts from these territories make it clear that the Mozarabic rite had been observed here in the years immediately following the reconquest.

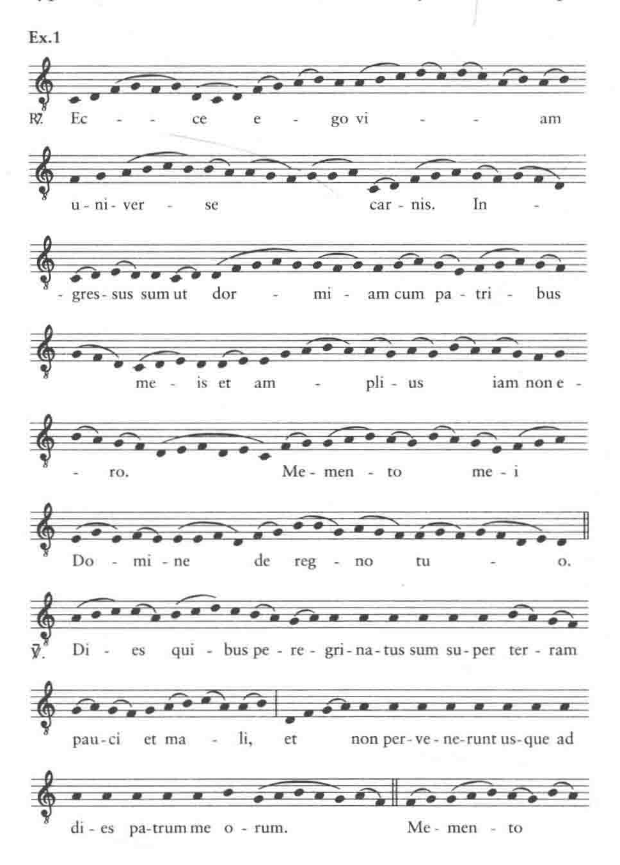
Toledo, the seat of the Spanish Church, was not recaptured from the Muslims until 1085. Hence, it was not until that year and the appointment of a French archbishop that the Roman rite could be imposed on the Spanish Church as a whole. Although Pope Alexander II had approved the Mozarabic service books as recently as 1065, Pope Gregory VII made their suppression official. Only a few parishes in Toledo itself were allowed to continue in the observance of their ancient rite. Whether the rite continued to be observed in territory held by the Muslims as late as 1492 is not known.

In the late 15th century Cardinal Jiménez de Cisneros embarked on a project to restore the rite. He published a missal in 1500 and a breviary in 1502. Some of the manuscripts on which these are based are still preserved in Toledo; they transmit a form of the rite that was not, however, found in the majority of the manuscripts there, or in any of the manuscripts from northern Spain. Scholars disagree over which form of the rite is the more ancient. New musical manuscripts were also copied at this time, although their melodies, in rhythmic notation, are evidently different from those of the older, non-diastematic sources.

The restoration of the rite received added impetus from Cardinal Lorenzana in the late 18th and early 19th centuries with the publication of new books and with increased support for the Mozarabic chapel in Toledo Cathedral. Except for relatively brief periods, this chapel has functioned continuously since that time, and services are still held daily. A few churches elsewhere in Spain have received permission to celebrate the Mozarabic Mass, but none does so on a regular basis.

2. SOURCES AND NOTATION. There are more than 20 surviving manuscripts and as many more fragments containing musical notation for Mozarabic chant. With only five exceptions, all these sources employ non-diastematic notation. The exceptions are four manuscripts copied during and after Cisneros's restoration of the rite around 1500 and one 11th-century manuscript containing about 20 melodies in Aquitanian neumes. Hence, the melodies will forever remain indecipherable, unless new sources are discovered that employ a more advanced

1. Mozarabic chant, northern notation (Liber ordinum, E-SI 4, f.85)



notation. It is unlikely, however, that such sources ever existed, for the rite was suppressed and the copying of manuscripts virtually ceased at just the period in which diastematic notation came into general use. Even scribes in Toledo, where the rite was observed after 1085, seem not to have bothered to recopy their melodies in a notation like that of the French manuscripts which the new archbishop had brought in that year.

On notational grounds, the manuscripts (excluding those copied during and after Cisneros's restoration) may be divided into two broad classes: those employing northern notation and those employing Toledan notation. These labels should not be taken to represent the actual geographical state of affairs in the 11th century and before. It is not certain, for example, whether all the Toledan manuscripts were actually copied in Toledo, and we have no idea at all of what notations might have been used in the southern half of the peninsula.

The northern notation is found primarily in manuscripts copied in the provinces of León (e.g. the antiphoner *E-L* 8) and Castile (e.g. *GB-Lbl* Add.30851, from S Domingo de Silos). It bears some resemblance to neumatic notations found elsewhere in Europe and is characterized by a predominance of upright neumes employing vertical strokes (fig.1 and ex.1).

By contrast, vertical strokes are almost totally lacking in Toledan notation, the neumes being generally inclined to the right. There are, furthermore, two types of Toledan notation. The first is found in manuscripts that embody the liturgical tradition of the north (referred to in the literature as tradition A). This notation includes a large number of delicate, rounded strokes (fig.2). The second type of Toledan notation is found only in manuscripts embodying a different liturgical tradition (tradition B), and is much coarser and more angular in appearance (fig.3).

Ex.1

The chronology of the sources, and thus the relative antiquity of the notations they contain, is not yet fully established, especially with respect to Toledan sources. The latter have been thought to include manuscripts copied as early as the 9th century. The manuscripts in question may, however, actually date from the 12th century and in some cases from as late as the 13th and 14th centuries (Mundó, 1965). The idea that non-diastematic notation continued in use into the 14th century must, of course, raise serious questions, but it is important to note that the earlier dating of these manuscripts is not firmly based.

Dates for a number of the northern manuscripts were provided by their copyists; all fall within the 11th century. Others, such as the antiphoners of León and S Millán de la Cogolla (*E-Mba* Aemil.30), have been assigned by scholars to the 10th century, although further study may show that some of these, too, should be placed in the 11th century.

The organization of the manuscripts into types and the arrangement of material within each of the types (for which see the writings of Pinell) are peculiar to the Mozarabic rite. For example, material which, in service books for the Roman rite, would be divided between the antiphoner (containing chants for the Office) and the gradual (containing chants for the Mass) is present in a single book in the Mozarabic rite. The León antiphoner is such a book and thus from the Roman point of view is not strictly an antiphoner at all. Within this volume all the music for both the secular Office and the Mass are combined in a single series so that the feasts of the Lord and the feasts of the saints appear in the order in which they would normally occur during the liturgical year. This series is followed by Offices and Masses for the Common of Saints, ordinary Sundays and various special occasions such as marriages and deaths. Other sources, such as the antiphoner of S Millán de la Cogolla, add to this same arrangement all the Proper prayers for both Mass and Office. Finally, the *Liber ordinum* from Silos (*E-SI* 4) contains the special liturgy for the week before Easter as well as numerous votive masses, including those for bishop, king and the sick or troubled. Music, prayers and readings are all provided in this manuscript.

3. Musical forms in the Office. The musical forms encountered in Mozarabic chant present a number of analogies with those of the Roman rite. For example, a comparable distinction exists between antiphonal and responsorial singing. And Mozarabic chant may be seen to make use of three styles: syllabic, neumatic and melismatic, much as in Gregorian chant. In the following descriptions of the principal musical items in both the Mozarabic Office and Mass, some of these analogies will be discussed further. The items from the Mass are presented here in the appropriate liturgical order.

(i) Antiphons. There are approximately 3000 in the surviving manuscripts. They are generally moderate in length and employ a simple syllabic or moderately neumatic style. Descriptions of the singing of antiphons found in the writings of Isidore of Seville and in the second prologue to the antiphoner of León make it clear that the alternation of two choirs was used, much as it is in Gregorian chant. Mozarabic manuscripts illustrate,

2. Mozarabic chant, Toledan notation, tradition A (E-Tc 35.4, f.44)

furthermore, that the verse or verses following the antiphons were sung to simple recitation formulae much like the Gregorian psalm tones. Unfortunately, however, there is very rarely musical notation for an entire verse. Instead, most antiphons are simply provided with the incipit of a single verse, usually without any notation at all. This was presumably done because the formulae were simple and so well known that there was no need to write them down, at least not for every antiphon.

The exact number of antiphonal psalm tones used in Mozarabic chant has not so far been ascertained because of the fragmentary nature of the evidence. Certainly it cannot be shown that there were eight tones corresponding to eight modes, as in Gregorian chant. Nevertheless, there are at least two tones that recur often enough to suggest that the application of the psalm tones depended on some scheme for classifying melodies, a scheme analogous to the modal system of Gregorian chant. Evidently these psalm tones could be modified slightly in order to adapt to individual antiphons, although these modifications are neither so numerous nor so extensive as the Gregorian *differentiae*.

The structure of the two most common tones is simple, consisting of an intonation of two or four elements, apparently applied without regard for text accent, a recitation tone, perhaps modified by an occasional elevation, and a final cadence consisting in one case of two elements and in the other of four applied mechanically to the final syllables of the verse. Whether these psalm tones were divided into two parts by a medial cadence is not clear.

The verse incipits provided for the antiphons are frequently not drawn from the beginning of a psalm, nor do the manuscripts always concur well in the choice of verse for a given antiphon. It is thus often doubtful, in the secular Office at least, whether an entire psalm was to accompany each antiphon, although the descriptions of antiphonal singing mentioned above always refer to the singing of 'verses' between the two choirs. Only in the monastic Office does it seem clear that entire psalms were sung with antiphons and that there was some provision for singing the entire psalter on a regular basis. For this purpose, however, psalters provided with antiphons were used in conjunction with other books containing other types of music such as the responsories. There seems to have been no single book containing all the music for the monastic Office.

At Matins, pairs of antiphons are each combined with an *alleluiaticus* (the term for an alleluiatic antiphon; see below) and a responsory to form *missae*, the number of which varies with the solemnity of the feast. Normally, the notation of the four pieces within any single *missa* does not suggest that they share common musical material. But a few *missae*, which definitely postdate the oldest core of the repertory, do display a musical unity brought about by shared material, sometimes extending to the responsory as well as the antiphons and *alleluiaticus*.

Another regular feature of Matins is a group of three antiphons, one drawn from each of the three *Psalmi canonici* (Psalms iii, l and lvi in the Vulgate numbering) and each presumably accompanied by the singing of the appropriate psalm. Although they do not follow one

3. Mozarabic chant, Toledan notation, tradition B (E-Mn 10.110, f.XXXVIIv)

another immediately in the service, the three pieces are generally cut from the same melodic stock.

(ii) Alleluiatici. These are simply alleluiatic antiphons, and they share the psalm tones and musical style of the antiphons just described. The rubrics in the sources, however, clearly distinguish these pieces from the remaining antiphons, and they occur only at specific points in the liturgy: as the third item in the *missae* at Matins and as the second antiphon at Vespers. Even during parts of Lent, when the word 'alleluia' is eliminated from the liturgy, pieces drawn from the alleluiatic psalms and bearing the rubric for the *alleluiatici* continue to appear in the appropriate places at Matins and Vespers.

(iii) Responsories. Approximately 500 responsories survive, and they bear a strong resemblance to the Great Responsories of Gregorian chant. They occur at Matins as the last item of each *missa* (see above) and at certain of the lesser hours. Their style is generally neumatic, as illustrated in ex.1 by one of the few melodies to have survived in both Mozarabic and decipherable Aquitanian neumes.

Most responsories are provided with a single verse written out complete with musical notation, and the manuscripts embody four clearly distinguishable traditions for the psalm tones to which these verses are sung. The northern sources transmit two of these traditions, one in sources from the region of León and the other in sources from the Rioja (the Ebro River valley above and below the city of Logroño) and neighbouring Castile. The melodies of these two traditions clearly correspond to one another, and since neither seems clearly to have been derived from the other, they must have descended from a common archetype dating from before the 10th century and the earliest surviving northern sources.

Studies of early Spanish monasticism suggest that, following their reconquest in the 8th century, parts of Castile were colonized by monks from Galicia, and that it was from Castile that the Rioja was colonized. The organization of monastic life in all three of these regions clearly sets them apart from León. Hence, it is not surprising that the musical manuscripts from Castile and the Rioja should present a tradition different from that of the Leonese manuscripts. And even though there are no musical sources from Galicia before the colonization of Castile, we may conclude that the differences between the two northern traditions reach back as far as the 8th century.

Of the two northern traditions, the Leonese is the more elaborate and systematic. Seven different tones occur more than once in the sources from León, but two of these appear much more frequently than the others (227 and 150 times, respectively, in a total of almost 500 pieces in the antiphoner of León). This immediately suggests that, here again, some scheme for the classification of melodies existed which formed the basis for the assignment of a particular psalm tone to each responsory. But it seems not to have been a scheme as elaborate as the Gregorian system of eight modes.

The application of the more common psalm tones to the responsory verses follows extremely closely certain principles, especially in the Leonese sources. As in the Gregorian Great Responsories, the melodies are generally bipartite, certain formulae (notably the final cadences) remaining fixed while others are adjusted to the structure of the text in question. These adjustments are carried out through the addition of single notes and through the contraction or division of more complex neumes. Even the adjustable formulae, however, are modified within narrow limits, and here the accentuation of the text clearly provides the guiding principle. In fact the treatment of accentuation in these melodies, unlike that in their Gregorian counterparts, is so careful that it provides clear evidence for some of the kinds of changes that were taking place in Latin on the Iberian peninsula just at the time when the vernacular began to emerge. The grammatical construction of the texts also exercises a clear influence on the melodies, for clauses and phrases in the text are punctuated through the introduction of secondary mediants and intonations. The verse in ex.1 presents one of the tones from the Rioja tradition.

The Toledan sources also transmit two traditions for the responsorial psalm tones, and these differ markedly from one another as well as from the two northern traditions. The two Toledan musical traditions correspond to the two liturgical and notational traditions found in these manuscripts. In the sources that agree liturgically with the northern manuscripts, there are again two tones that account for the great majority of examples. But neither of these tones corresponds clearly to any of the northern tones, even allowing for the considerable differences between the two notational systems. The melodies of the responsories themselves are clearly the same in these Toledan manuscripts and in the northern manuscripts, but responsories assigned to a single tone in one tradition are divided among several tones in the other. In general, these Toledan tones are much less elaborate and systematic than those of either northern tradition.

The Toledan sources embodying liturgical tradition B present four distinct responsorial psalm tones, and of these, one accounts for more than half of the total. It is treated with much the greatest consistency, but none of the four is applied to its texts as systematically as are the northern tones, and none significantly resembles tones in any other tradition.

An understanding of this last Toledan tradition must await a better knowledge of the liturgical tradition with which it is associated. But if the remaining three traditions for the responsorial psalm tones are compared, several conclusions emerge. The responsories themselves are the same in these three traditions, allowing for minor variants and notational differences. Consequently the disparity between the psalm tones of the two northern traditions on the one hand and the Toledan tradition on the other suggests that the psalm tones were transmitted orally long after the responsories themselves had been written down. By the time the psalm tones were written down, individual melodies and the criteria for applying them had evidently undergone considerable change in different parts of the peninsula, and they must have been written down only after the Toledan and northern notations had become quite distinct.

The existence of two quite distinct notational systems transmitting a single repertory of responsories can perhaps be attributed to the Muslim domination of large parts of the peninsula. Musical notation of the type found in Western chant manuscripts generally can only have been in its very first stages, if that, at the time of the Muslim invasion in 711. The Toledan and northern notations must therefore have become distinct only after the

Muslims were in control of much of Spain. Northern notation probably developed on the Christian side of the frontier, and Toledan probably among Christians living in territories on the Muslim side (the latter notation is thus properly 'Mozarabic'). And until it moved to the south of Toledo, opening the way for the suppression of the rite altogether, it was this frontier, marked with fire and blood, that kept the two notational and musical traditions separate.

These conclusions about regional differences in Mozarabic chant and its notations have been based almost exclusively on a study of the responsories for the Office and their psalm tones. But many of them could doubtless be confirmed by systematic studies of other types of chant.

(iv) Matutinaria. Occurring only at Matins, these pieces are evidently antiphons which are set apart from the others because their texts treat the appropriate themes for the early morning hours. They are normally provided with a notationless incipit for one verse.

(v) Benedictiones. Not to be confused with the *benedictiones* of the Mass, these are antiphons sung to the accompaniment of *Daniel* iii.52, 'Benedictus es Domine Deus', and the verses following. The sources occasionally provide the normal rubric for antiphons along with the rubric 'BNS' which always accompanies these pieces. Since the verse to follow was invariable, the sources do not always provide an incipit for it.

(vi) Soni. These often melismatic melodies occur at both Matins and Vespers. Their style and formal design, which resemble those of the *sacrificia* of the Mass (see below), make it clear that they are soloistic chants at least in part. Their refrain form suggests that they might be responsorial chants, but they are not mentioned in the prologues to the antiphoner of León as numbering among those pieces sung in the manner of responsories. The numbering of their verses also suggests that they belong to a separate category, for the first verse following the initial refrain always bears the rubric 'II' instead of the 'VR' of clearly responsorial chants. These melodies occasionally include long melismas (often on the word 'alleluia') that embody the double versicle structure of the *sequentiae* found in other chant repertories. With only the rarest exceptions in peripheral sources, these melismas were apparently not provided with *prosae*.

(vii) Laudes. Pieces bearing this title occur at Matins, at some of the Little Hours and at the Mass. The singing of 'alleluia' is a prominent feature of all of them except during Lent, when this word is suppressed throughout the liturgy.

(viii) Psallendi. These pieces occur at Matins and Vespers, generally without a verse following, although they were to be followed always by the Doxology. What melodies, if any, were to be used for this latter is not known, nor can it be said with certainty how the piece as a whole was performed and by whom. The closest analogy outside Mozarabic chant is provided by the *psallendae* of Ambrosian chant, although there are no concordances between the two groups.

(ix) Vespertini. The prologues to the antiphoner of León identify these as having been sung in the manner of responsories. Neumatic in style, they occur as the first item at Vespers and bear some resemblance to the Ambrosian *lucernaria*, the texts of the *vespertini* dealing with the traditional subjects of light, evening, night and the like. Although the term 'vespertinus' goes back at least as far as the Council of Merida in 666, the term 'lucernarium', describing what is certainly the same item in the liturgy, may be found in the *Regula monachorum* of Isidore of Seville and in the canons of the First Council of Toledo, which met between 397 and 400. Some Toledan manuscripts employ the rubric 'Lm', which should perhaps be interpreted as standing for 'lucernarium', given the Spanish tradition for this term.

There are not sufficient *vespertini* to provide a different piece for each feast. Hence, many of them are repeated during the course of the year. Within this limited repertory (fewer than 70 examples in the antiphoner of León) there is a considerable variety of forms. For example, although the *vespertini* are grouped among the responsorial pieces, about a quarter of them (notably those assigned to the ferias of Lent) lack verses. Almost another quarter have two or more verses, one of these pieces including as many as nine.

How the pieces without verses were performed is not clear. The ones with verses were almost certainly performed by soloists and a choir, as were other responsorial pieces. The verses were evidently performed by the soloists alone in most cases, for each verse is generally followed in the manuscripts by an indication to repeat the final portion of the refrain. This method of responsorial singing corresponds with Amalarius of Metz's description of responsorial singing among the Franks. Only when the music of the refrain and the verse is the same (or when the two at least end with the same material) is the repetition of part of the refrain omitted. In such cases, the choir presumably joined the soloists in singing the final portion of the verse.

The number of verses included in any one piece seems to be an index of the solemnity of the feast to which it is assigned. The composition of the texts with multiple verses, furthermore, makes it clear that these pieces are not remnants of a practice in which all *vespertini* consisted of entire psalms, for some of them intermingle psalmodic and non-psalmodic verses.

The *vespertini* illustrate most clearly the use of centonate composition in Mozarabic chant (*see* CENTONIZATION). Some of them employ common melodic formulae in such a way as to eliminate any possibility that one melody served as the model for the remainder. Among the *vespertini* without verses, however, there is one melody that was simply provided with different texts for different days in Lent.

(x) Preces. Occurring in both the Office and the Mass, the *preces*, in their most highly developed form, present us with rhythmic poetry composed in relatively short strophes separated by a brief refrain. Musically, this refrain may be entirely separate from the strophe or it may be the final phrase in what is essentially a single musical statement comprising both a strophe and a refrain. The melodies range between a simple syllabic and a moderately neumatic style.

The tradition of the *preces* reaches back at least into the 7th century and offers one of the principal points of contact between the Mozarabic and Gallican rites. It is generally thought that the texts shared by the two rites are Spanish in origin. Only two of these texts, however, can be shown to have employed the same melodics in France and Spain, and their distribution in Spanish

sources suggests that they may have originated in France. Among Spanish manuscripts, those associated with Toledo, and particularly those embodying liturgical tradition B, are richest in *preces*.

(xi) Hymns. Mozarabic manuscripts present texts for numerous hymns, many of which are common to other rites. But only a very few examples include musical notation. Hymns are assigned to Matins, Vespers and a number of the Little Hours.

4. Musical forms in the Mass.

(i) Praelegenda. These correspond in function to the Gregorian introits and, like them, are examples of antiphonal psalmody. In fact, some melodies in the Mozarabic rite serve both as *praelegenda* for the Mass and as antiphons or *alleluiatici* for the Office. In general, the manuscripts do not provide complete verses for the *praelegenda*, but there are enough verses with notation to reveal that the same psalm tones are employed as those found among the antiphons for the Office.

(ii) Gloria in excelsis Deo. Although this text and melodies for it rarely appear in the manuscripts, the antiphoner of León contains several versions among the pieces for ordinary Sundays.

(iii) Trisagion. The threefold singing of 'Hagios' to melodies that are at times quite melismatic is provided for in the manuscripts on only a few occasions. The texts sometimes present just the transliterated Greek; sometimes both the Greek and a Latin translation sung to the same melody; and in one case the Latin alone is given. The only rubric employed for these pieces is 'GRC', which is also used in the Office for antiphons with texts in transliterated Greek.

(iv) Benedictiones. All texts for the *benedictiones* of the Mass are drawn from the Canticle of the Three Children in the book of *Daniel*. Because their melodies are neumatic and even moderately melismatic, all verses in each piece are written out with notation. Within each piece, all verses employ much the same melodic material, and each is followed by the repetition of a refrain, a feature built into the scriptural text itself.

(v) Psalmi. Although scholars have generally employed the term 'psallenda' (singular 'psallendum'), the sources suggest that 'psalmi' (singular 'psalmo') ought to be preferred. In the antiphoner of León, these pieces are referred to as 'psalmi pulpitales'. They correspond to the Gregorian graduals in a number of respects.

Like the *vespertini*, they are numbered among the responsorial pieces by the author of the second prologue to the antiphoner of León. They are generally neumatic or melismatic in style, most consisting of a refrain and a single verse. As with the *vespertini*, part of the refrain is repeated after the verse unless the refrain and verse share the same melody. Only five out of more than 120 surviving examples have non-psalmodic texts.

Only nine examples include more than a single verse, and these nine are assigned to the Sundays in Lent, with the exception of the first, and to Tuesday, Wednesday, Thursday and Friday of Holy Week. The number of verses gradually increases as the weeks pass, and the *psalmo* for Good Friday in the antiphoner of León includes a total of 15 verses. This artificial arrangement alone suggests that these pieces are not remnants of an earlier practice in which all of the *psalmi* consisted of whole psalms. The structure of the texts adds some support to this notion, for the verses are not always presented in the order in which they occur in the psalm itself. Thus, at the very least, a considerable amount of rearranging was done in the course of abbreviating them. If the *psalmi* (and perhaps analogous pieces in other rites) originally consisted of whole psalms, it seems likely that nothing of the original melodies has been preserved for us.

(vi) Clamores. Only about 20 feasts are provided with *clamores*, and these pieces, though always identified by the appropriate rubrics, clearly form part of a continuous piece with the *psalmi*. A *clamor* normally consists of two parts separated by the acclamation *Deo gratias*, the melody for which is invariable. After the second part of the *clamor*, it is the refrain from the preceding *psalmo* that is repeated. If the concept of mode is applicable to these melodies at all, each *clamor* must be in the same mode as its associated *psalmo*. And since parts of the *clamor* melody are always the same, it would appear that all *clamores* and all their associated *psalmi* must be in the same mode. The 20 or so feasts to which these pieces are assigned are among the most ancient and important of the liturgical year. Hence, it appears that the oldest core of the *psalmo* repertory is constructed from a single mode, even though the notation for these pieces does not suggest significant melodic similarities among them. It is not possible to say, however, how many other *psalmi* might be in this same mode or how many other modes might be represented in the repertory of *psalmi* as a whole.

The *clamores* also bear on the question of whether the *psalmi* might originally have included more than one verse as a general rule. The text for a *clamor* is almost always taken from the psalm providing the text for its *psalmo*, and such an addition would have been pointless if the *psalmo* already consisted of the entire psalm. Hence, if the *clamores* and *psalmi* are of equal antiquity, as is generally agreed, the *psalmi* for which *clamores* exist must not have consisted originally of entire psalms.

(vii) Threni. The 11 pieces bearing this name substitute for the *psalmi* on certain days in Lent. Their texts are drawn from the books of *Job*, *Jeremiah* and the *Lamentations of Jeremiah*, and in the antiphoner of León all 11 pieces begin with the same refrain followed by three or four verses. Furthermore, all the pieces, and all verses within each piece, make use of the same melismatic melody. As with the *psalmi*, in which refrain and verse share the same melody, the refrain of the *threni* is not repeated after each of the verses. Hence, it is not entirely clear that they should be regarded as responsorial pieces. Their closest analogue in Gregorian chant is the tract, although this substitutes not for the gradual in Lent but for the alleluia.

(viii) Laudes. The *laudes* of the Mozarabic Mass correspond clearly to the alleluias of the Roman Mass. Outside Lent these pieces begin with the singing of the word 'alleluia' to a lengthy melisma. This is followed by a verse (although the usual rubric for verses does not appear here) that is neumatic in style, and this in turn is followed by a repetition, sometimes modified or expanded upon, of the initial alleluia melisma. Since the *laudes* are grouped among the pieces sung in the manner of responsories, it seems likely that they were performed in much the same manner as the Gregorian alleluias, although the manuscripts do not indicate the specific roles

of the soloists and choir. Like the Gregorian alleluias, too, the *laudes* for the Mass may be grouped into a number of melodic families.

The Mozarabic Mass includes an item with the title 'laudes' in Lent too. But since the word 'alleluia' itself is suppressed during this season, the *laudes* of Lent have quite a different form from their non-Lenten counterparts. In most respects they resemble the *psalmi* and the *vespertini*, for they are neumatic in style and consist of a refrain followed by one or two verses. And unless refrain and verse share the same melody, the final portion of the refrain is repeated after each verse.

(ix) Sacrificia. These correspond in function to the Gregorian offertories and are often quite long and highly melismatic. Each consists of a refrain followed by one or more verses (usually not from the psalter), although the first verse following the refrain always bears the roman numeral 'II'. In this and other respects, they resemble the *soni* of the Office, and in fact, an occasional piece serves in both categories. In this connection, it should be remembered that in the Gallican rite the piece which corresponds to the Gregorian offertory and the Mozarabic *sacrificium* is called the *sono*.

The final portion of the refrain is repeated after each of the verses, and in this respect the *sacrificia* resemble the *psalmi* and other responsorial pieces. But the second prologue to the antiphoner of León does not include them in this category. Hence, because of other peculiarities such as the scheme for numbering their verses, they are best placed in a separate category along with the *soni*.

(x) Ad pacem. The few melodies sung during Mass at the giving of the kiss of peace bear only the rubric 'ad pacem'. They are, however, antiphons which share the psalm tones found with the antiphons of the Office.

(xi) Ad sanctus. Chants bearing this rubric are provided for only a few important feasts. The texts, of which there are several different examples, are related to, but not the same as, the Sanctus of the Roman Mass. The rubric 'ad sanctus' is occasionally applied also to the Latin version of the Trisagion, which normally precedes the *benedictiones* of the Mozarabic Mass.

(xii) Ad confractionem panis. Sung at the breaking of the bread, this piece most often bears the rubric 'RS' for responsory. Unlike the responsories for the Office, however, it is rarely provided with a verse, even though a few melodies serve in both Office and Mass. The characteristic formulae for the verses of the Office responsories are never presented with the pieces for the Mass.

(xiii) Ad accedentes. These melodies correspond in function to the communion antiphons of the Roman rite. They are similar to the Office antiphons in style and in the treatment of their verses, sharing with them the same psalm tones.

DON M. RANDEL (with NILS NADEAU)

Mozart. South German-Austrian family of musicians.

(1) (Johann Georg) Leopold Mozart (*b* Augsburg, 14 Nov 1719; *d* Salzburg, 28 May 1787). Composer, violinist and theorist.

1. LIFE. He was the son of an Augsburg bookbinder, Johann Georg Mozart (1679–1736), and attended the Augsburg Gymnasium (1727–35) and the Lyceum adjoining the Jesuit school of St Salvator (1735–6), where he frequently performed as an actor and singer in various theatrical productions; he was also an accomplished organist and violinist. In 1737 Leopold broke with his family and matriculated at the Salzburg Benedictine University, studying philosophy and jurisprudence. He took the bachelor of philosophy degree the next year, with public commendation, but in September 1739 he was expelled for poor attendance and indifference. Shortly after, he became a valet and musician to Johann Baptist, Count of Thurn-Valsassina and Taxis, Salzburg canon and president of the consistory; it was to Thurn-Valsassina that Mozart dedicated his *Sonate sei da chiesa e da camera* op.1 (1740), which he engraved in copper himself.

During the early 1740s Mozart composed several German Passion cantatas which may have led to his appointment in 1743 as fourth violinist in the court orchestra of Archbishop Leopold Anton Freiherr von Firmian; in addition he taught violin to the choirboys of the cathedral oratory and, later, keyboard. By 1758 Mozart had advanced to the post of second violinist, and in 1763 to deputy Kapellmeister. (The title 'Hofkomponist', used to describe Mozart in a 1757 report on Salzburg published in F.W. Marpurg's *Historisch-kritische Beyträge zur Aufnahme der Musik*, had no official sanction.) There is no documentary support for the supposition that Mozart's teacher in composition was the court Kapellmeister, Johann Ernst Eberlin.

Mozart married Anna Maria Pertl on 21 November 1747; of their seven children only two, (2) Maria Anna ('Nannerl', *b* 1751) and (3) Wolfgang Amadeus (*b* 1756), survived to adulthood. In the same year as Wolfgang's birth, he published his important *Versuch einer gründlichen Violinschule*. Even before its publication, however, Mozart was already well-known. His works circulated widely in German-speaking Europe and in 1755 Lorenz Mizler petitioned for Mozart's membership in the Societät der Musicalischen Wissenschaften in Leipzig; the petition failed for unknown reasons.

The 'miracle which God let be born in Salzburg' changed Leopold Mozart's life, although it is not true, as Nannerl later reported, that Leopold 'entirely gave up both violin instruction and composition in order to direct that time not claimed in service to the prince to the education of his two children'. Even after Wolfgang's musical talents became apparent, Leopold continued to perform his works, to direct the court music, to teach violin, to arrange for the purchase of music and musical instruments, and to attend to numerous other details as part of his court duties. Nevertheless, the recognition of this 'miracle' must have struck Leopold with the force of a divine revelation and he felt his responsibility to be not merely a father's and teacher's but a missionary's as well. The numerous journeys that Leopold undertook, at first with his entire family but after 1769 chiefly with Wolfgang alone, were in part responsible for his lack of further advancement at court and must have physically taxed his son. Yet Wolfgang's artistic development is unimaginable without them.

Leopold Mozart's collaboration in Wolfgang's early works up to about 1766 was probably considerable (the trio of no.48 in the so-called 'Nannerl Notenbuch', an arrangement of the trio of the third movement of Leopold's D major serenade, also appears as Menuet II in Wolfgang's sonata K6) although he seldom drew direct attention to it. After this time he served chiefly (but not exclusively) as proofreader and editor; until the early

1770s scarcely a single autograph of Wolfgang's is without additions or alterations in his father's hand. Even later, the attributions and dates on Mozart's autographs are frequently by Leopold, who apparently preserved his son's manuscripts with painstaking orderliness. Thus the elder Mozart fulfilled a universal function as teacher, educator and private secretary to his son, and when necessary also served as valet, impresario, propagandist and travel organizer.

Leopold Mozart's final decade was one of rebuffs, setbacks at court and personal tragedy. His wife died in Paris in 1778 while accompanying Wolfgang on tour, and Leopold was subsequently compelled to mediate in the ever worsening relations between his son and Archbishop Colloredo. Although he managed to secure a temporarily satisfactory resolution of this conflict – in 1779 Wolfgang was appointed court and cathedral organist – his efforts finally came to nothing when in 1781 Mozart left the Archbishop's service and took up permanent residence in Vienna. Wolfgang's marriage to Constanze Weber was seen by Leopold as a misalliance and he became increasingly alienated from his son although in the spring of 1785, while visiting Vienna, he experienced at first hand Mozart's triumphs and heard with pride and satisfaction Haydn's famous words in praise of Wolfgang. But after this visit especially, Salzburg must have seemed remote and isolated to him. Earlier, in August 1784 Nannerl had married Johann Baptist von Berchtold zu Sonnenberg and moved to St Gilgen, the birthplace of Mozart's mother, and so Leopold returned to an empty house. One consolation was the birth in July 1785 of his grandson, Leopold (Nannerl and Berchtold's first child), who was brought to Salzburg to live with the elder Mozart, then 66 years old.

Leopold Mozart died in May 1787 and was buried in the cemetery of St Sebastian. On the same day, Dominicus Hagenauer, Abbot of St Peter's in Salzburg and a long-time family friend, noted in his diary:

> Leopold Mozart, who died today, was a man of much wit and wisdom, and would have been capable of good services to the state beyond those of music ... He was born in Augsburg, spent most of his days in court service here, and yet had the misfortune always to be persecuted and was far less beloved here than in other great places of Europe.

Mozart's personality could not be more accurately summarized, nor his misrepresentation at the hands of later biographers more strikingly contradicted. A man of broad cultural achievement – a passionate reader of literature and natural science, and an admirer of Gottsched, a correspondent of Gellert's and a friend of Wieland – Leopold Mozart may have been haughty, difficult to please and at times intractable (Hasse once described him as 'equally discontented everywhere' although he also gave Leopold full credit for Wolfgang's development, writing to Ortes, 'you will not be displeased to know a father who has the merit of having known how to form and give so good an education to a son'); but there is no compelling evidence that Mozart was excessively manipulative, intolerant, autocratic or jealous of his son's talent. On the contrary, a careful reading in context of the family letters reveals a father who cared deeply for his son but who was frequently frustrated in his greatest ambition: to secure for Wolfgang a worldly position appropriate to his genius (see especially Halliwell, A1998).

A portrait of Leopold Mozart (possibly by Lorenzoni, *c*1765; fig.1) and a drawing (probably by Count Firmian,

1. Leopold Mozart: portrait (c1765) attributed to Pietro Antonio Lorenzoni in the Mozart Museum, Salzburg

*c*1762, *A-Sm*) survive, while an engraving by J.A. Friedrich after M.G. Eichler appears as the frontispiece to the *Violinschule*; he is also depicted in the Carmontelle and Della Croce family paintings (see fig.18 below). A silhouette, purporting to show Leopold in Erfurt at the house of Baron Dalberg, reading the libretto of *Idomeneo* (Wagner, A1929), is a modern fabrication.

2. Works. According to the 'Nachricht von dem gegenwärtigen Zustande der Musik Sr. Hochfürstl. Gnaden des Erzbischoffs zu Salzburg', published in Marpurg, Leopold Mozart had by 1757 composed:

> many contrapuntal and other church items; further a great number of symphonies, some only *à4* but others with all the customary instruments; likewise more than 30 large serenades in which solos for various instruments appear. In addition he has brought forth many concertos, in particular for the transverse flute, oboe, bassoon, Waldhorn, trumpet etc.: countless trios and divertimentos for various instruments; 12 oratorios and a number of theatrical items, even pantomimes, and especially certain occasional pieces such as martial music ... Turkish music, music with 'steel keyboard' and lastly a musical sleigh ride; not to speak of marches, so-called 'Nachtstücke' and many hundreds of minuets, opera dances and similar items.

Most of these works are lost: of the 30 large serenades only one is extant, and of the oratorios and other theatrical items only two. Nevertheless, a significant body of music, chiefly symphonies, keyboard and chamber works, as well as masses, litanies and offertories, survives, mainly in manuscript copies, many of them prepared under Leopold Mozart's supervision.

While tentative dates can be established for most of this repertory, the extant manuscripts do not answer entirely the most intractable and significant chronological question: that is whether Leopold did in fact continue to compose after Wolfgang began his own career. The latest

substantiated dates of composition are April 1762 for the Trumpet Concerto and August 1762 for the Litany in D. It is almost certain, however, that the fragmentary Mass K116/90*a*, KA18–19/166*f–g* and 417*B*, was composed in Vienna in 1768; probably it is the work referred to in Leopold's petition to Archbishop Schrattenbach of March 1769:

this stay of mine in Vienna was made against my will and turned out to my disadvantage and to safeguard my and my child's honour I was unable to leave Vienna earlier … I myself as well as my son have composed sundry things for the Church and especially for the use of the archiepiscopal Cathedral Church.

On stylistic and bibliographical grounds it is likely that the so-called 'New Lambach' symphony (G16) was composed around 1767; and a cryptic remark in a letter of 14 November 1772 seems to refer to an as-yet-unfinished set of keyboard variations. (The date '1772' on the unique surviving copy of the symphony D25 is not reliable, nor is the listing in Breitkopf's catalogue of 1775 for the symphony G8.)

References in the family letters show that Leopold Mozart considered himself a 'modern' composer and his extant works, both early and late, bear this out. The church music, including the sacramental Litany in D, the Litany in E♭ and the *Missa solemnis* in C, is surprisingly dramatic, juxtaposing traditional *stile antico* counterpoint with arias based on models from Italian opera. The symphonies, too, are generally finely wrought; the most mature of them stylistically approximate other German symphonies by composers a generation younger than Leopold. It speaks for itself that several of his works were at one time thought to be compositions by Wolfgang. The 'popular' bias affects only a small part of Leopold Mozart's output and is of little significance. Like the character and variability of his works in general, it is more a reflection of particular occasions and the demands of the patrons concerned.

Curiously, Leopold seems to have written little for his own instrument. No violin concertos by him are known; the only reference to such works is a brief mention in J.C. Stockhausen's *Critischer Entwurf einer auserlesenen Bibliothek* (Berlin, 1771). The *Violinschule* of 1756, on the other hand, revised by the author for second and third editions published in 1769–70 and 1787 respectively, was widely recognized as the most important violin tutor of its time. A Dutch translation appeared in 1766, and a French edition, by Valentin Roeser, apparently not authorized, in 1770; elsewhere, revisions of Mozart's text continued to be published as late as 1817. In essence, the *Violinschule* draws on the Italian method and Tartini in particular, although the historical chapters show Mozart's acquaintance with a broad range of music theory, from Glarean on. While not universally applicable as a guide to pan-European 18th-century performing practices, the work nevertheless represents the source closest to Mozart and is the most valuable guide to the musical and aesthetic education of the younger composer. Other projected literary works, including a biographical account of Wolfgang, planned for a later edition of the violin method, and an edition of the travel letters, were never realized.

VOCAL

Sacred cants. (orats), applausus, school dramas: Christus begraben (I.A. Weiser), Salzburg, 1741, rev. 1755, music lost, libs *A-Su*, ed. in S; Antiquitas personata, Salzburg, 1742, pr. scenario *Su*, ed. in S; Christus verurteilt (Weiser), Salzburg, 1743, music lost, lib *Su* (1743), *Sca* (1749); Der Mensch ein Gottesmörder (Weiser), by 1753, parts *I-BZf* (see Tagliavini, C1963; Münster, A1965); Geistliches Schäfergedicht, oder Der gute Hirte (J.A. Schachtner), after 1754, music lost, lib *A-Su*; Oratorium pro Quadragesima, score *CH-BEl* (see Eisen, C1987); other Passion cants., lost, presumably incl. 2 extant arias ?11 April 1755, *D-Bsb**, S4.18, ed. in S; Weicht, zweifelnde Klagen, S4.19, *A-Wgm**; So straft Herodes die Verräter, S4.20, *Wn**, ed. in S; Applausus, 1753, comp. for St Peter's, lost (see Martin, A1913, p.355)

Masses: Missa solemnis, C, S4.1, by 1753, parts *A-Wgm*, *D-Ahk*, *Asa*; Missa solemnis, C, S4.2, before *c*1760, parts *A-Ssp*, *D-Mbs*, ed. R. Kubik (Neuhausen, 1981), frag. draft *OF** = K115, ed. in W xxiv/28 and by W. Schulze (Stuttgart, 1983) (see Pfannhauser, C1971–2); Missa, A, parts *A-Sd*; Missa brevis, F, K116 and K⁶417*B* and KAA18–19, frags. *D-Bsb**, *F-Pn**, *US-STu**, ed. in W xxiv/33 (see Plath, C1971–2); San-Ag, C, S4.11, formerly *D-Ahk*, lost; Missa 1ma Ssmae Trinitatis, C, S4.4, score, *A-Sca*, doubtful; Mass, C, KAC1.08, parts *Wn*, *CZ-Pnm*, doubtful, numerous other sources attrib. W.A. Mozart, pubd as Duae missae, no.1 (Munich, n.d.) and as Mozart's Masses 8 (London, n.d.), ? by F. Gleissner (see Köchel); Missa solemnis, C, S4.3, KAC1.20, doubtful, ? by C. Vogel; Gl-Cr-San, A, S4.5, spurious, by J.E. Eberlin; Missa pastoritia, C, spurious, by B. Grueber (see Plath, C1969, C1974)

Lits: Litaniae de venerabili, C, S4.6, 1 movt *D-Bsb**, parts formerly *Ahk*, ed. in S; Litaniae Lauretanae de BVM, E♭, S4.7–8, before *c*1760, *A-Sca**, rev. parts *Sd* with ob solo by W.A. Mozart (see Eisen, C1991), ed. in NMA, X:28, Abt.3–5/i (1973); Litaniae Lauretanae, F, S4.9, parts *A-Sd*; Litaniae Lauretanae, G, S4.10, before *c*1760, parts *Sd*; Litaniae de venerabili sacramento, D, 1762, *Sd** (see Senn, C1971–2), ed. in NMA, X:28, Abt.3–5/i (1973); Litanei, D, formerly *LA*

Other church music: Dixit Dominus, Mag, C, 1750s, parts *D-Asa*; Miserere, F, S4.12, formerly *Ahk*, lost; Tantum ergo, C, S4.16, before *c*1760, parts *A-Sd*, *Ssp*; Veni Sancte Spiritus, C, S4.17, parts *Ssp*, *KR*, ed. in Kurthen C1921; Offertorium de tempore et sub exposito venerabili (Convertentur sedentes), D, S4.13, before *c*1760, KAC3.09, parts *Ssp*, *D-FW*, ed. in W iii/23; Offertorium de Ssmo Sacramento (Parasti mensam), A, S4.14, score *A-Wgm*, parts *Sd*, ed. in S; Off SS Trinitate (Omnes hodie coelestium), D, by 1757, parts *D-Asa*, *TIT*, *A-Wgm*; Off (Rorate caeli), B♭, parts *HR-Zh*; Off (Jubilate Domino), C, before *c*1760, parts *D-Asa*, *A-KR*; Off (Beata es virgo Maria), C, parts *SEI*; Sequenza (Veni Sancte Spiritus), *GÖ**, doubtful; Ad sacram Communionem (Confitemini domino), F, S4.15, before *c*1760, parts *SsP*; Cantata pro Communione (Pulcherrimus mortalium), A, before *c*1760, parts *D-Asa*; Cantata ad Communionem (Surgite mortui), C, by 1756, parts *TIT*; Aria de BVM (Helle Sonn der dürstren Sterne), D, parts *Asa*; Aria (Trauere, o verwaiste Seele), F, ?*c*1750, parts *A-Sn*; Aria pro adventu (Christen auf), E♭, parts *Sn*; Aria pro Adventu (Nur im Paradeis), D, parts *Sn*

Secular lieder: Bey dem Abschiede (Du dauerst mich) (J.C. Günther) and Die Rangordnung (Den Schönen, die mit holden Blicken), *D-DÜk**; Der Mensch seufzt stets in Kreuz und Weh, 1 Jan 1761, *H-Bn**; Die grossmütige Gelassenheit (Ich hab' es längst gesagt) (Günther), K149, *A-LIm**, ed. in W vii/1; Die Zufriedenheit im niedrigen Stande (Ich trachte nicht nach solchen Dingen) (F.R.L. von Canitz), K151, *LIm**, ed. in W vii/1; Geheime Liebe (Was ich in Gedanken küsse) (Günther), K150, *H-Bn**, ed. in W vii/1; 15 Lieder (C.F. Gellert), KAC8.32–46, possibly by L. Mozart (see Plath, C1971–2); cadenzas for arias by J.C. Bach, K293*e* (see Plath, C1971–2)

SYMPHONIES

C: no.1, s3.1, parts *D-Bsb*; no.2, 'Sinfonia da camera', s3.2, by *c*1760, parts *HR*, ed. in Diletto musicale, no.938 (Vienna, 1989); no.3, s lost work no.1, KAC11.01, 1st vn part *Mbs*, movt i ed. H. Engel, *MJb 1951*, 22–33; no.4, parts *CH-Zz* (as 'Partia')

D [nos. 1–13]: no.1 'De gustibus non est disputandum', s3.3, parts *D-HR*, ed. in The Symphony 1720–1840, ser. B, vii (New York, 1984); no.2 'De gustibus non est disputandum', s3.4, parts *HR*; no.3 'Non è bello quello che è bello mà quello che piace', s3.5, parts *HR*; no.4, s3.6, parts *HR*; no.5 'Sinfonia da camera', s3.7, parts *HR*, ed. in S; no.6, s3.8 by *c*1760, parts *HR*; no.7, s3.9, parts *HR*; no.8, s3.10, parts *HR*; no.9, s3.11, by *c*1760, parts *HR*; no.10, s3.12, parts *HR*; no.11, s3.13 by 1751, parts *HR*; no.12, s3.14 by 1761, parts *CH-Zz, D-HR, Rtt*; no.13 'Non è bello quello che è bello mà quello che piace', s3.15, parts *HR*, ed. in The Symphony 1720–1840, ser. B, vii (New York, 1984)

D [nos. 14–25]: no.14, s3.16, K81/73*l*, ?1770, probably by W.A. Mozart (see Seiffert, C1908, pp.xxxviii ff, Köchel, 6/1964 and Eisen, C1986), parts *A-Wgm* (attrib. W.A. Mozart), ed. in W 24/4, NMA, IV:11/ii; no.15, s3.17, by 1772, frag. parts *A-Sca, D-HR, Rtt*; no.16, frag. parts *HR*; no.17, slost work no.2, by 1761, parts *RUh*; no.18, s lost work no.3, by 1753, parts *A-Sca*, ed. in E; no.19, s lost work no.4, by 1766, lost; no.20, parts *Ik*; no.21, parts *Ik*; no.22, ? by 1753, definitely by 1760, parts *D-Asa*; no.23 'Jagd Parthia', by 1768, formerly *A-LA*, lost; no.24, by 1768, frag. parts *D-Asa*; no.25, by 1771, parts *DO* dated 1771; no.26, parts *Rtt*, ed. in E

E♭: no.1, by 1768, formerly *A-LA*, lost

F: no.1, s3.18, by *c*1760, parts *D-HR*, ed. in The Symphony 1720–1840, ser. B, vii (New York, 1984) and in Diletto musicale, no.939 (Vienna, 1989); no.2, s3.19, by 1751, parts *HR*, ed. in E; no.3, s3.20, ? by 1753, definitely by 1760, parts *Mbs, Asa*, version with 2 hn, ed. W. Höckner (Hamburg, 1959); no.4, s lost work no.5, by 1761, parts *MÜu*; no.5, by 1760, parts *Tl* dated 1760; no.6, ? by 1748, definitely by 1768, parts *Asa*, ed. in E

G [nos. 1–9]: no.1, s3.21, parts *D-HR*; no.2 'Sinfonia burlesca', s3.22, parts *Asa, HR*, ed. in S; no.3 'Sinfonia pastorale', s3.23, KAC11.13, by 1753, parts *Asa, BAR, HR*, MS copies in score *A-Wgm, D-Bsb*, ed. K. Janetzky (Zürich, 1979); no.4, s3.24, parts *HR*; no.5, s3.25, by 1768, parts *Asa, HR*, ed. in E; no.6, s3.26, parts *HR*; no.7, s3.27, by *c*1760, parts *HR*, ed. in E; no.8, s3.28, KAC11.09, by 1775, attrib. L. Mozart in Breitkopf catalogue suppl.X (1775), 3, but cf Köchel (6/1964), edn (Leipzig, 1841); no.9 'Sinfonia da caccia', s3.29, parts *HR, A-Wgm*, ed. in S

G [nos. 10–20]: no.10, s lost work no.6, by 1761, lost; no.11, s lost work no.7, by 1766, lost; no.12, s lost work no.8, by 1766, lost; no.13, s lost work no.9, by 1766, parts Marburg, Hessisches Landesarchiv; no.14, by 1768, parts *D-Asa*; no.15, by 1768, formerly *A-LA*, lost; no.16, ?1767, definitely by 1769, parts *D-Asa*, ed. in NM, no.217 (1965), attrib. W.A. Mozart by Abert (C1964, also *MJb 1964*); no.17, by 1753, parts *A-Gd*, ed. in Diletto musicale, no.293 (Vienna, 1970); no.18, by 1753, parts *Gd*, ed. H.C.R. Landon (London, 1956); nos.19–20, both by 1768, formerly *LA*, lost

A: no.1, s3.30, by 1766, parts *D-Asa*, ed. in E; no.2, by 1751, inc. parts *Mbs*; no.3, lost, listed in Karlsruhe catalogue (see Eisen, C1987)

B♭: no.1, s lost work no.10, by 1753, parts *D-Asa*; no.2, s lost work no.11, by 1761, formerly *A-LA*, lost; no.3, s lost work no.12, by 1766, lost; no.4, by 1768, formerly *LA*, lost; no.5, by 1753, parts *Gd*, ed. in Diletto musicale, no.294 (Vienna, 1970); no.6, KAC11.02, ? by 1756, definitely by 1768, formerly *LA*, also circulated in version with 2 ob, 2 hn, W viii/i (see Köchel, 6/1964, and Eisen, A1986); no.7, formerly *D-ZL*, lost; no.8, s1.12, by 1761, arr. kbd in Raccolta delle megliore sinfonie, iii (Leipzig, 1761)

2 syms., discovered by Riemann, see *RiemannL11*, 1218: 1 lost, 1 = D no.17; 3 pastoral syms., lost, described in letters of 15, 18 and 29 Dec 1755 to J.J. Lotter; 'Post' Sym., lost, see note in MS of G no.9, *A-Wgm*

W.A. Mozart: Sym. K45*a*, attrib. to Mozart by A.A Abert (C1964, also *MJb 1964*)

OTHER ORCHESTRAL

Serenades: D, by 1762, parts *A-SEI*, movts iv and v = Tpt Conc. movts iv and v, trio of movt iii = Vn Sonata K6 trio of movt iii, ed. A. Weinmann (Zürich, 1977); Serenade, Aug 1754, lost, mentioned in diary of Oddo Gutrath (see Klein, B1962, p.320); 2 serenades, lost, mentioned in letter of 10 April 1755 to J.J. Lotter

Divertimentos: Divertimento militare, cioè Sinfonia, D, s3.31, parts *D-HR*, ed. in S; Die musikalische Schlittenfahrt: Divertimento, F, s1.11, 1755, parts *A-Wgm* (frag.), *D-Mbs, Rtt* [different work of same title by Wassmuth in *Bsb* (attrib. L. Mozart and Wassmuth), rev. in *ZI* (attrib. W.A. Mozart, numerous later edns as work of L. Mozart), cf Valentin, C1942–3, and Landon, C1956]

Partitas: D, by 1765, s3.32, score *GB-Lbl*; Die Bauernhochzeit, Divertimento, D, s3.33, 1755, score and parts *D-Bsb*, ed. in S and in Diletto musicale, no.259 (Vienna, 1972); D, mentioned in Breitkopf catalogue V (1765), 13; D, s lost work no.13, mentioned in Breitkopf Suppl.II (1767), 11; D, by 1768, formerly *A-LA*, lost; 2 parthia, C, formerly *A-LA*, lost

Cassatio: G, ?arr. L. Mozart from anon. 'Berchtesgadener Musik' (see Münster, C1969, and Gerlach, C1988), ed. in Diletto musicale, no.300 (Vienna, 1974) and in Denkmäler der Musik in Salzburg, ii (Munich, 1981)

Concs.: Conc., 2 hn, E♭, s3.35, 3 Aug 1752, parts *D-HR* (partly autograph), ed. H. Pizka (Kirchhei, 1983); Fl. Conc., G, before 24 Nov 1755, parts *HR-Zh*, ed. N. Delius (Milan, 1994); Tpt Conc., D, s3.34, Aug 1762, *D-Mbs**, ed. in S, in Organum, 3rd ser., xxix (Leipzig, 1930, 3/1960), in Concertino, no.98 (Mainz, 1967), cf Serenade, D; Ob Conc., F, mentioned in Breitkopf catalogue III (1763), 29, lost; Pf Conc., G, KAC15.02, only autograph sketches extant; 4 fl concs., lost, mentioned in letter of 24 Nov 1755 to J.J. Lotter (with incipits); 2 concs., 2 hn, D, mentioned in *SI* thematic catalogue, lost, also attrib. G.A. Reluzzi; vn concs., lost, mentioned in Stockhausen, 1771

Dances: 12 menuetti fatti per le nozze del Signore Francesco Spangler, s3.36, 1754, frag. parts *A-Sca*, nos.9 and 10 = minuet and trio no. 17 in Nannerl Notenbuch; [?Minuet], K64, ? by L. Mozart (see Plath, C1971–2)

'Chinese' and 'Turkish' music, by 1757, lost (see Marpung)

CHAMBER

With kbd/bc: Sonate 6 per chiesa e da camera, 2 vn, b, s2:Trios 7–12, parts (Salzburg, 1740), ed. G. Steinschaden (Salzburg, 1991), no.2, ed. in S, no.4 ed. in Hausmusik, no.177 (Vienna, 1955); 3 trios, hpd obbl, vn, vc, s2:Trios 13–15, parts *D-MMm*, from former set of 6 works, nos.1, 3 and 6 lost, no.5 ed. in S

With winds: Divertimento, G, fl, vn, b, parts *A-SB*, ed. (Winterthur, 1976); Divertimento, D, fl, vn, b, mentioned in *ST* thematic catalogue, lost

Str: 6 divertimentos, by 1762, s2:Trios 1–6, parts *D-Mbs*, Parthia di Rane, C, by 1768, parts *A-LA*, ed. in Diletto musicale, no.578 (Vienna, 1975); nos.1, 2, 4 ed. in S, 3 ed. in Organum, 3rd ser., xxx (Leipzig, 1930), no.1, ed. in Concertino, no.99 (Mainz, 1959); Divertimento, G, vn, vc, vle, parts *HR*; Divertimento, G, 2 vc, vle, parts *HR*

Vn duos: 16 in 1st edn of violin method (1756), ed. in Thesaurus musicus, vi (Budapest, 1959, 2/1965); 12 in Fr. edn of violin method (1770), s2:Solos, Duos, nos.3 and 7 from sonatas nos.4 and 2 of G.P. Telemann: 18 canons mélodieux, ou 6 sonates en duo (Paris, 1738), remainder probably by V. Roeser, ed. in HM, no.78 (Kassel, 1951, 2/1963)

Vn solo: Caprice, in Fr. edn of violin method (1770), s2:Solos, Duos

SOLO KEYBOARD

Sonata, F, s1.1 (Nuremberg, 1759), ed. in S; Sonata, B♭, s1.2 (Nuremberg, 1760), ed. in S; Sonata, C, s1.3, by 1759 (Nuremberg, 1760), ed. in S; Tempo di menuetto, 1 Jan 1761, *H-Bn**; Minuet and Trio, by 1756, and Trio, by 1762, *A-Sm* (Nannerl Notenbuch, no.17 = Hochzeitsmenuette s3.36 no.9–10 and Nannerl Notenbuch, no.48 = arr. of trio of movt iii of Serenade, D), ed. in NMA, IX:27/i; other unattrib. minuets in Nannerl Notenbuch, by Leopold; Fugue and Andante, *CH-E*, MS, *c*1801; Der Morgan und der Abend (for Salzburg Hornwerk), s1.4–10, ?1754 (Augsburg, 1759), ed. in Dankmäler der Musik in Salzburg, i (Munich, 1977); [Polonoise], Arietto and Scherzo, *D-Gms*, facs. in Staehelin, C1989; Variations, lost, ? never finished (see letter of 14 Nov 1772)

Pedagogical: Nannerl Notenbuch, 1759–*c*1763, *A-Sm*, ed. in NMA, IX:27/i [incl. works by L. Mozart and others]; Notenbuch, seinem Sohn Wolfgang Amadeus ... geschenkt, 1762, spurious (see Plath, A1971–2)

Arrs. and transcrs. of other composers' works; sketches, drafts, frags.; figured bass exercises

THEORETICAL WORKS

Versuch einer gründlichen Violinschule (Augsburg, 1756/*R*, 2/1769–70, enlarged 3/1787/*R*, 4/1800; Dutch trans., 1766/*R*; Fr.

trans., 1770; numerous other unauthorized reprintings and edns; Eng. trans., 1939 [?1948], 2/1951) [see also vn duos above]
[presumed author:] 'Nachricht von dem gegenwärtigen Zustande der Musik Sr. Hochfürstl. Gnaden des Erzbischoffs zu Salzburg im Jahre 1757', in F.W. Marpurg: *Historisch-kritische Beyträge zur Aufnahme der Musik*, iii (Berlin, 1757/*R*), 185–98; Eng. trans. in N. Saslaw: *Mozart's Symphonies* (Oxford, 1989), 50–57
Various letters, notebooks etc., ed. in *Mozart: Briefe und Aufzeichnungen*, ed. W. Bauer, O.E. Deutsch and J. Eibl (Kassel, 1962–75); see also bibliography

(2) Maria Anna (Walburga Ignatia) Mozart ['Nannerl'] (*b* Salzburg, 30/31 July 1751; *d* Salzburg, 29 Oct 1829). Pianist, daughter of (1) Leopold Mozart. She received her first music lessons from her father in 1758; in 1764 Leopold considered her 'one of the most skilful pianists in Europe' (letter of 8 June). From 1762 to 1767 Nannerl travelled with her family on various musical tours; from 1769 onwards she was no longer permitted to show her artistic talent on travels with her brother, as she had reached a marriageable age. While Wolfgang triumphed as a composer and virtuoso abroad, she remained with her mother in Salzburg. Wolfgang praised her compositions and encouraged her to continue composing, but her father never mentioned her work, and none of it survives.

Whereas Mozart disobeyed his father and married a woman of his choice, Nannerl, who was an avid reader and theatre-goer, obviously adopted the prescriptive and pedagogical literature of the late Enlightenment and lived as the epitome of contemporary ideas of femininity (piety, self-sacrifice, propriety, modesty). She apparently renounced her love for the captain and private tutor Franz d'Ippold and in accordance with her father's wishes married Johann Baptist von Berchtold zu Sonnenburg (*b* 22 Oct 1736; *d* 26 Feb 1801), a government official and magistrate at St Gilgen, in 1784. Besides bringing up five children of Berchtold's, she bore three children, Leopold Alois Pantaleon (1785–1840), Jeanette (1789–1805) and Maria Babette (1790–91). Her brother, who wrote several works for her, including the Prelude and Fugue K394/383*a*, remained closely attached to her. In St Gilgen Nannerl received most of Mozart's piano concertos up to K467, and copies in her handwriting exist (now in *A-Ssp*). It has falsely been assumed that Nannerl quarrelled with her brother about their father's legacy; however, as a woman she had no legal power, and the negotiations were conducted by her husband.

In 1792 Nannerl wrote down some recollections about her late brother for Schlichtegroll; her material (in *A-Sm*) was also used by Nissen. Parts of her diaries and some letters also exist. She was later wrongly accused of criticizing her sister-in-law Constanze as not being a 'fitting girl' for Mozart (see Rieger, 1990, pp.240–01) but, as the manuscript shows, this sentence is not written in her handwriting but in that of Albert von Mölk.

After her husband's death in 1801 Nannerl returned to Salzburg with her two surviving children. She gave piano lessons and helped publishers find missing works by her brother. Mozart's son Franz Xaver visited her in 1821, which gave her great pleasure. She was blind from 1825, and when Vincent and Mary Novello visited her in 1829 they found her 'blind, languid, exhausted, feeble and nearly speechless'; Mary Novello also remarked on her poverty and loneliness. Clearly her lifestyle in old age did not reflect her affluence, for her estate turned out to consist of the large sum of 7837 gulden. She was buried in the churchyard of the abbey of St Peter, Salzburg.

(3) (Johann Chrysostom) Wolfgang Amadeus Mozart (*b* Salzburg, 27 Jan 1756; *d* Vienna, 5 Dec 1791). Austrian composer, son of (1) Leopold Mozart. His style essentially represents a synthesis of many different elements, which coalesced in his Viennese years, from 1781 on, into an idiom now regarded as a peak of Viennese Classicism. The mature music, distinguished by its melodic beauty, its formal elegance and its richness of harmony and texture, is deeply coloured by Italian opera though also rooted in Austrian and south German instrumental traditions. Unlike Haydn, his senior by 24 years, and Beethoven, his junior by 15, he excelled in every medium current in his time. He may thus be regarded as the most universal composer in the history of Western music.

1. Ancestry and early childhood. Mozart was baptized on the day after his birth at St Rupert's Cathedral as Joannes Chrysostomus Wolfgangus Theophilus. The first two names record that 27 January was the feast day of St John Chrysostom, while Wolfgangus was the name of his maternal grandfather and Theophilus a name of his godfather, the merchant Joannes Theophilus Pergmayr; Mozart sometimes preferred the Latin form, Amadeus, but more frequently Amadè, Amadé or the German form Gottlieb. He was the seventh and last child born to Leopold Mozart and his wife Maria Anna, née Pertl (*b* St Gilgen, 25 Dec 1720; *d* Paris, 3 July 1778); only he and the fourth child, (2) Maria Anna ('Nannerl'), survived.

The name Mozart (spelt in a variety of forms including Mozarth, Mozhard and Mozer) is first recorded for a Heinrich Motzhart in Fischach, in 1331, and appears in other villages south-west of Augsburg, notably Heimberg, from the 14th century; the paternal ancestry of the family has been traced with some certainty to Ändris Motzhart, who lived in the Augsburg area in 1486. Several early member of the family were master masons (i.e. architects), builders, craftsmen and sculptors; two, in the late 16th and early 17th centuries, were artists. Mozart's great grandfather David (*c*1620–1685) was a master mason, his grandfather Johann Georg (1679–1736) a master bookbinder in Augsburg. His mother's family came mainly from the Salzburg region and followed middle-class occupations. Her father, Wolfgang Nikolaus Pertl, held important administrative and judicial posts at Hüllenstein, near St Gilgen, but a bout of ill-health pushed him into debt and his family was left destitute.

Until 1773 the Mozart family rented an apartment on the third floor of the house of Johann Lorenz and Maria Theresia Hagenauer, who had a thriving grocery business with connections in several important European cities. They also acted as bankers to the Mozarts, establishing credit networks for Leopold during the tours of the 1760s. It was to the Hagenauers that most of Leopold's early letters, now the most important source of information about Mozart's travels during the 1760s, were addressed. Many of them were intended for public circulation: Leopold was keen to impress the children's triumphs on the archbishop, the Salzburg nobility and his wide circle of friends and acquaintances.

As far as is known, Leopold was entirely responsible for the education of his children, which was by no means restricted to music but also included mathematics, reading, writing, literature, languages and dancing; moral and religious training were part of the curriculum as well. (A later biographical dictionary, B. Pillwein's *Biographische Schilderungen* (Salzburg, 1821), suggests that the court singer Franz Anton Spitzeder also gave the young Mozart musical instruction, but this assertion is uncorroborated.)

Mozart showed his musical gifts at an early age; Leopold noted in Wolfgang's sister's music book (the so-called Nannerl Notenbuch, begun in 1759) that Wolfgang had learnt some of the pieces – mostly anonymous minuets and other binary form movements, probably German in origin, but also including works by Wagenseil, C.P.E. Bach, J.J. Agrell and J.N. Tischer as well as Leopold Mozart himself – when he was four. According to Leopold, Wolfgang's earliest known compositions, a miniature Andante and Allegro K1*a* and 1*b*, were written in 1761, when he was five. More substantial are the binary form minuets in F major K2 and K5 and the Allegro in B♭ K3, composed between January and July 1762.

Mozart's first known public appearance was at Salzburg University in September 1761, when he took a dancing part in a performance of *Sigismundus Hungariae rex*, given as an end-of-term play (*Finalkomödie*) by Marian Wimmer with music by the Salzburg Kapellmeister Ernst Eberlin. In 1762 Leopold apparently took Wolfgang and Nannerl to Munich, where they played the harpsichord for Maximilian III Joseph, Elector of Bavaria (no documentation survives for this journey, which is known only from a later reminiscence of Nannerl Mozart). A tour to Vienna lasted from September to December 1762. The children appeared twice before Maria Theresa and her consort, Francis I, as well as at the homes of various ambassadors and nobles (the empress sent the children a set of court clothes, which they wore for the well-known paintings done later in Salzburg, probably by P.A. Lorenzoni;). The trip was a great success: in October the imperial paymaster presented the Mozarts with a substantial honorarium and a request to prolong their stay; the French ambassador, Forent-Louis-Marie, Count of Châtelet-Lomont, invited them to Versailles; and Count Karl von Zinzendorf, later a high state official, wrote in his diary that 'the poor little fellow plays marvellously, he is a child of spirit, lively, charming; his sister's playing is masterly'.

The family returned to Salzburg on 5 January 1763. Leopold was promoted to deputy Kapellmeister on 28 February, and that evening Mozart played at court as part of Archbishop Schrattenbach's birthday celebrations; the Salzburg court chronicle records that there was 'vocal music by several virtuosos, among whom were, to everyone's astonishment, the new vice-Kapellmeister's little son, aged seven, and daughter, aged ten, performing on the harpsichord, the son likewise on the violin, as well as one could ever have hoped of him'. On 9 June the family set out on a three-and-a-half-year journey through Germany, France, the Low Countries, England and Switzerland. It was the first of five tours undertaken during the next decade.

2. TRAVELS, 1763–73. Travelling by way of Munich, Augsburg, Ludwigsburg, the summer palace of the Elector Palatine Carl Theodor at Schwetzingen, Mainz, Frankfurt, Coblenz and Aachen, the Mozart family arrived at Brussels on 4 October 1763; in each of these places the children either performed at court or gave public concerts. From there they pressed on to Paris. The children played before Louis XV on 1 January 1764, with public concerts following on 10 March and 9 April at the private theatre of M. Félix, in the rue et porte Saint-Honoré. In Paris Mme Vendôme published Mozart's two pairs of sonatas for keyboard and violin, K6–9, his first music to appear in print.

The family arrived in England on 23 April, first lodging at the White Bear Inn in Piccadilly; the next day they moved to the house of the barber John Cousins, in Cecil Court. They played twice for George III, on 27 April and 17 May 1764 (in a letter of 28 May, Leopold enthusiastically recounted to Hagenauer the friendly greeting the king gave them at a chance meeting in St James's Park), and were scheduled to appear at a benefit for the composer and cellist Carlo Graziani on 23 May; however, Wolfgang was taken ill and was unable to perform. The Mozarts mounted their own benefit on 5 June, at the Great Room in Spring Garden; later that month Mozart performed 'several fine select Pieces of his own Composition on the Harpsichord and on the Organ' at Ranelagh Gardens, during breaks in a performance of Handel's *Acis and Galatea*. Further benefit concerts followed on 21 February and 13 May 1765. At some time during their visit to London, Mozart was tested by the philosopher Daines Barrington, who in 1769 furnished a report on him to the Royal Society (published in its *Philosophical Transactions*, lx (1771), 54–64). Barrington's tests were typical of others that Mozart was set elsewhere on the Grand Tour and, later, in Vienna and Italy:

> I said to the boy, that I should be glad to hear an extemporary *Love Song*, such as his friend Manzoli might choose in an opera. The boy . . . looked back with much archness, and immediately began five or six lines of a jargon recitative proper to introduce a love song. He then played a symphony which might correspond with an air composed to the single word, *Affetto*. It had a first and second part, which, together with the symphonies, was of the length that opera songs generally last: if this extemporary composition was not amazingly capital, yet it was really above mediocrity, and shewed most extraordinary readiness of invention. Finding that he was in humour, and as it were inspired, I then desired him to compose a *Song of Rage*, such as might be proper for the opera stage. The boy again looked back with much archness, and began five or six lines of a jargon recitative proper to precede a *Song of Anger*. This lasted also about the same time as the *Song of Love*; and in the middle of it, he had worked himself up to such a pitch, that he beat his harpsichord like a person possessed, rising sometimes in his chair. The word he pitched upon for this second extemporary composition was, *Perfido*. After this he played a difficult lesson, which he had finished a day or two before: his execution was amazing, considering that his little fingers could scarcely reach a fifth on the harpsichord. His astonishing readiness, however, did not arise merely from great practice; he had a thorough knowledge of the fundamental principles of composition, as, upon producing a treble, he immediately wrote a base under it, which, when tried, had very good effect. He was also a great master of modulation, and his transitions from one key to another were excessively natural and judicious; he practised in this manner for a considerable time with a handkerchief over the keys of the harpsichord.

The Mozarts left London on 24 July 1765, travelling by way of Canterbury (where a concert was announced, but apparently cancelled) and Lille to Ghent and Antwerp, arriving at The Hague on 10 September. There the children gave two public concerts and played before the Princess of Nassau-Weilburg, to whom Mozart later dedicated the keyboard and violin sonatas K26–31. They moved on to Amsterdam in January, returning to The Hague for the installation of Wilhelm V on 11 March – it was for this occasion that Mozart composed the *Gallimathias musicum* K32 – and in April they set out again for Paris, arriving there in early May. The Mozarts remained in Paris for two months; their patron, Baron Grimm, who had paved their way there earlier, commented on Mozart's 'prodigious progress' since early 1764.

The final stage of the homeward journey took the Mozarts to Dijon, Lyons, Lausanne, Zürich as well as

Donaueschingen, where they played for Prince Fürstenberg on nine evenings. From Donaueschingen they pressed on to Dillingen, Augsburg and Munich, arriving back in Salzburg on 29 November. On the day of their arrival, Beda Hübner, librarian at St Peter's, wrote in his diary (in *A-Ssp*):

I cannot forbear to remark here also that today the world-famous Herr Leopold Mozart, deputy Kapellmeister here, with his wife and two children, a boy aged ten and his little daughter of 13, have arrived to the solace and joy of the whole town . . . the two children, the boy as well as the girl, both play the harpsichord, or the clavier, the girl, it is true, with more art and fluency than her little brother, but the boy with far more refinement and with more original ideas, and with the most beautiful harmonic inspirations . . . There is a strong rumour that the Mozart family will again not long remain here, but will soon visit the whole of Scandinavia and the whole of Russia, and perhaps even travel to China, which would be a far greater journey and bigger undertaking still: de facto, I believe it to be certain that nobody is more celebrated in Europe than Herr Mozart with his two children.

Leopold Mozart is often portrayed as an inflexible, if consummate, tour manager, yet much of the 'Grand Tour' was not planned in advance. When he left Salzburg, Leopold was undecided whether to travel to England; nor was it his intention to visit the Low Countries (letter of 28 May 1764). There were also miscalculations. It is likely, for instance, that the Mozarts outstayed their welcome in London: by June 1765 they were reduced to giving cheap public displays at the down-market Swan and Hoop Tavern in Cornhill (see McVeigh, G1993). On the other hand, it is not widely appreciated how difficult travel could be at this time: routes were often unsafe and almost always uncomfortable (Leopold marvelled in a letter of 25 April 1764 at his successful crossing of the English Channel, an experience that was surely unknown to his friends in Salzburg), expenses were substantial, and he was frequently mistreated, ignored or prevented by potential patrons from performing. In a letter completed on 4 November 1763 he wrote from Brussels:

We have now been kept [here] for nearly three weeks. Prince Karl [Charles of Lorraine, brother of Emperor Francis I and Governor of the Austrian Netherlands] . . . spends his time hunting, eating and drinking . . . Meanwhile, in decency I have neither been able to leave nor to give a concert, since, as the prince himself has said, I must await his decision.

(Quotations from the Mozart family correspondence are based on the translations in Anderson, A1938, 3/1985).

Nevertheless, these unexpected detours – which added nearly two years to the tour – also reaped rich musical rewards: at every stage of their travels the Mozarts acquired music that was not readily available in Salzburg or met composers and performers who did not normally travel in south Germany and Austria. At Ludwigsburg they heard Nardini (on 11 July 1763 Leopold wrote to Salzburg, 'it would be impossible to hear a finer player for beauty, purity, evenness of tone and singing quality'), and in Paris they met, among others, Schobert, Eckard and Honauer, from whose sonatas, as well as sonatas by Raupach and C.P.E. Bach, Mozart later chose movements to set as the concertos K37 and 39–41. Their stay in London brought Mozart into contact with K.F. Abel, Giovanni Manzuoli and most importantly J.C. Bach, with whom the family became intimate and whose influence on Mozart was lifelong. Years later, when Wolfgang was in Paris, Leopold upheld Bach as a model composer (letter of 13 August 1778):

If you have not got any pupils, well then compose something more . . .. But let it be something short, easy and popular . . . Do you image that you would be doing work unworthy of you? If so, you are very much mistaken. Did Bach, when he was in London, ever publish anything but similar trifles? *What is slight can still be great*, if it is written in a natural, flowing and easy style – and at the same time bears the marks of sound composition. Such works are more difficult to compose than all those harmonic progressions, *which the majority of the people cannot fathom*, or pieces which have pleasing melodies, but which are *difficult to perform*. Did Bach lower himself by such work? Not at all. Good composition, sound construction, il filo – these distinguish the master from the bungler – even in trifles.

It is also safe to say that on the 'Grand Tour' Mozart began to absorb his father's opinions about various national styles and how to conduct himself in public. In Paris on 1 February 1764, Leopold wrote of the Royal Chapel at Versailles:

I heard good and bad music there. Everything sung by individual voices and supposed to resemble an aria was empty, frozen and wretched – in a word, French – but the choruses are good and even excellent . . . the whole of French music is not worth a sou.

In this he anticipated by many years Mozart's comment on 5 April 1778, when he was again in Paris, that

at Mannheim [the choruses] are weak and poor, whereas in Paris they are powerful and excellent . . . What annoys me most of all in this business is that our French gentlemen have only improved their *goût* to this extent that they can now listen to good stuff as well. But to expect them to realize that their own music is bad or at least to notice the difference – Heaven preserve us!

More importantly, perhaps, Mozart also took to heart his father's negative opinions of Salzburg, repeating them almost verbatim in his letters of the late 1770s and early 80s. As early as 19 July 1763 Leopold wrote from Schwetzingen:

The orchestra is undeniably the best in Germany. It consists altogether of people who are young and of good character, not drunkards, gamblers or dissolute fellows.

Mozart, some 15 years later, wrote to his father (letter of 9 July 1778):

one of my chief reasons for detesting Salzburg [is the] coarse, slovenly, dissolute court musicians. Why, no honest man, of good breeding, could possibly live with them! Indeed, instead of wanting to associate with them, he would feel ashamed of them . . . [The Mannheim musicians] certainly behave quite differently from ours. They have good manners, are well dressed and do not go to public houses and swill.

Mozart remained in Salzburg for nine months. During this time he wrote three vocal works: a Latin comedy, *Apollo et Hyacinthus*, for the university; the first part of the oratorio *Die Schuldigkeit des ersten Gebots*, a joint work with Michael Haydn and Anton Cajetan Adlgasser; and the *Grabmusik* K42 (to which he added a concluding chorus with introductory recitative, *c*1773). On 15 September 1767 the family set out for Vienna. Presumably Leopold had timed this visit to coincide with the festivities planned for the marriage of the 16-year-old Archduchess Josepha to King Ferdinand IV of Naples. Josepha, however, contracted smallpox and died on the day after the wedding was to have taken place, throwing the court into mourning and inducing Leopold to remove his family from Vienna, first to Brünn (Brno) and then to Olmütz (Olomouc) where both Mozart and Nannerl had mild attacks of smallpox.

Shortly after their return to Vienna in January 1768, Leopold conceived the idea of securing for Mozart an opera commission, *La finta semplice*, but intrigues at court conspired to defeat his plan (the Mozarts' side of the story is preserved in detail in the surviving correspondence). He wrote an indignant petition to the emperor in

September, complaining of a conspiracy on the part of the theatre director Giuseppe Afflisio (d'Affligio), who apparently claimed that Wolfgang's music was ghost-written by his father, and proving Mozart's output by including a list of his compositions to that time (see Zaslaw, A1985). Presumably as compensation for the suppression of the opera, in December Mozart directed a performance before the imperial court of a festal mass (K139), an offertory (K47*b*, lost) and a trumpet concerto (K47*c*, lost) at the dedication ceremony of the Waisenhauskirche; the *Wienerisches Diarium* reported on 10 December 1768 that Mozart performed his works 'to general applause and admiration, and conducted with the greatest accuracy; aside from this he also sang in the motets'. That same month he completed the Symphony K48. Earlier, in October, Mozart may have given a private performance of his one-act Singspiel *Bastien und Bastienne* at the home of Dr Franz Anton Mesmer, the inventor of 'magnetism therapy' (later parodied in *Così fan tutte*).

On the return journey to Salzburg, the Mozarts paused at Lambach Abbey, where father and son both presented symphonies to the library (the controversy over the attribution of the two works, Leopold Mozart's G9 and Mozart's KAnh.221, is summarized in Zaslaw, L1989). They arrived home on 5 January and remained there for nearly a year. *La finta semplice* was performed at court on or about 1 May, and Mozart wrote the Mass K66 in October for the first Mass celebrated by his friend Cajetan (Father Dominicus) Hagenauer, son of the family's Salzburg landlord. Other substantial works from this time include three orchestral serenades (K63, 99 and 100), two of which were probably intended for performance as 'Finalmusik' at the university's traditional end-of-year ceremonies, possibly some shorter sacred works (K117 and 141) and several sets of dancing minuets (K65*a* and 103; K104 and 105 are by Michael Haydn, possibly arranged by Mozart). By the age of 13, then, Mozart had achieved a significant local reputation as both a composer and a performer. On 27 October he was appointed, on an honorary basis, Konzertmeister at the Salzburg court.

Less than two months later, on 13 December, Leopold and Wolfgang set out on their own for Italy. The journey followed the now usual pattern: they paused at any town where a concert could be given or where an influential nobleman might wish to hear Mozart play. Travelling by way of Innsbruck and Rovereto, they arrived at Verona on 27 December. While there, Mozart played at the Accademia Filarmonica and had his portrait painted, probably by Saverio dalla Rosa (fig.2); the piece of music shown on the harpsichord, almost certainly by him, is otherwise unknown (K72*a*; but see Heartz O1995). At Mantua, on 16 January, Mozart gave a concert typical of his public and private performances at the time: it included a symphony by him; *prima vista* and extempore performances of concertos, sonatas, fugues, variations and arias; and, in addition, a small number of works contributed by other performers. The *Gazzetta di Mantova*, in a report on the concert (19 January 1770), described Mozart as 'incomparable'.

From Mantua the Mozarts travelled to Milan where Wolfgang gave several performances at the home of Count Karl Firmian, the Austrian minister plenipotentiary, including a grand academy on 12 March that may have included the newly composed arias K77, 88 and

2. Wolfgang Amadeus Mozart: portrait (early 1770) probably by Saverio della Rosa, formerly attributed to Felice Cignaroli (private collection); the music he is playing is presumed to be by Mozart himself (this is its only source) and is entered in the Köchel catalogue (3/1937) as K*72a*

Anh.2; presumably as a result of his performances and compositions, Mozart was commissioned to write the first opera, *Mitridate, re di Ponto*, for the carnival season in December. Father and son left Milan on 15 March, bound for Lodi (where Mozart completed his first string quartet, K80), Parma, Bologna (where they met the theorist and composer Padre Martini) and Florence, where Mozart became reacquainted with the castrato Manzuoli and newly acquainted with the English composer Thomas Linley, a boy of his own age. From there they passed on to Rome, arriving on 10 April, in time for Holy Week; Mozart made a clandestine copy of Allegri's famous *Miserere* (traditionally considered the exclusive property of the papal choir), and may have composed two or three symphonies (K81, 95 and 97). After a brief stay in Naples, where Mozart gave several concerts and heard Jommelli's *Armida* (which he described on 5 June 1770 as 'beautiful, but much too broken up and old-fashioned for the theatre'), they returned to Rome, where on 5 July Pope Clemens XIV created Mozart a Knight of the Golden Spur (fig.3). Father and son set out again on 10 July, returning to Bologna and the summer home of Count Pallavicini. There Mozart may have completed the Symphony K84, as well as some sacred works and canons, and he received the libretto and cast-list for his Milan opera. Before they left Bologna he was admitted to membership of the Accademia Filarmonica; the original autograph of his test piece, the antiphon K86, has annotations by Padre Martini, suggesting that he may have had help.

Work on the composition of *Mitridate, re di Ponto* began in earnest after the Mozarts' return to Milan on 18 October 1770. The libretto, by Vittorio Amadeo Cigna-Santi, after Racine, had been set by Quirino Gasparini for

3. Mozart wearing the insignia of the Golden Spur: anonymous portrait (1777) in the Civico Museo Bibliografico Musicale, Bologna

Turin in 1767 and Leopold in his letters described various intrigues among the singers, including the possibility of their substituting certain of Gasparini's settings for Mozart's. In fact the setting of 'Vado incontro al frato estremo' found in the earliest scores of the opera has been found to be by Gasparini; apparently the primo uomo, D'Ettore, was unwilling to sing Mozart's now lost version, (Peiretti, J1996). There were three recitative rehearsals, two preliminary orchestral rehearsals and two full ones in the theatre, as well as a dress rehearsal; Leopold's letter of 15 December gives the useful information that the orchestra consisted of 14 first and 14 second violins, 6 violas, 2 cellos, 6 double basses, 2 flutes, 2 oboes, 2 bassoons, 4 horns, 2 trumpets and 2 keyboards. The première, at the Regio Ducal Teatro was on 26 December; including the ballets (by other composers), it lasted six hours. Leopold Mozart had not been confident that the opera would be a success, but it was; indeed, it ran to 22 performances.

The Mozarts left Milan on 14 January 1771, stopping at Turin, Venice, Padua and Verona before returning to Salzburg on 28 March. The 15-month Italian journey had been an extraordinary success, widely reported in the international press: on 20 March 1770 the *Notizie del mondo* of Florence carried a notice of the 'magnificent academy' given at Count Firmian's, while the Hamburg *Staats- und gelehrte Zeitung* described Mozart's 'extraordinary and precocious musical talent' in a report sent from Rome on 22 May. The same newspaper's account of Wolfgang's Venice concert of 5 March 1771 (published on 27 March) neatly sums up the professional and personal accomplishments of the tour:

> Young Mozart, a famous keyboard player, 15 years old, excited the attention and admiration of all music lovers when he gave a public performance in Venice recently. An experienced musician gave him a fugue theme, which he worked out for more than an hour with such science, dexterity, harmony and proper attention to rhythm that even the greatest connoisseurs were astounded. He composed an entire opera for Milan, which was given at the last carnival. His good-natured modesty, which enhances still more his precocious knowledge, wins him the greatest praise, and this must give his worthy father, who is travelling with him, extraordinary pleasure.

Even before their return to Salzburg in March 1771, Leopold had laid plans for two further trips to Italy: when the Mozarts were in Verona, Wolfgang was commissioned to write a serenata or *festa teatrale*, *Ascanio in Alba*, for the wedding in Milan the following October of Archduke Ferdinand and Princess Maria Beatrice Ricciarda of Modena; that same month the Regio Ducal Teatro at Milan had issued him with a contract for the first carnival opera of 1773, *Lucio Silla* (an oratorio commissioned for Padua, *La Betulia liberata*, seems never to have been performed). Accordingly, Mozart spent barely five months at home in 1771, during which time he wrote the Paduan oratorio, the *Regina coeli* K108, the litany K109 and the Symphony K110. Father and son set out again on 13 August, arriving at Milan on 21 August: They received Giuseppe Parini's libretto for *Ascanio in Alba* on 29 August; the serenata went into rehearsal on 27 September and the première took place on 17 October. Hasse's Metastasian opera *Ruggiero*, also composed for the wedding festivities, received its first performance the day before; according to Leopold, *Ascanio* 'struck down Hasse's opera' (letter of 19 October 1771), a judgment confirmed by a report in the Florentine *Notizie del mondo* on 26 October: 'The opera has not met with success, and was not performed except for a single ballet. The serenata, however, has met with great applause, both for the text and for the music'. The Mozarts remained in Milan until 5 December; Wolfgang wrote the curiously titled 'Concerto ò sia Divertimento' K113 (later revised for Salzburg performance; see Blazin L1992) and the Symphony K112. He also may have sought employment at court, but his application was effectively rejected by Ferdinand's mother, Empress Maria Theresa, who in a letter (12 December 1771) advised the archduke against burdening himself with 'useless people' who go 'about the world like beggars'.

The third and last Italian journey began on 24 October 1772; probably Mozart had been sent the libretto and cast-list for the new Milan opera, *Lucio Silla*, during the summer, and had also set the recitatives. On his arrival at Milan, these were adjusted to accommodate changes made by the poet, Giovanni de Gamerra. He then wrote the choruses, and composed the arias for the singers in turn, having first heard each of them so that he could suit the music to their voices. The première, on 26 December, was a mixed success, chiefly because of a patchy cast; nevertheless, the opera ran for 26 performances. In January Mozart wrote the solo motet *Exsultate, jubilate* for the primo uomo in the opera, Venanzio Rauzzini (in Salzburg, about 1780 he revised the motet, probably for the soprano Francesco Ceccarelli to sing at the Dreifaltigkeitskirche; see Münster, I1993).

Leopold and Wolfgang arrived back in Salzburg on 13 March 1773. Mozart's days as a child prodigy were over; although he later travelled to Vienna, Munich and, more importantly, Mannheim and Paris, the 1770s can fairly be described as dominated by his tenure at Salzburg. For the most part, his career as both performer and composer was focussed on his court activities and a small circle of friends and patrons in his native town.

3. Salzburg, 1773–80. Archbishop Schrattenbach, who died on 16 December 1771, the day after Wolfgang's return from the second Italian tour, was succeeded in March 1772 by Hieronymus Colloredo. An unpopular choice whose election was bitterly contested, Colloredo sought to modernize the archdiocese on the Viennese model, but his reform, while generally favouring cultural life in the city by attracting numerous prominent writers and scientists, met with local resistance. The court music in particular suffered, and many traditional opportunities for music-making were eliminated: the university theatre, where school dramas (the nearest Salzburg equivalent to opera) had been performed regularly since the 17th century, was closed in 1778; the Mass was generally shortened; restrictions were placed on the performance of purely instrumental music as well as some instrumentally accompanied sacred vocal music at the cathedral and other churches; and numerous local traditions, including the firing of cannons and the carrying of pictures and statues during church processions as well as the famous pilgrimage to Pinzgau, were abolished. Concerts at court were curtailed; in a letter of 17 September 1778 Leopold Mozart complained:

> Yesterday I was for the first time [this season] the director of the great concert at court. At present the music ends at around 8.15. Yesterday it began around 7.00 and, as I left, 8.15 struck – thus an hour and a quarter. Generally only four pieces are done: a symphony, an aria, a symphony or concerto, then an aria, and with this, Addio!

Certainly these changes profoundly influenced traditional composition and performance in Salzburg. Yet they also encouraged other kinds of musical activity. In 1775 Colloredo ordered that the Ballhaus in the Hannibalgarten be rebuilt, at the city's expense, as a theatre for both spoken drama and opera. The first troupe to play there, directed by Carl Wahr, included in its repertory the comedy *Der Zerstreute* (after J.F. Regnard), with incidental music by Joseph Haydn (Symphony no.60, 'Il distratto'), while Gebler's tragedy *Thamos, König in Ägypten* may have been performed with incidental music by Mozart. Schikaneder's troupe visited in 1780; Mozart composed the aria KAnh.11*a* (of which only a fragment survives) for his production of *Die zwei schlaftlosen Nächte* (Edge, K1996). Private orchestras were also established, the first of them by Colloredo's nephew, Count Johann Rudolf Czernin. Nevertheless, Colloredo's reforms served ultimately to impoverish Salzburg's musical life, and his policy of promoting Italians at the expense of local German talent – Domenico Fischietti was appointed Kapellmeister in 1772, and Giacomo Rust in 1777 – was a frequent cause for complaint. This may have been a sticking-point for Leopold Mozart in particular, who as deputy Kapellmeister since 1763 had reasonable expectations for promotion; as early as 1763 he had lamented the power and influence of Italian musicians in Germany, attributing his failure to secure an audience with Duke Carl Eugen of Württemberg to the intrigues of his Ober-Kapellmeister, Jommelli. In Paris in 1764 he wrote to Hagenauer: 'If I had *one single wish* that I could see fulfilled in the course of time, it would be to see Salzburg become a court which made a tremendous sensation in Germany with its own local people'.

Mozart composed prolifically during the early years of Colloredo's rule: between 1772 and 1774 he wrote the masses K167, 192 and 194, the litanies K125 and 195, the *Regina coeli* K127, more than a dozen symphonies (from K124 to K202), the Keyboard Concerto K175 (possibly for organ) and the Concertone for two solo violins K190, the serenade K203, the divertimentos K131, 166 and 205 and the Quintet K174 (presumably modelled on similar works by Michael Haydn; see Seiffert, in Eisen and Seiffert, N1994). Financially the family prospered: in late 1773 they moved from their apartment in the Getreidegasse, where they had lodged with the Hagenauers, to a larger one, the so-called Tanzmeisterhaus, in the Hannibalplatz (now the Makartplatz). No doubt this move reflected Leopold's consciousness of their status in Salzburg society: the family was socially active, taking part in shooting parties and in constant music-making and often receiving visitors. Nevertheless, encouraged by rumours of a possible opening at the imperial court, Leopold took Wolfgang to Vienna in July 1773. Nothing came of this, but the sojourn, which lasted four months, was a productive one for Mozart: he composed a serenade (K185, possibly intended as a Salzburg Finalmusik) and six string quartets (K168–73). The more intense style of the quartets (two of which, K168 and 173, include fugal finales) has traditionally been attributed to Mozart's presumed contact with Joseph Haydn's latest quartets, in particular opp.9, 17 and 20, although it is more likely that they reflect common elements of the Viennese quartet at the time (Brown, H1992).

Mozart returned from Vienna in late September, and with the exception of three months spent in Munich between December 1774 and March 175 for the composition and première of *La finta giardiniera*, the libretto of which is generally thought to have been prepared by Coltellini after Goldoni, he remained in his native city until September 1777. In the absence of any sustained family correspondence, his activities can only be surmised; no doubt they included performing at court and in the cathedral, frequent musical gatherings at home, considerable social activity and composition. Among the few documented events of these years are the composition of *Il re pastore* for the visit to Salzburg of Archduke Maximilian Franz on 23 April 1774 and Mozart's participation in celebrations marking the 100th anniversary of the pilgrimage church at Maria Plain in 1774.

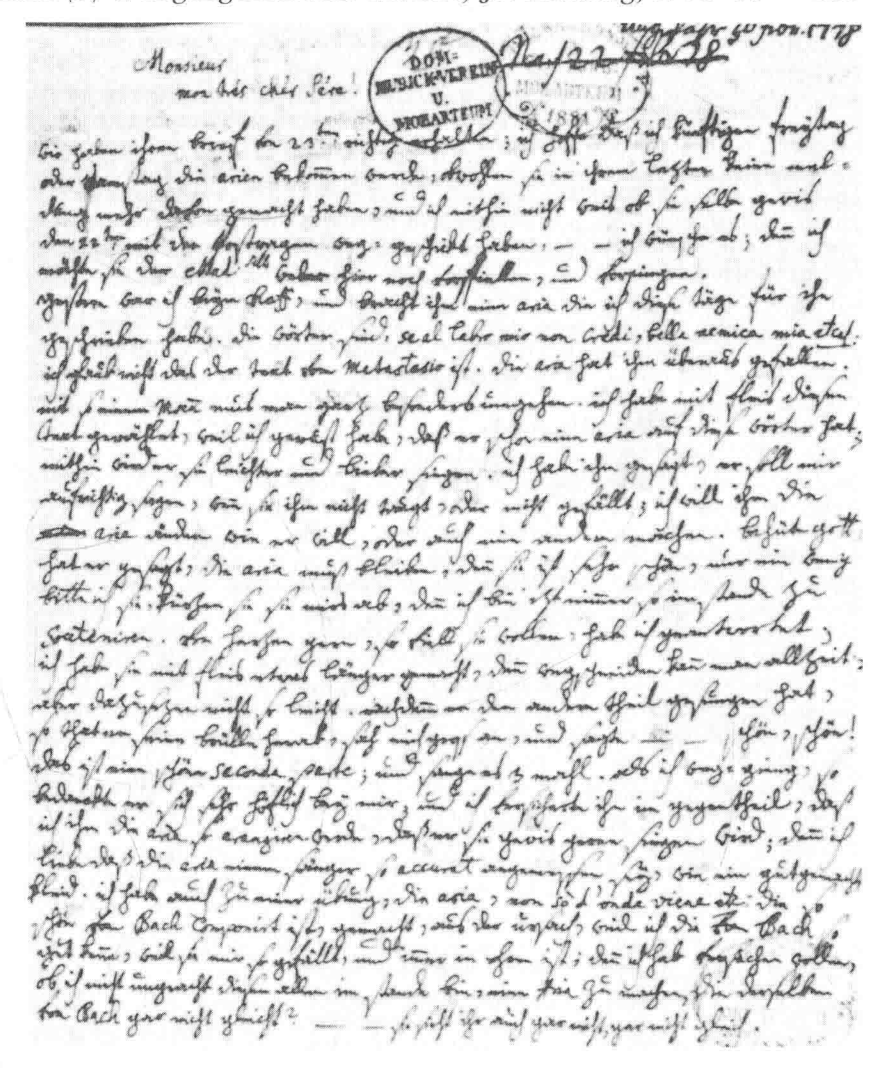
It was about this time that Mozart began to withdraw from the Salzburg court music although the root cause of his dissatisfaction remains unclear. The family letters document Leopold's frustrating inability to find suitable positions for both of them; they frequently complain of longstanding troubles with Colloredo, who is described as rude and insensitive. There was also the irritation of being outdone in the court music by Italians, who were better paid than local musicians. Yet there is no compelling evidence of Colloredo's mistreatment of the Mozarts early in his rule. Wolfgang's serenata *Il sogno di Scipione*, originally composed for the 50th anniversary of Schrattenbach's ordination, was reworked early in 1772 and performed as part of the festivities surrounding Colloredo's enthronement; on 21 August 1772 he was formally taken into the paid employment of the court, as Konzertmeister (a post he had held in an honorary capacity for nearly three years) with an annual salary of 150 gulden, while Leopold continued to run the court music on a periodic basis and was entrusted with securing musicians, music and instruments; and the Mozarts travelled to Italy, Vienna and Munich. Their discontent with Salzburg – and Colloredo's eventual rejection of them – must

therefore have had grounds beyond the conditions of their employment, Colloredo's difficult personality, his attempts to reform music-making in Salzburg or his general belt-tightening.

No doubt Colloredo was displeased by Leopold's excessive pride and his superior manner (in November 1766 Leopold had written, 'after great honours, insolence is absolutely not to be stomached') and in particular by his continuing attempts to leave the court. Both in Italy (1770–71) and in Vienna (1773) Leopold had attempted to find jobs that would permit the family to leave Salzburg, and not for the first time. As early as 30 October 1762, when he was in Vienna, he wrote a thinly veiled threat to Hagenauer: 'If only I knew what the future will finally bring. For one thing is certain: I am now in circumstances which allow me to earn my living in Vienna'; and in London he was offered a post that, after much consideration, he rejected. Leopold frequently wrote of his plans in his letters home, often in cypher, to prevent them from being read and understood by the Salzburg censors. But it is likely that they were well known to Colloredo, who had good connections both in Vienna and in Italy. Maria Theresa's description of the family as like 'beggars' may have represented a common view among some of the European nobility.

Mozart's rejection of court musical life was transparent. He continued to compose church music, the primary duty of all Salzburg composers, but with little enthusiasm: his output between 1775 and 1777, including the masses K220, 257–9, 262 and 275, the litany K243 and the offertory K277, was meagre compared with Michael Haydn's. Instead, Mozart established himself as the chief composer in Salzburg of instrumental and secular vocal music. Four violin concertos (K211, 216, 218 and 219; K207 was composed earlier, in 1773) and four keyboard concertos (K238, K242 for three keyboards, K246 for two and K271, presumably for the otherwise unknown French pianist Mlle Jeunehomme), the serenades K204 and 250, the 'Serenata notturna' K239 and numerous divertimentos (including K188, 240, 247 and 252) all date from this time; he also composed several arias, including *Si mostra la sorte* K209, *Con ossequio, con rispetto* K210, *Voi avete un cor fedele* K217 and *Ombra felice . . . Io ti lascio* K255. It is likely that Mozart's cultivation of instrumental music, which in many cases he wrote for private patrons rather than the court, was encouraged by Leopold, who during his heyday had been the most prominent and successful local composer of symphonies and serenades. Yet this may also have been a miscalculation. Leopold apparently failed to recognize that the conditions of musical life in the archdiocese, to say nothing of musical taste, had changed since the 1750s.

Matters came to a head in the summer of 1777. In August Mozart wrote a petition asking the archbishop for his release from employment, and Colloredo responded by dismissing both father and son. Leopold, however, felt he could not afford to leave Salzburg, and so Mozart set out with his mother on 23 September. The purpose of the journey was clear: Mozart was to secure well-paid employment (preferably at Mannheim, which Leopold had described in a letter of 13 November 1777 as 'that famous court, whose rays, like those of the sun, illuminate the whole of Germany') so that the family could move. Mozart first called at Munich, where he offered his services to the elector but met with a polite refusal. In Augsburg he gave a concert including several of his recent works and became acquainted with the keyboard instrument maker J.A. Stein; in a letter of 17 October he described Stein's pianos as damping



> ever so much better than [Späth's] instruments. When I strike hard, I can keep my finger on the note or raise it, but the sound ceases the moment I have produced it. In whatever way I touch the keys, the tone is always even. It never jars, it is never stronger or weaker or entirely absent; in a word, it is always even.

He also embarked on a relationship with his cousin, Maria Anna Thekla (the 'Bäsle'), with whom he later engaged in a scatological correspondence. Although obscene humour was typical of Salzburg (Mozart's parents sometimes wrote to each other in a similar vein), Solomon (F1995) has argued that the relationship between Wolfgang and the Bäsle may have been sexual; Schroder (F1999) offers a more contextualized reading of the letters.

From Augsburg Mozart and his mother went on to Mannheim, where they remained until the middle of March. Wolfgang became friendly with the Konzertmeister, Christian Cannabich, the Kapellmeister, Ignaz Holzbauer, and the flautist J.B. Wendling; he recommended himself to the elector but with no success. His Mannheim compositions included the keyboard sonatas K309 and 311, the Flute Quartet K285, five accompanied sonatas (K296, K301–3, K305, possibly inspired by the sonatas of Joseph Schuster) and two arias, *Alcandro lo confesso . . . Non sò d'onde viene* K294 and *Se al labbro mio non credi . . . Il cor dolente* K295; he was also asked by Ferdinand Dejean, an employee of the Dutch East India Company who had worked in eastern Asia for many years as a physician, to compose three flute concertos and two flute quartets, but in the event failed to fulfil the commission and may have written only a single quartet. The aria K294 was composed for Aloysia Lange, the daughter of the Mannheim copyist Fridolin Weber. Mozart, who was in love with Aloysia, put to Leopold the idea of taking her to Italy to become a prima donna, but this proposal infuriated his father, who accused him of dilatoriness, irresponsibility over money and family disloyalty.

In a letter of 11–12 February 1778, Leopold ordered his son to Paris; at this time it was also decided that his mother should continue to accompany him, rather than return to Salzburg, a decision that was to have far-reaching consequences for both father and son. Wolfgang arrived in Paris on 23 March and immediately re-established his acquaintance with Grimm. He composed additional music, mainly choruses (KA1), for a performance of a *Miserere* by Holzbauer and, according to his letters home – which are less than entirely truthful – a sinfonia concertante KAnh.9/297*B*, for flute, oboe, bassoon and horn. Like the *Miserere* choruses, the sinfonia concertante, allegedly suppressed by Joseph Legros, is lost (the convoluted history of this work, and the possibility that part of it survives in KAnh.9/C14.01, is described in Levin, M1988). A symphony (K297) was performed at the Concert Spirituel on 18 June and repeated several times (as described in his letters, Mozart composed two slow movements, of which the one in 6/8 is probably the original), while a group of ballet pieces, *Les petits riens*, composed for Noverre, was given with Piccinni's opera *Le finte gemelle*.

Mozart was unhappy in Paris: he claimed to have been offered, but to have declined, the post of organist at

Monsieur
mon très cher Père!

4. Autograph letter from Mozart to his father (dated '30' February 1778) written from Mannheim; it refers to the aria 'Se al labbro' K295 that he composed for Anton Raaff (Mozart Museum, Salzburg)

Versailles, and his letters make it clear that he despised French music and suspected malicious intrigue. He was not paid for a flute and harp concerto (K299) that he had composed in April for the Court of Guines, and his mother fell ill about mid-June. Although Grimm's doctor was called in to treat her, nothing could be done and she died on 3 July. Mozart wrote to his father to say that she was critically ill, and by the same post to Abbé Bullinger, a close friend in Salzburg, telling him what had happened; Leopold was thus prepared when Bullinger broke the news to him.

These events triggered another round of incriminating letters: Leopold accused Mozart of indolence, lying and improper attention to his mother; for his part Mozart defended himself as best he could. Although this correspondence is frequently taken to represent the first – and most compelling – evidence of an irreparable fissure in the relationship between Wolfgang and his father, it reflects more on their attempts to come to grips with an overwhelming family tragedy. Leopold's implicit suggestion that Mozart was partly responsible for his mother's death cannot be taken seriously. Stuck in Salzburg, grieving for his wife and worrying about his son, Leopold must have felt himself a helpless bystander; his only recourse was by letter, after the event. Not surprisingly, he sometimes wrote insensitively and hurtfully. His uncompromising devotion to Mozart, however, was never in question. It is significant – given his belief in the fragility of existence (see especially Halliwell, F1998) – that in his first letter to Wolfgang after learning of Maria Anna's death, he does not lay blame but is concerned chiefly with his son's well-being.

Mozart stayed with Grimm for the remainder of the summer. He had another symphony given at the Concert Spirituel, on 8 September (his claim in a letter of 11 September that it was a new work appears to be untrue), and renewed his acquaintance with J.C. Bach, who had come over from London to hear the Paris singers before composing the opera *Amadis de Gaule*. Mozart also wrote a scena, now lost, for the castrato Tenducci. But his friendship with Grimm, to whom he owned money, deteriorated, and on 31 August Leopold wrote to inform him that, following the death of Adlgasser, a post was open to him in Salzburg, as court organist with accompanying duties rather than as violinist; the archbishop had offered an increase in salary and generous leave. Mozart set out for home on 26 September. Grimm put him on the slow coach through Nancy, and Strasbourg to Mannheim, where he heard Benda's melodrama *Medea* and resolved to write one himself (the work, *Semiramis*,

if started, was never performed and is now lost; Mozart later wrote a melodrama for the incomplete Singspiel *Zaide*). Leopold, however, was infuriated that Mozart had gone to Mannheim, where, since the removal of Carl Theodor's court to Munich, there were no opportunities for advancement. Mozart reached Munich on 25 December and remained there until 11 January; he was coolly received by Aloysia Weber, now singing in the court opera. Finally, in the third week of January 1779, he arrived back in Salzburg.

Immediately on his return Mozart formally petitioned the archbishop for his new appointment as court organist. His duties included playing in the cathedral, at court and in the chapel, and instructing the choirboys. Reinstated under favourable conditions, he seems at first to have carried out his duties with determination: in 1779–80 he composed the 'Coronation' Mass K317, the *Missa solemnis* K337, the vespers settings K321 and 339 and the *Regina coeli* K276. Nevertheless, Colloredo was not satisfied: in an ambiguously worded document appointing Michael Haydn court and cathedral organist in 1782 he wrote: 'we accordingly appoint [J.M. Haydn] as our court and cathedral organist, in the same fashion as young Mozart was obligated, with the additional stipulation that he show more diligence . . . and compose more often for our cathedral and chamber music'. The cause of Colloredo's dissatisfaction may have lain in Mozart's other works of the time: the Concerto for two pianos K365, the Sonata for piano and violin K378, the symphonies K318, 319 and 338, the 'Posthorn' Serenade K320 (fig.5), the Divertimento, K334 the Sinfonia concertante for violin and viola K364, incidental music for *Thamos, König in Ägypten* and *Zaide*. Few of these works would have been heard at court, where instrumental music was little favoured; the production of theatrical music was the domain of the civil authorities.

Mozart's contract with Colloredo did not specify his compositional obligations as a composer: it stated only that 'he shall as far as possible serve the court and the church with new compositions made by him'. As Colloredo's criticism makes clear, however, he expected Mozart to take a more active role in the court music. During his final years in Salzburg, then, Mozart reverted to the pattern of 1774–7: he put in appearances at court as both performer and composer, but half-heartedly; his music-making was intended instead chiefly for a small circle of friends and the local nobility.

4. THE BREAK WITH SALZBURG AND THE EARLY VIENNESE YEARS, 1780–83. In the summer of 1780, Mozart received a commission to compose a serious opera for Munich, and the Salzburg cleric Giovanni Battista Varesco was engaged to prepare a libretto based on Danchet's *Idomenée*. The plot concerns King Idomeneus of Crete, who promises Neptune that if spared from a shipwreck he will sacrifice the first person he sees and is met on landing by his son Idamantes. Mozart began to set the text in Salzburg; he already knew several of the singers, from Mannheim, and could draft some of the arias in advance.

Mozart arrived in Munich on 6 November 1780. Both the performing score of the opera (not taken into consideration by the Neue Mozart-Ausgabe; see Münster, J1982) and Mozart's letters to his father, who was in close touch with Varesco, offer insights into the genesis of the work and its modification during rehearsal. The matters that chiefly occupied Mozart were, first, the need to prune an overlong text; secondly, the need to make the action more natural; and third, the need to accommodate the strengths and weaknesses of the singers. Several cuts were made in December, during rehearsals, and Mozart continued to trim the score even after the libretto was sent to the printer at the beginning of January; a second libretto was printed to show the final text (although in the event still more adjustments were made, as the performing score makes clear). Much of the *secco* and accompanied recitative was cut, as well as sections of the ceremonial choral scenes and probably three arias in the last act. In a letter of 15 November to his father, Mozart described his concerns for both dramatic credibility and the singers' capabilities:

> [Raaff] was with me yesterday. I ran through his first aria for him and he was very well pleased with it. Well – the man is old and can no longer show off in such an aria as that in Act 2 – 'Fuor del mar ho un mar nel seno'. So, as he has no aria in Act 3 and as his aria in Act 1, owing to the expression of the words, cannot be as cantabile as he would like, he wishes to have a pretty one to sing (instead of the quartet) after his last speech, 'O Creta fortunata! O me felice!' Thus too a useless piece will be got rid of – and Act 3 will be far more effective. In the last scene of Act 2 Idomeneo has an aria or rather a sort of cavatina between the choruses. Here it will be *better* to have a mere recitative, well supported by the instruments. For in this scene which will be the finest in the whole opera . . . there will be so much noise and confusion on the stage that an aria at this particular point would cut a poor figure – and moreover there is the thunderstorm, which is not likely to subside during Herr Raaff's aria, is it?

The opera was first given on 29 January 1781, with considerable success. Both Leopold and Nannerl, who had travelled from Salzburg, were in attendance, and the family remained in Munich until mid-March. During this time Mozart composed the recitative and aria *Misera! dove son . . . Ah! non son' io che parlo* K369, the Oboe Quartet K370 and possibly three piano sonatas (K330–32 although these many equally date from his first month in Vienna).

On 12 March Mozart was summoned to Vienna, where Archbishop Colloredo and his retinue were temporarily in residence for the celebrations of the accession of Emperor Joseph II; he arrived on 16 March, lodging with the archbishop's entourage. Fresh from his triumphs in Munich, Mozart was offended at being treated like a servant, and the letters that he wrote home over the next three months reflect not only increasing irritation and resentment – on 8 April the archbishop refused to allow him to perform for the emperor at Countess Thun's and thereby earn the equivalent of half his annual Salzburg salary – but also a growing enthusiasm for the possibility of earning his living, at least temporarily, as a freelance in Vienna. Matters came to a head on 9 May: at a stormy interview with Colloredo, Mozart asked for his discharge. At first he was refused, but at a meeting with the chief steward, Count Arco, on 8 June, he was finally and decisively released from Salzburg service, 'with a kick on my arse . . . by order of our worthy Prince Archbishop' (letter of 9 June 1781).

About this time Mozart moved to the house of the Webers, his former Mannheim friends, who had moved to Vienna after Aloysia's marriage to the court actor Joseph Lange, although in order to scotch rumours linking him with the third daughter, Constanze, he moved again in late August to a room in the Graben. He made a modest living at first, teaching three or four pupils, among them Josepha von Auernhammer (for whom he wrote the

5. First page of the autograph MS of Mozart's 'Posthorn' Serenade K320, composed 1779 (*D-Bsb*)

Sonata for two pianos K448) and Marie Karoline, Countess Thiennes de Rumbeke, cousin of Count Johann Phillipp von Cobenzl, the court vice-chancellor and chancellor of state (whom Mozart had met in Brussels in autumn 1763). He also participated in, or had works performed at, various concerts: the Tonkünstler-Societät gave one of his symphonies on 3 April (Mozart later applied for membership in the society, which provided pensions and benefits for the widows and orphans of Viennese musicians, but he failed to provide a birth certificate and his application was never approved); and on 23 November he played at a concert sponsored by Johann Michael von Auernhammer. Later Mozart participated in a series of Augarten concerts promoted by Philipp Jakob Martin. At the first of these, on 26 May 1782, he played a two-piano concerto with Josepha von Auernhammer (the programme also included a symphony by him). Mozart's own first public concert took place on 3 March 1782, possibly at the Burgtheater. The programme included the concertos K175 (with the newly composed finale K382) and K415, numbers from *Lucio Silla* and *Idomeneo*, and a free fantasy; on 23 March Mozart wrote to his father that the new concerto finale was 'making . . . a furore in Vienna'. During this period he also played regularly at the home of Baron Gottfried van Swieten, where Handel and Bach were staples of the repertory.

By the end of 1781, Mozart had established himself as the finest keyboard player in Vienna; although he was not without competitors, few could match his pianistic feats. The most serious challenge, perhaps, came from Clementi, with whom Mozart played in an informal contest at Emperor Joseph II's instigation on 24 December. Clearly Mozart was perturbed by the event: although he was judged to have won, and Clementi later spoke generously of his playing, Mozart in his letters repeatedly disparaged the Italian pianist. It is likely that Clementi's skill took Mozart by surprise; the emperor must have been impressed as well, for he continued to speak of the contest for more than a year. That same month saw the appearance of Mozart's first Viennese publication, a set of six keyboard and violin sonatas (K296 and 376–80, of which two, K296 and 378 had been composed earlier). They were well received; a review in C.F. Cramer's *Magazin der Musik* (4 April 1783) described them as 'unique of their kind. Rich in new ideas and traces of their author's great musical genius'.

The most important composition of this period, however, was *Die Entführung aus dem Serail*, the libretto of which was given to Mozart at the end of July 1781. Originally planned for September, the première was postponed until the following summer (Mozart had completed the first act in August 1781). The opera was a great success: Gluck requested an extra performance, Schikaneder's troupe mounted an independent production in September 1784 (although the aria 'Martern aller Arten' was replaced because the orchestra was incapable of performing the obbligato solos), and productions were soon mounted in cities throughout German-speaking Europe. The earliest lengthy obituary of Mozart, in the

Musikalische Korrespondenz der Teutschen Filarmonischen Gesellschaft of 4 January 1792, described the work as 'the pedestal upon which his fame was erected'.

In his letters to Leopold, Mozart described in detail several of his decisions in composing the opera. He wrote on 26 September 1781:

in the original libretto Osmin has only [one] short song and nothing else to sing, except in the trio and the finale; so he has been given an aria in Act 1, and he is to have another in Act 2. I have explained to Stephanie the words I require for the aria ['Solche hergelaufne Laffen'] – indeed, I had finished composing most of the music for it before Stephanie knew anything whatever about it. I am enclosing only the beginning and the end, which is bound to have a good effect. Osmin's rage is rendered comical by the use of the Turkish music. In working out the aria I have . . . allowed Fischer's beautiful deep notes to glow. The passage 'Drum beim Barte des Propheten' is indeed in the same tempo, but with quick notes; and as Osmin's rage gradually increases, there comes (just when the aria seems to be at an end) the Allegro assai, which is in a totally different metre and in a different key; this is bound to be very effective. For just as a man in such a towering rage oversteps all the bounds of order, moderation and propriety and completely forgets himself, so must the music too forget itself. But since passions, whether violent or not, must never be expressed to the point of exciting disgust, and as music, even in the most terrible situation, must never offend the ear, but must please the listener, or in other words must never cease to be *music*, so I have not chosen a key foreign to F (in which the aria is written) but one related to it – not the nearest, D minor, but the more remote A minor. Let me now turn to Belmonte's aria in A major, 'O wie ängstlich, o wie feurig'. Would you like to know how I have expressed it – and even indicated his throbbing heart? By the two violins playing in octaves. This is the favourite aria of all who have heard it, and it is mine also. I wrote it expressly to suit Adamberger's voice. You see the trembling, the faltering, you see how his throbbing breast begins to swell; this I have expressed by a crescendo. You hear the whispering and the sighing – which I have indicated by the first violins with mutes and a flute playing in unison.

Mozart had already described his concern for naturalness, in both composition and performance, in a letter written in Paris on 12 June 1778:

Meis[s]ner, as you know, has the bad habit of making his voice tremble at times, turning a note that should be sustained into distinct crotchets, or even quavers – and this I never could endure in him. And really it is a detestable habit and one that is quite contrary to nature. The human voice trembles naturally – but in its own way – and only to such a degree that the effect is beautiful. Such is the nature of the voice; and people imitate it not only on wind instruments, but on string instruments too and even on the keyboard. But the moment the proper limit is overstepped, it is no longer beautiful – because it is contrary to nature.

Shortly after the première of *Die Entführung*, on 16 July, Mozart decided to go forward with his marriage to Constanze Weber, which he had first mooted to his father the previous December. Events gave him little choice: probably through his future mother-in-law's scheming, he was placed in a position where because of his alleged intimacy with Constanze he was required to agree to marry her or to compensate her. Mozart wrote to his father on 31 July 1782, asking for his approval, on 2 August the couple took communion together, on 3 August the contract was signed, and on 4 August they were married at the Stephansdom. Leopold's grudging consent did not arrive until the next day. The marriage appears to have been a happy one. Although Mozart described Constanze as lacking wit, he also credited her with 'plenty of common sense and the kindest heart in the world', and his letters to her, especially those written when he was on tour in 1789 and when she was taking the cure at Baden in 1791, are full of affection. There is little reason to imagine that she was solely, or even primarily, to blame for their chronic financial troubles, which surfaced only weeks after their marriage; the truth probably lies somewhere nearer Nannerl's statement, in 1792, that Mozart was incapable of managing his own financial affairs and that Constanze was unable to help him.

Mozart's departure from Salzburg, and his wedding to Constanze, triggered another acrimonious exchange with Leopold (whose letters from this period are lost, but their contents can be inferred from Mozart's). Leopold accused Wolfgang of concealing his affair with Constanze and, worse, of being a dupe, while Wolfgang, for his part, became increasingly anxious to defend his honour against reproaches of improper behaviour and his alleged failure to attend to his religious observations; he chastised his father for withholding consent to his marriage and for his lukewarm reaction to the success of *Die Entführung*. Mozart had reason to be upset: not only had Leopold repeatedly pressed him to return home, but in his dealings with Colloredo Mozart had been told by Count Arco that he could not leave his post without his father's permission. Despite his numerous successes in Vienna, he felt thwarted in his attempt to achieve a well-earned independence.

Presumably in order to heal the rift with his family, Mozart determined to take Constanze to Salzburg to meet his father and sister, although to Leopold's irritation the visit was several times postponed. The success of *Die Entführung* had catapulted Mozart to prominence: the opera was performed at the Burgtheater on 8 October, in the presence of the visiting Russian Grand Duke Paul Petrovich (Mozart directed from the keyboard, as he explained in a letter of 19 October 1782, 'partly to rouse the orchestra, who had gone to sleep a little, partly . . . in order to appear before the royal guests as the father of my child'); and between November and March 1783 he played at concerts sponsored by Auernhammer (at the Kärntnertortheater), the Russian Prince Dmitry Golitsïn, Countess Maria Thun, Philipp Jakob Martin (at the casino 'Zur Mehlgrube'), his sister-in-law Aloysia Lange (at the Burgtheater; according to Mozart's letter of 12 March, Gluck, who attended, 'could not praise the symphony and aria too much'), Count Esterházy and the singer Therese Teyber. On 23 March Mozart gave his own academy at the Burgtheater, in the presence of the emperor. The programme may have included the Haffner Symphony K385 (composed in July 1782 to celebrate the ennoblement in Salzburg of Siegmund Haffner) and improvised variations on an aria from Gluck's *La rencontre imprévue*.

Mozart composed several new works for these occasions, including the piano concertos K413–15, later published by Artaria (although Mozart may not have conceived them as a set, the autographs show that some time in the spring of 1783 he thoroughly revised all three together), and three arias, K418–20, intended for a production of Pasquale Anfossi's *Il curioso indiscreto* at the Burgtheater on 30 June 1783. He also began work on the so-called 'Haydn' quartets. The first, K387, was completed in December 1782; the second, K421, was finished in June 1783, while Constanze was giving birth to their first child, Raimund Leopold, born on 17 June. (Mozart and Constanze had six children, four of whom died in infancy: Raimund Leopold (1783), (5) Karl Thomas, Johann Thomas Leopold (1786), Theresia (1787–8), Anna Maria (1789) and (6) Franz Xaver Wolfgang.)

Mozart and Constanze eventually set out in July (Raimund Leopold, who was left behind, died on 9 August); they remained in Salzburg for about three months. Later correspondence suggests that the visit was not entirely happy – Mozart was anxious about the success of the visit and about his father's reaction to Constanze – but details are lacking. While there, he probably composed his two violin-viola duos for Michael Haydn, who was behindhand with a commission from the archbishop, and parts of the Mass in C minor (K427, never completed) had their first hearing, possibly with Constanze singing, at St Peter's on 26 October. On the return journey to Vienna, Mozart paused at Linz, where he composed a symphony (K425) for a concert; the Piano Sonata K333 may also date from this time.

5. VIENNA, 1784–8. With his return to Vienna in late November 1783, Mozart entered on what were to be the busiest and most successful years of his life. On 22 December he performed a concerto in a concert mounted by the Tonkünstler-Societät, and on 25 January 1784 he conducted a performance of *Die Entführung* for the benefit of Aloysia Lange. He gave three subscription concerts in the private hall of the Trattnerhof in March, and a grand musical academy at the Burgtheater on 1 April; the programme included a 'quite new' symphony, possibly the Linz (K425), a new concerto (K450 or 451), the Quintet for piano and wind (K452) and an improvisation. The 1785 season was similar: there where six subscription concerts at the Mehlgrube beginning on 11 February (including the first performance of the D minor Concerto K466) and another grand academy at the Burgtheater on 10 March. It was chiefly for these concerts that, between February 1784 and December 1786, Mozart composed a dozen piano concertos (from K449 to K503), unquestionably the most important works of their kind. Perhaps in recognition of his risen star, in February 1784 Mozart started keeping a list of his new works, the *Verzeichnüss aller meiner Werke*, recording the incipit and the date of each (fig.6). The catalogue is a primary source of information concerning Mozart's compositional activities during the 1780s, documenting among other things several lost compositions, including the aria *Ohne Zwang, aus eignem Triebe* K569, the contredanses K565 and an Andante for a violin concerto K470.

In addition to his public performances, Mozart was also in demand for private concerts: in March 1784 alone he played 13 times, mostly at the houses of Count Johann Esterházy and the Russian ambassador, Prince Golitsïn. By the same token, visiting and local virtuosos and concert organizations frequently gave newly commissioned works by him in their programmes: on 23 March the clarinettist Anton Stadler mounted a performance of the Wind Serenade K361, and on 29 April Mozart and the violinist Regina Strinasacchi played the Sonata K454. (Mozart is said to have performed from a blank or fragmentary copy; it is clear from the autograph that the violin part was written first and the piano one added later.) The Tonkünstler-Societät gave the cantata *Davidde penitente* (K469, arranged from the unfinished Mass in C minor K427) in March 1785; Mozart played a concerto for the same group in December. These works and performances brought Mozart considerable acclaim. A review of the December Tonkünstler-Societät concert noted 'the deserved fame of this master, as well known as he is universally valued' (*Wiener Zeitung*, 24 December). Earlier that year Leopold Mozart, who visited Wolfgang in Vienna in February and March 1785, wrote to Nannerl describing a quartet party at Mozart's home at which

Haydn told him, 'Before God and as an honest man I tell you that your son is the greatest composer known to me either in person or by name. He has taste and, what is more, the most profound knowledge of composition'.

His publications were numerous. Torricella brought out the three sonatas K333, K284 and K454; in July 1784 Lausch advertised manuscript copies of six piano concertos; and in February 1785 Traeg offered copies of three symphonies. The most significant publications, however, were possibly the three concertos K413–15, published by Artaria in March 1785, and the six quartets dedicated to Haydn, brought out by Artaria in September of that year. The success of these works seems to have brought about a fundamental shift in Mozart's attitude to composition and publishing. After mid-1786, several works were planned primarily with a view to publication rather than public performance; these include the piano quartets K478 and 493, the three piano trios K496, 542 and 548, the C major and G minor string quintets K515 and 516, the Hoffmeister Quartet K499 and the Sonata for piano and violin K526.

Although opera remained central to Mozart's ambitions throughout this period, there was no opportunity to build on the success of *Die Entführung*: by late 1782, Joseph II decided to close down the Nationaltheater (which he had founded in 1776 to promote German-language culture) and to re-establish Italian opera. Mozart was quick to capitalize on the change, although he had little luck in finding a suitable text; on 7 May 1783 he wrote to his father, 'I have looked through at least a hundred librettos and more, but I have scarcely found a single one with which I am satisfied'. He therefore asked Leopold to have Varesco, the Salzburg poet and librettist of *Idomeneo*, provide a text. This was *L'oca del Cairo*, which Mozart received from Salzburg in June 1783. He may have worked on it during his visit to Salzburg, but the project was apparently abandoned by the end of the year, by which time he had sketched out seven pieces, including a large sectional finale. In 1785, or possibly earlier, he began work on *Lo sposo deluso, ossia La rivalità di tre donne per un solo amante*, which he based on the libretto used by Cimarosa for his opera *Le donne rivali* of 1780 (see Zaslaw, in Sadie, B1996), but this too was left incomplete: of the five surviving numbers – an overture, a quartet, a trio and two arias – only the trio, 'Che accidenti, che tragedia', is completely orchestrated. A one-act comedy, *Der Schauspieldirektor* K486, was given early in 1786 in the Orangery at Schloss Schönbrunn, together with Salieri's *Prima la musica e poi le parole* (both were commissioned for a visit by the Governor-General of the Austrian Netherlands), and in March a private performance of a revised version of *Idomeneo* was given at Prince Auersperg's; among other changes, Mozart wrote the duet 'Spiegarti non poss'io' (K489) to replace 'S'io non moro a questi accenti' and the scena and rondò 'Non più, tutto ascoltai ... Non temer, amato bene' (K490) to replace the original beginning of Act 2.

The topic of Mozart's first documented collaboration with Lorenzo da Ponte, *Le nozze di Figaro* (fig.7) was no doubt carefully chosen: Beaumarchais' play, *La folle journée, ou Le mariage de Figáro*, had been printed in German translation in Vienna in 1785, although performances by Schikaneder's theatrical company had been banned; further, it was a sequel to Beaumarchais' *Le barbier de Séville, ou La précaution inutile*, of which Paisiello's operatic version, given at Vienna in May 1784, had been a great success. Work on *Figaro* was started by October or November 1785, and the opera came to the stage of the Burgtheater on 1 May 1786. The initial run was a success: many items were applauded and encored at the first three performances, prompting the emperor to restrict encores at later ones to the arias. Letters from Leopold to Nannerl Mozart make it clear that there was a good deal of intrigue against the work, allegedly by Salieri and Vincenzo Righini, while a pamphlet published in Vienna in 1786 (*Ueber des deutsche Singspiel des Apotheker des Hrn. v. Dittersdorf*; see Eisen, A1991) similarly claims that '[The foreign partisans] ... have completely lost their wager, for Mozart's *Nozze di Figaro* ... [has] put to shame the ridiculous pride of this

fashionable sect'. An equally biting comment appeared in the *Wiener Zeitung* for 11 July: 'Herr Mozart's music was generally admired by connoisseurs already at the first performance, if I except only those whose self-love and conceit will not allow them to find merit in anything not written by themselves'.

The allegedly seditious politics of the opera may be overstated: Da Ponte was careful to remove the more inflammatory elements of Beaumarchais' play, and the characters and events of the opera are well situated within the *commedia dell'arte* tradition. Nevertheless, social tensions remain, as in Figaro's 'Se vuol ballare', the Act 2 finale, and the Count's music early in Act 3. Individual arias also reflect the social standing of the various characters: this may be exemplified by a comparison of Bartolo's blustery, parodistic vengeance aria 'La vendetta' and the Count's 'Vedrò, mentr'io sospiro', with its overtones of power and menace, or between the breadth and smoothness of the Countess's phraseology as opposed to Susanna's. Ultimately, however, *Figaro* may be no more than a comic domestic drama, though not without reflecting contemporary concerns about gender and society (see Hunter, J1996).
